Appointment to the Graduate Faculty

All faculty members who serve on supervisory committees or direct master's theses and doctoral dissertations must first be appointed to the Graduate Faculty. University of Florida faculty members who are appointed to full-time faculty positions in tenured or tenure-accruing positions are appointed to the Graduate Faculty as a matter of course, shortly after the time of their appointment to the university faculty. For all others, a graduate degree program's academic unit nominates faculty members for appointment to the Graduate Faculty. Nominations must be approved by the Department Chair/ Director, the College Dean, and a vote of the current graduate faculty members in the nominating unit. The appointment is formally made by the Graduate Dean. The academic unit determines the level of duties for each Graduate Faculty member, though it is expected that all Graduate Faculty members should be available and willing to serve as external members of doctoral dissertation committees throughout the University of Florida.

Below, one can find the current list of Graduate Faculty Members. For information regarding the organization and governance of the UF Graduate School, please visit https://gradcatalog.ufl.edu/graduate/school/
