GRADUATE CATALOG

A Message from Our Dean

We welcome you to explore the many offerings of our graduate programs at the University of Florida. The reputation of a research university is, in large part, measured not only by the excellence of its graduate faculty and graduate students but, importantly, by the quality of its academic graduate programs. Through its chosen graduate faculty members, the University of Florida offers graduate programs of the highest quality.

Our catalog is intended to provide information and resources to those interested in graduate education programs at the University of Florida. Our catalog is for our current students as well to assist them to make the best decisions for maintaining and continuing their academic progress while on the way to their professional and personal goals.

Nicole L. P. Stedman, Ph.D.
Associate Provost and Dean of the Graduate School

Contact the Graduate school

For assistance, please reach out using the Graduate School's Contact Form (<https://grad.ufl.edu/contact-us/>). Updates to this catalog can also be submitted via the Graduate School's Contact Form (<https://grad.ufl.edu/contact-us/>) or via direct email to grad-catalog@ufl.edu.

Research and Academic Offerings

The University of Florida Graduate School (<https://grad.ufl.edu/>) offers research opportunities in a variety of fields. In collaboration with UF's Office of Research (<http://research.ufl.edu/>), our many colleges and departments (p. 12) offer numerous majors alongside the various Centers, Institutes, and Other Research Facilities (<https://research.ufl.edu/about/centers-and-institutes.html>) and interdisciplinary offerings available to the graduate students here at UF. Explore the many services provided to our graduate students by the Graduate School and other student-oriented service units by visiting the Student Services (<https://gradcatalog.ufl.edu/graduate/student-services/>) section of this catalog. Additionally, the University of Florida Libraries and the University Press of Florida offer extensive collections to guide your research. For information on these services and UF's state-of-the-art computer facilities, art galleries, performing arts centers, museums, and other student offerings, such as UF's Office of Research (<http://research.ufl.edu/>), see the Research Facilities and Other Campus Resources (<https://gradcatalog.ufl.edu/graduate/research-centers/>) section of the catalog.

Accreditation

The University of Florida is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate's, baccalaureate, master's, educational specialist, and doctoral degrees. The University of Florida also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of the University of Florida may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org) (<https://www.sacscoc.org/>).

Admission

How to Apply

To apply for admission, go online to the Office of Admissions Graduate Admissions website (<https://admissions.ufl.edu/apply/graduate/>) (<https://admissions.ufl.edu/apply/graduate/>) for basic information and contact the academic unit of interest for specific deadlines, requirements, and procedures. To find websites for academic units, go online to <https://grad.ufl.edu/apply/admission/>. The Office of Admissions refers applications that meet minimum standards to the graduate admission committees of the pertinent academic units for approval or disapproval. Applicants must meet the requirements of both the academic unit and the Graduate School to be admitted for graduate study. Admission to some programs is limited by what resources are available.

Requirements for Admission:

- A recognized baccalaureate, graduate or professional degree from a college, university, or higher education institution accredited by the Higher Learning Commission, the Middle States Commission on Higher Education, the New England Commission of Higher Education, the Northwest Commission on Colleges and Universities, the Southern Association of Colleges and Schools, the Western Association of Schools and Colleges, or a comparable degree from an international institution.
- For applicants with a bachelor's degree only, a minimum grade point average of B (3.0), calculated from all grades and credits after the semester where the applicant reached 60 semester hours or 90 quarter hours is required. Applicants should refer directly to their intended academic units for Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) requirements. If required, academic test scores are used in the context of a holistic credential review process.
- For all international applicants, a minimum score on one of these English Language Skills tests:
 - Test of English as a Foreign Language (TOEFL): 550 paper, or 80 Internet & Home Edition;
 - International English Language Testing System (IELTS): 6 (6.5 Effective: Spring 2026); or
 - Documented successful completion of the University of Florida English Language Institute program.
 - For graduate programs that require a GRE score, the verbal GRE must be a minimum of 140 in addition to TOEFL or IELTS.

** Students from countries where English is the only official language, who have attended non-US institutions where the language of instruction is English or have earned a degree within the United States may qualify for an exemption at the discretion of the academic department.*

- The admissions application must be submitted with a non-refundable \$30.00 application fee.
- Satisfactory conduct record.
- Proof of medical immunization. Visit the following website <http://shcc.ufl.edu/services/primary-care/immunizations> (<http://shcc.ufl.edu/services/primary-care/immunizations/>).
- A complete and up-to-date résumé or curriculum vitae (submitted via CollegeNET) that includes all post-high

school education and employment, plus information about ongoing international affiliations and research funding.

Some academic units require a reading knowledge of at least one foreign language. Exceptions to the above requirements are made only when these and other criteria, including letters of recommendation, are reviewed by the academic unit, recommended by the college, and approved by the Dean of the Graduate School.

Admission to the Graduate School requires a baccalaureate degree from a college, university, or higher education institution accredited by the Higher Learning Commission, the Middle States Commission on Higher Education, the New England Commission of Higher Education, the Northwest Commission on Colleges and Universities, the Southern Association of Colleges and Schools, or the Western Association of Schools and Colleges. Applicants must arrange to send official transcripts from each institution attended to the Office of Admissions. Applicants should reference their academic unit's website as some require that applicants submit an official copy of their transcript from each institution attended directly to their attention as well as the Office of Admissions. These transcripts must be received directly from the registrar of the institution where the work was done. Applicants who currently are enrolled at another institution must send updated transcripts as soon as they are available for any work completed after applying for admission.

Please note: If admitted without final official transcripts or test scores, final test scores or final credentials must be posted by the UF Office of Admissions before the end of the first term of enrollment.

Students failing to meet admission conditions are barred from continued registration after their first semester.

Admission requirements of an academic unit are often more rigorous than the minimum requirements set by the Graduate School. Because of resource limitations, most academic units do not accept all qualified applicants.

All applicants who meet requirements and standards will be considered equally for admission to any academic program, regardless of race, color, religion, gender, marital status, beliefs, age, national origin, sexual orientation or physical or mental disabilities.

Admissions Examinations

Graduate Record Examination (GRE): If stipulated as an admission requirement by the graduate academic program to which they seek acceptance, applicants must submit GRE scores that are acceptable to the program of interest. In addition to the General Test of the GRE, some academic units may encourage applicants to submit scores on one or more advanced subject tests. Applicants with a previous graduate or professional degree or equivalent from a regionally accredited U.S. institution may be exempt from the GRE and undergraduate GPA requirements. Contact the academic unit for specific admission testing requirements.

Graduate Management Admission Test (GMAT): Applicants to some of the M.B.A. programs must submit satisfactory scores on the GMAT for admission into the degree program. For further information on admission requirements to all M.B.A. offerings at UF, please visit <https://warrington.ufl.edu/mba/apply/>.

Graduate Study in Engineering: Some programs may use the Fundamentals of Engineering (FE) examination in lieu of the GRE for admitting students into the non-thesis master's degree programs.

Required Immunizations

The University of Florida requires that all new students show proof of certain immunizations prior to attending UF. The official form and instructions for how to complete it successfully are available at <https://healthcompliance.shcc.ufl.edu/immunization-requirement/immunizations/>. Once received, your completed form will be reviewed by UF Health Compliance Office staff. PLEASE NOTE: Students will not be cleared to register for classes until all immunization requirements are met.

About Health Compliance

Students must comply with the University's immunization and health insurance requirements. More information and submission instructions about both of these prerequisites can be found at <http://healthcompliance.shcc.ufl.edu/> (<https://healthcompliance.shcc.ufl.edu/>).

Immunizations: Vaccine-preventable diseases do still exist, and contracting these illnesses can have an adverse effect on a student's health, well-being, and ability to reach optimal academic performance. Students shall be required to show documentation of specific vaccinations or proof of immunity for Measles/Mumps/Rubella (MMR), Hepatitis B, and Meningitis. Please note that international students and those entering most academic health professions may have additional requirements including tuberculosis screening. Find the immunization form and instructions online at <https://healthcompliance.shcc.ufl.edu/immunization-requirement/>.

Should you need to obtain vaccinations, please contact the UF Student Health Care Center's Call Center regarding appointments and any applicable charges: (352) 392-1161.

Insurance: The University follows an Opt Out system where students who don't opt out by providing documentation of adequate health insurance will be automatically enrolled in the school-sponsored plan. They may either purchase outside health insurance that meets the requirements for comparable coverage or they can be auto-enrolled in the school-sponsored Student Health Insurance Plan.

If a student currently has insurance, they will be required to review their insurance coverage and check that it meets the requirements set forth as comparable coverage. They will then need to submit a waiver with their policy information for verification by the end of drop/add but ideally much earlier. The charge for the school-sponsored Student Health Insurance Plan will be removed once the submission is completed and verified. Once verified, the waiver is good for one year. All this can be done online at <https://healthcompliance.shcc.ufl.edu/health-insurance-requirement/waiver/>

Still, have questions? You can contact the health compliance office for further assistance: healthcompliance@shcc.ufl.edu or (352) 294-2925.

Computer Requirement

Access to and on-going use of a computer is required for all students to complete their degree programs successfully. The University of Florida expects each student to acquire computer hardware and software appropriate to their degree program. The university maintains general computing requirements which can be located at <http://www.it.ufl.edu/policies/student-computing-requirements/>. (<http://www.it.ufl.edu/>)

policies/student-computing-requirements/) However, individual colleges may have specific requirements to ensure students can complete their coursework. A list of each college's requirements, if any, are posted at <https://it.ufl.edu/it-policies/student-computing-requirements/college-specific-requirements/>

Competency in the basic use of a computer is a requirement for graduation. Class assignments may require the use of a computer, academic advising and registration can be done by computer, and official university correspondence is often sent via email.

While the university offers limited access to computers through its computer labs, most students will be expected to purchase or lease a computer that is capable of wireless and wired network connection to the Internet, graphical access to the World Wide Web, and productivity functions such as word processing and spreadsheet calculation. Costs of meeting this requirement will be included in financial aid considerations.

Conditional Admission

Academic units may, at their discretion, grant conditional admission to up to 10% of an incoming class. Conditional admission candidates must have all application materials submitted: a valid prior degree, admission exam scores, English test scores (if required), transcripts, statement of purpose and recommendation letters, along with records of postbaccalaureate grades or work histories of pertinent prior professional experience, if the academic unit is justifying conditional admission on the basis of either. Academic units granting conditional admission must include the terms of admission in the acceptance letter they send to the student.

Conditional admission cases due to graduate admission grade point averages below 3.0, missing or unofficial test scores, and English test scores (if required) below the required minimums (6 for IELTS (6.5 Effective: Spring 2026), 80 for Internet TOEFL must have final approval from the Graduate School. In such cases, no acceptance letter can be sent until the Graduate School gives final approval.

In cases of students conditionally admitted with missing official transcripts, final admission is deferred for two semesters, until required final credentials are posted by the UF Office of Admissions.

Registration holds to block next-term pre-registration will remain on the records of conditionally admitted students until their first-semester grades are posted on their UF transcripts and show that they met the terms of their conditional admission. Students failing to meet any admission conditions are subject to being barred from continued enrollment after their second semester.

Conditional admission based on unofficial language test scores will have holds placed to block first-term enrollment until official scores are posted by the UF Office of Admissions.

International Students

English Language Institute (ELI) Conditional Admission

International applicants, who require additional English language training in order to meet the Graduate School's English language minimum requirements, may be offered English Language Institute (ELI) Conditional Admission. Academic programs will assess an application for ELI Conditional Admission based on all of the materials in an applicant's file. If an applicant has a low or missing score on the IELTS or TOEFL test, or does not have a satisfactory score on the GRE Verbal section, but is

otherwise academically qualified, a program may grant ELI Conditional Admission.

Such an offer of admission does not guarantee an applicant can enroll in graduate coursework. All ELI Conditionally Admitted students must complete one of the following two options before they can enroll:

1. They must complete the ELI Intensive English Program and receive an exit certificate from it, or;
2. They must provide official IELTS or TOEFL scores that meet the required minimums.

An offer of ELI Conditional Admission may also contain additional conditions set by an applicant's prospective academic program. ELI will coordinate with an applicant's academic program, in order to assist in the student's entry into the Intensive English Program and obtain an appropriate visa.

Students with Disabilities

The Disability Resource Center (DRC) in the Division of Student Affairs celebrates disability identity as a valued aspect of diversity. We champion a universally accessible community that supports the holistic advancement of individuals with disabilities.

The DRC offers many student services to students with disabilities. These include setting up accommodation plans to help remove barriers in the learning environment, offering academic coaching, disability management counseling, assistive technology resources, and programs and outreach events that celebrate disability.

The DRC serves more than 3100 students each year. Our testing center proctors over 10,000 exams annually and students from various classifications and areas of study utilize DRC accommodations. We work with graduate students, professional school students such as medical, veterinary, law, nursing, and all other disciplines. We welcome graduate students to connect with our office!

The DRC staff is available for consultation with faculty, families, and students. Please contact the office at (352) 392-8565 or via email at accessUF@ufsa.ufl.edu to schedule an appointment or inquire about our services. If you are a graduate student who requires employment-related accommodations, please contact Ken Osfield in the University's ADA Compliance Office at (352) 392-1591 or kosfield@ehs.ufl.edu.

We look forward to connecting with you! Go Gators!

Postbaccalaureate Students

Postbaccalaureate study is for students who have already received a baccalaureate degree and have not been admitted to the Graduate School. Admission for postbaccalaureate enrollment requires a recognized baccalaureate degree (or higher) from a regionally accredited college or university, or an international equivalent based on a 4-year curriculum, a minimum C (2.0) GPA on all junior and senior year

undergraduate work, as computed by UF, and a satisfactory conduct record.

International applicants must submit a satisfactory score on one of the following: TOEFL (Test of English as a Foreign Language: paper=550, Internet=80) or IELTS (International English Language Testing System: 6 (6.5 Effective: Spring 2026)).

Applicants who meet the following conditions may be exempt from the English language test requirements:

- International students whose native language is English
- International students who have spent at least 1 academic year enrolled full-time in a baccalaureate or postbaccalaureate degree program at a college or university in a country where English is the official language prior to your anticipated term of enrollment at UF.

The Postbaccalaureate Application

Applicants must ensure that transcripts are sent to the Office of Admissions from each post-secondary institution attended. Applications will not be referred for a decision until transcripts have been received by the Office of Admissions. Postbaccalaureate applicants may apply for Distance Education programs. Only students who have completed a baccalaureate degree in the College of Education may be admitted to postbaccalaureate status for the purpose of completing a teacher certification program. Other applicants may be admitted to postbaccalaureate status only for a limited time to fulfill prerequisites for admission to a master's program. Applicants with degrees in other fields who are seeking teacher certification should apply for admission to a master's program in the College of Education.

Postbaccalaureate students may enroll in graduate courses, but graduate credit is not generally accepted by the Graduate School for transfer. It is possible to transfer up to 15 semester credits of graduate coursework earned with a grade of A, A-, B+, or B by petition in clearly justified cases and in conformance with regulations on courses and credit.

Proof of immunization for measles and rubella or a tuberculosis skin test is required before registering for coursework.

For more information, visit the Office of Admissions website, <https://admissions.ufl.edu/apply/post-baccalaureate> (<https://admissions.ufl.edu/apply/post-baccalaureate/>)

Nondegree Registration

Nondegree enrollment is restricted to participants in special programs, off-campus programs, University-affiliated exchange programs, and those participants with non-degree educational objectives at UF. Students denied admission to UF for any term are not eligible for non-degree registration. If you previously have attended UF in a degree-seeking status and did not subsequently earn a degree, you are not eligible for non-degree registration. Students need prior approval from the academic unit(s) to take courses in a non-degree status. That coursework normally is not applied toward the graduate degree if the student is admitted to the Graduate School. By petition in clearly justified cases and in conformance with regulations on courses and credit, it is possible to transfer up to 15 credits of graduate coursework earned with the grade of A, A-, B+, or B. A student should not remain in this classification for more than 1 term before being admitted as a post-baccalaureate or graduate student.

For non-degree registration request form information, click on this link: <https://admissions.ufl.edu/apply/non-degree> (<https://admissions.ufl.edu/apply/non-degree/>)

Readmission

This information applies only to students who have previously been enrolled in a graduate, postbaccalaureate, or professional UF program. Former students who do not enroll at the university for three consecutive terms, including any summer term, must apply for readmission to the same program of their previous enrollment. Students who wish to take an academic leave of absence should obtain written approval from their academic unit prior to leaving. For students who have a Graduate Assistantship and/or are here on a student visa, please contact the appropriate office(s) for additional information and requirements. <https://hr.ufl.edu/leave/graduate-assistant-leave-of-absence/> <https://internationalcenter.ufl.edu/f-1-student/f-1-processes/leave-absence-loa-or-withdrawal-uf> (<https://internationalcenter.ufl.edu/f-1-student/f-1-processes/leave-absence-loa-or-withdrawal-uf/>)

All readmission applicants must meet the current admission requirements of the college or school they expect to enter. Readmission is not guaranteed and is subject to availability at the level, college, and major. Consult the appropriate program's admission requirements. Readmission is for a specific term. If you are unable to enroll for the term for which you have been admitted, you must apply for readmission again to a different term.

Applicants must present a satisfactory record of conduct. Regardless of other qualifications, applicants who have experienced major or continuing difficulties with school or other authorities since their last enrollment at the University of Florida may find their application for readmission denied.

The readmission application must be submitted with a non-refundable \$30.00 application fee.

For further information, visit the Office of Admissions website <https://admissions.ufl.edu/apply/readmission> (<https://admissions.ufl.edu/apply/readmission/>)

Faculty Members as Graduate Students

UF faculty members in tenured or tenure-accruing positions, as designated by Regulations of the University of Florida, 7.003, normally may not pursue graduate degrees from this institution. Exceptions are made for the Florida Cooperative Extension Service (IFAS) county personnel, the faculty of the P. K. Yonge Laboratory School, and University Libraries faculty. Graduate Council policies have also established limited exceptions for persons holding faculty positions that do not include tenure or tenure accrual, and for specified degree programs, including the online MBA. Other exceptions to this policy must be approved by the Graduate Council. Such exceptions, if given, are rare and will only be approved if pursuit of the proposed graduate degree program is determined to be in the best interest of the University and the Colleges involved.

Graduate Student Employees

For more information about employing graduate students, please visit the Graduate School website and see Principles for the Employment of Graduate Students at the University of Florida (<https://grad.ufl.edu/work/ga/>).

Residency Status

Florida Residency for Tuition Purposes

For information about Florida residency requirements, please visit the Office of Admission's website (<https://admissions.ufl.edu/cost-and-aid/residency/#establishing-residency>) for the most up-to-date information regarding initial classification as a Florida resident for tuition purposes; currently enrolled students seeking reclassification as a Florida resident for tuition purpose should reference the information available through the Office of the University Registrar's website (<https://registrar.ufl.edu/services/residency/>).

For further information about applying to graduate school, please visit <https://admissions.ufl.edu/apply/graduate>. (<https://admissions.ufl.edu/apply/graduate/>)

Centers, Institutes, and Other Research Facilities

The University of Florida has approximately 180 approved Centers and Institutes (http://www.ir.ufl.edu/centers/Active_Centers.pdf) that have been established over the years to enhance the university's teaching and research functions by facilitating interdisciplinary cooperation and providing campus research instrumentation facilities and services. Ten of these centers and institutes with campus-wide missions report to the Vice President for Research: <https://research.ufl.edu/about/centers-and-institutes.html>

For more information, visit <http://centers.ufl.edu/> and <http://institutes.ufl.edu/> to contact the centers (<http://centers.ufl.edu/>) or institutes (<http://institutes.ufl.edu/>) directly.

Expanding subheadings and printing/saving to PDF: To view all subheadings on a page or to print/save the fully expanded PDF of the page, please use the print options button on the orange toolbar at the top of each page.

Catalog updates: The information on this page is current as of August 2025, with revisions made to the underlying degree table each semester as new programs become available. In the interim, contact individual programs for further updates.

Updates to this catalog should be submitted by the academic units each term via the Graduate School's Contact Form (<https://grad.ufl.edu/contact-us/>). Please also feel free to report any revisions or discrepancies via email to grad-catalog@ufl.edu. Updates are appreciated throughout the entire year.

College of Agricultural and Life Sciences

Dean: K. Migliaccio

The College of Agricultural and Life Sciences offers academic programs and grants advanced degrees in 14 departments and the Schools of Forest Resources and Conservation, and Natural Resources and Environment. These academic units are all a part of the Institute of Food and Agricultural Sciences (IFAS). Additional components of IFAS include 12 research and education centers located throughout the state and cooperative extension offices in each of the 67 counties of the state.

For more information, please see our website: <http://cals.ufl.edu>.

Faculty

GRADUATE FACULTY APPOINTED TO THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

Associate Professor

- Adams, Alison Eve
- Koeser, Andrew K.
- Marble, Stephen Christopher

Assistant Professor

- Barry, Debra Marie-Hope
- Revynthi, Alexandra
- Sidhu, Sudeep Singh

Other

- Zhuang, Yilin

Scientist

- Hendrickx, Saskia Carola

Research Assistant Professor

- Chagaris, David D.

Assistant Extension Scientist

- Toledo, Izabella Maria Michelon

Assistant Research Scientist

- Elborai, Fahiem Elsayeed

For the list of faculty associated with each department within CALS, please consult the faculty tab on each of the individual departmental listings within this catalog.

Agricultural and Biological Engineering Department

Chair: G. Kiker

Graduate Coordinator: TBA

The Master of Science and Doctor of Philosophy degrees are offered, along with graduate programs in agricultural and biological engineering in the areas of agricultural operations management and applied sciences, through the College of Agricultural and Life Sciences. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Master of Science and Doctor of Philosophy in the agricultural operations management area of specialization provide for scientific training and research in technical agricultural management. Typical plans of study focus on advanced training in environmental systems management, production systems management, construction and process management, and technical sales management.

For students with basic science degrees, the Master of Science and Doctor of Philosophy programs with a specialization in applied sciences through the College of Agricultural and Life Sciences provide advanced training in problem-solving capabilities, interdisciplinary research, and methods for applying science to real-world problems and issues. Typical emphasis is on:

1. the use of engineering methods and approaches, such as mathematical modeling, optimization, and information technologies, in the application of science to problems of various spatial and temporal scales and
2. an interdisciplinary experience in research at the doctoral level.

The requirements for a master's degree normally take 2 years to complete. The time required for the Doctor of Philosophy degree depends partly on the research topic but takes typically 3 to 4 years.

For more information about the program, please visit the program link below and the graduate studies pages on the departmental website at <http://www.abe.ufl.edu>.

Agricultural and Biological Engineering (CALS)

Program Information

The degrees of Master of Science, Master of Engineering, and Doctor of Philosophy are offered with graduate programs in agricultural and biological engineering through the College of Engineering. Students must have an undergraduate or graduate degree in Engineering or meet specific articulation requirements in order to pursue an advanced degree in engineering.

For students without an engineering degree, The Master of Science and Doctor of Philosophy degrees in agricultural and biological engineering are offered in the areas of agricultural operations management and applied science through the College of Agricultural and Life Sciences. Students must have a degree in a related field or meet specific articulation requirements.

A combination B.S./M.S. or B.S./M.E. for Engineering students program allows up to 12 graduate credits to be double-counted toward fulfillment of both degrees. Contact the graduate coordinator for qualifications and details. A 30-credit, nonthesis master's degree program is also available to students interested in completing the requirements in 1 year.

The Master of Science, Master of Engineering, and Doctor of Philosophy (Engineering) degrees are offered in the following areas of research:

Agricultural production engineering includes development and application of precision agriculture concepts and tools, weather and climate risk in agriculture, decision support systems, food security, pesticide application, post-harvest operations robotics and other machine systems and environmental control systems. Applications to space biology are included in cooperation with NASA at Kennedy Space Center.

Biological engineering includes includes biocomplexity analysis, ecological modeling, risk and decision analysis, bioprocess design, plant biotechnology, process microbiology, food process engineering, environmental biotechnology, bioreactors, and packaging science.

Information systems includes development and application of GIS and remote sensing, communications, mathematical modeling, data solutions, and expert systems techniques to biological and agricultural systems.

Land and water resources includes soil-water-plant relations, irrigation, water quality, watershed hydrology, BMP and TMDL studies, hydrologic modeling, ecological restoration, environmental fate and transport of nanoparticles, waste management, and water reuse.

Students also may choose to participate in interdisciplinary concentrations in hydrologic sciences, geographic information sciences, particle science and technology, and interdisciplinary ecology.

The Master of Science and Doctor of Philosophy (CALS) in the agricultural operations management area of specialization provide for scientific training and research in technical agricultural management. Typical plans of study focus on advanced training in environmental systems management, production systems management, construction and process management and technical sales management.

In addition, for students with basic science degrees, the Master of Science and Doctor of Philosophy programs with a specialization in **applied sciences** through the College of Agricultural and Life Sciences provides advanced training in problem-solving capabilities, interdisciplinary research, and methods for applying science to real-world problems and issues. Typical emphasis is on:

1. the use of engineering methods and approaches, such as mathematical modeling, optimization, and information technologies, in application of science to problems of various spatial and temporal scales; and
2. an interdisciplinary experience in research at the doctoral level.

The requirements for a master's degree normally take 2 years to complete. The length of time required for the Doctor of Philosophy degree depends partly on the research topic, but normally takes 3 to 4 years.

Additional information can also be found on the graduate studies pages on the department website at www.abe.ufl.edu (<http://www.abe.ufl.edu>).

Degrees Offered

Degrees Offered with a Major in Agricultural and Biological Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Global Systems Agroecology
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Agroecology
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Agricultural and Biological Engineering Departmental Courses

Code	Title	Credits
ABE 5009	Control Methods in SmartAg Systems	3
ABE 5038	Recent Developments and Applications in Biosensors	3
ABE 5152	Fluid Power Circuits and Control	3

ABE 5310	Advanced Controlled Environment Agriculture Systems Design	3
ABE 5442	Advanced Agricultural Process Engineering	3
ABE 5643C	Biological Systems Modeling	3
ABE 5646	Biological and Agricultural Systems Simulation	3
ABE 5648	Modeling Coupled Natural-Human Systems	3
ABE 5653	Rheology and Mechanics of Agricultural and Biological Materials	3
ABE 5663	Advanced Applied Microbial Biotechnology	3
ABE 5707C	Agricultural Waste Management	3
ABE 5805	Advanced Life Cycle Assessment in Water-Energy-Food Systems	3
ABE 5815C	Food and Bioprocess Engineering Design	4
ABE 5936	Writing Grant Proposals for Scholarships and Fellowships	2
ABE 6005	Applied Control for Automation and Robots	3
ABE 6017	Stochastic Modeling in Ecology and Hydrology	3
ABE 6031	Instrumentation in Agricultural Engineering Research	3
ABE 6035	Advanced Remote Sensing: Science and Sensors	3
ABE 6037C	Remote Sensing in Hydrology	3
ABE 6165	Comp Vis Deep Learn Agri Sys	3
ABE 6252	Advanced Soil and Water Management Engineering	3
ABE 6254	Simulation of Agricultural Watershed Systems	3
ABE 6265	Vadose Zone Modeling	3
ABE 6266	Nanotechnology in Water Research	3
ABE 6615	Advanced Heat and Mass Transfer in Biological Systems	3
ABE 6644	Agricultural Decision Systems	3
ABE 6645C	Computer Simulation of Crop Growth and Management Responses	3
ABE 6649C	Advanced Biological Systems Modeling	3
ABE 6654C	Advanced Bio-Based Products from Renewable Resources	3
ABE 6840	Data Diagnostics	3
ABE 6905	Individual Work in Agricultural and Biological Engineering	1-4
ABE 6910	Supervised Research	1-5
ABE 6931	Seminar	1
ABE 6933	Special Topics in Agricultural and Biological Engineering	1-4
ABE 6940	Supervised Teaching	1-5
ABE 6971	Research for Master's Thesis	1-15
ABE 6972	Research for Engineer's Thesis	1-15
ABE 6974	Nonthesis Project	1-6
ABE 6986	Applied Mathematics in Engineering and Agriculture	3
ABE 7979	Advanced Research	1-12
ABE 7980	Research for Doctoral Dissertation	1-15
AGG 5607	Communicating in Academia	3
AOM 5456	Applied Methods in SmartAg Systems	3
EGN 5949	Practicum/Internship/Cooperative Work Experience	1-6
EGN 6913	Engineering Graduate Research	0-3
STA 6348	Bayesian Analysis for Machine Learning and Uncertainty Quantification	3
STA 6703	Statistical Machine Learning	3

STA 6709	Spatial Statistics & Hierarchical Modeling for Dependent Data	3

College of Agricultural and Life Sciences Courses

Code	Title	Credits
ALS 5156	Agricultural Ecology Principles and Applications	3
ALS 5905	Individual Study	1-4
ALS 5932	Special Topics	1-4
ALS 6046	Grant Writing	2
ALS 6166	Exotic Species and Biosecurity Issues	3
ALS 6921	Colloquium on Plant Pests of Regulatory Significance	1
ALS 6925	Integrated Plant Medicine	4
ALS 6931	Plant Medicine Program Seminar	1
ALS 6935	Topics in Biological Invasions	3
ALS 6942	Principles of Plant Pest Risk Assessment and Management	3
ALS 6943	Internship in Plant Pest Risk Assessment and Management	1-10
ANS 6936	Graduate Seminar in Animal Molecular and Cell Biology	1-2
BCH 5045	Graduate Survey of Biochemistry	4
FNR 6933	Seminar	1
STA 6093	Introduction to Applied Statistics for Agricultural and Life Sciences	3
STA 6329	Matrix Algebra and Statistical Computing	3

Student Learning Outcomes

Agricultural & Biological Engineering (PHD)

SLO 1 Knowledge

Employ mathematics, science and engineering principles to solve problems in the discipline of Agricultural and Biological Engineering

SLO 2 Skills

Apply, analyze, and synthesize content knowledge to plan and conduct scholarly activities that make original contributions to the knowledge base in the field of study by identifying components or processes of agricultural and/or biological systems to meet desired needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability constraints.

SLO 3 Professional Behavior

Display ethical behavior, cultural sensitivity, teamwork, professional conduct and effective communication.

Agricultural & biological engineering (MS)

SLO 1 Knowledge

Identifies, describes, explains, and applies the mathematics, science and engineering principles of the discipline of Agricultural and Biological Engineering.

SLO 2 Skills

Apply, analyze, and synthesize content knowledge to solve problems by identifying components or processes of agricultural and/or biological systems to meet desired needs within realistic economic, environmental,

social, political, ethical, health and safety, manufacturability and sustainability constraints.

SLO 3 Professional Behavior

Display ethical behavior, cultural sensitivity, teamwork, professional conduct and effective communication

Agricultural Education and Communication Department

Chair: B. E. Myers

Graduate Coordinator: J. C. Bunch

The Department of Agricultural Education and Communication offers the degrees of Master of Science and Doctor of Philosophy. Graduate students who obtain a degree in Agricultural Education and Communication will focus their study in one of four areas of specialization. The areas of specialization are agricultural communication, agricultural education, extension education, and leadership development. These degree programs are individually tailored to meet the student's unique needs for professional development. The requirements for each degree are described in the Graduate Degrees (p. 778) section of the University of Florida Graduate Catalog. More information about our program can be found by following the link below.

Majors

- Agricultural Education and Communication (p. 18)

Faculty

Professor

- Kistler, Mark J.
- Lundy, Lisa Katherine
- Myers, Brian E.
- Roberts, Thomas G.
- Stedman, Nicole Lamee
- Telg, Ricky W.
- Warner, Laura Anne

Associate Professor

- Baker, Lauri May
- Benge, Matthew Paul
- Bunch, James Charles
- Diaz, John M.
- Galindo, Sebastian
- Loizzo, Jamie Lynn
- Monaghan, Paul F.
- Sowcik, Matthew J.

Assistant Professor

- Ahn, Jaehyun
- Beattie, Peyton Nicole
- Bush, Sarah A.
- Easterly, Ralph G.
- Greenhaw, Laura Lee
- Hundemer, Sarah E.

- Jagger, Carla
- Lamino Jarmillo, Pablo
- White, Shane

Research Associate Professor

- Stofer, Kathryn Anne

Lecturer

- Coers, Natalie
- Young, Heather L.

Affiliated Faculty

- Barry, Debra Marie-Hope
Assistant Professor

Agricultural Education and Communication

Program Information

The Master of Science program is designed to prepare graduates for domestic and international teaching, research, extension, administrative and leadership positions in both the public and private sectors. Courses are taught in an agricultural and natural resources context and are broadly applicable in educational, business, government, and agency settings. The Master of Science program is delivered on-campus and online via the AEC e-Learning Institute (eLI). The Doctor of Philosophy degree program is primarily designed to prepare graduates for academic positions in teaching, research, and extension within the realm of Agricultural Education and Communication. In addition, graduates may obtain positions in administration, human resource management, or training and development.

The **Agricultural Communication** specialization prepares students for professional communication careers in or dealing with agriculture and agribusiness. It is intended primarily for students who enter with a bachelor's degree in journalism, agricultural communication/journalism, advertising, broadcasting, public relations, or related fields. Graduates of this option are employed in:

1. communication or management positions with the numerous commodity or special-interest associations in agriculture and related fields;
2. communication support positions in agricultural extension and research information departments of land-grant universities, agencies of USDA, state Departments of Agriculture, and agricultural development projects overseas;
3. advertising and public relations positions with agribusiness firms or commodity associations; and
4. media positions involved in reporting on agriculture, agribusiness, and natural resource issues.

Students in Agricultural Communication also develop strong skills/application in media writing, production, campaign strategies and/or Web design/desktop publishing. Graduates become prepared for positions in both public and private sectors in both industry and educational settings.

The **Agricultural Education** specialization is designed to enhance the careers of those employed in the educational professions in agriculture and natural resources. Regardless if one is employed in public school

teaching, community college instruction, or training and development in agribusiness, students gain valuable knowledge and experience in designing, implementing, and evaluating educational programs. In addition, graduates of the program command added depth in the understanding of the teaching and learning process. This specialization may be designed to allow students to complete the requirements of teacher certification while completing their master's degree program. The PhD is a research-oriented degree that has a primary focus of preparing candidates to assume faculty positions in colleges or university teacher education programs. Candidates develop an individual program of study that provides a comprehensive knowledge of teaching and learning processes. The degree also seeks to extend the candidate's development by providing instruction, research opportunities, and experiences that enhance the depth and breadth of the candidate's prior learning opportunities.

The **Extension Education** specialization is designed to prepare students for careers in the Cooperative Extension service, outreach education, and/ or other international agencies. Through coursework and research, students will gain valuable knowledge and experience in designing, implementing, and evaluating educational programs. Extension graduate students choose between a domestic or international focus in regards to coursework and/or research. In addition, graduates of the program command tremendous depth of the teaching and learning process. Candidates who select the **Extension Education** specialization develop an individual program of study that focuses on such topics as program development, experiential education, the change process, educational technologies and extension, program evaluation and organizational accountability, administration and leadership, and international extension. Graduates become prepared for a variety of positions including extension specialists, county and district extension directors, outreach education coordinators for private and public agencies, 4-H Extension agents and specialists, and educator specialists with international agencies.

The **Leadership Development** specialization is designed to prepare students for educational leadership, training, and outreach positions in agricultural, extension, community and governmental agencies. Course work in the major will focus on a core of agricultural courses along with emphasis in designing educational/training programs, professional presentation enhancement, leadership development, teaching/training methods, and interpersonal communication. Candidates who select the **Leadership Development** specialization develop an individual program that focuses on leadership theory and measurement, critical and creative thinking, and leadership in cross-cultural settings. Students will encompass a strong research and theory-based program with a strong knowledge of training and development, and human resource management. Graduates become prepared for positions in both public and private sectors in both industry and educational settings.

Degrees Offered

Degrees Offered with a Major in Agricultural Education and Communication

- Doctor of Philosophy
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Agricultural Education & Communications (PHD)

SLO 1 Knowledge

Summarize contemporary and foundational theory and research in the selected specialization

SLO 2 Knowledge

Apply, analyze and synthesize content knowledge, evolving concepts and philosophies in the selected specialization to solve problems by identifying component parts, relationships and ideas.

SLO 3 Skills

Apply visual and nonvisual techniques in the use of instructional materials and methods.

SLO 4 Skills

Apply concepts and principles related to design, implementation and evaluation of formal and non-formal education and/or training and development programs.

SLO 5 Skills

Apply principles, practices and strategies for conducting behavioral research in agricultural and natural resource professions.

SLO 6 Professional Development

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication.

Agricultural Education & Communications (MS)

SLO 1 Knowledge

Display competency in contemporary and foundational theory and research in their selected specialization.

SLO 2 Knowledge

Apply, analyze and synthesize content knowledge and evolving concepts and philosophies in the selected specialization to solve problems by identifying component parts, relationships and ideas.

SLO 3 Skills

Apply visual and nonvisual techniques in the use of instructional materials and methods.

SLO 4 Skills

Apply concepts and principles related to design, implementation and evaluation of formal and non-formal education and/or training and development programs.

SLO 5 Skills

Apply principles, practices and strategies for conducting behavioral research in agricultural and natural resource professions.

SLO 6 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication.

Agronomy Department

Interim Department Chair: J. Ferrell

Graduate Coordinator: K. E. Kenworthy

The Agronomy Department offers the degrees of Doctor of Philosophy and Master of Science (thesis and non-thesis options) in agronomy with specializations in plant physiology, ecology, management and nutrition, weed science (terrestrial and aquatic), and plant breeding and genetics. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Graduate programs emphasize the development and subsequent application of basic principles in each specialization to the management of agricultural and natural ecosystems in Florida and throughout the world. The continuing need for increased plant production for food, fiber and energy to meet the demands of a rapidly escalating population is reflected in departmental research programs. When compatible with a student's program and permitted by prevailing circumstances, some thesis and dissertation research may be conducted wholly or in part in other countries.

Students seeking a graduate program in the Agronomy Department should hold a Bachelor of Science degree from an accredited college or university with a major in an area of plant science, or closely related discipline. A science background with basic courses in biology, botany, mathematics, chemistry, and physics is required of new graduate students.

For more information, please see <https://agronomy.ifas.ufl.edu/>.

Student Learning Outcomes

Agronomy (PhD)

SLO 1 Knowledge

Describe and explain theories and concepts in the basic plant sciences and in a chosen specialization (Crop Genetics and Breeding; Crop Physiology and Ecology; Crop Nutrition and Management; Weed Science).

SLO 2 Knowledge

Design and execute an innovative research plan and analyze, synthesize and interpret research results using appropriate experimental designs and statistical analyses.

SLO 3 Knowledge

Address and solve issues related to crop production and resource management in preparation for leadership roles in the discipline (in academia, government or the private sector).

SLO 4 Skills

Communicate effectively and professionally in oral and written form and in interpersonal relationships.

SLO 5 Professional Behavior

Conduct all scholarly activities, including teaching, research and outreach with collegiality, cultural sensitivity, and ethical practices.

Agronomy (MS)

SLO 1 Knowledge

Describe and explain theories and concepts in the basic plant sciences and in a chosen specialization (Crop Genetics and Breeding; Crop Physiology and Ecology; Crop Nutrition and Management; Weed Science).

SLO 2 Knowledge

Design and execute an innovative research plan and analyze, synthesize and interpret research results using appropriate experimental designs and statistical analyses.

SLO 3 Knowledge

Address and solve issues related to crop production and resource management in preparation for leadership roles in the discipline (in academia, government or the private sector).

SLO 4 Skills

Communicate effectively and professionally in oral and written form and in interpersonal relationships.

SLO 5 Professional Behavior

Conduct all scholarly activities, including teaching, research and outreach with collegiality, cultural sensitivity, and ethical practices.

Animal Sciences Department

Chair: J. Arthington

Graduate Coordinators: A. Faciola (Animal Sciences) and J. Bromfield (AMCB)

Animal Sciences is an academic department of the College of Agriculture and Life Sciences (CALS) (<https://cals.ufl.edu/>), a unit of the Institute of Food and Agricultural Sciences (IFAS) (<https://ifas.ufl.edu/>). Creating new solutions to tomorrow's problems underlies everything we do in the Animal Sciences Program. In the areas of teaching, research, and extension, our faculty integrate the most modern technologies available with personal expertise and attention to the needs of students and our industry. For more information about the Animal Sciences program, contact Antonio Faciola and for information about AMCB, reach out to John Bromfield or visit the program's website at <https://animal.ifas.ufl.edu/graduate> (<https://animal.ifas.ufl.edu/graduate/>).

Animal Molecular and Cellular Biology

PROGRAM INFORMATION

The animal molecular and cell biology (AMCB) graduate program offers Master of Science and Doctor of Philosophy degrees. Faculty are drawn from these disciplines:

- Animal Sciences
- Biochemistry and Molecular Biology
- Large Animal Clinical Sciences
- Obstetrics and Gynecology
- Zoology

Early in the program, students choose a faculty supervisor who will ensure the quality of their research experience. Students may also do

optional rotations through the laboratories of one or more other faculty. The Annual Research Symposium features guest speakers and student research presentations. A weekly journal club and monthly seminars draw on the knowledge and diversity the campus offers in molecular and cell biology.

Core course requirements for the M.S. degree are BCH 5045 Graduate Survey of Biochemistry (4 cr.), registration in a 1-credit graduate seminar course and successful completion of a course on responsible and ethical conduct of research. Core course requirements for the Ph.D. include BCH 5413 Mammalian Molecular Biology and Genetics (3 cr.) and GMS 6421 Cell Biology (3-4 cr.), registration in two graduate seminar courses and successful completion of a course on responsible and ethical conduct of research.

Contact P.J. Hansen at pjhansen@ufl.edu or visit the program's website at <https://programs.ifas.ufl.edu/animal-molecular-and-cellular-biology/>

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN ANIMAL MOLECULAR AND CELLULAR BIOLOGY

- Doctor of Philosophy
 - no concentration
 - concentration in Domestic Animal Genomics
 - concentration in Reproductive Biotechnology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

ANIMAL MOLECULAR & CELLULAR BIOLOGY (MS)

SLO 1 Knowledge

Identify, recall, appraise, and interpret the principles of molecular and cellular biology and their application to comparative biology

SLO 2 Skills

Design, conduct and draw sound conclusions on scientific experiments

SLO 3 Professional Behavior

Interact with peers and instructors with honesty, cultural sensitivity and effective communication

Animal Sciences

Program Information

The Department of Animal Sciences (<https://gradcatalog.ufl.edu/graduate/colleges-departments/agricultural-life-sciences/animal/>) offers the degrees of Master of Science (thesis and non-thesis) and Doctor of Philosophy in Animal Sciences with emphasis in beef or dairy cattle, swine, or equine.

Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The following informal specializations are available:

- Breeding, genetics and genomics
- Behavior
- Management
- Immunology
- Nutrition (nutritional physiology, nutrient metabolism, and feedstuff utilization)
- Physiology (environmental, lactational, muscle and reproductive)
- Molecular biology (embryology, endocrinology, and genetics)
- Meat science (meat processing, meat quality, muscle biology, and food safety)

Available formal concentration areas appearing on the transcript are listed here (<http://gradcatalog.ufl.edu/graduate/colleges-departments/agricultural-life-sciences/animal/animal/gradcatalog.ufl.edu/graduate/>)

colleges-departments/agricultural-life-sciences/animal/animal/#degreesofferedtext).

A student may work on a problem covering more than one area of study. Animal resources (beef cattle, dairy cattle, horses, swine, sheep, and laboratory animals) are available for use in various research programs. Nutrition, physiology, immunology, and meat laboratories are available for detailed chemical and carcass quality evaluations, and excellent computer facilities are available. Special arrangements may be made to conduct research at the various branch agricultural experiment stations throughout Florida.

Departmental and program prerequisites for admission to graduate study include a sound science background, with basic courses in microbiology, biology, mathematics, and chemistry. All courses in the animal sciences program area are acceptable for graduate credit as part of the candidate's major.

The Graduate School restricts graduate students from pursuing minors in academic units that contribute major credit toward their degree program. Therefore, graduate students majoring in Animal Sciences cannot pursue a minor in Food and Resource Economics, Food Science and Human Nutrition, Medicine-Biochemistry, and Veterinary Medical Sciences. In addition, undergraduate credits at the 3000–4000 level in the major of any of these listed academic units are not eligible to count toward degree requirements.

Combination Degree Program

Qualified students are encouraged to apply to the combination degree program. Acceptance into the program will allow both a bachelor's degree and a master's degree with a savings of one semester. Please contact the academic unit for more information regarding this opportunity.

Degrees Offered

Degrees Offered with a Major in Animal Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Animal Molecular and Cellular Biology
 - *optional second concentration in Domestic Animal Genomics*
 - concentration in Domestic Animal Genomics
 - concentration in Reproductive Biotechnology
- Master of Science
 - without a concentration
 - concentration in Animal Molecular and Cellular Biology
 - concentration in Domestic Animal Genomics
 - concentration in Reproductive Biotechnology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Doctoral Program Requirements

The Ph.D. program represents independent mastery of a field of knowledge and the successful pursuit of an independent research program. Requirements for the Ph.D. are more flexible and varied than those of other degrees. The general requirement is that the program be unified with clear objectives, and approved by the student's supervisory

committee. A total of 90 credits and a dissertation are required to complete this degree.

Master's Program Requirements

Requirements for the M.S. with a thesis include a research project with a minimum of 30 credit hours of which six are research credits (ANS 6971). Each student develops a degree plan that must be approved by their supervisory committee with final approval from the graduate coordinator. The M.S. non-thesis option is primarily designed for those students who are seeking opportunities in a field where research is not required for employment. A minimum of 32 credits is required to complete this degree. Each student develops a degree plan that must be approved by the student's supervisory committee with final approval from the graduate coordinator.

For more information visit <https://animal.ifas.ufl.edu/graduate/> (<https://animal.ifas.ufl.edu/graduate/>)

Student Learning Outcomes

Animal Sciences (PHD)

SLO 1 Principles of Animal Sciences

Identify, interpret, and discuss the principles of the animal sciences with a deeper mastery of a chosen specialization.

SLO 2 Employ Scientific Methods

Employ scientific methods to critically appraise and devise solutions to problems in the animal sciences

SLO 3 Solve Problems and Generate New Information

Propose and deploy scientific methods to solve problems and generate new information.

SLO 4 Prepare Grants for Funding

Prepare grants for extramural funding during their PhD program.

SLO 5 Professional Behavior

Display ethical conduct and interact with others with honesty, cultural sensitivity, and respect.

SLO 6 Effective Communication

Communicate effectively in professional situations.

Animal sciences (MS)

SLO 1 Principles of Animal Sciences

Identify, interpret, and discuss the principles of the animal sciences with a deeper mastery of a chosen specialization.

SLO 2 Apply Scientific Methods

Apply scientific methods to problems in the animal sciences and develop new solutions to such problems.

SLO 3 Problem Solving Skills

Propose and deploy scientific methods to solve problems and generate new information.

SLO 4 Professional Behavior

Display ethical conduct and interact with others with honesty, cultural sensitivity, and respect.

SLO 5 Communicate Effectively

Communicate effectively in professional situations.

Genetics and Genomics (CALS)

Program Information

Program Director: T. Burris

Program Coordinator: C. Mulligan

The University of Florida Genetics Institute is a multi-college, multi-faceted research center which offers the a degree program leading to the Ph.D. in Genetics and Genomics. Minimum requirements for this degree are available in the Graduate Degrees (p. 778) section of this catalog.

What defines the Genetics & Genomics Graduate Program is the philosophy that good geneticists are integrative geneticists, who incorporate many different subfields of genetics into their work. Accordingly, faculty interests and graduate research opportunities include a wide range of areas: advances in gene therapy, understanding the maintenance of genetic variation, understanding plant immune responses, developing improved algorithms for identifying regulatory motifs in DNA sequences, and the challenges of bioethics to strategies for controlling malaria. Due to the fundamental nature of genetics in the life sciences, our training program is distributed across several colleges at UF, including but not limited to the College of Medicine (<https://graduate.education.med.ufl.edu/>), the College of Liberal Arts and Sciences (<https://clas.ufl.edu/>), the College of Agricultural and the Life Sciences (<https://cals.ufl.edu/>), and the Florida Museum of Natural History.

Graduate Program Overview

First Year:

Code	Title	Credits
ANG 7979	Advanced Research	1-12
BCH 6415	Advanced Molecular and Cell Biology	3
GMS 6221	Ethics in Genetics	1
GMS 6231	Genomics and Bioinformatics	3
GMS 6290	Genetics/Genomics Program Graduate Seminar (begins in the first semester and continues throughout students' graduate careers)	1
GMS 7877	Responsible Conduct of Biomedical Research	2
PCB 5065	Advanced Genetics	4
PHC 6052	Introduction to Biostatistical Methods	3

The first year core training is the research rotation program, in which students "rotate" through three labs in a minimum of two colleges. Rotations are critical to selecting a graduate advisor: they provide a hands-on opportunity to participate in the research being conducted in a lab, and a mutual opportunity to evaluate fit between advisor and prospective student.

Second Year:

- Individual program of courses and requirements is developed in consultation with major professor and dissertation committee

Admission Standards: Prospective students should have strong backgrounds in biology and other hard sciences. Exceptional students with other backgrounds will also be considered. The research statement required as part of the application has a particularly important part in the admissions decision. Each applicant must describe their research interests so that Graduate Faculty can evaluate knowledge of the discipline, fit to the program, and ability to articulate and motivate an interesting research problem. The required Letters of Recommendation are also extremely important in helping identify applicants with exceptional aptitude for genetics, and with research experience and promise.

Contact the Genetics and Genomics Graduate Program by email, UFGI-Info@ad.ufl.edu or by phone, 352-273-8124.

For more information, visit our website: <http://www.ufgi.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Genetics and Genomics

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Domestic Animal Genomics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Entomology and Nematology Department

Chair: A. Short

Graduate Coordinator: M. Branham

The Entomology and Nematology Department offers the Master of Science (thesis and nonthesis options) and Doctor of Philosophy degrees in entomology and nematology. Minimum requirements for the M.S. and Ph.D. degrees are described in the Graduate Degrees (p. 778) section of this catalog.

The Department also offers a cooperative Doctor of Philosophy degree with Florida A&M University and distance education courses leading to the Master of Science degree with specializations in basic entomology, medical entomology, urban pest management, and landscape pest management. Members of the Graduate Faculty include the department resident faculty, faculty located on the University of Florida campuses away from Gainesville, scientists with other State of Florida agencies such as the Division of Plant Industry and Florida Department of Agriculture and Consumer Services, and scientists of the U.S. Department of Agriculture. The Graduate Faculty is qualified to direct graduate students in all specialties of entomology and nematology.

New graduate students should have backgrounds in biology, chemistry, physics, and mathematics. Minor deficiencies may be made up after entering graduate school.

The Department offers a combination bachelor's/master's degree program. Contact the graduate coordinator for information.

For more information, please see the program page below and visit our website: <https://entnemdept.ufl.edu/academic-programs/graduate-studies/>

Majors

- Miller, Jacqueline Y.
Curator
- Reeves, Lawrence E.
Assistant Professor
- Revynthi, Alexandra
Assistant Professor
- Rohrig, Eric Andrew
Courtesy Assistant Scientist
- Shatters, Robert G.
Assistant Professor

Entomology and Nematology

Program Information

The Entomology and Nematology department offers research-based M.S. (thesis) and PhD degrees in entomology and in nematology. Our large faculty in Gainesville and at Research and Education Centers around the state allow for study in many important areas. Insect and nematode pests cause significant losses to agricultural and horticultural crops and livestock, and are important vectors of pathogens that cause diseases in plants, livestock and humans. Urban pests can affect quality of life and cause significant loss to property. However, these organisms

also provide important services through decomposition, pollination of fruits and vegetables, and as natural enemies of other pest species. Our department is uniquely positioned to address these fundamental and applied biological questions because of our strong interdisciplinary research and education programs, from molecular to whole organism and population ecology studies.

In addition to our research based degree programs, the M.S. degree can be taken in a non-thesis format, in Gainesville or entirely online, with a specialization in either entomology or pest management (with foci on pests of medical, urban or landscape importance). Online M.S. degrees are designed to accommodate place-bound students interested in biological science with emphasis on insects and other arthropods, including extension faculty and other educators; state and federal employees in agricultural, environmental and regulatory positions; consultants; pest control industry personnel; and others who want to further their education.

Certificates, comprising 15 credit hours of specific coursework, are available online or to residential students with concentrations in urban pest management, landscape pest management or medical entomology. These certificates document specialization and proficiency in sub-disciplines within entomology for enrolled graduate students and provide evidence of expertise for non-degree seeking students.

Students entering graduate programs in entomology and nematology should have a strong science background, including biology, chemistry, and algebra. Physics and statistics are recommended. Admissions criteria can be found on the Graduate School's Admission (p. 8) page.

Degrees Offered

Degrees Offered with a Major in Entomology and Nematology

- Doctor of Philosophy
 - without a concentration
 - concentration in Global Systems Agroecology
- Master of Science
 - without a concentration
 - concentration in Agroecology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Entomology & Nematology (PHD)

SLO 1 Knowledge

Identify insects, other arthropods and/or nematodes, and describe their relationship with the environment and humans

SLO 2 Knowledge

Discuss appropriate research methodology, including aspects of statistical design and analysis, in the execution of arthropod research

SLO 3 Skills

Effectively communicate science orally and in written form to an audience of scientific peers

SLO 4 Skills

Effectively communicate science orally and in written form to a non-specialized audience through educational activities

SLO 5 Skills

Apply critical thinking and inquiry/analysis methodologies to solve problems and generate new knowledge

SLO 6 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, and teamwork.

entomology & Nematology (MS)

SLO 8 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork and effective communication

SLO 9 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork and effective communication

Plant Medicine

Program Information

Coordinator: A.C. Hodges

Campus Program

The Doctor of Plant Medicine (DPM) program is an intensive doctorate-level graduate level training program for students interested in plant health diagnosis and management. Requirements for the degree can be found in the Graduate Degrees (p. 778) section of this catalog.

DPM students complete rigorous coursework and intensive internships. Only DPM students jointly enrolled in one of our discipline department M.S. programs complete a thesis. DPM students often participate in applied research within laboratory programs, and may participate in the publication of peer-reviewed scientific and extension papers. More information regarding the latest policies for the DPM program is available

in the DPM graduate handbook (http://dpm.ifas.ufl.edu/wp-content/uploads/2017/11/DPM_Handbook_2017.pdf).

The DPM program is a partnership among faculty mentors and teaching faculty within the following primary departments:

- Entomology and Nematology Department
- Department of Plant Pathology
- Agronomy Department
- Horticulture Sciences Department
- Environmental Horticulture Department
- Soil and Water Sciences Department
- Food Science and Human Nutrition Department

Distance Program

The College of Agricultural and Life Sciences offers a distance education program leading to the D.P.M. degree for highly qualified students. The D.P.M. degree is awarded after a 3- to 4-year program of graduate student. Foreign languages are not required. The distance education program leading to a D.P.M. degree is administered by the Entomology and Nematology Department, College of Agricultural and Life Sciences, and the Graduate School.

Admission: Students must meet the following minimum requirements:

Entrance requirements:

- A graduate degree (Master's or Doctoral) with a concentration in plant health science, plant pathology, agronomy, horticulture, environmental horticulture, forestry, entomology, nematology, soil science or a similar field.
- A passing score for the Certified Crop Advisor (CCA) exam administered by the Agronomy Society of America (ASA).
- Completion of at least two years of full-time work in a professional job associated with the Plant Doctor (DPM/H) profession. Examples of professional jobs associated with the Plant Doctor profession include: crop consultant, industry scientist, extension specialist, diagnostician, identifier, survey specialist, plant pest risk analyst, plant health technician, or instructor.
- A minimum score of a 300 on the Graduate Record Examination (GRE). Verbal and quantitative portions of the GRE should be approximately 150 each. Exceptions to the minimum may be considered by the DPM admissions committee.
- International applicants must also have a TOEFL score above 80.
- A graduate (Master's or Doctoral) grade point average of 3.0 or higher.
- A passing score (80% or higher) on the Plant Pathology Written Comprehensive Exam. The exam must be completed in Gainesville, Florida.

Course requirements: Students enter the program with a Master's or Doctoral degree and must earn 60 credits. Transfer of graduate credits from another graduate degree are not allowed for the distance education program. All D.P.M. students must complete two substantial 3-credit internships. Signed approval by a student's Committee and the D.P.M. Director is required prior to registering for substantial internship credits.

Comprehensive examination: Both written and oral comprehensive examinations are required of all D.P.M. students. The written examination has three sections:

- entomology/nematology,
- plant pathology, and
- plant/soil science.

Faculty from the appropriate disciplines are appointed by the D.P.M. Program Director and D.P.M. Competency Exam Coordinators to develop and grade the final written examination. Students enrolled in the distance education program must pass the plant pathology written competency area exam prior to admission. The two remaining sections of the written exam may be taken independently throughout the program at the discretion of the supervisory committee and the D.P.M. Director. Students are encouraged to complete the exam prior to the last full year of the D.P.M. program and their anticipated semester of graduation. Students should also complete the D.P.M. Competency Area Exams before the completion of a substantial internship. After a student passes all three sections of the final written examination (80% or higher is considered a passing grade), the supervisory committee administers an oral examination that tests the student's ability to diagnose and manage plant health problems. A student who fails to pass a comprehensive examination may retake an exam once with the recommendation of their supervisory committee.

For more information, please see the DPM website: <http://dpm.ifas.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Plant Medicine

- Doctor of Plant Medicine
 - without a concentration
 - concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Agronomy Departmental Courses

Code	Title	Credits
AGR 5230C	Florida Grassland Agroecosystems	4
AGR 5266C	Field Plot Techniques	3
AGR 5277C	Tropical Crop Production	3
AGR 5307	Molecular Genetics for Crop Improvement	3
AGR 5321C	Genetic Improvement of Plants	3
AGR 5444	Ecophysiology of Crop Production	3
AGR 5511	Crop Ecology	3
AGR 6233	Tropical Grassland Agroecosystems	3
AGR 6237C	Research Techniques in Forage Evaluation	3
AGR 6305	Plant Chromosomes and Genomes	3
AGR 6322	Advanced Plant Breeding	3
AGR 6325L	Plant Breeding Techniques	1
AGR 6422C	Environmental Crop Nutrition	3
AGR 6442C	Physiology of Agronomic Plants	4
AGR 6905	Agronomic Problems	1-5
AGR 6913	Supervised Extension-Agronomy	3
AGR 6932	Topics in Agronomy	1-3
AGR 6933	Graduate Agronomy Seminar	1

FNR 6933	Seminar	1

STA 6093	Introduction to Applied Statistics for Agricultural and Life Sciences	3
STA 6329	Matrix Algebra and Statistical Computing	3

Student Learning Outcomes

SLO 1: Knowledge

Prevention, Diagnosis and Management of Plant Health Problems

Master the subject matter and concepts related to the prevention, diagnosis and management of plant health problems of all types

SLO 2: Skills

Solve Plant Health Problems

Integrate the subject matter and concepts learned during their program of study to solve plant health problems.

SLO 3: Professional Behavior

Exhibit professionalism in the practice of plant medicine by maintaining client confidentiality, keeping up to date on plant health management practices through continuing education and seeking the assistance of their colleagues when necessary.

Family, Youth and Community Sciences Department

Chair: L. Forthun

Graduate Coordinator: K. Fogarty

The Master of Science in FYCS can help you develop the specialized skills needed to pursue an advanced social science degree (e.g., PhD) or move into a leadership role in career areas such as human services, social welfare, family life education, nonprofit organizations, youth development, or other community-based initiatives. The curriculum examines methods to effectively create and evaluate human services programs and explores interdisciplinary research and assessment techniques you can immediately apply to your organization.

Contact the graduate coordinator for more information or visit <http://fyys.ifas.ufl.edu/>.

Majors

- Family, Youth and Community Sciences (p. 39)
- Youth Development and Family Sciences (p. 41)

Faculty

Professor

- Diem, Keith
- Forthun, Larry F.
- Irani, Tracy Anne
- Radunovich, Heidi Liss
- Shelnutt, Karla Pagan
- Simonne, Amarat
- Swisher, Marilyn E.

Associate Professor

- Cantrell, Randall Alan
- Diehl, David Christopher
- Fogarty, Kate
- Gillen, Martie
- Harris, Victor
- Kumaran, Muthusami
- Lindsey, Angela B.
- Lynne, Sarah Delphia
- O'Neal-Rodrigues, LaToya Jonnese
- Pracht, Dale
- Ruiz, Jorge

Assistant Professor

- Abraczinskas, Michelle
- Campbell, Catherine G.
- Duncan, Jenee
- Riley, Tennisha N.
- Vilaro, Melissa J.
- Wiley, Kimberly Kay
- Zhang, Xiaoya

Other

- Duffy, Nicole Owens

Lecturer

- Johnson, Emily Rose

Family, Youth, and Community Sciences

Master of Science in Family, Youth and Community Sciences

The **Master of Science** in FYCS seeks to prepare students for careers in human services, youth professions, and community development in public, private, and nonprofit organizations. There are two degree options: thesis and capstone.

- The thesis option prepares students to conduct independent research needed to develop science-based solutions to problems, issues, and policies that affect families, youth, and communities. Students develop expertise in a subject matter area directly relevant to the problem or need they want to address with the thesis research.
- The capstone option provides the student with a broad base of knowledge and skills in the discipline and culminates in a capstone project in the student's final or penultimate semester. Completion of a community-based project that addresses an identified issue within the field of Family, Youth, and Community Sciences. Projects will vary based on student interests but will comply with expected professional and ethical standards. Students will also develop a professional portfolio and deliver a professional presentation. This course meets the graduate school requirement of the final comprehensive examination for a master's degree without thesis.

Students in the Master of Science program have the option to complete one of three concentrations:

- **Concentration in Nonprofit Organizational Development.** The concentration helps students build a foundation of skills to develop and sustain an effective nonprofit organization, including coursework that examines essential topics like governance, strategic planning, fundraising, risk management, and financial planning.
- **Concentration in Family and Youth Development.** The concentration helps students build the leadership skills needed to effectively develop, implement, and evaluate services and programs affecting youth and families within their communities.
- **Concentration in Community Studies.** This concentration prepares students to serve as leaders and managers for community-based organizations and programs.

Students both inside and outside the major may complete a **Graduate Certificate in Nonprofit Leadership**. This 12-credit certificate covers the core competencies of: governance, strategic planning, fundraising, human resources management, and risk management, as well as other emerging strategies.

An online professional development program in **Personal and Family Financial Planning** is available. The program is registered with the Certified Financial Planner™ Board of Standards to offer courses that cover education requirements for sitting for the CFP examination.

The Family, Youth and Community Sciences Department offers two minors for non-majors. The **Minor in Organizational Leadership for Nonprofits** introduces students to the core management and leadership competencies necessary to work in the nonprofit sector. The **Minor in Family, Youth and Community Sciences** provides students with knowledge about the theories and body of research that explain how families, youth, and communities develop and interact.

Combination program: The Department offers a combination bachelor's/master's degree program, which allows qualified students to earn both a bachelor's degree and a master's degree with a savings of up to 12 credits.

Degrees Offered

Degrees Offered with a Major in Family, Youth, and Community Sciences

- Master of Science
 - without a concentration
 - concentration in Community Studies
 - concentration in Family and Youth Development
 - concentration in Nonprofit Organizational Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Family, Youth and Community Sciences Departmental Courses

Code	Title	Credits
FYC 5935	Personal and Family Financial Planning Capstone	3
FYC 6026	Human Resource Management for Nonprofits	3
FYC 6105	Youth and Family Relationships	3

FYC 6111	Families and Violence	3
FYC 6117	Military Families in Community Context	3
FYC 6131	Ethics for FYCS Practitioners	3
FYC 6207	Adolescent Problematic Behavior	3
FYC 6221	Grant Proposals for Community-Based Organizations	3
FYC 6222	Parenting and Child Relationships	3
FYC 6223	Promoting Positive Youth Development	3
FYC 6230	Theories of Family Development, Systems and Change	3
FYC 6234	Theoretical Approaches to Youth Development	3
FYC 6235	Prevention Science in Youth Development and Family Science	3
FYC 6302	Sustainable Community Development	3
FYC 6320	Community Development and Civic Engagement	3
FYC 6330	Theories of Community Development	3
FYC 6421	Nonprofit Organizations	3
FYC 6424	Fund Raising for Community Nonprofit Organizations	3
FYC 6425	Risk Management in Nonprofit Organizations	3
FYC 6620	Program Planning and Evaluation for Human Service Delivery	3
FYC 6662	Public Policy and Human Resource Development	3
FYC 6800	Scientific Reasoning and Research Design	3
FYC 6802	Advanced Research Methods for Family, Youth, and Community Sciences	3
FYC 6804	Applied Data Analysis in Family, Youth and Community Sciences	3
FYC 6901	Problems in Family, Youth, and Community Sciences	1-3
FYC 6912	Nonthesis Project in Family, Youth, and Community Sciences	1-3
FYC 6920	Capstone Project	3

Student Learning Outcomes

Family, youth & community sciences (MS)

SLO 1 Analyze Problems, Issues and Needs

Use science-based research to analyze complex family, youth, or social problems, issues, and needs

SLO 2 Apply Theory and Research

Apply family, economic, or social theory and research to the analysis of policies and programs that affect families, youth, and communities

SLO 3 Analyze and Assess Needs, Issues and Problems

Analyze and assess the needs, issues and problems of families, youth, and communities

SLO 4 Impacts of Policies, Programs and Organizations

Develop, implement and analyze the impacts of policies, programs and organizations for families, youth, and communities

SLO 5 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, and teamwork

Youth Development and Family Sciences

Program Information

The Doctor of Philosophy in Youth Development and Family Sciences will prepare students to conduct high-impact research on youth, their families, and the communities in which they live. Graduates will be trained to become faculty members in academic departments such as human development and family studies, family and consumer sciences, community resource development, community psychology, and prevention science, as well as for research positions in the public and private sectors. Research in this field considers the influence of risk and protective factors, human growth and development, interpersonal and family processes and systems, and community contexts on the behavioral, psychosocial, and socio-emotional well-being of children, adolescents, and emerging adults. Students can also elect to learn how to build partnerships with local community organizations using participatory and community engaged approaches to research. Students will be able to apply this knowledge to the development and rigorous evaluation of prevention and promotion programs and activities, and contribute to systems and policy changes to benefit youth and families.

Students in the Doctor of Philosophy YDFS program have the option to complete one concentration:

Concentration in Clinical and Translational Science (CTS). This 14 credit-hour concentration was designed to provide PhD scientists in a variety of disciplines with the knowledge, skills and attitudes to support future career goals related to clinical and translational research. This concentration requires an application to UF's Clinical and Translational Science Institute outside the Family, Youth and Community Sciences department.

Degrees Offered

Degrees Offered with a Major in Youth Development and Family Science

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science (CTS)

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

YOUTH DEVELOPMENT & FAMILY SCIENCES (PhD)

SLO 1 Knowledge

Students analyze and synthesize the existing scientific literature in all 3 priority areas: 1.) Youth Development or Family Sciences; 2. Research Methods, Statistics; 3. Area of Specialization.

SLO 2 Skills

Students analyze and synthesize theoretical and empirical research on complex problems and propose strategies for advancing their research by applying appropriate research methods, statistics, and analysis.

SLO 3 Professional Behavior

Students interact with honesty and ethical behavior, including cultural sensitivity and attention to issues of diversity in all its forms.

Food and Resource Economics Department

Chair: L. House

Graduate Coordinator: Z. Gao

The Food and Resource Economics Department offers the Master of Agribusiness (M.AB) (non-thesis), Master of Science with Concentration in Agribusiness (M.S.AB.) (non-thesis), Master of Science (thesis), and Doctor of Philosophy. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Department participates in programs with the Center for Latin American Studies, the Center for African Studies, the Center for Tropical Agriculture, the School of Natural Resources and Environment, the College of Law, and the Florida Sea Grant College Program.

The Department programs reflects the diversity of Florida's agriculture which has more than fifty major commodities. With over thirty faculty involved in a full range of research, extension, and teaching programs in areas including Agricultural Marketing, International Trade, Policy, Production/Farm Management, International Development, Marine Economics, Natural Resource and Environmental Economics, Community/Regional Development and Labor Economics. In addition to the main campus location, the department has faculty at research centers throughout the state.

Several members of the faculty have garnered international reputations in diverse fields such as trade policy, generic advertising, citrus economics, sugar policy, business retention and expansion, leadership development, consumer attitudes towards genetically modified food, and dairy marketing.

The Department offers a combination bachelor's/master's degree program for the Master of Science and Master of Science with Concentration in Agribusiness. Contact the Graduate Program Office in 1179 McCarty Hall for information.

For more information, please see the program pages below, and see our website: <http://www.fred.ifas.ufl.edu>.

Food and Resource Economics

Program Information

The Food and Resource Economics Department offers the Master of Agribusiness (M.AB.) (non-thesis), Master of Science with Concentration in Agribusiness (M.S.AB.) (non-thesis), Master of Science (thesis), and Doctor of Philosophy.

The **Ph.D. in Food and Resource Economics** is designed to provide the student with rigorous training in economics, statistics, and applied quantitative techniques. Each student is exposed to core theory and to fields of specialization with the purpose to prepare the candidate for a professional career in post-secondary education, government, non-governmental organizations, private business, and international agencies.

The **Master of Agribusiness** is designed for students with no academic background in economics. Students who come from diverse academic backgrounds including Accounting, Agricultural Education and Communication, Agricultural Operations Management, Agronomy, Animal Science, Business Administration, Finance, English, Food Science, History, Horticulture, Management, Marketing, Soil and Water Science, Turfgrass, and Wildlife Ecology and Conservation. The graduate coursework prepares students for careers in banking, investing, financial analysis, sales, management, marketing, human resources, policy, production, and entrepreneurial pursuits working in private industry, international firms, non-profit organizations and government.

The **Master of Science** in the Food and Resource Economics Department provides broad training in applied economics as it relates to food production, policy, marketing and trade, regional economics, and natural resource issues. Students are taught to use economic principles and quantitative methods to address empirical problems. The core consists of courses in microeconomics, policy, econometrics, statistics and survey research methods. Many students continue their education with a Ph.D. while others opt for employment with government agencies, nongovernmental organizations, foreign agencies, private consulting firms, or corporations.

The **Master of Science with Concentration in Agribusiness** is designed for students with an academic background in economics. The quantitative courses include microeconomics, policy, econometrics and survey research methods and provide solid economic theory and prepares students for careers in banking, investing, financial analysis, sales, management, marketing, human resources, policy, production, and entrepreneurial pursuits working in private industry, international firms, non-profit organizations and government.

For more information, please see our website: <http://www.fred.ifas.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Food and Resource Economics

- Doctor of Philosophy
 - without a concentration
 - with a concentration in Tropical Conservation and Development
- Master of Agribusiness
 - without a concentration
 - with a concentration in Tropical Conservation and Development
- Master of Science

- without a concentration
- with a concentration in Agribusiness
- with a concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Food and resources economics (PHD)

SLO 1 Knowledge

Explain relevant economic principles and apply economic theory to address problems relevant to agriculture and natural resources

SLO 2 Skills

Identify relevant economic problem, propose and complete an original research project, and effectively communicate results to appropriate audiences (including off campus)

SLO 3 Professional Behavior

Display honesty and integrity in research, the classroom and professional activities

Food and resources economics (MAB)

SLO 1 Principles Relating to Food and Agribusiness Firms

Explain principles of economics, management, marketing, finance, quantitative analysis and policy as they apply to food and agribusiness firms

SLO 2 Solve Management Problems

Apply, analyze and synthesize content knowledge to solve management problems faced by food and agribusiness firms

SLO 3 Display Honesty and Integrity

Display honesty and integrity in research, the classroom, and professional activities

Food and resources economics (MS)

SLO 1 Explain Relevant Economic Principles

Explain relevant economic principles and apply economic theory and tools to address problems relevant to agriculture and natural resources

SLO 2 Develop, Complete and Present Research Project

Identify relevant economic problem, complete research project, and effectively communicate results to an appropriate audience

SLO 3 Professional Behavior

Display honesty and integrity in the classroom, research and professional activities

Food Science and Human Nutrition Department

Chair: R. Goodrich-Schneider

Graduate Coordinators: C. Sims & R.E. Turner

The Food Science and Human Nutrition Department (FSHN) is one of the world's largest combined academic programs where food science, nutritional sciences, and dietetics are all studied within one department. FSHN has nearly 30 full-time faculty members, 80 graduate assistants, and close to 1,000 undergraduate students. Our programs are accredited by the Institute of Food Technologists (<http://www.ift.org/>) (IFT) and the Accreditation Counsel for Education in Nutrition and Dietetics (ACEND) (<http://www.eatrightacend.org/ACEND/>). After completing undergraduate degrees, our students typically move on to professional employment, further education or training in food or nutrition graduate programs, or on to professional school programs. We have a strong record of excellent placement of our graduate students in industry and professional organization employment positions, as faculty members at colleges and universities, or in postdoctoral training experiences.

Our faculty has trained at institutions from around the world; they have been widely successful in their teaching, research, and extension efforts. Throughout our programs in food science, nutrition, and dietetics, our faculty is recognized nationally and internationally as experts in their respective fields.

The Food Science and Human Nutrition Department offers programs leading to the degrees of Master of Science in Food Science and Human Nutrition, Doctor of Philosophy in Food Science, and Doctor of Philosophy in Nutritional Sciences (offered under the auspices of the Center for Nutritional Sciences (<http://nutritionalsciences.centers.ufl.edu/>)). Minimum requirements for these degrees are located in the Graduate Degrees section of this catalog.

For more information, please click the links to the program pages below, or see our website: <http://fshn.ifas.ufl.edu>.

Food Science

Program Information

The Ph.D. program in Food Science is a multidisciplinary program consisting of Food Chemistry, Food Processing and Engineering, and Food Microbiology and Safety. Students are expected to obtain a breadth

of food science knowledge by taking courses in all program areas with the majority of courses stressing one of the three areas of emphasis.

For further information, please see our website at: <http://fshn.ifas.ufl.edu>.

Degrees Offered

Degrees Offered With a Major in Food Science

- Doctor of Philosophy
 - without a concentration
 - concentration in Toxicology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Food science

SLO 1 Knowledge
Explain and apply components and interactions of food and health.

SLO 2 Skills
Use critical thinking to evaluate research design and experiments and the scientific literature.

SLO 3 Skills

Identify appropriate research methodologies, execute a research plan and interpret results for the discovery of new information.

SLO 4 Professional Behavior

Interact with professional peers, faculty, and staff with honesty, ethical behavior, respect, fellowship, and cooperation.

Food Science and Human Nutrition

Program Information

The M.S. program offers tracks in food science and in nutritional sciences. The Institute of Food Technologists and the American Society for Nutrition recognize these concentrations. The department also offers a combination Master of Science-Dietetics Internship (MS-DI) program accredited by the Accreditation for Education in Nutrition and Dietetics (ACEND) (<https://www.eatrightpro.org/acend/>). Students who complete this program are eligible to take the national registration examination to become registered dietitians. Only graduates from an ACEND accredited/approved Didactic Program in Dietetics are eligible for the MS-DI program.

Specific areas of study include nutritional biochemistry/molecular biology, nutrient function/metabolism, medical nutrition therapy/dietetics, nutritional immunology, food processing/engineering, food chemistry/biochemistry, and food safety/microbiology/quality.

Applicants must have an adequate background in physical and biological sciences and food science or nutritional sciences. Students with specific deficiencies will be required to take prerequisite courses.

For further information, please see our website at <http://fshn.ifas.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Food Science and Human Nutrition

- Master of Science
 - without a concentration
 - concentration in Nutritional Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Food Science and human nutrition (MS)

SLO 1 Knowledge

Explain and apply components and interactions of food and health.

SLO 2 Skills

Use critical thinking to evaluate research design and experiments and the scientific literature.

SLO 3 Skills

Identify appropriate research methodologies, execute a research plan and interpret results for the discovery of new information.

SLO 4 Professional Behavior

Interact with professional peers, faculty, and staff with honesty, ethical behavior, respect, fellowship, and cooperation.

Nutritional Sciences

Program Information

The field of nutritional science has unprecedented public interest. This is fostered by evolving links between diet and health, and the impact of one's individual genetic makeup on nutrient utilization. The Ph.D. degree program in Nutritional Sciences is interdisciplinary, with participating CALS, COM, CLAS, and CVM faculty directing research of doctoral students, where the full spectrum of Nutritional Sciences is available. Emphasis areas include basic nutritional sciences, biochemistry and molecular biology, genetics, immunology, physiology, clinical nutrition, microbiology, and biostatistics.

Students are admitted to the program after the bachelor's degree or a master's degree in nutritional sciences or a related field. Applicants should have a strong undergraduate background in biological sciences and chemistry. Deficiencies may be made up during the first year of graduate study.

Additional information can be found at <http://nutritionalsciences.centers.ufl.edu>.

For additional information, e-mail Dr. Wendy Dahl, Director at wdahl@ufl.edu, or Dr. Elaine Turner, Graduate Coordinator at returmer@ufl.edu.

Student Learning Outcomes

Nutritional sciences

SLO 1 Articulate Fundamental Knowledge

Articulate (in oral and written form) fundamental knowledge in nutrition, physiology, biochemistry, molecular biology, genetics and genomics.

SLO 2 Research in Nutritional Sciences

Analyze, interpret and evaluate research in nutritional sciences.

SLO 3 Discovery of New Information

Plan, organize and conduct research for the discovery of new information.

SLO 4 Professional Behavior

Display ethical behavior in all areas of conduct; interact with peers, faculty and staff with respect, fellowship and cooperation.

Horticultural Sciences Department

Chairs: C. Gunter (Chair, Horticultural Sciences) and L. House (Interim Chair, Environmental Horticulture)

Graduate Coordinators: C. Vallejos (Horticultural Sciences) and G. Hansen (Environmental Horticulture)

The Horticultural Sciences Department Graduate Program at the University of Florida has a wide array of opportunities for graduate study.

The Horticultural Sciences (HOS) graduate program is administered jointly by the Environmental Horticulture (HSE) and Horticultural Sciences (HS) departments and offers graduate programs leading to the Master of Science (thesis or nonthesis options) and the Doctor of Philosophy degrees. Members of the program's Graduate Faculty include department resident faculty and faculty at the University of Florida Research and Education Centers located throughout Florida.

The Horticultural Sciences Department offers a combination bachelor's/master's degree program. Please contact the graduate coordinator for information.

For admission to the HOS graduate program, apply to either the HS or HSE departments, depending on your career/research interest. Details about the program and how to apply are listed on their website:

HOS <http://hos.ufl.edu>

HSE <https://hort.ifas.ufl.edu/environmental-horticulture-graduate-program/>

Majors

- Horticultural Sciences (p. 52)
- Plant Breeding (p. 55)

Faculty

Professor

- Boyd, Nathan S.
- Brecht, Jeffrey K.
- Chen, Jianjun

- Crane, Jonathan H.
- Folta, Kevin M.
- Gmitter, Frederick G.
- Grosser, Jude William
- Gunter, Christopher C.
- Koch, Karen E.
- Mccarty, Donald R.
- Messina, Carlos D.
- Moore, Kimberly
- Ritenour, Mark A.
- Sargent, Steven Alonzo
- Schaffer, Bruce A.
- Simonne, Eric H.
- Vallejos, Carlos E.
- Vendrame, Wagner Aparecido
- Whitaker, Vance M.
- Williamson, Jeffrey G.
- Zhao, Xin
- Zotarelli, Lincoln

Associate Professor

- Agehara, Shinsuke
- Albrecht, Ute
- Alferez, Fernando Miguel
- Basset, Gilles J.
- Chaparro, Jose Xavier
- Chase, Carlene Ann
- Dittmar, Peter J.
- Hutton, Samuel F.

- Wang, Jianping
Professor
- Wang, Xu
Assistant Professor
- Wu, Xingbo
Assistant Professor

- Physiology and Biochemistry
- Plant Molecular Biology
- Protected Agriculture

Numerous HS and HSE faculty participate in the interdisciplinary Plant Molecular and Cellular Biology Program. Students interested in molecular biology/biotechnology may pursue molecular-oriented studies in any listed specialization. Students interested in full specialization in molecular and related disciplines should contact the Plant Molecular and Cellular Biology interdisciplinary program for specific requirements.

Specializations in the HSE department:

- Breeding and Genetics
- Restoration Ecology
- Floriculture
- Foliage Production
- Plant anatomy and development
- Plant Biotechnology
- Plant Restoration Conservation Biotechnology
- Stress Physiology
- Taxonomy
- Tissue Culture
- Turfgrass Science
- Woody Plants

Horticultural Sciences

Program Information

The Horticultural Sciences (HOS) graduate program is administered jointly by the Environmental Horticulture (HSE) and Horticultural Sciences (HS) departments and offers graduate programs leading to the Master of Science (thesis or nonthesis options) and the Doctor of Philosophy degrees. The Department offers a combination bachelor's/master's degree program. Contact the graduate coordinator for information. Members of the program's Graduate Faculty include department resident faculty and faculty at University of Florida Research and Education Centers located throughout Florida.

For admission to the HOS graduate program, apply to either the HS or HSE departments, depending on your career/research interest.

Requirements

A strong undergraduate or graduate background in horticultural, biological, agronomic, or other disciplines in the life sciences and undergraduate coursework in chemistry, physics, and mathematics. A prospective graduate student need not have majored in horticulture as an undergraduate or master's student; however, students with curriculum deficiencies are required to take prerequisite subjects during the first year of graduate study. Undergraduate courses taken to correct curriculum deficiencies do not count for graduate program credit.

Specializations in the HS department focus on vegetable and fruit crops and include

- Plant Breeding and Genetics
- Crop Production and Nutrient Management
- Postharvest Biology
- Organic Sustainable Agriculture
- Weed Science

Graduate School Degree Program Requirements Master of Science (Thesis Option)

Students must earn at least 30 credits as a graduate student at UF. No more than 9 of the 30 credits (earned with a grade of A, B+, or B) may be transferred from institutions approved for this purpose by the Dean of the Graduate School. A minimum of 12 credits is required in the Horticultural Sciences major; additionally, a maximum of 6 credits in HOS 6971 Research for Master's Thesis (1-15 cr.)- Master's Research - may be counted toward the total credits. See here for information on M.S. graduate degrees (p. 778).

A minor may be chosen in an academic unit other than the major. If a minor is chosen, at least 6 credits of course work are required in the minor field. Two 6-credit minors may be taken with the major academic unit's permission. A 3.00 (truncated) GPA is required for minor credit. In addition, a representative from the department in which the minor is being received must be on the supervisory committee.

Master of Science Non-Thesis Option

This option offers additional training beyond the bachelor's degree in a horticultural specialization. Essential elements of this program include a program of courses and a comprehensive written and/or final oral qualifying examination. There is no thesis requirement. A minimum of 30 credit hours of course work is required. Courses taken for program credit must be numbered 5000 or higher with at least 15 of these credits in the Horticultural Science major. With supervisory committee and college dean approval, 6 hours of 3000- or 4000-level undergraduate courses, taught outside the major department, may count toward the minimum requirements for the degree. Click for information on all graduate degrees (p. 778).

A minor may be chosen in an academic unit other than the major. If a minor is chosen, at least 6 credits of work are required in the minor field. Two 6-credit minors may be taken with the major academic unit's

permission. A 3.00 (truncated) GPA is required for minor credit. In addition, a representative from the department in which the minor is being received must be on the supervisory committee.

Doctor of Philosophy

The Doctor of Philosophy is a research degree and is granted on evidence of general proficiency, distinctive attainment in a special field, and ability to conduct independent investigation as demonstrated in a dissertation presenting original research with a high degree of literary skill. Consequently, doctoral programs are more flexible and varied than those leading to M.S. degree programs. The Ph.D. degree requires at least 90 credits beyond the bachelor's degree, although specific course requirements vary from field to field and from student to student. Up to 30 credits of master's degree may be transferred to a doctoral program. Any credits counted from an M.S. degree program must have been earned within the previous seven years (or by petition). The Graduate Council does not specify the courses required for the Ph.D. degree.

General requirements for the program include

- a clear objective for research
- approval of the student's entire supervisory committee
- an appropriate number of credits of doctoral research

Click for information on all graduate degrees (p. 778).

Minor

With the supervisory committee's approval, the student may choose one or more minor fields. Minor work may be completed in any academic unit outside the major, if approved for M.S. or doctoral programs listed in this catalog. The collective grade for courses included in a minor must be "B" (3.00) or higher. If one minor is chosen, the supervisory committee member representing the minor suggests 12 to 24 credits of courses numbered 5000 or higher as preparation for a qualifying examination. Part of this credit may have been earned in the M.S. degree program. If two minors are chosen, each must include at least 8 credits. Competence in the minor area is demonstrated by written examination by the minor academic unit, or by the oral qualifying examination. Minor course work at the doctoral level may include courses in more than one academic unit; if the objective of the minor is clearly stated and the combination of courses is approved by the Graduate School (this approval is not required for a minor in one academic unit). Further requirements for the Master of Science and the Doctor of Philosophy degrees are listed under those headings in the General Information section of this catalog.

Degrees Offered

Degrees Offered with a Major in Horticultural Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Environmental Horticulture
 - concentration in Horticultural Sciences
 - concentration in Toxicology
- Master of Science
 - without a concentration
 - concentration in Environmental Horticulture
 - concentration in Horticultural Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

STA 6093	Introduction to Applied Statistics for Agricultural and Life Sciences	3
STA 6329	Matrix Algebra and Statistical Computing	3

Student Learning Outcomes

horticultural sciences (PHD)

- **SLO 1 (Knowledge):** Describe and explain theories and concepts of the various disciplines of Horticultural Sciences, including plant physiology and plant genetics as related to horticultural plant growth and development, and the integration of structure and function of the whole plant
- **SLO 2 (Knowledge):** Describe new techniques and technologies from associated disciplines
- **SLO 3 (Knowledge):** Evaluate horticultural systems, components, and/or processes to meet industry and societal needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints
- **SLO 4 (Skills):** Design and conduct experiments required for the successful production of fruit and vegetable crops, and analyze results
- **SLO 5 (Skills):** Communicate horticultural ideas, technical data, and design information clearly and professionally to other students, scientists, and the public
- **SLO 6 (Professional Behavior):** Display ethical behaviors, cultural sensitivity, teamwork skills, and professional conduct

Horticultural Sciences (MS)-Horticultural Sciences

- **SLO 1 (Knowledge):** Describe and explain theories and concepts of the various disciplines of Horticultural Sciences, including plant physiology and plant genetics as related to horticultural plant growth and development, and the integration of structure and function of the whole plant

- **SLO 2 (Knowledge):** Describe new techniques and technologies from associated disciplines
- **SLO 3 (Knowledge):** Evaluate horticultural systems, components, and/or processes to meet industry and societal needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints
- **SLO 4 (Skills):** Design and conduct experiments required for the successful production of fruits and vegetables, and analyze results
- **SLO 5 (Skills):** Communicate horticultural ideas, technical data, and design information clearly and professionally to other students, scientists, and the public
- **SLO 6 (Professional Behavior):** Display ethical behaviors, cultural sensitivity, teamwork skills, and professional conduct

Horticultural Sciences (MS)- Environmental Horticulture

- **SLO 1 (Knowledge):** Describe and explain theories and concepts of the various disciplines of Horticultural Sciences, including plant physiology and plant genetics as related to horticultural plant growth and development, and the integration of structure and function of the whole plant.
- **SLO 2 (Knowledge):** Evaluate and advance horticultural systems, components, and/or processes to meet industry and societal needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- **SLO 3 (Knowledge):** Describe techniques and technologies from associated disciplines as applied to Environmental Horticulture
- **SLO 4 (Skills):** Design, conduct, and evaluate experiments or studies required to advance or improve the production and/or management of horticultural crops, and analyze results
- **SLO 5 (Skills):** Communicate in written and oral form horticultural ideas, technical data, and design information clearly and professionally to other students, scientists, and the public
- **SLO 6 (Professional Behavior):** Display ethical behaviors, cultural sensitivity, teamwork skills, and professional conduct

Plant Breeding PROGRAM INFORMATION

Program Director: E. Rios

Program Coordinator: E. Kampf

Plant Breeding is an interdisciplinary and interdepartmental graduate program that provides comprehensive training to prepare well-rounded and career-ready plant breeders for academic, industry, non-profit and other sectors. Our integrated curriculum equips students with traditional and contemporary breeding methodologies, including analysis of breeding trials, breeding methods and techniques, bioinformatics, gene editing, genomic prediction and quantitative genetics.

The Plant Breeding Graduate Program offers a Doctor of Philosophy degree that provides students with a strong background in experimental design and analysis during the first semester, and plant breeding theory and methods during the second semester. Our plant breeding faculty work with 50 plant species and represent diverse disciplines including: cell biology, genomics, molecular genetics, plant pathology, quantitative genetics & biometrics. For a complete faculty listing, please see the last page of this document.

To graduate in the program, students are required to have a minimum of 40 credits of coursework toward their major. Students must take all the 7 required courses listed below for a total of 20 credits of required courses and must additionally choose a minimum of 20 additional credits from the list of elective courses.

Minimum requirements for this degree are available in the Graduate Degrees (<http://gradcatalog.ufl.edu/content.php?catoid=12&navoid=2748>) section of this catalog. Successful applicants should have a B.S. or M.S. in agricultural, horticultural, forestry, biological or chemical sciences with desirable advanced undergraduate coursework in genetics, statistics, plant breeding, and biochemistry. However, outstanding students from a broad range of science and engineering disciplines will be considered.

All doctoral students must have at least one first author publication submitted to a peer-reviewed journal in their research field before graduation. Our students are strongly encouraged to publish before graduating.

Contact program director Dr. Esteban Rios at estebanrios@ufl.edu or 352-301-2244

Contact program coordinator Eliana Kampf at elianak@ufl.edu or 352-273-4760

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN PLANT Breeding

- Doctor of Philosophy

Courses

PLANT Breeding COURSES

The Plant Breeding Ph.D. degree will require a minimum of 90 post-baccalaureate credit hours and will include required courses, elective courses and dissertation research. To graduate in the program, students are required to have a minimum of 40 credits of coursework toward their major. All students are required to take 20 credits of required courses and must additionally choose a minimum of 20 additional credits from the list of elective courses.

Students must take the following 20 credits of required courses toward the Plant Breeding major:

REQUIRED COURSES

Code	Title	Credits
AGR 5266C	Field Plot Techniques	3
AGR 5321C	Genetic Improvement of Plants	3
AGR 6325L	Plant Breeding Techniques	1
Students can take AGR 6325L any spring semester of odd years in coordination with their supervisory committee.		
HOS 6932	Special Topics	1-4
Students need to take a total of 7 credits of HOS 6932 Special Topics: HOS 6932 Survey of Breeding Tools and Methods (3 credits) and a minimum of 4 credits of HOS 6932 Journal Colloquium (1 credit) toward the major. HOS 6932 can be taken any fall and spring semester.		
PCB 6555	Introduction to Quantitative Genetics	3
Students can take PCB 6555 any fall semester of even years in coordination with their supervisory committee.		

STA 6093	Introduction to Applied Statistics for Agricultural and Life Sciences	3

Students must choose a minimum of 20 credits from the list of electives below:

ELECTIVE COURSES

Code	Title	Credits
AGR 5307	Molecular Genetics for Crop Improvement	3
AGR 6305	Plant Chromosomes and Genomes	3
AGR 6322	Advanced Plant Breeding	3
AGR 5444	Ecophysiology of Crop Production	3
BCH 5045	Graduate Survey of Biochemistry	4
ENY 5006	Graduate Survey of Entomology	3
ENY 5006L	Graduate Survey of Entomology Laboratory	1
HOS 5242	Genetics & Breeding of Vegetable Crops	3
HOS 6201	Breeding Perennial Cultivars	3
HOS 6236	Molecular Marker Assisted Plant Breeding	3
HOS 6295	Methods in Plant Biotechnology	3
HOS 6932	Special Topics	1-4
HOS 6991	Fundamentals of Seed Biology	4
NEM 5004C	Graduate Survey of Nematology	3
PCB 5065	Advanced Genetics	4
PCB 5530	Plant Molecular Biology and Genomics	3
PCB 6685	Population Genetics	4
PLP 5005C	General Plant Pathology	4
PLP 6291	Plant Disease Diagnosis	3

Students admitted with an M.S. degree may be able to transfer up to 30 credits toward their elective courses requirement from a regionally accredited institution or international equivalent, subject to existing UF Graduate School policies.

The number of dissertation research credits will vary according to the student's field of study and progression toward research and degree.

Agronomy Departmental Courses

Code	Title	Credits
AGR 5230C	Florida Grassland Agroecosystems	4
AGR 5266C	Field Plot Techniques	3
AGR 5277C	Tropical Crop Production	3
AGR 5307	Molecular Genetics for Crop Improvement	3
AGR 5321C	Genetic Improvement of Plants	3
AGR 5444	Ecophysiology of Crop Production	3
AGR 5511	Crop Ecology	3
AGR 6233	Tropical Grassland Agroecosystems	3
AGR 6237C	Research Techniques in Forage Evaluation	3
AGR 6305	Plant Chromosomes and Genomes	3
AGR 6322	Advanced Plant Breeding	3
AGR 6325L	Plant Breeding Techniques	1
AGR 6422C	Environmental Crop Nutrition	3
AGR 6442C	Physiology of Agronomic Plants	4
AGR 6905	Agronomic Problems	1-5
AGR 6913	Supervised Extension-Agronomy	3
AGR 6932	Topics in Agronomy	1-3
AGR 6933	Graduate Agronomy Seminar	1
AGR 6940	Supervised Teaching	1-5
AGR 6971	Research for Master's Thesis	1-15
AGR 7306	Multi-Omic Integration for Applied Prediction Breeding	3
AGR 7979	Advanced Research	1-12
AGR 7980	Research for Doctoral Dissertation	1-15
ALS 5155	Global Agroecosystems	3

ALS 5932	Special Topics	1-4
ALS 6031	Project Team Research: Building Skills in Agrobiology	3
IPM 5305	Principles of Pesticides	3
PLS 5625	Upland Invasive Plant Management	3
PLS 5632C	Integrated Weed Management	3
PLS 5633	Aquatic Plant Management	3
PLS 6626	Invasive Plant Ecology	3
PLS 6655	Plant/Herbicide Interaction	3

Environmental Horticulture Departmental Courses

Code	Title	Credits
ALS 5934	Graduate Professional Development Seminar	2
BCH 5045	Graduate Survey of Biochemistry	4
HOS 5117C	Horticultural Plant Morphology and Identification	3
HOS 5432	Advanced Nutritional Management of Ornamental Crops	3
HOS 5515C	Greenhouse and Nursery Operations	3
HOS 5516C	Cultivation, Extraction, and Application of Medicinal Plants and Their Bioactive Compounds	3
HOS 6070	Plant Materials for Conservation and Restoration	3
HOS 6295	Methods in Plant Biotechnology	3
HOS 6523	Research and Development in Turfgrass Science	3
HOS 6905	Problems in Horticultural Science	1-4
HOS 6910	Supervised Research	1-5
HOS 6931	Horticultural Science Seminar	1
HOS 6932	Special Topics	1-4
HOS 6940	Supervised Teaching	1-5
HOS 6941	Practicum in Horticultural Science	2-4
HOS 6971	Research for Master's Thesis	1-15
HOS 6991	Fundamentals of Seed Biology	4
HOS 7979	Advanced Research	1-12
HOS 7980	Research for Doctoral Dissertation	1-15
ORH 5026C	Advanced Annual and Perennial Gardening	3
ORH 5086	Advanced Golf and Sports Turf Management	2
ORH 5282	Orchid Biology and Culture	3
ORH 5817C	Advanced Florida Native Landscaping	3
PLS 5222C	Propagation of Horticultural Crops	3
PLS 5241C	Advanced Plant Micropropagation	4

Horticultural Sciences Departmental Courses

Code	Title	Credits
ALS 5932	Special Topics	1-4
HOS 5085C	Principles of Postharvest Horticulture	3
HOS 5242	Genetics & Breeding of Vegetable Crops	3
HOS 5330	Postharvest Technologies for Horticultural Crops	2
HOS 5505	Getting Published Horticulture	3
HOS 5555	Tropical Fruit Production and Research in Florida	3
HOS 5711	Phytochemicals in Food & Health	3
HOS 6201	Breeding Perennial Cultivars	3
HOS 6236	Molecular Marker Assisted Plant Breeding	3

Research Credits

Code	Title	Credits
PLS 7979	Advanced Research	1-12
PLS 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Plant Breeding (PHD)

- **SLO 1 (Knowledge):** Students explain and apply fundamental theory and principles of plant breeding, such as genetics and genomics, plant biochemistry, plant transformation technologies, and computational genetics.
- **SLO 2 (Knowledge):** Students apply genetic inheritance theory to crops of interest and develop a research proposal and a dissertation for a targeted crop/trait/method based on the biology of the crop and the technology available.
- **SLO 3 (Skills):** Students use critical thinking to revise scientific literature and to evaluate, plan, analyze, and design experiments related to plant breeding and cultivar development.
- **SLO 4 (Skills):** Students prepare and complete plant breeding research of sufficient quality to be published in peer-reviewed journals.
- **SLO 5 (Skills):** Students communicate plant breeding knowledge effectively and clearly in oral form to peers, scientists, industry, producers, and the general public.
- **SLO 6 (Professional Behavior):** Students interact with peers, faculty, and staff with honesty, respect, ethical behavior, cultural sensitivity, fellowship, and cooperation.

Microbiology and Cell Science Department

Chair: E. Triplett

Graduate Coordinator: J. Maupin

Graduate study is offered leading to the Master of Science and Doctor of Philosophy degrees in microbiology and cell science, with emphasis

in one or more of the disciplines of biochemistry, cell biology, and microbiology.

Requirements for these degrees are provided in the Graduate Degrees (p. 778) section of this catalog and also on the Department webpage: <http://microcell.ufl.edu/>. (<http://microcell.ufl.edu/>)

Instruction and guidance are collaborative among faculty in the Colleges of Agricultural and Life Sciences, Liberal Arts and Sciences, and Medicine.

Research spans broad areas in the cellular and molecular aspects of bacterial, plant, and animal life functions. Areas of research include microbial biochemistry, biotechnology, biomass conversion, genetic and metabolic regulation, environmental microbiology, cell biology, molecular biology, molecular genetics, genomics and bioinformatics, immunology, virology, parasitology, host-pathogen interactions, cellular ultrastructure.

Prerequisites for admission to graduate study, in addition to those of the Graduate School, are a broad educational background including mathematics, physics, and chemistry through organic, analytical, and physical chemistry; basic courses in biology, botany, and/or zoology; and at least one course in microbiology and biochemistry. An undergraduate major in biochemistry, physical or chemical science, engineering, or general biology may be an acceptable alternative to a degree in microbiology or cell science. Receipt of an advanced degree requires detailed knowledge of microbiology, biochemistry, and chemistry; undergraduate deficiencies may necessitate additional coursework prior to entry into the graduate program.

Majors

- Microbiology and Cell Science (p. 59)

Faculty

Professor

- Christner, Brent Craig
- De Crecy, Valerie Anne
- Foster, Jamie S.
- Gonzalez, Claudio F.
- Lorca, Graciela L.
- Maupin, Julie A.
- Mou, Zhonglin
- Triplett, Eric
- Vermerris, Willem

Associate Professor

- Ferraro, Mariola Jadwiga
- Kima, Peter Epeh
- Larkin, Joseph
- Rice, Kelly C.
- Wang, Xin
- Wurdig Roesch, Luiz Fernando

Assistant Professor

- Aversch, Nils Jonathan Helmuth
- Chevrette, Marc G.
- Czyz, Daniel M.

- De Anda Torres, Valerie Yselle
- Dias, Raquel
- Doore, Sarah M.
- Fernandez Garcia, Jessie
- Jones, Melissa Kolsch
- Martens-Habbena, Willm Abben
- Moreira Passalacqua, Luiz Fernando
- Rolando Betancou, Jose L.
- Square, Tyler A.
- Zhao, Meixia

Eminent Scholar

- Wang, Nian

Microbiology and Cell Science

Program Information

The Department of Microbiology and Cell Science offers a top-10 education for students who wish to earn their M.S. or Ph.D. in Microbiology and Cell Science. Graduates are well prepared to pursue careers in government, industry, research and teaching in microbiology, cell biology, cellular biochemistry, and molecular genetics. For more information on how to apply for these programs, please visit our Microbiology and Cell Science Graduate Program Website – <http://microcell.ufl.edu/graduate-program/#> (<http://microcell.ufl.edu/graduate-program/>).

Currently there are 25 tenure eligible faculty positions staffed, 2 emeritus faculty, 5 non-tenure eligible faculty, 16 post-doctoral fellows, over 56 graduate students, and 2 full time academic advisors. Most faculty are involved in both teaching and research programs that complement one another. The faculty's research programs span areas of broad interest in the cellular and molecular aspects bacterial, plant and animal life functions. Areas of research include:

- Microbial Biochemistry, Physiology, Metabolism and Regulation
- Molecular Biology

- Molecular Genetics
- Immunology
- Virology
- Host-pathogen Interactions
- Environmental Microbiology
- Bioinformatics
- Functional and Comparative Genomics
- Astrobiology
- Human Parasitology
- Cellular Ultrastructure and Function
- Microbial Communities
- Microbial Processing of Plant Biomass

For more information, please see our website: <http://microcell.ufl.edu>.
For Microbiology and Cell Science Academic Advising, contact Jacqueline Lee at 352-846-1330 or jlee9@ufl.edu.

Degrees Offered

Degrees Offered with a Major in Microbiology and Cell Science

- Doctor of Philosophy
 - without a concentration
 - concentration in Microbial and Cellular Data Science
 - concentration in Toxicology
- Master of Science
 - without a concentration
 - concentration in Medical Microbiology and Biochemistry
 - concentration in Microbiome in Health & Disease

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Microbiology & Cell science (PHD)

SLO 1 Knowledge

Describe orally and in writing, the molecular genetic, biochemical and cellular basis of life

SLO 2 Skills

Discuss orally and in writing, research methodologies for applying the scientific method to the generation of new knowledge

SLO 3 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork, and effective communication.

Microbiology & Cell science (MS)

SLO 1 Knowledge

Describe in writing and orally, the molecular genetic, biochemical and cellular basis of life

SLO 2 Skills

Discuss orally and in writing, research methodologies for applying the scientific method to the generation of new knowledge.

SLO 3 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork, and effective communication.

Plant Molecular and Cellular Biology Department

Plant Molecular and Cellular Biology (PMB) currently has 45 faculty members in the program. They are based in the departments of Agronomy (<http://agronomy.ifas.ufl.edu/>), Biology (<http://web.botany.ufl.edu/>), Environmental Horticulture (<https://hort.ifas.ufl.edu/>), Forest Resources and Conservation (<http://sfrc.ufl.edu/>), Horticultural Sciences (<https://hos.ifas.ufl.edu/>), Microbiology and Cell Science (<http://microcell.ufl.edu/>), Molecular Genetics and Microbiology (<http://mgm.ufl.edu/>), and Plant Pathology (<https://plantpath.ifas.ufl.edu/>) within the colleges of Agriculture and Life Sciences (<https://cals.ufl.edu/>), Medicine (<https://med.ufl.edu/>), and Liberal Arts and Sciences (<https://clas.ufl.edu/>).

Plant Molecular and Cellular Biology (CALS)

Program Information

Director: Dr. Svetlana Folimonova

Graduate Coordinator: Dr. Gilles Basset

Program Coordinator: Eliana Kampf

Plant Molecular and Cellular Biology (PCMB) is an interdisciplinary and interdepartmental graduate degree program that emphasizes

understanding the molecular and cellular mechanisms that mediate plant development, adaptation, and evolution. Students can pursue an M.S. or a Ph.D. degree through the PMCB program. All students complete core courses in Advanced Genetics, Plant Molecular Biology and Genomics, Plant Cellular and Developmental Biology, and Plant Biochemistry. In addition to the core classes, students can select from a variety of courses in biochemistry, molecular biology, physiology, breeding, genetics, evolution, microbiology, and plant pathology.

New students are exposed to a variety of faculty and experimental systems while they rotate through several laboratories during their first two semesters before selecting an adviser and dissertation research area. Both M.S. and Ph.D. students take four required courses:

PCB 5065 Advanced Genetics (4 cr.), PCB 5530 Plant Molecular Biology and Genomics (3 cr.), PCB 6528 Plant Cell and Developmental Biology (3 cr.) and BOT 6935 Special Topics (1-4 cr.), as well as journal colloquium classes (PCB 7922 Journal Colloquy in Plant Molecular and Cellular Biology (1 cr.)). Additional elective courses are taken after approval by the student's supervisory committee. For additional information see <http://pmcb.ifas.ufl.edu>.

Successful candidates should have a strong interest in plant molecular and cellular mechanisms controlling development, metabolism, adaptation, and evolution. Applicants typically have a B.S. or M.S. in the agricultural, forestry, biological or chemical sciences.

Degrees Offered

Degrees Offered with a Major in Plant Molecular and Cellular Biology

- Doctor of Philosophy
 - without a concentration
 - concentration in Toxicology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Plant molecular & Cellular biology (MS)

SLO 1 Knowledge

Describe and explain fundamental theories and concepts in plant biochemistry, cell and developmental biology, genetics and genomics, molecular biology and general plant biology

SLO 2 Knowledge

Use critical thinking to evaluate research design and experiments

SLO 3 Skills

Critically evaluate the primary scientific literature

SLO 4 Skills

Develop practical experimental research skills

SLO 5 Skills

Communicate effectively using scientific writing and oral presentation skills

SLO 6 Professional Behavior

Effectively work in teams with peers interacting honestly, ethically and with cultural sensitivity

Plant Pathology Department

Chair: M. Paret

Graduate Coordinators: J. Jones

The Department of Plant Pathology offers graduate studies leading to the Master of Science (thesis and nonthesis option) and Doctor of Philosophy degrees. The Department also participates in the Doctor of Plant Medicine interdisciplinary professional degree.

The Department offers a combination bachelor's/master's degree program. Contact the graduate coordinator for information.

For more information, please visit <http://plantpath.ifas.ufl.edu/>.

Eminent Scholar

Plant Pathology

Program Information

A student may pursue studies in one of several basic areas of plant pathology. These areas include fungal plant pathology, plant bacteriology, plant virology, diagnostics, control, and also molecular and biochemical aspects of host-pathogen systems, biological control of pathogens and weeds, epidemiology, etiology, genetics of host-pathogen systems, soil microbiology, and pathogen taxonomy. In Florida, the variety of cultivated plants, coupled with an environment ideal for plant disease development, offers the student opportunities to study diseases of many crops as they develop. First-hand knowledge can be gained of diseases of field, fruit, ornamental, pasture, range, turf, and vegetable crops in temperate, subtropical, and tropical environments. Students who anticipate study in plant pathology at the University of Florida should include in their undergraduate programs training in botany, chemistry (through biochemistry), genetics, and microbiology.

Courses in nematology are offered by the Department of Entomology and Nematology.

Degrees Offered

Degrees Offered with a Major in Plant Pathology

- Doctor of Philosophy
 - without a concentration
 - concentration in Toxicology
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

School of Forest, Fisheries, and Geomatics Sciences

Director: T. "Red" Baker III

Graduate Coordinator: S. Bohlman (Forest Resources and Conservation) and D. Behringer (Fisheries and Aquatic Sciences)

Since 1937 the Change to School of Forest, Fisheries and Geomatics Sciences has prepared students for professional careers caring for natural resources. We emphasis the role of people in managing both terrestrial and aquatic systems, to produce the myriad of benefits and services they provide. Our faculty have a broad range of interests, including ecology, economics/policy, and recreation/education, and are united by an interest in environmental resources, rather than by traditional academic discipline. The School is composed of three programmatic areas: Fisheries and Aquatic Sciences, Forest Resources and Conservation and Geomatics which is a concentration within the Forest Resources and Conservation major. These programs offer seven different degree options (including two professional masters degrees), as well as concentrations and certificates in a diversity of specific areas. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Joint program: Students may simultaneously earn a juris doctorate from the College of Law and a graduate degree (M.F.R.C., M.S., or Ph.D.) in Forest Resources and Conservation.

Combination programs: The School offers a combination bachelor's/master's degree program, which allows qualified students to earn both a bachelor's degree and a master's degree with a savings of 1 semester. Ph.D. students may pursue a co-major with the Department of Statistics (see below).

Concentrations: SFFGS graduate students completing 15 or more credit hours in designated courses may earn a concentration in the following areas: Ecological Restoration, Geomatics or Natural Resource Policy and Administration. For additional information please go to the SFFGS website (<https://ffgs.ifas.ufl.edu/>).

Statistics co-major: Ph.D. students with the School may elect the co-major offered jointly with the Department of Statistics. Students focusing on forest genetics, tree improvement, and other statistics-intensive

aspects of natural resource management are potential candidates for this option.

Certificates: SFFGS offers a variety of undergraduate and graduate certificate programs. For more information. Please go here (<https://ffgs.ifas.ufl.edu/academics/certificates/>).

For additional information, please visit the School's web page at <https://ffgs.ifas.ufl.edu>. (<https://ffgs.ifas.ufl.edu>)

Fisheries and Aquatic Sciences

Program Information

Director: T. "Red" Baker III

Graduate Coordinator: D. Behringer

Since 1937 the Change to School of Forest, Fisheries and Geomatics Sciences has prepared students for professional careers caring for natural resources. We emphasize the role of people in managing both terrestrial and aquatic systems, to produce the myriad of benefits and services they provide. Our faculty have a broad range of interests, including ecology, economics/policy, and recreation/education, and are united by an interest in environmental resources, rather than by traditional academic discipline. The School is composed of three programmatic areas: Fisheries and Aquatic Sciences, Forest Resources and Conservation, and Geomatics. Combined, these programs offer seven different degree options (including two professional masters degrees), as well as concentrations and certificates in a diversity of specific areas.

The School's program in Fisheries and Aquatic Sciences leads to the Master of Science, Master of Fisheries and Aquatic Sciences (nonthesis), and Doctor of Philosophy degrees with a program in Fisheries and Aquatic Sciences. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Fisheries and Aquatic Sciences program also offers a combination bachelor's/master's degree program. Contact the academic coordinator for information.

The School of Forest, Fisheries and Geomatics Sciences program in Fisheries and Aquatic Sciences conducts research, teaching, and extension programs in four broad areas:

- Sustainable fisheries
- Aquaculture
- Aquatic animal health
- Conservation and management of aquatic environments

Faculty encompass both freshwater and marine environments, as well as managed aquaculture systems. Collaborators include the UF College of Veterinary Medicine, National Biological Survey, National Marine Fisheries Service, Harbor Branch Oceanographic Institute, Mote Marine Laboratory, the US Geologic Survey, the Florida Fish and Wildlife Conservation Commission, and others. Academic programs are structured to emphasize direct engagement of students with faculty. Further information, including specific degree options, faculty biographies, and information on the admissions process, is available at <https://ffgs.ifas.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Fisheries and Aquatic Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Ecological Restoration
 - concentration in Geographic Information Systems

- concentration in Natural Resource Policy and Administration
- concentration in Wetland Sciences
- Master of Fisheries and Aquatic Sciences
 - without a concentration
 - concentration in Ecological Restoration
 - concentration in Geographic Information Systems
 - concentration in Natural Resource Policy and Administration
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Ecological Restoration
 - concentration in Geographic Information Systems
 - concentration in Natural Resource Policy and Administration
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Fisheries & Aquatic sciences (PHD)

SLO 1 Knowledge

Describe and explain key concepts, theories and information in their discipline.

SLO 2 Knowledge

Apply the scientific method and the appropriate methodologies to the generation of new knowledge.

SLO 3 Skills

Communicate effectively in both written and oral form.

SLO 4 Skills

Develop and execute proper experimental or sampling designs.

SLO 5 Skills

Utilize critical thinking to evaluate spoken and written communications.

SLO 6 Professional Behavior

Work in teams with peers; interact honestly, ethically and with cultural sensitivity; translate skills, knowledge and motivation into observable behaviors related to success in specific situations.

Fisheries & Aquatic sciences (MFAS)

SLO 1 Knowledge

Describe and explain key concepts, theories and information in their discipline.

SLO 2 Knowledge

Apply the appropriate methodologies to the synthesis of existing knowledge.

SLO 3 Skills

Communicate effectively in both written and oral form.

SLO 4 Skills

Develop and execute proper project design.

SLO 5 Skills

Utilize critical thinking to evaluate spoken and written communications.

SLO 6 Professional Behavior

Work in teams with peers; interact honestly, ethically and with cultural sensitivity; translate skills, knowledge and motivation into observable behaviors related to success in specific situations.

Graduate Coordinator: S. Bohlman

Since 1937 the Change to School of Forest, Fisheries and Geomatics Sciences has prepared students for professional careers caring for natural resources. We emphasize the role of people in managing both terrestrial and aquatic systems, to produce the myriad of benefits and services they provide. Our faculty have a broad range of interests, including ecology, economics/policy, and recreation/education, and are united by an interest in environmental resources, rather than by traditional academic discipline. The School is composed of three programmatic areas: Fisheries and Aquatic Sciences, Forest Resources and Conservation and Geomatics which is a concentration within the Forest Resources and Conservation major. These programs offer seven different degree options (including two professional masters degrees), as well as concentrations and certificates in a diversity of specific areas. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The SFFGS offers graduate programs leading to the Master of Forest Resources and Conservation (professional, non-thesis), Master of Science (thesis and non-thesis), and Doctor of Philosophy degrees in Forest Resources and Conservation. The Master of Science non-thesis degree may be taken entirely online. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Forest Resources and Conservation program prepares students to work with the ecological, economic, and social aspects of natural resources, including the management of spatial information gathered through traditional surveying as well as remote sensing. Faculty have a wide variety of specializations, including fire ecology, land tenure, tree genetics, recreation management, environmental education, geographic information systems, silviculture, forest economics, and environmental policy. Further information, including specific degree options, faculty biographies, and information on the admissions process, is available at: <https://ffgs.ifas.ufl.edu/>

Degrees Offered

Degrees Offered with a Major in Forest Resources and Conservation

- Doctor of Philosophy
 - without a concentration
 - concentration in Agroforestry
 - concentration in Ecological Restoration
 - concentration in Geographic Information Systems
 - concentration in Geomatics
 - concentration in Hydrologic Sciences
 - concentration in Natural Resource Policy and Administration
 - concentration in Toxicology
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences
- Master of Forest Resources and Conservation
 - without a concentration
 - concentration in Agroforestry
 - concentration in Geographic Information Systems
 - concentration in Geomatics
 - concentration in Natural Resource Policy and Administration
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Agroforestry
 - concentration in Ecological Restoration
 - *optional second concentration in Hydrologic Sciences*
 - concentration in Geographic Information Systems
 - concentration in Geomatics
 - concentration in Hydrologic Sciences
 - concentration in Natural Resource Policy and Administration
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

School of Forest Resources and Conservation Courses

Geomatics Concentration Courses

Code	Title	Credits
GIS 6103	GIS Programming and Customization	3
GIS 6116	Geographic Information Systems Analysis	3
SUR 5365	Digital Mapping	3
SUR 5385	Remote Sensing Applications	3
SUR 5386	Image Processing for Remote Sensing	3
SUR 5525	Least Squares Adjustment Computations	3
SUR 6346	Marine Geomatics	3
SUR 6355	Analytical Photogrammetry	3
SUR 6377	Geospatial Application of UASs	3
SUR 6395	Topics in Geographic Information Systems	3
SUR 6502C	Foundations of UAS Mapping	3
SUR 6535	GPS-INS Integration	3

SUR 6536	Geodesy and Geodetic Positioning	3
SUR 6905	Special Problems in Geomatics	1-6
SUR 6934	Topics in Geomatics	1-4
SUR 6940C	Practicum in UAS Mapping	3

Fisheries and Aquatic Sciences Program Courses

Code	Title	Credits
FAS 5015	Aquaculture I	3
FAS 5203	Biology of Fishes	3
FAS 5203C	Biology of Fishes	4
FAS 5255	Diseases of Warmwater Fish	3
FAS 5276C	Field Ecology of Aquatic Organisms	4
FAS 5335C	Applied Fisheries Statistics	4
FAS 5407	Biology of Fishery and Aquaculture Invertebrates	3
FAS 5901	Scientific Thinking in Ecology	2
FAS 6154	Marine Adaptations: Environmental Physiology	3
FAS 6165	Fish and Crustacean Nutrition	3
FAS 6176	Algae Biology and Ecology	3
FAS 6238	Environmental Physiology of Fishes	3
FAS 6256	Fish and Aquatic Invertebrate Histology	3
FAS 6272	Marine Ecological Processes	3
FAS 6273	Trophic Ecology of Fishes	3
FAS 6275	Freshwater Ecology	3
FAS 6310C	Fish & Limnology	3
FAS 6337C	Fish Population Dynamics	4
FAS 6339C	Advanced Quantitative Fisheries Assessment	4
FAS 6355C	Fisheries Management	4
FAS 6356	Fisheries Enhancement	2
FAS 6357	Marine Protected Areas	3
FAS 6360	Invasion Ecology of Aquatic Animals	3
FAS 6408	Aquaculture II	3
FAS 6416	Spatial Ecology and Modeling of Fish Populations	2
FAS 6426	Applied Aquaculture Genetics	3
FAS 6705	Fisheries and aquaculture: An economics perspective	3
FAS 6905	Individual Study	1-6
FAS 6910	Supervised Research	1-5
FAS 6932	Special Topics in Fisheries and Aquatic Sciences	1-4
FAS 6933	Graduate Symposium	1
FAS 6935	Contemporary Problems in Fisheries and Aquatic Sciences	2
FAS 6940	Supervised Teaching	1-5
FAS 6971	Research for Master's Thesis	1-15
FAS 7979	Advanced Research	1-12
FAS 7980	Research for Doctoral Dissertation	1-15

Forest Resources and Conservation Program Courses

Code	Title	Credits
FAS 6306C	Spatial Sciences for Marine Environmental Characterization	4
FAS 6356	Fisheries Enhancement	2
FNR 5015	Ecosystem Restoration Principles and Practice	3
FNR 5016	Ecology and Restoration of Longleaf Pine Ecosystems	3
FNR 5072C	Environmental Education Program Development	3
FNR 5405	Forest Information Systems	3

FNR 5608	Research Planning	3
FNR 5625	Managing Public Lands and Waters	3
FNR 5626	Forest Resource Manag	3
FNR 6006	Silviculture: Concepts and Application	3
FNR 6046C	Lidar Remote Sensing for Forestry Applications	3
FNR 6061	Conflict and Collaboration in Natural Resources	3
FNR 6075	Science Communication & Public Education	3
FNR 6085	Landscape Planning for Ecotourism	3
FNR 6134	Physiology of Forest Trees	3
FNR 6308	Urban Forestry	3
FNR 6314	Issues in Southeastern Forest Health	3
FNR 6315	Tropical Forestry	3
FNR 6406C	Lidar Remote Sensing for Forestry Applications	3
FNR 6462	Foundations of Geospatial AI for Natural Resource Management	3
FNR 6504	Analysis of Forest Ecosystems	3
FNR 6505	Forest Ecosystem Health	3
FNR 6506	Forest Ecosystem Resilience	3
FNR 6516	Management and Restoration of Invaded Ecosystems	3
FNR 6560	Intro to Bayesian Statistics for Life Sciences	3
FNR 6564	Ecohydrology	3
FNR 6565	Simulation Analysis of Forest Ecosystems	3
FNR 6607	Conservation Behavior	3
FNR 6615C	Visualization of Ecological Data	3
FNR 6620	Community Forest Management	3
FNR 6626	Fire Paradigms	3
FNR 6628	Watershed Management and Restoration	3
FNR 6665	Natural Resource Economics and Valuation	3
FNR 6668	Natural Resources in a Changing Climate	3
FNR 6669	Policy and Economics of Natural Resources	3
FNR 6905	Research Problems in Forest Resources and Conservation	1-6
FNR 6910	Supervised Research	1-5
FNR 6933	Seminar	1
FNR 6934	Topics in Forest Resources and Conservation	1-4
FNR 6940	Supervised Teaching	1-5
FNR 6971	Research for Master's Thesis	1-15
FNR 7979	Advanced Research	1-12
FNR 7980	Research for Doctoral Dissertation	1-15
GIS 6116	Geographic Information Systems Analysis	3
PCB 5530	Plant Molecular Biology and Genomics	3
PCB 6528	Plant Cell and Developmental Biology	3
PCB 6555	Introduction to Quantitative Genetics	3

Code	Title	Credits
SUR 6377	Geospatial Application of UASs	3
SUR 6502C	Foundations of UAS Mapping	3
SUR 6940C	Practicum in UAS Mapping	3

College of Agricultural and Life Sciences Courses

Code	Title	Credits
ALS 5156	Agricultural Ecology Principles and Applications	3
ALS 5905	Individual Study	1-4
ALS 5932	Special Topics	1-4
ALS 6046	Grant Writing	2

ALS 6166	Exotic Species and Biosecurity Issues	3
ALS 6921	Colloquium on Plant Pests of Regulatory Significance	1
ALS 6925	Integrated Plant Medicine	4
ALS 6931	Plant Medicine Program Seminar	1
ALS 6935	Topics in Biological Invasions	3
ALS 6942	Principles of Plant Pest Risk Assessment and Management	3
ALS 6943	Internship in Plant Pest Risk Assessment and Management	1-10
ANS 6936	Graduate Seminar in Animal Molecular and Cell Biology	1-2
BCH 5045	Graduate Survey of Biochemistry	4
FNR 6933	Seminar	1
STA 6093	Introduction to Applied Statistics for Agricultural and Life Sciences	3
STA 6329	Matrix Algebra and Statistical Computing	3

Student Learning Outcomes

Forest resources & Conservation (PHD)

SLO 1 Knowledge

Describes and explains theories and concepts in major-specific and related subject matter areas relevant to the individualized focus of the degree program

SLO 2 Skills

Critically evaluates literature, analyzes and synthesizes information, applies experimental and/or descriptive research methodologies, creates new knowledge through discovery, and effectively communicates information

SLO 3 Professional Behavior

Displays honest, ethical, and culturally sensitive behavior and practices in all scholarly activities including teaching, research, and outreach

Forest resources & Conservation (MFRC)

SLO 1 Knowledge

Describes and explains theories and concepts in major-specific and related subject matter areas relevant to the individualized focus of the degree program

SLO 2 Skills

Critically evaluates literature, analyzes and synthesizes information, applies experimental and/or descriptive research methodologies, creates new knowledge through discovery, and effectively communicates information

SLO 3 Professional Behavior

Displays honest, ethical, and culturally sensitive behavior and practices in all scholarly activities including teaching, research, and outreach

Forest Resources & Conservation (MS)

SLO 1 Knowledge

Describes and explains theories and concepts in major-specific and related subject matter areas relevant to the individualized focus of the degree program

SLO 2 Skills

Critically evaluates literature, analyzes and synthesizes information, applies experimental and/or descriptive research methodologies, creates

new knowledge through discovery, and effectively communicates information

SLO 3 Professional Behavior

Displays honest, ethical, and culturally sensitive behavior and practices in all scholarly activities including teaching, research, and outreach

School of Natural Resources and Environment

Director and Graduate Coordinator: K. R. Reddy

The University of Florida School of Natural Resources and Environment offers interdisciplinary coursework in the basic and applied science of ecology, the related social sciences, and sustainability, leading to M.S. and Ph.D. degrees. Choose from about 450 courses, 280 faculty advisors, and 44 participating departments. Research areas of ecology graduate students range across natural resource ecology, environmental policy and management, and sustainable development.

Environmental problems are fundamentally human problems and should be understood in terms of human motivations and actions in a biophysical context. Their solution requires holistic thinking about dynamic ecological systems and the social, economic, and political forces driving human action. To this end, the goal of the Interdisciplinary Ecology graduate program is to provide advanced training in ecosystems thinking and the main theories and methodologies of the biophysical and social sciences to foster integrative approaches to complex real-world problems. Interdisciplinary Ecology students are intensely interested in the sustainability problem, and they welcome the challenge of addressing it through more than one traditional discipline.

Combination programs: The School offers a combination bachelor's/master's degree program, which allows qualified students to earn both a bachelor's degree and a master's degree with a savings of 1 semester.

Interdisciplinary Ecology

Program Information

Director of Academic Programs and Graduate Coordinator: K. R. Reddy

Graduate students are advised by one of the 340 members of the School's affiliate faculty and have a supervisory committee with interdisciplinary composition. For the list of Graduate Faculty, see <https://snre.ifas.ufl.edu/people/affiliate-faculty/>. Graduate students are hosted in one of 50 participating academic units.

The School offers a program of study leading to the Master of Science (thesis and non-thesis options), and Doctor of Philosophy degrees in interdisciplinary ecology. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog. The course work requirements and curriculum are described in more detail at <http://snre.ifas.ufl.edu/academics/graduate/courses-syllabi-and-curriculum/>. Choices among 450 courses are custom-fitted by the student and the supervisory committee to meet the student's specific needs and interests.

The Interdisciplinary Ecology program views the social-ecological system as the proper framework for addressing the full scope of complex, adaptive systems comprising humans in the natural world. The degree program challenges students to understand both natural and human dynamics to obtain a holistic view and to foster integration of human activities with natural resources and the environment. The learning outcomes of the program are to develop a thorough understanding of the components, processes, and interactions of the social-ecological system, competence in scientific research methodologies, and experience in professional interaction with peers.

The degree programs combine

1. course work in the science of ecology and additional natural and social sciences; and
2. competence in a recognized discipline in one of these fields of study.

The former is achieved with a core-course and distribution requirement and the latter by extra course work for the master's and a concentration for the doctoral degree. A thesis or dissertation provides first-hand experience creating scientific knowledge. The non-thesis master's option provides rapid, advanced preparation for the job market in 3 to 4 semesters, without research experience. Course requirements are 30 semester hours for the thesis option, 30 hours for the non-thesis option, and 60 hours beyond the master's degree for the doctoral degree.

Combination programs: The School offers a combination bachelor's/master's degree program, which allows qualified students to earn both a bachelor's degree and a master's degree with a savings of 1 semester.

Degrees Offered

Degrees Offered with a Major in Interdisciplinary Ecology

- Doctor of Philosophy
 - without a concentration
 - concentration in Agricultural and Biological Engineering
 - concentration in Agricultural Education and Communication
 - concentration in Agronomy
 - concentration in Anthropology
 - concentration in Architecture
 - concentration in Biochemistry and Molecular Biology
 - concentration in Botany
 - concentration in Business Administration
 - concentration in Chemistry
 - concentration in Civil Engineering
 - concentration in Climate Science
 - concentration in Coastal and Oceanographic Engineering
 - concentration in Economics
 - concentration in English
 - concentration in Entomology and Nematology
 - concentration in Environmental Engineering Sciences
 - concentration in Family, Youth and Community Sciences
 - concentration in Farming Systems
 - concentration in Fisheries and Aquatic Sciences
 - concentration in Food and Resource Economics
 - concentration in Food Science
 - concentration in Forest Resources and Conservation
 - concentration in Foundations of Education
 - concentration in Geographic Information Systems
 - concentration in Geography
 - concentration in Geology
 - concentration in Global Systems Agroecology
 - concentration in Health and Human Performance
 - concentration in Horticultural Sciences
 - concentration in Hydrologic Sciences
 - concentration in Landscape Architecture
 - concentration in Mathematics
 - concentration in Microbiology and Cell Science
 - concentration in Nuclear and Radiological Engineering
 - concentration in Philosophy
 - concentration in Political Science
 - concentration in Religion
 - concentration in Sociology
 - concentration in Soil and Water Science
 - concentration in Statistics
 - concentration in Tropical Conservation and Development
 - concentration in Urban and Regional Planning
 - concentration in Veterinary Medical Sciences
 - concentration in Wetland Sciences
 - concentration in Wildlife Ecology And Conservation

- concentration in Women's/Gender Studies
- concentration in Zoology
- Master of Science
 - without a concentration
 - concentration in Agricultural and Biological Engineering
 - concentration in Agricultural Education and Communication
 - concentration in Agronomy
 - concentration in Anthropology
 - concentration in Architecture
 - concentration in Biochemistry and Molecular Biology
 - concentration in Botany
 - concentration in Business Administration
 - concentration in Chemistry
 - concentration in Civil Engineering
 - concentration in Climate Science
 - concentration in Coastal and Oceanographic Engineering
 - concentration in Economics
 - concentration in English
 - concentration in Entomology and Nematology
 - concentration in Environmental Engineering Sciences
 - concentration in Family, Youth and Community Sciences
 - concentration in Farming Systems
 - concentration in Fisheries and Aquatic Sciences
 - concentration in Food and Resource Economics
 - concentration in Food Science
 - concentration in Forest Resources and Conservation
 - concentration in Foundations of Education
 - concentration in Geographic Information Systems
 - concentration in Geography
 - concentration in Geology
 - concentration in Health and Human Performance
 - concentration in Horticultural Sciences
 - concentration in Hydrologic Sciences
 - concentration in Landscape Architecture
 - concentration in Mathematics
 - concentration in Microbiology and Cell Science
 - concentration in Nuclear and Radiological Engineering
 - concentration in Philosophy
 - concentration in Political Science
 - concentration in Religion
 - concentration in Sociology
 - concentration in Soil and Water Science
 - concentration in Statistics
 - concentration in Tropical Conservation and Development
 - concentration in Urban and Regional Planning
 - concentration in Veterinary Medical Sciences
 - concentration in Wetland Sciences
 - concentration in Wildlife Ecology And Conservation
 - concentration in Women's/Gender Studies
 - concentration in Zoology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

INTERDISCIPLINARY ECOLOGY (PH.D.)

SLO 1 Knowledge

Describe and explain the components, processes, and interactions of the social-ecological system

SLO 2 Skills

Apply the scientific method to generate new knowledge

SLO 3 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork, and effective communication

Interdisciplinary ecology (M.S.)

SLO 1 Knowledge

Describe and explain the components, processes, and interactions of the social-ecological system

SLO 2 Skills

Apply the scientific method to generate new knowledge

SLO 3 Professional Behavior

Interact with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork, and effective communication

Soil, Water, and Ecosystem Sciences Department

Chair and Graduate Coordinator: P. C. Wilson

Soil and water are vital resources in urban, agricultural, and natural ecosystems. The Department of Soil, Water, and Ecosystem Sciences provides highly visible leadership in teaching, research, and extension/outreach programs related to improving the productivity of agriculture with environmentally sound management practices, improving water quality, and protecting and conserving natural resources. Our department is one of the few in the nation that offers comprehensive research and educational programs (molecular to landscape level) involving terrestrial, wetland, and aquatic ecosystems. In addition to traditional on-campus educational programs, we use innovative e-technologies to offer educational programs to place-bound students throughout the world.

Our graduates and postdoctoral fellows are well-prepared for future careers in universities, state and federal agencies, and private industry. The Department of Soil, Water, and Ecosystem Sciences offers Master of Science and Doctor of Philosophy degrees in the *Soil and Water Sciences*. Broadly defined emphasis areas for degree programs include:

- biogeochemistry (coastal, landscape, soil, trace metals, and wetlands)
- bioenergy and sustainable technology
- carbon dynamics and ecosystem services
- environmental toxicology
- landscape analysis and modeling
- landscape and soil hydrology
- microbial ecology, molecular biology, bioinformatics
- pedological sciences
- soil quality (natural, agricultural, and urban systems)
- soil physics
- soil, water, and aquifer remediation
- soil, water, and environmental chemistry
- soil, water, and nutrient management
- water quality (natural, agricultural, and urban systems)
- watershed sciences and management
- wetland, aquatic systems, and coastal ecology

Students can work with departmental faculty on the main campus and at Research and Education Centers located throughout the state to custom-design their graduate program.

The department also offers a completely online Master of Science degree (thesis or professional non-thesis option) via distance education for place-bound students interested in environmental sciences or an agroecology concentration (<http://soils.ifas.ufl.edu/sws-online> (<http://soils.ifas.ufl.edu/sws-online/>)).

<http://soils.ifas.ufl.edu/sws-online/>)). Requirements for the M.S. and Ph.D. degrees are given in the Graduate Degrees (<http://gradcatalog.ufl.edu/content.php?catoid=12&navoid=2748>) section of this catalog. An additional option offered by the Department is a combination bachelor's/master's degree program that allows students to earn a B.S. in Soil and Water Sciences or Interdisciplinary Studies – Environmental Management in Agriculture and Natural Resources and an M.S. Degree within five years. In addition to the MS and PhD degrees, the Department also offers graduate-level certificates in Biodegradation and Remediation, Global Agroecology, Soil Ecosystem Services, Sustainable Agroecosystems, Sustainable Land Resource and Nutrient Management, and Wetland and Water Resource Management for on-campus and off-campus students via the distance education delivery system (<http://soils.ifas.ufl.edu/academics/degree-certificates.shtml> (<http://soils.ifas.ufl.edu/academics/degree-certificates.shtml/>)). Contact the graduate coordinator for more information.

For more information, please see our program's page in this catalog (p. 80) and our website: <http://soils.ifas.ufl.edu>.

Soil, Water, and Ecosystem Sciences Program Information

The Soil, Water, and Ecosystem Sciences Department offers Master of Science (thesis or professional non-thesis option) and Doctor of Philosophy degrees in soil, water, and ecosystem sciences with the following specializations: ecology, environmental science, hydrologic science, and soil science. The department also offers Master of Science (thesis or professional option) track in environmental science via distance education for place bound students (<http://soils.ifas.ufl.edu/academics/degree-environscience.shtml> ([http://soils.ifas.ufl.edu/](http://soils.ifas.ufl.edu/academics/degree-environscience.shtml)

<http://soils.ifas.ufl.edu/academics/degree-environscience.shtml>)). Requirements for the M.S. and Ph.D. degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Students can also develop specializations in several interdisciplinary areas including biogeochemistry, ecology, geographic information systems, hydrologic science, tropical agriculture, turfgrass management, and wetland science. The Department emphasizes (but is not limited to) the following research areas:

- Nutrient, Pesticide, and Waste Management
- Soil, Water, and Aquifer Remediation
- Carbon Dynamics and Ecosystem Services
- Landscape Analysis and Modeling
- Wetlands and Aquatic Ecosystems

Interests of the student and faculty, the facilities, and funding available will determine the student's research area. A specific program of study is prepared by an appointed supervisory committee for each student. Students will present a thesis or dissertation in their major field (M.S. thesis option and Ph.D.). In addition, Ph.D. candidates must pass a qualifying examination covering several areas of soil and water science and related fields.

Prerequisites: Students who expect to do graduate work in the Soil, Water, and Ecosystem Sciences Department should hold a bachelor's degree from an accredited college or university with a major in soil, water, and ecosystem sciences or the equivalent background in another field of science. Graduate students should have backgrounds in biology, chemistry, physics, and mathematics and knowledge of basic soil and water science.

For more information, please see our website: <http://soils.ifas.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Soil, Water, and Ecosystem Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Climate Science
 - concentration in Geographic Information Systems
 - concentration in Global Systems Agroecology
 - concentration in Hydrologic Sciences
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Agroecology
 - concentration in Climate Science
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Research Methods
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

soil and water science (PHD)

SLO 1 Theories and Concepts
Describe and explain theories and concepts in soil and water sciences

SLO 2 Skills
Apply, analyze, and synthesize content knowledge by identifying component parts, relationships and ideas

SLO 3 Professional Behavior
Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication

Soil and water science (MS)

SLO 1 Theories and Concepts in Soil and Water Sciences
Describe and explain theories and concepts in soil and water sciences

SLO 2 Skills
Apply, analyze, and synthesize content knowledge by identifying component parts, relationships and ideas

SLO 3 Professional Behavior
Display ethical behaviors, cultural sensitivity, professional conduct and effective communication

Wildlife Ecology and Conservation Department

Chair: E. C. Hellgren
Graduate Coordinator: J. Austin

The Department of Wildlife Ecology and Conservation offers Master of Science (thesis and nonthesis option) and Doctor of Philosophy degrees in wildlife ecology and conservation. Requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog.

Program emphases include wildlife biology, ecology, and management; landscape ecology and restoration; human dimensions; tropical and international conservation; and conservation education. Graduate students should have appropriate undergraduate training in the biological, social, and physical sciences including physics, chemistry, and mathematics. Students with inadequate backgrounds may be required to take (without credit at the graduate level) remedial undergraduate courses pertinent to their fields of interest.

For more information, please see our website: <http://www.wec.ufl.edu>.

Majors

- Wildlife Ecology and Conservation (p. 83)

Wildlife Ecology and Conservation

Program Information

The Department of Wildlife Ecology and Conservation offers a breadth of graduate programs that are designed to prepare students for professional employment in conservation of natural resources in a changing world.

WEC faculty teach, conduct research, and provide service and extension in the following areas: avian ecology, behavioral ecology, community ecology, conservation biology, conservation education, conservation genetics, ecosystem management, environmental interpretation, habitat restoration, global change ecology, herpetofaunal ecology, human dimensions of wildlife management, international conservation, introduced species, landscape ecology, macroecology, mammalian behavior, marine mammal ecology, plant ecology, population biology, range ecology, systems ecology, tropical conservation, urban wildlife relations, wetlands ecology, wildlife diseases, and wildlife management.

The **Doctor of Philosophy (PhD) program** in Wildlife Ecology and Conservation serves graduate students conducting advanced, original studies of fundamental ecological and social sciences (e.g., ecosystem, community, landscape ecology, human dimensions), usually with applications to further society's understanding of wildlife ecology and to improve conservation of wildlife resources.

The **Master of Science (MS) thesis program** in Wildlife Ecology and Conservation:

1. prepares graduate students for entry-level professional positions in areas of wildlife biology and ecology, natural resource management, conservation, and
2. provides a solid scientific foundation for further graduate work leading to the PhD degree.

The **Master of Science, non-thesis (MS) program** in Wildlife Ecology and Conservation provides advanced training for students in technical and professional aspects of wildlife management, conservation, and public education, emphasizing written and oral communication of scientific information.

- Master of Science in Wildlife Ecology and Conservation with a concentration in Wildlife Forensics Science and Conservation - offered by WEC in conjunction with UF's Maples Center for Forensic Science as a non-thesis, online option. Students are prepared for real-world situations in wildlife forensics such as poaching and illegal trade and courses are taught by faculty members who have years of experience in the field working with law enforcement and wildlife organizations. See <https://masters.wildlife.forensics.med.ufl.edu/programs/masters-degree/> for a full program description and application instructions.

For more information, please see our website: <http://www.wec.ufl.edu>.

Student Learning Outcomes

Wildlife ecology & conservation (PHD)

SLO 1 Concepts and Theories of Wildlife Ecology and Conservation
Describe and explain concepts and theories of wildlife ecology and conservation science, and the appropriate methods and techniques in a specialization.

SLO 2 Independent/Original Research
Plan, conduct and analyze independent/original research.

SLO 3 Apply Research to Address Problems
Apply quantitative, spatial or qualitative research approaches to address wildlife ecology and conservation problems.

SLO 4 Effective Communication
Communicate proficiently and productively in oral and written form.

SLO 5 Professional Behavior
Display ethical behaviors and professional conduct to contribute as responsible professionals in the field of wildlife ecology and conservation

wildlife ecology & Conservation (MS)

College of Dentistry

Dean: I. Garcia

Associate Dean & Director: R. Pileggi

Advanced education has progressed over the years to be an integral component of the College of Dentistry, growing from six certificate residency programs, with an enrollment of only 36 students in 1979, to fourteen certificate programs and various fellowship programs. Enrollment is now over 145. In 1993, the college started master degree programs in endodontics, orthodontics, periodontics and prosthodontics, and continues today to grow.

Follow this link for more information about UF's College of Dentistry graduate programs: <http://admissions.dental.ufl.edu/advanced-graduate-programs> (<http://dental.ufl.edu/admissions/>)

Endodontics Chair and Graduate Coordinator: R. Pileggi
Orthodontics Chair: C. Dolce; *Graduate Coordinator:* D. Karanth
Periodontology Chair: I. Aukhil; *Graduate Coordinator:* W. Duarte
Restorative Dental Sciences Chair: D. Dilbone; *Graduate Coordinator:* E. O'Neill

The College of Dentistry offers the Master of Science degree in dental sciences with concentrations in endodontics, orthodontics, periodontics, and prosthodontics. These concentrations include a minimum of 38 hours of appropriate course work and research in topics relevant to each specialization. Requirements for the master's degree include a minimum of 38 hours of appropriate course work and research in topics relevant to each specialization. Requirements for the master's degree include

- Satisfactory completion of all course work
- Meeting the requirements for clinical certification in the respective dental specialty
- Thesis or project based on research.

Prerequisites for admission, in addition to those of the Graduate School, include

- D.D.S. or D.M.D. degree
- Completion of Parts I and II of the American Dental Association's National Board of Dental Examinations.

The application deadline for Endodontics is July 1

The application deadline for Periodontics is August 1

The application deadline of Orthodontics and Prosthodontics is September 2

Application details for these programs can be found on the webpage <http://admissions.dental.ufl.edu/advanced-graduate-programs/> (<http://admissions.dental.ufl.edu/advanced-graduate-programs/programs-application-process/>)

Requirements for the M.S. degree are provided in the Graduate Degrees (p. 778) section of this catalog.

Dental Sciences

Program Information

The College of Dentistry offers the Master of Science degree in dental sciences with concentrations in endodontics, orthodontics, periodontics, and prosthodontics. These concentrations include a minimum of 38 hours of appropriate course work and research in topics relevant to each specialization. Requirements for the master's degree include

- Satisfactory completion of all course work
- Meeting the requirements for clinical certification in the respective dental specialty
- Thesis or project based on research.

Prerequisites for admission, in addition to those of the Graduate School, include

- D.D.S. or D.M.D. degree
- Completion of Parts I and II of the American Dental Association's National Board of Dental Examinations according to individual program requirements.

Application deadlines for these programs can be found on the webpage <http://admissions.dental.ufl.edu/advanced-graduate-programs> (<http://dental.ufl.edu/admissions/>)

Those not in Dentistry are given in-department graduate credit. Registration in the courses listed below is restricted to students currently admitted to a program in the College of Dentistry.

Degrees Offered

Degrees Offered with a Major in Dental Sciences

- Master of Science
 - without a concentration
 - concentration in Endodontics
 - concentration in Operative and Esthetic Dentistry
 - concentration in Orthodontics
 - concentration in Periodontics
 - concentration in Prosthodontics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Dental Sciences General Courses

Code	Title	Credits
DEN 6674	Advanced Oral Pathology	1
DEN 6675	Craniofacial Pain	1

DEN 6678	Advanced Oral Medicine and Drug Interactions in Dentistry	1
DEN 6679	Advanced Radiology and Interpretation	1
DEN 6905	Individual Study	1-6
DEN 6910	Supervised Research	1-5
DEN 6934	Special Topics in Dentistry	1-3
DEN 6935	Special Topics in Dentistry	1-6
DEN 6936	Practice Management	1
DEN 6940	Supervised Teaching	1-5
DEN 6941	Clinical Teaching in Dentistry	1
DEN 6942	Grand Rounds	1-3
DEN 6971	Research for Master's Thesis	1-6
DEN 6973	Project in Lieu of Thesis	1-9

Endodontics Courses

Code	Title	Credits
DEN 6642	Introduction to Advanced Endodontics	1
DEN 6644	Nonsurgical Endodontic Care I	1
DEN 6645	Nonsurgical Endodontic Care II	1

Orthodontics Courses

Code	Title	Credits
DEN 6602	Orthodontic Treatment—Appliance Management and Effect of Treatment Part 1: Class I Treatment	1
DEN 6603	Orthodontic Treatment—Appliance Management and Effect of Treatment Part 2: Class II Treatment	1
DEN 6604	Appliance Mgmt and Effect of Orthodontic Treatment Part 3: Class II and Overbite Treatments	1
DEN 6605	Appliance Mgmt and Effect of Orthodontic Treatment Part 4: Class II and Overbite Treatments	1
DEN 6606	Appl Mgmt and Effect of Ortho Treatment Part 5: Class III and Crossbite Tmts, Soft Tissue	1
DEN 6607	Appl Mgmt and Effect of Ortho Treatment Part 6: Impactions, Transplantations, and Stability	1
DEN 6610	Biology of Tooth Movement: Part I	1
DEN 6612	Orthodontic Biomechanics: Part I	1
DEN 6613	Orthodontic Biomechanics: Part II	1
DEN 6615	Ortho-Perio Relationships: Part II	1
DEN 6616	Orthognathic Surgery: Part I	1
DEN 6617	Orthognathic Surgery: Part II	1
DEN 6618	Postnatal Growth and Development	1
DEN 6672	Materials in Orthodontics	0-1

Periodontics Courses

Code	Title	Credits
DEN 6652	Review of Periodontics Literature I	1
DEN 6654	Review of Periodontics Literature III	1
DEN 6655	Review of Periodontics Literature IV	1
DEN 6656	Introduction to Advanced Periodontology	1
DEN 6657	Periodontal Histology and Histopathology	1
DEN 6658	Treatment Planning in Periodontal Therapy	1

Prosthodontics Courses

Code	Title	Credits
DEN 6622	Principles of Occlusion	2
DEN 6623	Maxillofacial Prosthetics	1
DEN 6624	Dental Implant Restoration	1
DEN 6625	Fixed Prosthodontic Ceramics	1
DEN 6626	Advanced Removable Partial Dentures	1
DEN 6627	Treatment Planning Seminar	1

College of Dentistry Courses

Code	Title	Credits
DEN 6905	Individual Study	1-6
DEN 6910	Supervised Research	1-5
DEN 6934	Special Topics in Dentistry	1-3
DEN 6935	Special Topics in Dentistry	1-6
DEN 6936	Practice Management	1
DEN 6940	Supervised Teaching	1-5
DEN 6941	Clinical Teaching in Dentistry	1
DEN 6942	Grand Rounds	1-3
DEN 6971	Research for Master's Thesis	1-6
DEN 6973	Project in Lieu of Thesis	1-9

Student Learning Outcomes

Dental Sciences (MS)

SLO 1 Knowledge
Describe and show didactic and scientific proficiency in their specialty as required by each specific Advanced Graduate Education standards

SLO 2 Skills
Develop and apply clinical skills based on evidence based practice and scientific literature

SLO 3 Professional Behavior
Connect and align standards for professional behavior

College of Design, Construction and Planning

Dean: C. Anumba

DCP is home to five independent professional disciplines: architecture, construction management, interior design, landscape architecture and urban and regional planning. The college is also home to an interdisciplinary program in historic preservation, which allows graduate students to gain expertise in research and application of historic preservation in the United States and abroad.

Accreditation and Degrees

The academic programs in the college have an accreditation process from the professional organizations of each discipline.

- Architecture – National Architectural Accrediting Board
- Construction Management – American Council for Construction Education
- Interior Design – Foundation for Interior Design Education Research
- Landscape Architecture – American Society of Landscape Architects
- Urban and Regional Planning – Planning Accreditation Board

DCP offers both undergraduate and graduate degrees and programs. Through its academic units, the college offers doctoral, master's, and bachelor's degrees, as well as distance education programs, combination degrees, joint degrees, certificate programs, and academic minors.

College Institutes, Centers and Programs

Research and service projects conducted through the research centers and institutes often entail multidisciplinary, cross-campus student input and effort. Each division of the college is involved in on-going projects that advance both scholarly study and professional practice. The college contributes to community, state, regional and national efforts to conserve and improve the quality of the natural and built environments through its research centers. The college's teaching and research programs have national and international prominence.

For more information, please see our website: <http://www.dcp.ufl.edu>. (<http://www.dcp.ufl.edu>)

- Historic Preservation (p. 93)
- Integrated Sustainable Development (p. 96)

Faculty

Design, Construction, and Planning (Ph.D.)

Program Information

The Department of Design, Construction and Planning offers a Doctor of Philosophy degree. The department also offers Doctor of Philosophy degrees with the following specializations: historic preservation, urban and regional planning, landscape architecture, construction management, interior design, and geographic information systems.

Degrees Offered

Degrees Offered with a Major in Design, Construction, and Planning

- Doctor of Philosophy
 - without a concentration
 - concentration in Architecture
 - concentration in Construction Management
 - *optional second concentration in Geographic Information Systems*
 - *optional second concentration in Hydrologic Sciences*
 - concentration in Geographic Information Systems
 - concentration in Historic Preservation
 - *optional second concentration in Geographic Information Systems*
 - concentration in Interior Design
 - *optional second concentration in Geographic Information Systems*
 - concentration in Landscape Architecture
 - *optional second concentration in Geographic Information Systems*
 - concentration in Urban and Regional Planning
 - *optional second concentration in Geographic Information Systems*

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Design, Construction and Planning (Ph.D.)

SLO 1

Knowledge

Each student will apply in-depth knowledge from their individual discipline.

SLO2

Skills

- Employ appropriate research methodologies.
- Each student will apply the critical thinking skills required of doctoral faculty and researchers.
- Communicates effectively both orally and in writing.

SLO3

Professional Behavior

Display ethical behaviors, and professional conduct in research.

Historic Preservation Program Information

The Master of Historic Preservation (MHP) program promotes interdisciplinary thinking and active problem-solving through research, documentation, conservation, and management of historic resources. Drawing from the disciplines housed within the College of Design, Construction and Planning, as well as other units across campus, Historic Preservation coursework addresses heritage at different scales (cultural landscapes, neighborhoods, architecture, interiors, and materials and building technologies) and presents a range of issues impacting the preservation of historical places including economic, legal, and sustainable practices, among others. Both the tangible (physical) and intangible (cultural) realms of heritage are explored. This program is

open to students with a bachelor's degree in any discipline from an accredited university. While experience and/or education in design/planning fields, technology, or history are useful, it is not mandatory for entering the program.

The University of Florida Master of Historic Preservation degree encompasses an interdisciplinary study of the basic and applied skills in historic preservation, anthropology, archeology, architecture, building construction, cultural tourism, history, interior design, landscape architecture, museum studies, and urban and regional planning.

Historic preservation problems are fundamentally human as well as physical problems and should be understood in terms of human motivations and actions as well as technical, legal, and historical solutions. To this end, the graduate program provides advanced training in theories and methodologies of the historic preservation and cultural conservation movements in the US and internationally. Programs are designed to foster integrative approaches to complex real-world problems.

The coursework totals 42 hours. A written thesis or research project meeting Graduate Requirements relating to historic preservation is required.

Degrees Offered

Degrees Offered with a Major in Historic Preservation

- Master of Historic Preservation

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Historic Preservation (MHP)

SLO 1 Knowledge

Identify, describe, and synthesize the substantive body of literature on a specialized topic within the discipline and field of Historic Preservation.

SLO 2 Skills

Identify, formulate, test, and analyze research questions in Historic Preservation.

SLO 3 Professional Behavior

Engage and work with members of a community and professionals in historic preservation and other allied disciplines.

Integrated Sustainable Development Program Information

The Master of Integrated Sustainable Development (M.I.S.D.) is an interdisciplinary graduate degree program offered by the University of Florida (UF) College of Design, Construction and Planning (DCP) Sustainability and the Built Environment (SBE) Program. The M.I.S.D. is a STEM (Science, Technology, Engineering, and Mathematics) degree delivering education within the planning, design, construction, and operations of more sustainable and resilient built environments. Through a mix of pedagogical approaches, MISD students will learn the skills and strategies to facilitate a quadruple bottom line of ecological, cultural, social, and economic sustainability across local, state, national, and international scales.

The M.I.S.D. curriculum focuses on collaborative and integrative design, construction, planning, and engineering problem-solving, as well as leadership and management, in the built environment. MISD students are critical thinkers, managers of complexity, and strategists capable of creating comprehensive assessments and solutions to cross-disciplinary problems with social, political, economic, ethical, and technical components.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN integrated sustainable development

- Master of Integrated Sustainable Development (M.I.S.D.)

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

URP 6541	Economic Development Planning	3

Student Learning Outcomes

Integrated Sustainable Development (M.I.S.D.)

SLO 1 Knowledge

Delineate and apply principles of sustainability to problems of the built environment.

SLO 2 Skills

Understand the collaborative roles of an integrated project team (with professionals from a range of disciplines including civil/environmental engineering, architecture, construction management, interior design, landscape architecture, and urban and regional planning) in the delivery of sustainable development projects.

SLO 3 Professional Behavior

Demonstrate the capacity to undertake return on investment analysis of sustainable development projects for the built environment.

SLO 4

Apply a wide range of skills, tools and strategies to sustainable problem-solving combining engineering capabilities, innovation, design, and soft skills, like communication and facilitation.

Interior Design Department

Chair: R. Rengel

Graduate Coordinator: S. Bosch

Doctor of Philosophy:

The College offers an interdisciplinary program leading to the Doctor of Philosophy degree in design, construction, and planning. Areas of specialization within this program include architecture, building construction, interior design, landscape architecture, and urban and regional planning. For information, write to

The Ph.D. Director
College of Design, Construction, and Planning Doctoral Program
331 ARCH, P.O. Box 115701.

Master of Interior Design:

The Master of Interior Design (M.I.D.) provides opportunities for students to direct their attention toward a variety of topics, including

- Design pedagogy and processes
- Sustainable, healthy, safe, and secure environments
- Creative performance and innovation
- Built heritage conservation

Regardless of the study emphasis selected by the student, the M.I.D. program has a central focus with three categories of course work:

- Design studio
- Seminars in current interior design topics
- Theories and methods of research.

All M.I.D. students must complete an approved research topic with a written thesis. Requirements for the M.I.D. and Ph.D. degrees are given in the General Information section of this catalog.

Applications:

All applications must include transcripts for all previous academic work, and if the applicant's native language is not English, a satisfactory score on one of the following: TOEFL (Test of English as a Foreign Language: computer=213, paper=550, web=80), IELTS (International English Language Testing System: 6), MELAB (Michigan English Language Assessment Battery: 77), or successful completion of the UF English Language Institute. This information must be received in the Office of the Registrar by February 2. In addition to satisfying University requirements for admission, the applicants are required to submit to the Department of Interior Design the following:

- A portfolio of your design work (if you received a design-based degree). The portfolio should be emailed to the department as a pdf to mmatchkie@dcp.ufl.edu or sent via WeTransfer as a pdf to mmatchkie@dcp.ufl.edu.
- A written essay on your goals and aspirations related to graduate studies; attach to your application or email to mmatchkie@dcp.ufl.edu.
- Three letters of recommendation; directly sent to the applications system via the on-line request you set up or emailed to the department to mmatchkie@dcp.ufl.edu.
- A personal interview is not required, but many applicants choose to visit the campus and Department as a part of the application process.

Students enrolled in the Bachelor of Interior Design program at the University of Florida may apply to the M.I.D. program during their junior year by applying for a Combination Degree (see below). The college currently offers a combination degree between a Bachelor of Design and the Master of Interior Design.

The Department reserves the right to retain student course work for the purposes of record, exhibition, or instruction. Field trips are required for all students; students should plan to have adequate funds available. Students are required to purchase a computer for course work. It may be necessary to assess studio fees to defray costs of base maps, plans, and other generally used materials.

Admission: Applications are processed through February 2 for fall term and all applicants are encouraged to apply as soon as possible. Admission decisions are made between February and the end of April. All new students begin their studies in the fall to coincide with curriculum sequencing.

Graduate course requirements according to background: After assessment of previous design work, leveling courses may be required to prepare the student for the M.I.D. 36 hours of graduate course work. Therefore, each student entering the Master of Interior Design program works with the graduate coordinator to evaluate the student's unique background to determine the specific courses needed to facilitate interest and experience. Estimated credit hours and length of study time

vary according to each student's individual baccalaureate degree and experience.

There are four options.

- For students enrolled in the Bachelor of Design program at the University of Florida, 12 hours of graduate-level course work in the senior year can be counted for both the undergraduate and the M.I.D. degrees. An additional 24 graduate credit hours are required. Expect at least 1 additional year to complete the M.I.D. (Combination Degree form found on the Graduate School site)
- For students who graduated from a Council of Interior Design Accreditation (CIDA) accredited first professional degree program within an architectural framework, the course of study is estimated to be 36 graduate credit hours. Expect 2 years to complete the M.I.D.
- For students who graduated from a design-related (architecture or interior design) baccalaureate degree program, the course of study is estimated to be a maximum of 59 graduate credit hours (includes the 36-hour M.I.D.). Expect 3 years to complete leveling courses and the master's degree.
- For students with a bachelor's degree in a field other than design, the course of study is estimated to be 93 undergraduate and graduate credit hours. Expect 3 to 4 years to complete leveling courses and the M.I.D.

Estimates of the number of credit hours and length of study time may be adjusted based on the individual student's previous preparation including experience as a practicing designer, architect, or other professional.

Program requirements: After leveling courses are completed and with approval by the graduate coordinator and supervisory committee chair, a student completes 24 hours of departmentally approved graduate work in the Department of Interior Design. In addition, with the graduate coordinator's approval, the student is required to take 3 hours of course work in graduate statistics and 9 hours of multidisciplinary graduate electives that reinforce and extend the research.

Courses from such academic units as Psychology, Anthropology, Sociology, Engineering, Education, and Business Administration provide possible electives. The College of Design, Construction and Planning offers the Certificate in Historic Preservation. If the focus of a student is the renovation and preservation of built environments, then historic preservation courses leading to a certificate would strengthen the research and design effort. Likewise, existing appropriate courses in Architecture, Landscape Architecture, Urban and Regional Planning, and Building Construction offer both collaborative study and research opportunities for M.I.D. students.

Each student must select a two-member supervisory committee to guide course selection and to guide thesis selection, study, and production.

Interior Design

Program Information

The Master of Interior Design (MID) educates students to become professionals in practice, to engage in research, and to develop a specialization in the design of the built environment. In addition to coursework, the main requirement for the MID degree is a written research thesis, adding to the greater body of knowledge.

The UF-ID MID will

- Aid design and problem-solving skills to achieve excellence in the design of interiors
- Enable students to propose and conduct research that adds to the body of knowledge in the field, building on previous research findings
- Explore a specialized area of interest and expertise

MID graduate students can join practices within interior design and architecture firms or other specialized fields; can achieve advanced study in areas of specialization often of interest to contract public interior design firms; have the opportunity to pursue entry-level teaching positions within interior design programs; can enter Ph.D. Programs for advanced research specialization(s) in interior design or related design disciplines; and are offered the opportunity to disseminate knowledge through publications, conferences, teaching, and collaboration with various professionals in related fields.

Student Learning Outcomes

Interior Design (MID)

- SLO 1 Knowledge**
Illustrate an understanding of a specialized topic within the knowledge base of Interior Design
- SLO 2 Skills**
Identify, formulate, test and analyze research questions in interior design
- SLO 3 Professional Behavior**
Engage in field experience

Landscape Architecture Department

Chair: J. Bruck

Graduate Coordinator: A. Nawre

The mission of the Department of Landscape Architecture is to conduct research to enhance the understanding and practice of the profession of landscape architecture, and address societal challenges; train practitioners and scholars who are committed to advancing the efficacy, impact and knowledge of the discipline of landscape architecture; and provide service to the diverse communities of our state, region and abroad. The Master of Landscape Architecture seeks excellence through professional practice and service, and through research and scholarly pursuit.

The department offers a combination bachelor's/master's degree program with the Bachelor of Sustainability and the Built Environment. The department also offers a combination bachelor/master degree program for current UF landscape architecture undergraduate students who intend to complete a graduate landscape architecture degree at UF. Please contact a College of Design, Construction and Planning Advisor and/or Graduate Coordinator for the Department of Landscape

Architecture to learn more and for information about application procedures for both combination degree programs.

Interstate field trips are required as a part of the normal program curriculum. Students should plan to have adequate funds for field trips, studio materials, and use of the Infinity Fab Lab. Students are also required to own a laptop computer meeting minimum department requirements. These specifications are available through the Department of Landscape Architecture's website at URL: <http://www.dcp.ufl.edu/landscape> (<http://www.dcp.ufl.edu/landscape/>).

The graduate program in landscape architecture offers flexibility in meeting the needs of applicants with varied backgrounds. Students entering the graduate program in landscape architecture follow one of the four following tracks:

First Professional MLA Program

Graduate students who do not possess an LAAB accredited professional degree in landscape architecture are invited to enroll in the First Professional MLA program.

The First Professional MLA Program aids the development of basic analytical, design and graphic skills. Upon successful completion of the First Professional Summer term, students advance into a two-semester sequence of articulation courses that provide a foundation of applied landscape design and planning theory as well as competencies in landscape construction.

MLA Advanced Graduate Studies Program

Graduate students having completed the summer and first year of the First Professional program or entering the MLA program with an LAAB accredited professional baccalaureate degree in landscape architecture commence a two-year program of advanced graduate coursework towards the completion of the MLA degree.

Graduate students with a non-accredited or non-LAAB accredited degree in landscape architecture may be required to take additional coursework beyond the two-year program of advanced graduate coursework to develop core competencies required for advanced graduate study.

MLA Research Degree

Graduate students with an LAAB accredited professional degree in landscape architecture and a significant history of achievement in professional practice may tailor a program of advanced study to meet their specific needs.

The normal tenure of advanced graduate study is five semesters which includes a summer semester internship. Students complete a minimum of 52 credit hours composed of lecture courses, seminars, design and construction studios, internship and individual study (special studies, supervised research and thesis or terminal project).

This time period would be extended should a student elect to expand the course work or seek a concurrent degree in a related field.

Design studios: Graduate design studios build on required lecture and seminar courses. A core of three advanced design studios are typically-oriented focusing on issues of human, ecological and regional concern. Each studio requires students to engage a method appropriate to the studio's selected projects, to analyze the findings generated by this research and to use the findings to build a rational argument that leads to a defensible design position. Interdisciplinary and multidisciplinary

collaborations are encouraged on both a formal and an informal basis. Graduate studio projects also deal with current issues related to the mission of the Department with an additional focus on research and community service.

Thesis or terminal project: The Department recognizes that students have different professional goals and personal strengths and interests. A thesis is appropriate for students interested in further research or teaching, or in pursuing advanced degrees. A project (with a significant research component) is appropriate for students interested in design or project-oriented aspects of landscape architecture, or if their specific areas of interest suggest a nontraditional approach.

Programs, centers, and institutes: The College of Design, Construction, and Planning has several research centers and institutes. Please see the College's webpage for more information (<https://dcp.ufl.edu/research/centers-institutes/>).

Graduate advisement: Students are initially advised by the Graduate Coordinator. They have guided the student's application through the acceptance process and is familiar with the student's background and needs. A plan of study is developed that includes required and optional courses. By the end of the second semester of the MLA1 year, each student is required to form a supervisory committee composed of two faculty members. The primary purpose of the graduate committee is to advise the student on educational objectives and the thesis or terminal project course work.

Application Procedure

Details of application procedure are found on the Department of Landscape Architecture's website. Applicants are encouraged to familiarize themselves with the details of the application procedures and the application requirements. Applications will ONLY be considered for the track for which they have been submitted. Make certain you are applying to the correct track based on your background and credentials and the criteria detailed above.

Application Dates

Applications are to be completed and submitted prior to the deadline noted on the Department's website. Unless otherwise noted, applications must be received no later than February 1st. Early applications are encouraged.

Application materials to be submitted online and/or to the Office of the Registrar.

Application materials include the online application form accompanied by official transcripts, Letters of Recommendation, GRE scores, and TOEFL scores (applicants with English as a second language) to:

Office of the Registrar
Admissions Section
Criser Hall
University of Florida
Gainesville, Florida 32611.

In addition, applicants must also submit a letter of intention to the Department of Landscape Architecture.

Application Portfolio

All applicants are encouraged to submit a portfolio of creative works.

Applicants with a baccalaureate landscape architecture degree or other design affiliated degree are required to submit a portfolio that both exhibits creative work experience and shows evidence of acquired technical proficiencies in, or related to, the practice of landscape architecture.

All portfolio must be digital. PDF is preferred.

Application Status

Applications will be processed once all material has been received and must be complete prior to the application deadline. Applicants will be contacted by the program's Academic Assistant if their application is incomplete. Please respond quickly if you have been contacted to increase the chances of your application being considered in the current review period. Only completed applications will be processed for review.

Once the application has been processed for review, applicants will receive written notification of their application status, generally sometime in the middle of March. Please do not contact the department with inquiries of your application status prior to the end of March.

Landscape Architecture

Program Information

The Department of Landscape Architecture offers graduate programs leading to the Master of Landscape Architecture (MLA) degree in Landscape Architecture. A Ph.D. degree with a concentration in Landscape Architecture is also offered through the College of Design, Construction and Planning. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Master of Landscape Architecture: The First Professional MLA is a Landscape Architecture Accreditation Board (LAAB) accredited professional Master's degree in Landscape Architecture. Graduation from an accredited program is an essential first step toward licensing in Florida and other states that regulate the practice of landscape architecture.

For more information, please see our website: <http://www.dcp.ufl.edu/landscape> (<http://www.dcp.ufl.edu/landscape/>).

Degrees Offered

Degrees Offered with a Major in Landscape Architecture

- Master of Landscape Architecture
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Historic Preservation
 - concentration in Sustainable Design
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Landscape Architecture (MLA)

SLO 1 Knowledge

Integrate concepts from the general body of knowledge of the profession of Landscape Architecture in design decision making

SLO 2 Skills

Apply core professional skills in landscape architecture

SLO 3 Skills

Combine and analyze information from multiple sources to support design decision making

SLO 4 Skills

Produce professional visual, oral and written communications

SLO 5 Skills

Devise research methodologies and conclusions appropriate to individual area of interest

SLO 6 Professional Behavior

Display ethical behaviors and professional conduct

M.E. Rinker, Sr. School of Construction Management

School Director: R. Cox

Director of Graduate Programs and Research: M. Gheisari

The mission of the M. E. Rinker, Sr. School of Construction Management is to be the center of excellence for construction. The Rinker School will pursue this by: Promoting professional and ethical behavior in education and practice, advancing the industry by creating new knowledge through research and scholarly activities, educating individuals in principles, knowledge and skills required to be successful in their professional careers, and providing service and transferring knowledge to the citizens of Florida, the construction industry, professional societies, the nation, and the world. The Rinker School will achieve this mission by fostering a core culture of value and quality.

Graduate Degrees offered include:

Construction Management

- Master of Construction Management (M.C.M.) – Non-Thesis Option
- Master of Science in Construction Management (M.S.C.M.) – Thesis Option
- Doctor of Philosophy in Design, Construction and Planning – Construction Management Concentration

Fire and Emergency Sciences

- Master of Fire and Emergency Sciences (M.S.F.E.S.) – Online Non-Thesis

The degree and admission requirements for the Ph.D. program are found at <https://dcp.ufl.edu/rinker/academics/cm/phd/>.

The degree and admission requirements for the M.S.C.M. and M.C.M. are found at <https://dcp.ufl.edu/rinker/academics/cm/masters/>.

The degree and admission requirements for the M.S.F.E.S. are found at <https://dcp.ufl.edu/rinker/academics/online/master-of-fire-and-emergency-sciences/>.

The research fields in which the Rinker School specializes are listed at <https://dcp.ufl.edu/rinker/research/>.

Additional information regarding the Rinker School is available at <https://dcp.ufl.edu/rinker/>.

Construction Management Program Information

The Rinker School offers two master's degree pathways. While both have the same number of credit hours, they differ slightly in terms of coursework structure and research requirements:

- **Master of Construction Management (M.C.M.) – Non-Thesis Option:** This non-thesis option is coursework-only and designed for students who intend to enter the construction industry directly after graduation. The M.C.M. requires 30 semester hours of coursework, plus 6 semester hours of leveling courses for students who do not hold an undergraduate degree in Construction Management accredited by the American Council for Construction Education (ACCE).
- **Master of Science in Construction Management (M.S.C.M.) – Thesis Option:** This thesis option is designed for students who are interested in conducting research or planning to pursue a Ph.D. in the future. The thesis option provides an in-depth research experience, allowing students to work closely with a faculty advisor and thesis committee on construction-related topics. The M.S.C.M. also requires 30 semester hours of coursework, plus 6 semester hours of leveling courses for students who do not hold an undergraduate degree in Construction Management accredited by the *American Council for Construction Education (ACCE)*. The M.S.C.M. includes 6 semester hours of BCN 6971 (Research for Master's Thesis), dedicated to research and thesis writing, along with BCN 6036 (Research Methods in Construction).

Further details regarding both degrees are found at <https://dcp.ufl.edu/rinker/academics/cm/masters/>.

Combination program: The Rinker School participates in a combination degree program between the Bachelor of Science in Construction Management (B.S.C.M.) and the Master of Science in Construction Management (M.S.C.M.). The program allows participating undergraduate students to take 12 semester hours of graduate coursework while completing their undergraduate degree, shortening the duration of the M.S.C.M. to one year. To be eligible to apply, B.S.C.M. students must have an upper-division grade point average of at least 3.4 and have the approval of the Rinker School's undergraduate and graduate programs.

Degrees Offered

Degrees Offered with a Major in Construction Management

- Master of Construction Management
 - without a concentration
 - concentration in Hydrologic Sciences
- Master of Science in Construction Management
 - without a concentration
 - concentration in Hydrologic Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Construction Management (MCM)

SLO 1 Apply Basic Statistics BCN 6036: Exam; 80% of students earn 77% or higher

SLO 2 Formulate a plan to solve a problem BCN 6036: 75% of students earn 77% or higher on both the written paper and the verbal presentation

SLO 3 Convey a Research Plan to interested parties utilizing proper written and verbal communication skills BCN 6036: 75% of students earn 77% or higher on both the written paper and the verbal presentation

SLO 4 Identify and exhibit professional and ethical behavior BCN 6036: 75% of students earn 77% or higher on their presentation dealing with ethical research

Construction Management (MSCM)

SLO 1 Identify rigorous problems in the construction management discipline Thesis Defense: 100% of students earn an average rating of 3 or higher, and 80% of students will earn an average rating of 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 2 Create a literature review on a selected topic that encapsulates the latest research on the topic Thesis Defense: 100% of students earn an average Rating of 3 or higher, and 80% of students will earn an average rating of 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 3 Devise and apply research methods to solve problems and generate new knowledge Thesis Defense: 100% of students earn an average Rating of 3 or higher, and 80% of students will earn an average rating of 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 4 Communicate effectively in writing Thesis Defense: 100% of students earn an average Rating of 3 or higher, and 80% of students will earn an average rating of 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 5 Communicate effectively in professional situations Thesis Defense: 100% of students earn an average Rating of 3 or higher, and 80% of students will earn an average rating of 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

Fire and Emergency Sciences

Program Information

The Master of Science in Fire and Emergency Sciences degree program focuses on Emergency Services/Disaster Management (ES/DM) and is designed for individuals who are seeking knowledge in emergency planning, hazard mitigation and preparedness, disaster response and recovery, and homeland security. The goal is to create broad experience that includes the many elements of current cases in ES/DM and emphasizes both the critical thinking and leadership skills necessary to advance in the field.

The M.S.F.E.S. degree provides post-professional advancement for the critical technical issues beyond the initial emergency science practices and administrative studies. Major research topics include interdisciplinary studies in material sciences, suppression systems, advanced planning and geographic systems, pre- and post-disaster mitigation planning, computer applications, and technological innovations.

The M.S.F.E.S. is an online distance education program. All courses are conveniently delivered utilizing a web-based e-Learning system. Students must complete 33 credits/11 FES classes in order to fulfill the degree requirements. The classes are selected with the FES Academic Advisor.

For more information, please see the program website: <https://dcp.ufl.edu/rinker/academics/online/master-of-fire-and-emergency-sciences/>.

Student Learning Outcomes

Fire & Emergency Services (MSFES)

SLO 1 Assess complex communication technology systems, both current and emerging, for disaster management
80% of the students earn an 80% or higher

SLO 2 Manage the application of safety, health, and environmental regulations relevant to disaster management
80% of the students earn an 80% or higher

SLO 3 Assess leadership skills for disaster management
80% of students earn an 80% or higher

SLO 4 Organize human resources for disaster situation
80% of the students earn an 80% or higher

SLO 5 Formulate effective organizational management skills associated with disaster management
80% of the students earn an 80% or higher

SLO 6 Create verbal and written communication as it relates to disaster management
80% of the students earn an 80% or higher

Sustainable Construction

Program Information

The Major in Sustainable Construction inside of a Master of Science in Construction Management degree will prepare students to effectively contribute to the design, construction, operation and maintenance of a high performance-built environment comprised of green, energy-efficient buildings, renewable energy systems, and efficient infrastructure. Its objectives are to address:

1. Issues of built infrastructure related water, energy, and material resource efficiencies.
2. Alternative practices that can significantly reduce the environmental impacts of the built environment.
3. Exploring emerging disciplines in sustainable construction.

The resulting degree awarded upon successful completion of the program will be a Master of Science in Construction Management (thesis) with a Major in Sustainable Construction.

In addition to writing a sustainability themed thesis, students must complete the following coursework:

Code	Title	Credits
BCN 6583	Sustainable Housing	3
BCN 6584C	Building Energy Modeling	3

BCN 6585	Sustainable Construction	3
BCN 6641	Construction Value Engineering	3

Degrees Offered

Degrees Offered with a Major in Sustainable Construction

- Master of Science in Construction Management

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Construction Management Departmental Courses

Student Learning Outcomes

M.E. Rinker Sr. School of Construction Management (MSCM) Sustainable Construction

SLO 1 Identify contemporary problems in the construction management discipline

Thesis Defense: 100% of students earn an average Rating of 3 or higher, 80% of students will earn a 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 2 Create a rigorous literature review on a selected topic

Thesis Defense: 100% of students earn an average Rating of 3 or higher, 80% of students will earn a 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 3 Develop and apply research methods to solve problems and generate new knowledge

Thesis Defense: 100% of students earn an average Rating of 3 or higher, 80% of students will earn a 4 or higher, from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 4 Communicate effectively in writing

Thesis Defense: 100% of students earn an average Rating of 3, 80% of students will earn a 4 or higher, or higher from their committee members as recorded on the Thesis Defense Assessment Rubric

SLO 5 Communicate effectively in professional situations

Thesis Defense: 100% of students earn an average Rating of 3, 80% of students will earn a 4 or higher, or higher from their committee members as recorded on the Thesis Defense Assessment Rubric

School of Architecture

Director: J. Alread

Graduate Coordinator: B. Walters

The School of Architecture recognizes design as a synthesis of thinking, analyzing and making — an iterative process that engages, issues of space, historical precedent, sustainability, ecology, urbanity, landscape, built-form, and construction toward innovation. As Florida will soon support the third largest population in the US, the challenges of rapid growth within sensitive natural ecologies, fluctuating tourism, humid and hot climate, multiple urban centers, sprawling suburbs, dwindling agriculture, lack of mass transit, and extensive coastal hurricane threats requires integrative and collaborative design strategies for the future.

The School of Architecture is uniquely positioned to respond to these issues by deploying studio-based design methodologies in collaboration with a new generation of experts in engineering, ecology, business, anthropology, energy, fine arts, medicine and construction. Within the University of Florida, the State's flagship research institution, a trove of researchers and faculty dedicated to academic excellence and interdisciplinary collaboration are focused on the demands of changing culture. The SoA is one of seven programs associated within the College of Design, Construction and Planning — Architecture, Landscape

Architecture, Planning, Preservation, Sustainability and the Built Environment, Interior Design and Building Construction. SoA faculty and students, working independently and collaboratively across disciplines through teaching, research and practice, have garnered international, national, state and local design awards, publish regularly and secure national, state and local grant funding for research based service learning and design projects. This body of work poses theoretical, poetic, cultural and practical questions and suggests responses through the discipline of design.

The GISoA is focused on research-based design that explores critical issues of a changing culture — climate, energy, infrastructure, transportation and population growth/redistribution. Students are engaged in design as a collaborative and integrative methodology addressing both real and speculative projects through coordinated studios, seminars and workshops. To support this effort, nationally recognized award winning Architects from practice and the academy in the US and abroad collaborate with faculty and students in studio and intensive issue-oriented workshops strategically scheduled during the academic year.

Architecture

Program Information

Doctor of Philosophy: The college offers an interdisciplinary program leading to the Doctor of Philosophy degree in design, construction, and planning. Areas of specialization in this program include architecture, building construction, interior design, landscape architecture, and urban and regional planning. For information, write to the:

Ph.D. Director
College of Design, Construction, and Planning Doctoral Program
331 ARCH
Box 115701.

Master of Architecture: In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards. Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree.

The University of Florida School of Architecture offers the following NAAB-accredited degree programs:

- Master of Architecture (M.Arch) – Track I: Undergraduate pre-professional degree with architecture major + 52 graduate semester credit hours
- Master of Architecture (M.Arch) – Track II: Undergraduate professional degree + 30 graduate semester credit hours
- Master of Architecture (M.Arch) – Track III: Undergraduate degree with non-architecture major + 48 preparatory semester credits + 52 graduate semester credit hours

Next accreditation visit for all programs: 2022.

During graduate studies, each student has the opportunity to focus on one or more areas, including design, history and theory, urban design, preservation, structures, and technology. Concentrations and certificates are available in themed environments integration, historic preservation, sustainable architecture, and sustainable design. The student's overall college experience, both undergraduate and graduate programs, is intended to be a complete unit of professional education leading to practice in architecture or related fields.

- *Master of Architecture – Track I (Undergraduate pre-professional degree with architecture major + 52 graduate semester credit hours):* For those students who have a 4-year pre-professional baccalaureate degree in architecture from an accredited institution, 2 years in residence (52 credits) are normally required to complete the Master of Architecture degree. Notification of program length is part of the letter of acceptance and is determined by portfolio and transcript review. ARC 6241 Advanced Studio I (1-9 cr.), ARC 6355 Advanced Studio II (6 cr.), and ARC 6356 Advanced Studio III (6 cr.) are required of all graduate students in this track and are prerequisites for the required thesis or master's project. Course sequences in history and theory, technology, structures, and professional practice must also be completed.
- *Master of Architecture – Track II (Professional degree + 30 graduate semester credit hours):* For students with a professional degree in architecture from a NAAB-accredited professional degree program, a 1-year degree program is available. In these cases, a specialized curriculum is developed that complements the needs of the applicant. Minimum registration is 30 credits; however, the minimum may increase if transcript reviews show that further course work is needed to meet registration and curriculum requirements. ARC 6356 (<https://catalog.ufl.edu/search/?P=ARC%206356>) Advanced Studio III (6 cr.) is a prerequisite for the thesis or master's project.
- *Master of Architecture – Track III (Undergraduate degree with non-architecture major + 48 preparatory semester credits + 52 graduate semester credit hours):* For students with a baccalaureate degree in a nonrelated academic area and have completed fewer than 4 design studio courses, 4 years of residence (100 credits, approximately) are normally required to complete the Master of Architecture degree. Notification of program length is part of the letter of acceptance and is determined by portfolio and transcript review. ARC 4071 Core Studio 1 (6 cr.), ARC 4072 Core Studio 2 (6 cr.), ARC 4073 Core Studio 3 (6 cr.), ARC 4074 Core Studio 4 (6 cr.), ARC 6241 Advanced Studio I (1-9 cr.), ARC 6355 Advanced Studio II (6 cr.), and ARC 6356 Advanced Studio III (6 cr.) are required of all graduate students in this track and are prerequisites for the required thesis or project. Undergraduate courses 3000 and 4000 level in the major do not count toward the 52-hour minimum requirements for the graduate degree. Course sequences in history and theory, materials and methods, technology, structures, and practice must be completed.

Student work: The School may retain student work for the purpose of record, exhibition, or instruction.

Master of Science in Architectural Studies: The M.S.A.S. is a nonprofessional degree for advanced investigations in specialized areas, including themed environments integration, pedagogy, sustainable design, acoustics, computational design, community design, history/theory/criticism, building technology, preservation, or practice. Students with a bachelor's degree in any discipline from an accredited university are eligible to apply to this program. The proposed area of focus should be precisely defined in the application. This is a 3- to 4-semester program (32 hours minimum) that includes a thesis. (No more than 6 hours of ARC 6971 Research for Master's Thesis (1-15 cr.) may be counted in the minimum credit hours for the degree.) Interdisciplinary study is encouraged. Concentrations and certificates are available in themed environments integration, historic preservation, sustainable architecture, and sustainable design.

Requirements for the M.Arch., M.S.A.S., and Ph.D. degrees are described in the General Information section of this catalog.

Applications: For the Master of Architecture (M.Arch) degree programs, all applications for fall term graduate admission (including official transcripts, GRE scores, and TOEFL scores, if necessary) must be received by the Office of the Registrar by January 1. In addition to satisfying University requirements for admission, applicants are required to submit to the Graduate Program Assistant, School of Architecture, 231 ARCH, Box 115702, the following: a portfolio of their creative work; a scholarly statement of intent and objectives; and three letters of recommendation. This material must be received by January 1 to be considered for admission in the next fall term. Students may apply after the January 15 deadline but will only be considered if spaces become available.

For the Master of Science in Architectural Studies (M.S.A.S.) degree programs, all applications (including official transcripts, GRE scores, and TOEFL scores, if necessary) must be received by the Office of the Registrar by February 15 to be considered for the following fall semester or by September 15 to be considered for the following spring semester. In addition to satisfying University requirements for admission, applicants are required to submit to the Graduate Program Assistant, School of Architecture, 231 ARCH, Box 115702, the following: a scholarly statement of intent and objectives; three letters of recommendation; and a portfolio of their creative work (if applicable to the course of study). Students may apply after the fall or spring deadlines will only be considered if spaces become available.

Field trips are required of all students; students should plan to have adequate funds available. It may be necessary to assess studio fees to defray costs of base maps and other generally used materials.

Degrees Offered

Degrees Offered with a Major in Architecture

- Master of Science in Architectural Studies
 - without a concentration
 - concentration in Historic Preservation
 - concentration in Sustainable Architecture
 - concentration in Sustainable Design
 - concentration in Themed Environments Integration
- Master of Architecture

- without a concentration
- concentration in Historic Preservation
- concentration in Sustainable Architecture
- concentration in Sustainable Design

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

DGP 7980	Research for Doctoral Dissertation	1-15
DGP 7981	Doctoral Core 3: Academic Writing for Publication	3

Student Learning Outcomes

Architecture (MS)

SLO 1 Knowledge

Acquire, interpret and analyze information as it relates to the design process. Use critical thinking and specialized knowledge of architectural systems to identify and assess problems. Develop design responses in a competent and ethical manner

SLO 2 Skills

Develop an area of focus and a self-directed inquiry. Work collaboratively toward integrative proposals

SLO 3 Professional Behavior

Engage in the advancement of the discipline

Engage the economic, ethical, and aesthetic aspects of professional practice

Master of Science in Architectural Studies

SLO 1 Knowledge

Acquire, interpret and analyze information as it relates to the design process. Use critical thinking and specialized knowledge of architectural systems to identify and assess problems. Develop design responses in a competent and ethical manner

SLO 2 Skills

Develop an area of focus and a self-directed inquiry. Work collaboratively toward integrative proposals

SLO 3 Professional Behavior

Engage in the advancement of the discipline. Engage the economic, ethical, and aesthetic aspects of professional practice

Urban and Regional Planning Department

Director of School of Landscape Architecture and Planning: K. Larsen
Chair: L. Hu

Graduate Coordinator: L. Dedenbach

Graduate Coordinator of Online Degree program: T. Hawkins

The mission of the Department of Urban and Regional Planning is to educate the next generation of planning professionals to be good stewards of our built and natural environments, to conduct innovative research that improves quality of life for all, and to provide planning services to communities.

Doctor of Philosophy: The College offers an interdisciplinary program leading to the Doctor of Philosophy degree in Design, Construction, and Planning. Areas of specialization within this program include architecture, building construction, interior design, landscape architecture, and urban and regional planning. For information, please see the Design, Construction, and Planning (Ph.D.) (<http://gradcatalog.ufl.edu/graduate/colleges-departments/design-construction-planning/other-programs/design-construction-planning-phd/>) program page in this catalog, or the DCP Ph.D. website: <https://dcp.ufl.edu/urp/academics/ph-d/>.

Master of Urban and Regional Planning: The Department of Urban and Regional Planning offers graduate work leading to the degree of Master of Urban and Regional Planning (M.U.R.P.). The fifty-two credit graduate degree program can be earned on campus or online. The Planning Accreditation Board has accredited the campus-based program; students typically complete the campus-based degree program in two academic years. The online program targets practicing professionals with its flexible scheduling and sequencing of classes. Students with a master's degree in a related field may obtain approval from the Department to transfer up to 18 credit hours toward the 52-credit requirement. The department encourages students with any undergraduate degree who are interested in the field of planning to apply for admission.

The Department of Urban and Regional Planning and the Levin College of Law offer a joint degree program. The four-year program leads to a Juris Doctor and a Master of Urban and Regional Planning (<https://www.law.ufl.edu/areas-of-study/degree-programs/joint-degree-programs/>). Students may pursue Concurrent Degrees in Latin American Studies and in Transportation Engineering. Concurrent degrees allow the sharing of 9 credits between the two degrees. Areas of concentration with other programs in the Graduate School may be developed to meet the individual needs of students.

The department offers a combination undergraduate/graduate degree program with several UF departments and colleges including Sustainability and the Built Environment, Political Science, Forestry, and more. Please contact a College of Design, Construction and Planning Advisor and/or Graduate Coordinator for Urban and Regional Planning to learn more and for information about application and approval procedures.

In addition to coursework, the student is required to complete an internship with a public agency or private planning firm and to complete a master's thesis or research project (in lieu of thesis) with faculty approval. The Department reserves the right to retain student work for purposes of record, exhibition, or instruction.

Complete descriptions of the requirements for the above-mentioned degrees are provided in the Graduate Degrees (p. 778) section of this catalog.

For more information, please see the program page below and our website: <http://www.dcp.ufl.edu/urp> (<http://www.dcp.ufl.edu/urp/>).

Urban Analytics

Overview

PROGRAM INFORMATION

The Master of Science (M.S.) with a major in Urban Analytics program at the University of Florida is designed to equip students with a strong foundation in computing, data analysis and visualization skills for urban science. What sets our program apart is its focus on artificial intelligence with an interdisciplinary support, offering a holistic perspective that goes beyond the limitations of single-discipline urban analytics degrees.

The 36-credit, two-year degree program will offer students a variety of courses in different clusters about urban and regional planning theory (6 credits required), methods (9 credits required), data science (3 credits required), Artificial Intelligence (9 credits required) and database (3 credits required) in collaboration with departments in the College of Engineering. Incoming students will begin the program in the fall semester. Based on their terminal project topic, each student will enroll in URP 6979 for their 6 credits of master's research project.

Each student will develop a solid base of understanding for data science and AI technologies and have a strong domain knowledge in urban studies and urban planning, understand social justice and equity, become an expert in their chosen field of research, and develop the skills necessary to pursue an independent research and practice agenda in both academia and industry.

Upon completion of this degree, students will be able to think critically and apply AI and Machine Learning methodologies to complex spatial analysis and environmental, and urban planning problems, and integrate technologies with analysis.

For more information, please see our website: <https://dcp.ufl.edu/urp/urban-analytics/>

Urban and Regional Planning Program Information

The Department of Urban and Regional Planning offers the degree of Master of Urban and Regional Planning (M.U.R.P.). The 52-credit graduate program is usually completed in two academic years. Students with a master's degree in a related field may obtain approval from the Department to transfer up to 18 credit hours toward the 52-credit requirement. The Department encourages students with any undergraduate degree who are interested in the field of planning to apply for admission.

The M.U.R.P. degree is accredited by the Planning Accreditation Board, a joint undertaking of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, for having achieved the highest applicable standards for graduate education in the field of planning. Graduates of the Department are prepared to practice urban and regional planning. Complete descriptions of the requirements for the M.U.R.P. and Ph.D. degrees are provided in the General Information section of this catalog.

The Urban and Regional Planning curriculum is designed to provide a set of core studies and contextual projects that prepare the graduate for the practice of planning in public or private agencies at both national and international levels. The core studies include history and theory of planning; planning methods; and related studies in community and regional social, natural, and economic systems. Contextual projects include, among many subject areas, urban design, transportation, regional planning, community redevelopment and preservation, housing, real estate, and economic development. Interstate field trips are required as a part of the normal program curriculum. Students should plan to have adequate funds for field trips and for studio materials.

The program emphasizes planning, policy, and design for the built and natural environments. Areas of specialized knowledge include land use and transportation, urban design, housing, community and economic development, information technologies for planning, and environmental planning. Students are also encouraged to take advantage of the interdisciplinary faculty, course offerings, and other resources available in the College of Design, Construction, and Planning and throughout the University.

The Department has several research centers: The Geo-facilities Planning and Information Center (GeoPlan), the Center for International Design and Planning (CIDP), the Center for Building Better Communities (CBBC), and the Center for Health and the Built Environment (CHBE).

Combination Degree: The college participates in combination degree programs between any UF undergraduate degree and a Master of Urban and Regional Planning. Please consult the academic unit for more information or if interested in participating in this program.

For more information, please see our website: <https://dcp.ufl.edu/urp/academics/>

Degrees Offered

Degrees Offered with a Major in Urban and Regional Planning

- Master of Urban and Regional Planning
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Historic Preservation
 - concentration in Sustainable Design
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Urban & Regional Planning (MURP)

SLO 1 Knowledge

Apply knowledge of human settlement, historical and contemporary practice, and policy and processes relevant to urban and regional planning concepts and theories

SLO 2 Skills

Apply oral, written, and critical thinking skills required of master's students within their area of specialization

SLO 3 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication

College of Education

Dean: G. Good

Graduate study in education allows individuals with bachelor's degrees in agriculture, business, education, engineering, mathematics, sciences, humanities, foreign languages, preprofessional studies, and other fields to prepare for rewarding professional careers in education and related fields.

The College of Education offers 19 master's or specialist programs, 12 doctoral programs, and a J.D./Ph.D. program with the College of Law through its three schools:

1. Human Development and Organizational Studies in Education (p. 118)
2. Special Education, School Psychology and Early Childhood Studies (<https://gradcatalog.ufl.edu/graduate/colleges-departments/education/special-education-psychology-early-childhood-studies/>)
3. School of Teaching and Learning (p. 145)

Follow these links for more information about UF's College of Education graduate programs:

Anatomical Sciences Education

The Anatomical Sciences Education graduate program offers the Master of Science and the Doctor of Philosophy degrees. The faculty for this program is drawn from these disciplines:

- Anatomy
- Education

For the Ph.D. program, applicants must meet the minimum requirements for the University of Florida Graduate School: Junior/Senior GPA > 3.0 and a score on the Graduate Record Exam (GRE) a minimum score of 300 for the current scale. No GRE is required for the MA program. For both the MS and the PhD program, the student will submit a minimum of three letters of reference, a statement of purpose, and a resume, which the admissions committee will use to assess the student's qualifications for admission to the program. International students must comply with current UF standards for admission to the Graduate School, including requirements for English language competency and financial responsibility.

Contact Mark Zakshevsky at zmz30@ufl.edu

or visit the program's website at <https://anatomy.acb.med.ufl.edu/>.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN ANATOMICAL SCIENCES EDUCATION

- Doctor of Philosophy
- Master of Science

Courses

Anatomical Sciences Education Courses

Student Learning Outcomes

ANATOMICAL SCIENCES EDUCATION (Ph.D.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Display appropriate behavior to instructors, fellow students and individuals who have bequeathed their bodies to medical science.

Anatomical sciences education (M.S.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Apply ethical standards and implement excellence in all endeavors which focus on professional identity formation (i.e., development of professional values, actions and aspirations).

Counseling and Counselor Education Program Information

The doctoral program in Counseling and Counselor Education prepares students for careers in academia and advanced clinical and administrative positions. Our program aligns with the University of Florida's mission to prepare the next generation of scholars and professional leaders. Thus, our doctoral program is a good fit for individuals who want to fulfill the roles of counselor educators – research, writing, teaching, service, securing external funding to support scholarship, assuming professional leadership positions, etc. The doctoral program ideally suits individuals with previously earned master's and at least two years of clinical experience. Doctoral students complete coursework and a doctoral clinical internship, participate in teaching and supervision, and conduct research leading to the completion of a

dissertation. Students average 3 to 5 years to complete the doctorate, many balancing work and school commitments. In addition to other admission materials, GRE scores must be submitted upon application to the Counseling and Counselor Education doctoral program. Please visit <https://education.ufl.edu/counselor-education/admissions/> for further information about admission requirements to our programs.

Student Learning Outcomes

Counseling & Counselor Education

SLO 1 Knowledge

Candidates will apply professional knowledge in each of the eight (CACREP) common core curricular areas and at least one specialty area within the counselor education context.

SLO 2 Skills

Candidates will apply proficiency in counseling, supervision, counselor education (teaching), and research associated with counselor preparation and training.

SLO 3 Professional Behavior

Candidates will apply professional behavior in the field of counselor education and supervision by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Educational Leadership

Program Information

Programs in Educational Leadership provide opportunities for professional educators and those who would like to be professional educators to receive quality coursework, mentorship, and degrees in educational administration, policy, and leadership. The programs provided are ideal for vice principals, principals, district directors and supervisors, assistant superintendents, school business managers, teachers aspiring to acquire administrative roles within the K-12 system and educational leaders of other organizations.

Degrees Offered

Degrees Offered with a Major in Educational Leadership

- Doctor of Education
 - without a concentration
 - concentration in Educational Policy
- Doctor of Philosophy
 - without a concentration
 - concentration in Educational Policy
- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Educational Leadership (PHD)

SLO 1 Knowledge

Students will identify and describe the core curricular areas of educational leadership including: school finance and law, human resources, technology, data-driven decision-making, diversity, organizational theory, supervision, evaluation, and research.

SLO 2 Skills

Candidates will apply clarity of written and oral expression to advanced levels of skill in the core areas of educational leadership, evaluation and dissertation research.

SLO 3 Skills

Candidates will identify and explain competencies and skills of instructional leadership, operational leadership and school leadership to promote the success of all students.

SLO 4 Professional Behavior

Candidates will participate in professional organizations and will apply ethical behavior and professional conduct.

SLO 5 Professional Behavior

Candidates will promote the success of all students by understanding the larger political, social, economic, legal and cultural issues.

Educational leadership (edd)

SLO 1 Knowledge

Students will identify and describe the core curricular areas of educational leadership including: school finance and law; human resources; technology; data-driven decision-making, diversity; organizational theory, leading change, educational policy, instructional leadership, program evaluation, supervision and strategic planning.

SLO 2 Skills

Candidates will apply clarity of written and oral expression to advanced levels of skill in the core areas of educational leadership, evaluation and dissertation research.

SLO 3 Skills

Candidates will identify and explain competencies and skills of instructional leadership, operational leadership, and school leadership to promote the success of all students and the improvement of teacher quality.

SLO 4 Professional Behavior

Candidates will apply ethical behavior, professional conduct, and communication.

SLO 5 Professional Behavior

Candidates will promote the success of all students by understanding the larger political, social, economic, legal and cultural issues.

Educational Leadership (eds)

SLO 1 Knowledge

Candidates will identify and describe the core curricular areas of educational leadership including: school finance and law, human resources, technology, data-driven decision-making, diversity, organizational theory, supervision and strategic planning.

SLO 2 Skills

Candidates will apply and defend advanced levels of skill in the core areas of educational leadership.

SLO 3 Skills

Candidates will identify and explain competencies and skills of instructional leadership, operational leadership and school leadership to promote the success of all students.

SLO 4 Professional Behavior

Candidates will apply ethical behavior, professional conduct and communication.

SLO 5 Professional Behavior

Candidates will promote the success of all students by understanding the larger political, social, economic, legal and cultural issues.

Educational Leadership (MAE)

SLO 1 Knowledge

Candidates will identify and describe the core curricular areas of educational leadership including school finance, law, human resources, technology, data-driven decision-making, diversity, organizational theory, supervision & strategic planning.

SLO 2 Skills

Candidates will apply competencies and skills of instructional leadership, operational leadership and school leadership to promote the success of all students.

SLO 3 Professional Behavior

Candidates will apply ethical behavior, professional conduct, and communication.

SLO 4 Professional Behavior

Candidates will promote the success of all students by understanding the larger political, social, economic, legal and cultural issues.

Educational Leadership (MEd)

SLO 1 Knowledge

Candidates will identify and describe the core curricular areas of educational leadership including school finance, law, human resources, technology, data-driven decision-making, diversity, organizational theory, supervision & strategic planning.

SLO 2 Skills

Candidates will apply competencies and skills of instructional leadership, operational leadership and school leadership to promote the success of all students.

SLO 3 Professional Behavior

Candidates will apply ethical behavior, professional conduct, and communication.

SLO 4 Professional Behavior

Candidates will promote the success of all students by understanding the larger political, social, economic, legal and cultural issues.

Higher Education Administration

Program Information

The Higher Education Administration program is one of the nation's premier graduate programs for higher education administration and policy evaluation. Our emphasis remains on the role of research in evaluating policies, informing institutional effectiveness, and creating scholarship that connects both scholars and practitioners through a multidisciplinary approach. Focusing on both the two-year and four-year sectors, our nationally respected Higher Education Administration programs offer a Ph.D. and Ed.D. focused on rigorous scholarship and preparing future higher education faculty members, institutional leaders, policymakers, and researchers. Aided by our innovative and nationally respected faculty, the Higher Education Administration program provides students with the opportunity to work on cutting-edge research projects and publish work in top journals within higher education, public policy, and postsecondary administration.

Degrees Offered

Degrees Offered with a Major in Higher Education Administration

- Doctor of Education
 - without a concentration
 - concentration in Educational Policy
- Doctor of Philosophy
 - without a concentration
 - concentration in Educational Policy

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Higher education administration (PHd)

SLO 1 Knowledge

* Identifies, describes, and explains the substantive body of literature related higher education and the national, state, regional, and institutional contexts in higher education * Describes and explains the institutional functioning of higher education institutions including issues related to leadership and governance, funding, the role of the government as well as issues pertaining to students, faculty, and administrators * Identifies and describes major global and national trends affecting higher education
* Identifies and describes the most conventional types of qualitative and quantitative research methodologies applied to the study of higher education

SLO 2 Skills

* Relate and apply major concepts and theories in the literature to specific higher education issues, cases, and settings * To develop skills of analysis, synthesis, research, and communication (verbal and written) concerning issues and topics related to higher education * To write academically according to APA style and to other audiences effectively

SLO 3 Professional Behavior

* Displays ethical behaviors consistent with professional standards related to research and publishing and practice demonstrated through cultural sensitivity, awareness, and empathy * Abides to expectations and norms of the discipline and profession

Higher education administration (Edd)

SLO 1 Knowledge

* Identifies, describes, and explains the substantive body of literature related to higher education and the national, state, regional, and institutional contexts in higher education * Describes and explains the institutional functioning of higher education institutions including issues related to leadership and governance, funding, the role of the government as well as issues pertaining to students, faculty, and administrators
* Identifies and describes the major global and national trends affecting higher education * Identifies and describes the most conventional types of qualitative and quantitative research methodologies applied to the study of higher education

SLO 2 Skills

* Relate and apply major concepts and theories in the literature to specific higher education issues, cases, and settings * To develop skills of analysis, synthesis, research, and communication (verbal and written) concerning issues and topics related to higher education * To write academically according to APA style and to other audiences effectively

SLO 3 Professional Behavior

* Displays ethical behaviors consistent with professional standards related to research and publishing and practice demonstrated through cultural sensitivity, awareness, and empathy Abides to expectations and norms of the discipline and profession

Marriage and Family Counseling

Program Information

The Marriage & Family Counseling/Therapy program is designed to equip students with the pre-professional competencies required for Registered Intern status and, after a minimum number of years of post-degree supervised clinical experience, for licensure in the State of Florida as Marriage and Family Counselors. The program emphasizes an eco-systemic approach to understanding human problems and generating solution opportunities to mutual concerns and problems.

Degrees Offered

Degrees Offered with a Major in Marriage and Family Counseling

- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

MHS 6440	Marriage and Couples Counseling	3			
MHS 6450	Substance Abuse Counseling	3	SLO 1	Knowledge	

Candidates will apply professional knowledge to address a wide variety of issues in the context of relationships and families.

SLO 2 Skills

Candidates will apply ethical and legal standards in marriage, couple, and family counseling and select models or techniques appropriate to couples' or families' presenting problems in a practical setting.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in marriage and family counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Marriage & Family Therapy (MAE)

SLO 1 Knowledge

Candidates will apply professional knowledge to address a wide variety of issues in the context of relationships and families.

SLO 2 Skills

Candidates will engage in marriage and family counseling skills by applying ethical and legal standards in marriage, couple, and family counseling and to select models or techniques appropriate to couples' or families' presenting problems.

SLO 3 Professional Behavior

Candidates will engage in professional behavior in marriage and family counseling by: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Marriage & Family Therapy (MEd)

SLO 1 Knowledge

Candidates will apply professional knowledge to address a wide variety of issues in the context of relationships and families.

SLO 2 Skills

Candidates will engage in marriage and family counseling skills by applying ethical and legal standards in marriage, couple, and family counseling and to select models or techniques appropriate to couples' or families' presenting problems.

SLO 3 Professional Behavior

Candidates will engage in professional behavior in marriage and family counseling by: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Mental Health Counseling

Program Information

The M.Ed./Ed.S. and M.AE./Ed.S. program in Mental Health Counseling is designed to equip students with the pre-professional competencies required for Registered Intern status and, after a minimum number of years of post-degree supervised clinical experience,

1. licensure in the State of Florida as Mental Health Counselors and
2. clinical membership in NBCC's Academy of Certified Clinical Mental Health Counselors.

Additionally, some students elect the thesis option (M.A.E.) to complete their studies.

Degrees Offered

Degrees Offered with a Major in Mental Health Counseling

- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

mental health counseling (eds)

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the clinical mental health counseling context.

SLO 2 Skills

Candidates demonstrate proficiency in counseling skills by applying principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Candidates also apply multicultural competencies to clinical mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in mental health counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling

Mental Health Counseling (MAE)

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the clinical mental health counseling context.

SLO 2 Skills

Candidates demonstrate proficiency in counseling skills by applying principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Candidates also apply multicultural competencies to clinical

mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders.

SLO 3 Professional Behavior Candidates will demonstrate professional behavior in mental health counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Program Evaluation in Educational Environments

Program Information

The goal of the Program Evaluation in Educational Environments is to prepare exemplary educational evaluators, who are able to apply state-of-the-art evaluation theory and tools to develop, improve, and assess programs, organizations, and policies. The coursework and learning experiences offered by this major are designed to train and empower evaluators to provide evaluation support for organizations and institutions, as they seek solutions to critical problems at local, national, and global levels. Because evaluation activity crosses disciplines, the evaluator is able to provide a unique and informed perspective to guide social change and innovations. The actions and recommendations of a program evaluator often trigger and foster positive reform in policies and programs in government, schools, business, health, and social agencies both locally, nationally, and internationally.

- Learn to evaluate educational and other social science programs, interpret educational data, develop evaluation assessment instruments, and use research methodologies and evaluation theory to plan, conduct, and complete a program evaluation.
- Find jobs in federal and state agencies, institutions of higher education, school districts, and for-profit and non-profit organizations.

A number of program evaluators also choose to work as private consultants for school districts, government agencies, and private organizations.

- Complete a master's degree (M.A.E.) in two years with classes focusing on program evaluation theory and tools, research methodology, and statistics and psychometrics as applied to educational program evaluation.
- Our students come from a variety of backgrounds, including psychology; education; sociology; political science; anthropology; agricultural, family, youth, and community sciences; and health education and performance.

Degrees Offered

Degrees Offered with a Major in Program Evaluation in Educational Environments

- Master of Arts in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Research and Evaluation Methodology Program Information

The mission of the Research and Evaluation Methodology program is to generate, evaluate, apply and disseminate knowledge about educational research methodology, to prepare exemplary educational research methodologists, and to collaborate with others to provide methodology for the advancement of educational research. This mission aligns with College of Education's and University of Florida's missions because it results in research strategies for knowledge discovery to solve critical educational and human problems in a diverse global community.

- Learn to evaluate educational programs, analyze educational data, develop assessment instruments, and conduct research about the efficacy of research methodologies.
- Work as an educational researcher, an educational data analyst, or a psychometrician (an expert in testing and assessment).
- Find jobs in testing companies; research and evaluation companies; research centers; and assessment centers at universities, school districts, and state and federal agencies.
- Complete a master's degree (M.A.E. or M.Ed.) in two years or a Ph.D. in four years with classes focusing on research methodology, statistics applied to education, program evaluation, and psychometrics.
- We admit students with some undergraduate research experience. Our students come from a variety of backgrounds, including psychology, sociology, statistics, mathematics, mathematics education, political science, marketing, economics, and engineering.

Degrees Offered

Degrees Offered with a Major in Research and Evaluation Methodology

- Doctor of Education
- Doctor of Philosophy
- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Majors will participate in professional organizations, research presentations, or scholarly publications.

research & evaluation methodology (edd)

SLO 1 Knowledge

Majors will identify, define, explain, and describe the concepts, methods and issues in educational measurement and assessment, evaluation, and research methodology.

SLO 2 Skills

Majors will formulate hypotheses, plan and design educational research studies, plan and design methodological research studies, analyze data, and report results at an advanced level.

SLO 3 Professional Behavior

Majors will participate in professional organizations, research presentations, or scholarly publications.

Research & Evaluation Methodology (MAE)

SLO 1 Knowledge

Majors will identify, define, explain, and describe the concepts, methods and issues in educational measurement and assessment, evaluation, and research methodology.

SLO 2 Skills

Majors will formulate hypotheses, planning and designing educational research studies, planning and designing methodological research studies, analyzing data, and reporting results.

SLO 3 Professional Behavior

Majors will present concepts in research methodology both orally and in writing.

Research & Evaluation Methodology (MEd)

SLO 1 Knowledge

Majors will identify, define, explain, and describe the concepts, methods and issues in educational measurement and assessment, evaluation, and research methodology.

SLO 2 Skills

Majors will formulate hypotheses, planning and designing educational research studies, analyzing data, and reporting results.

SLO 3 Professional Behavior

Majors will present concepts in research methodology both orally and in writing.

School Counseling and Guidance Program Information

The M.Ed./Ed.S. and M.AE./Ed.S. program in School Counseling is designed to equip students with the pre-professional competencies required for Florida Department of Education Certification in School Counseling. The 72-credit hour program provides students with the specialized knowledge and skills required for placements as school counselors in public or private elementary, middle, or secondary schools.

Student Learning Outcomes

Research & evaluation methodology (Phd)

SLO 1 Knowledge

Majors will identify, define, explain, and describe the concepts, methods and issues in educational measurement and assessment, evaluation, and research methodology.

SLO 2 Skills

Majors will formulate hypotheses, plan and design educational research studies, plan and design methodological research studies, analyze data, and report results at an advanced level.

SLO 3 Professional Behavior

Students enrolled in the School Counseling program, a state-approved and CAEP (Council for the Accreditation of Educator Preparation) and CACREP (Council for the Accreditation of Counseling and Related Educational Programs) accredited school counselor preparation program, must provide passing scores for all pertinent sections of the Florida Teacher Certification Examination (FTCE) including the General Knowledge test (math, English language skills, reading comprehension, and essay), the Professional Education examination, and the Subject Area Examination in Guidance and Counseling K-12 prior to graduation from the program. Questions about this requirement or any other certification related questions may be addressed to the College of Education Office of Student Services.

Degrees Offered

Degrees Offered with a Major in School Counseling and Guidance

- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

School counseling & guidance

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the school counseling field.

SLO 2 Skills

Candidates demonstrate proficiency in school counseling skills by demonstrating the ability to apply and adhere to ethical and legal standards in school counseling and the ability to articulate, model, and advocate for an appropriate school counselor identity and program.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in school counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

School Counseling & Guidance (EdS)

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the school counseling field.

SLO 2 Skills

Candidates demonstrate proficiency in school counseling skills by demonstrating the ability to apply and adhere to ethical and legal standards in school counseling and the ability to articulate, model, and advocate for an appropriate school counselor identity and program.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in school counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and

credentialing bodies, and applications of ethical and legal considerations in professional counseling.

School Counseling & Guidance (MAE)

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the school counseling field.

SLO 2 Skills

Candidates demonstrate proficiency in school counseling skills by demonstrating the ability to apply and adhere to ethical and legal standards in school counseling and the ability to articulate, model, and advocate for an appropriate school counselor identity and program.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in school counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

School Counseling & Guidance (MEd)

SLO 1 Knowledge

Candidates will identify, explain, and defend professional knowledge to address a wide variety of circumstances within the school counseling field.

SLO 2 Skills

Candidates demonstrate proficiency in school counseling skills by demonstrating the ability to apply and adhere to ethical and legal standards in school counseling and the ability to articulate, model, and advocate for an appropriate school counselor identity and program.

SLO 3 Professional Behavior

Candidates will demonstrate professional behavior in school counseling by engaging in: (a) professional organizations, including membership benefits, activities, services to members, and current issues; (b) professional credentialing, including certification, licensure, and accreditation practices and standards, and the effects of public policy on these issues; (c) ethical standards of professional organizations and credentialing bodies, and applications of ethical and legal considerations in professional counseling.

Student Personnel in Higher Education

Program Information

The University of Florida Student Personnel in Higher Education program is a master's program designed to prepare students to enter Student Affairs leadership positions in two- and four-year institutions of higher education. The program integrates academic coursework with practitioner-based experience. The SPHE master's degree consists of 36 credit hours of core classes and 10 credit hours of supervised practicum and internship experiences (total = 46 credit hours). Students enter the graduate program in the fall semester as members of a cohort group. The group provides support and builds a sense of community for the

students. All students are assigned a faculty advisor at the time of admission.

The student affairs profession is increasingly diverse and is engaged in a variety of activities and programs. The emphasis in UF's master's degree program in SPHE is upon the promotion, design, and assessment of student learning in a variety of campus and community settings.

Degrees Offered

Degrees Offered with a Major in Student Personnel in Higher Education

- Master of Arts in Education
- Master of Education

Student Learning Outcomes

SLO1 Knowledge

Students will apply student affairs functioning constructs which include, but are not limited to, issues related to leadership and governance, technology, curricular and co-curricular partnerships, as well as issues pertaining to students, faculty, and administrators.

SLO2 Skills

Students will exhibit professional skills and competencies expected of student affairs professionals to be competitive for employment in student affairs positions.

SLO3 Professional Behavior

Students will develop presentation skills to effectively communicate and articulate student affairs related concepts and ideas.

School of Teaching and Learning

Director: A. Adams

Graduate Coordinator: K. Dawson

The School of Teaching and Learning (<http://education.ufl.edu/school-teaching-learning/>) offers face-to-face and online programs leading to the Master of Education (M.Ed., non-thesis), Master of Arts in Education (M.A.E., thesis or project in lieu of thesis), Specialist in Education (Ed.S.), Doctor of Education (Ed.D.), and Doctor of Philosophy (Ph.D.) degrees. Descriptions of the programs are linked below, and official requirements for these degrees are provided in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

Students pursuing the Ph.D. degree in Curriculum & Instruction gain research and teaching experience in one of eight areas of specialization:

- Educational Technology
- English Education
- ESOL/Bilingual Education
- Language Arts, Reading, & Children's Literature (LARC)
- Mathematics Education
- Science Education
- Social Studies Education
- Teachers, Schools, and Society (TSS)

Various forms of financial support are available to Ph.D. students through fellowships, scholarships, research assistantships, and teaching assistantships.

The Ed.D. degree is a professional practice doctorate with three specialization areas for students to pursue online: Teachers, Schools, and Society (TSS), Computer Science Education, and Educational Technology.

The School of Teaching and Learning also offers graduate programs and specializations at the M.Ed., M.A.E, and Ed.S. degrees for students seeking to deepen their knowledge and advance within their professions. These include Educational Technology, English Education, ESOL/ bilingual Education, Language Arts, Reading & Children's Literature (LARC), Literacy & the Arts, Mathematics Education, Media Literacy Education, Reading Education, Science Education, Social Foundations of Education, Social Studies Education and Teacher Leadership for School Improvement (TLSI).

Majors

- Anatomical Sciences Education (p. 146)
- Curriculum and Instruction (Ed.D.) (p. 146)
- Curriculum and Instruction (ISC) (p. 150)
- Elementary Education (p. 155)
- English Education (p. 159)
- Mathematics Education (p. 162)
- Reading Education (p. 166)
- Science Education (p. 170)
- Social Studies Education (p. 174)

Faculty

Professor

- Adams, Thomasenia L.
- Antonenko, Pavlo
- Crippen, Kent J.
- Dana, Nancy L.
- Dana, Thomas M.
- Dawson, Kara Mariehopkins
- Fang, Zhihui
- Ritzhaupt, Albert D.
- Terzian, Sevan G.
- Washington, Elizabeth Anne

Associate Professor

- Brown, Julie Catherine
- Coleman King, Chonika Ceptember
- Israel, Maya
- Kohnen, Angela Marie
- Smith, Sara Ashley
- Xing, Wanli

Assistant Professor

- Botelho, Anthony
- Closser, Avery Harrison
- Dever, Daryn
- Moore, Robert Lamont
- Nash, Brady Lee
- Newbutt, Nigel Arthur

- Pacheco, Mark B.
- Rahimi, Seyedahmad

Clinical Assistant Professor

- Beckett, Blake Mickle
- Bivens, Briana M.
- Huang, Rui
- Lazarevic, Bojan
- Olesova, Larisa A.

Clinical Associate Professor

- Hambacher, Elyse Lee
- Soto, Melissa Marie

Clinical Professor

- Adams, Alyson Joyce
- Kumar, Swapna

Affiliated Faculty

- Black, Erik Wade
Master Lecturer
- Brown, Taryn T C
Assistant Professor
- Vescio, Vicki Ann
Clinical Associate Professor
- Vetere-Earley, Timothy Matthew
Clinical Assistant Professor

Anatomical Sciences Education

The Anatomical Sciences Education graduate program offers the Master of Science and the Doctor of Philosophy degrees. The faculty for this program is drawn from these disciplines:

- Anatomy
- Education

For the Ph.D. program, applicants must meet the minimum requirements for the University of Florida Graduate School: Junior/Senior GPA > 3.0 and a score on the Graduate Record Exam (GRE) a minimum score of 300 for the current scale. No GRE is required for the MA program. For both the MS and the PhD program, the student will submit a minimum of three letters of reference, a statement of purpose, and a resume, which the admissions committee will use to assess the student's qualifications for admission to the program. International students must comply with current UF standards for admission to the Graduate School, including requirements for English language competency and financial responsibility.

Contact Mark Zakshevsky at zmz30@ufl.edu or visit the program's website at <https://anatomy.acb.med.ufl.edu/>.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN ANATOMICAL SCIENCES EDUCATION

- Doctor of Philosophy
- Master of Science

Courses

Anatomical Sciences Education Courses

Student Learning Outcomes

ANATOMICAL SCIENCES EDUCATION (PH.D.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Display appropriate behavior to instructors, fellow students and individuals who have bequeathed their bodies to medical science.

ANATOMICAL SCIENCES EDUCATION (M.S.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Apply ethical standards and implement excellence in all endeavors which focus on professional identity formation (i.e., development of professional values, actions and aspirations).

Curriculum and Instruction (Ed.D.)

Program Information

The School of Teaching & Learning's doctoral program in Curriculum & Instruction cultivates proficient scholars, teachers, and other educational professionals through an academically rigorous curriculum that balances theoretical and applied knowledge.

The Ed.D. is viewed as a professional practice doctorate wherein graduate students acquire and produce expert knowledge of how theoretical and empirical academic research can be applied in ways that foster school improvement in various contexts. The Ed.D. degree prepares students to advance within their professions and is not designed to prepare for faculty careers in higher education. Ed.D. students

pursue specializations in one of three areas: Teachers, Schools, and Society (<https://education.ufl.edu/curriculum-teaching/>), Computer Science Education (<https://education.ufl.edu/computer-science-education/>), and Educational Technology (<https://education.ufl.edu/educational-technology/>). All specializations are offered to students online.

All doctoral students are required to complete successfully a minimum of 90 credits. Coursework includes research methodology and methods, educational curriculum and foundations, independent research, specialization seminars, and at least 12 credit hours of dissertation work. To earn their doctoral degree, all students must complete their coursework satisfactorily, pass written and oral qualifying examinations, and successfully complete and defend a dissertation.

Degrees Offered

Degrees Offered with a Major in Curriculum and Instruction

- Doctor of Education
 - without a concentration
 - concentration in Educational Technology
 - concentration in Languages and Literacies in Education
 - concentration in Critical Study of Race, Ethnicity and Culture In Education
 - concentration in Teachers, Schools, & Society

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

curriculum and instruction (PHD)

SLO 1 Knowledge

The student will master scholarly breadth of research about teaching and learning and neighboring academic fields.

SLO 2 Knowledge

The student will apply expertise of an original and significant question and issue in education.

SLO 3 Skills

The student will apply clarity of written and oral expression in the qualifying examination and the dissertation.

SLO 4 Professional Behavior

The student will address professional audiences through membership in professional organizations, research presentations, and/or scholarly publications.

curriculum and instruction (edd)

SLO 1 Knowledge

The student will explain and evaluate their conceptual and practical competence and critical stances in theory, pedagogy, and research.

SLO 2 Skills

The student will present results of research about resolving context-based problems of practice in written and oral format.

SLO 3 Professional Behavior

The student will disseminate and/or demonstrate professional knowledge in formal and informal settings about best curricular and pedagogical practices.

curriculum and instruction (eds)

SLO 1 Knowledge

The student will explain and evaluate their breadth of knowledge of content, methods, and contexts of schooling and education.

SLO 2 Skills

The student will utilize expertise developed in an area of specialization to pursue an original and significant inquiry or research question.

SLO 3 Professional Behavior

The student will demonstrate their implementation of an inquiry stance to improving teaching and on-going professional learning that can be shared with other professionals.

Curriculum & Instruction (MAE)

SLO 1 Knowledge

The student will explain and evaluate research-based knowledge of curriculum, teaching, and learning.

SLO 2 Skills

The student will apply knowledge to investigate a problem or question related to curriculum, teaching, and learning.

SLO 3 Professional Behavior

The student will present a written and an oral examination of a topic of investigation within the field of study.

Curriculum & Instruction (MEd)

SLO 1 Knowledge

The student will explain and evaluate their masterful use of research-based knowledge of general and specific subject area best practices in teaching and learning.

SLO 2 Skills

The student will use knowledge of teaching and learning to organize content for instruction, develop appropriate differentiated teaching practices, and evaluate the impact of instruction on student learning.

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon their own practice, and demonstrate a sense of efficacy and ethical practice.

Curriculum and Instruction (ISC)

Program Information

The School of Teaching & Learning's graduate programs in Curriculum & Instruction cultivate proficient scholars, teachers, and other educational professionals through an academically rigorous curriculum that balances theoretical and applied knowledge.

The Ph.D. prepares graduate students to assume roles as faculty and other leaders in higher education. It is carefully designed to balance coursework, research projects, and teaching experiences for students to acquire the knowledge, dispositions, skills and abilities to become highly effective faculty and leaders in higher education. Program area faculty adhere to a comprehensive framework reflecting broad and multi-faceted conceptions of scholarship: Application, Discovery, Integration and Teaching. Students engage in research, teaching, professional

service, and professional practice projects that further their familiarity with these domains. An array of subject area specializations (<https://education.ufl.edu/school-teaching-learning/admissions/doctordal-degrees-phd-edd/>) for all Ph.D. students in Curriculum & Instruction fosters their intellectual and professional growth in greater depth. These include: Educational Technology (<http://education.ufl.edu/educational-technology/on-campus-ph-d/>); English Education (<http://education.ufl.edu/english-education/degrees/>); ESOL/Bilingual Education (<https://education.ufl.edu/esol/degrees/#doctorate>); Reading and Literacy Education (<https://education.ufl.edu/reading-education/doctorate/>); Mathematics Education (<https://education.ufl.edu/math-education/doctorate/>); Science Education (<https://education.ufl.edu/science-education/doctor-of-philosophy/>); Social Studies Education (<https://education.ufl.edu/social-studies-education/degrees/doctorate/>); and Teachers, Schools, and Society (<https://education.ufl.edu/curriculum-teaching/>) (TSS) (<https://education.ufl.edu/curriculum-teaching/>). All doctoral students are required to complete successfully a minimum of 90 credits. Coursework includes research methodology and methods, educational curriculum and foundations, independent research, specialization seminars, and at least 12 credit hours of dissertation work. To earn their doctoral degree, all students must complete their coursework satisfactorily, pass written and oral qualifying examinations, and successfully complete and defend a dissertation.

The Master of Arts in Education (M.A.E.) in Curriculum & Instruction is designed to provide exposure to research and increase the practical knowledge of those interested in various aspects of Curriculum & Instruction. Specialization areas include: Educational Technology (<http://education.ufl.edu/educational-technology/>); ESOL/Bilingual Education (<https://education.ufl.edu/esol/>); Reading and Literacy Education (<https://education.ufl.edu/reading-education/>); Literacy & the Arts (<https://education.ufl.edu/english-education/>); Media Literacy Education (<http://education.ufl.edu/english-education/specializations/media-literacy/>); and Teachers, Schools, and Society (<https://education.ufl.edu/curriculum-teaching/>) (TSS) (<https://education.ufl.edu/curriculum-teaching/>). A thesis or final project in lieu of a thesis is required of all students. The LARC specialization is available both on-campus and online.

The Master of Education (M.Ed.) in Curriculum & Instruction is a professional degree designed to meet the needs of practicing and aspiring professionals to serve various functions in established and emerging educational activities. Specialization areas include: Educational Technology (<http://education.ufl.edu/educational-technology/>); ESOL/Bilingual Education (<https://education.ufl.edu/esol/>); and Teacher Leadership for School Improvement (TLSI) (<https://education.ufl.edu/tlsi/>). The Educational Technology and TLSI specializations are both available online.

The Specialist in Education (Ed.S.) in Curriculum & Instruction is a degree designed to meet the needs of practicing and aspiring professionals, who already hold a master's degree in an appropriate field, to serve various functions in established and emerging educational activities. Specialization areas include: Educational Technology (<http://education.ufl.edu/educational-technology/>); ESOL/Bilingual Education (<https://education.ufl.edu/esol/degrees/>); Reading and Literacy Education (<https://education.ufl.edu/reading-education/>); Literacy & the Arts (<https://education.ufl.edu/english-education/degrees/>); Media Literacy Education (<http://education.ufl.edu/english-education/specializations/media-literacy/>); and Teacher Leadership for School Improvement (TLSI) (<https://education.ufl.edu/tlsi/>). The Educational Technology and TLSI specializations are both available online.

For more information, please see our website: <http://education.ufl.edu/school-teaching-learning> (<http://education.ufl.edu/school-teaching-learning/>).

Degrees Offered

Degrees Offered with a Major in Curriculum and Instruction

- Doctor of Education
 - with a concentration in Computer Science Education
- Doctor of Philosophy
 - without a concentration
 - concentration in Critical Study of Race, Ethnicity and Culture In Education
 - concentration in Educational Technology
 - *optional second concentration in Critical Study of Race, Ethnicity and Culture In Education*
 - concentration in Languages and Literacies in Education
 - *optional second concentration in Critical Study of Race, Ethnicity and Culture In Education*
 - concentration in Science Education
 - *optional second concentration in Critical Study of Race, Ethnicity and Culture In Education*
 - concentration in Teachers, Schools, & Society
 - *optional second concentration in Critical Study of Race, Ethnicity and Culture In Education*
- Master of Arts in Education
 - without a concentration
 - concentration in Computer Science Education
 - concentration in Educational Technology
 - *optional second concentration in Media and Digital Literacy Education*
 - concentration in Media and Digital Literacy Education
 - Teaching English as an Additional Language (K-12)
- Master of Education
 - without a concentration
 - concentration in Educational Technology
 - concentration in Teaching English as an Additional Language (K-12)
 - concentration in Teacher Leadership for School Improvement
- Specialist in Education
 - without a concentration
 - concentration in Educational Technology
 - concentration in Teacher Leadership for School Improvement

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

curriculum and instruction (edd)

SLO 1 Knowledge
The student will explain and evaluate their conceptual and practical competence and critical stances in theory, pedagogy, and research.

SLO 2 Skills

The student will present results of research about resolving context-based problems of practice in written and oral format.

SLO 3 Professional Behavior

The student will disseminate and/or demonstrate professional knowledge in formal and informal settings about best curricular and pedagogical practices.

curriculum and instruction (eds)

SLO 1 Knowledge

The student will explain and evaluate their breadth of knowledge of content, methods, and contexts of schooling and education.

SLO 2 Skills

The student will utilize expertise developed in an area of specialization to pursue an original and significant inquiry or research question.

SLO 3 Professional Behavior

The student will demonstrate their implementation of an inquiry stance to improving teaching and on-going professional learning that can be shared with other professionals.

curriculum and instruction (PHD)

SLO 1 Knowledge

The student will master scholarly breadth of research about teaching and learning and neighboring academic fields.

SLO 2 Knowledge

The student will apply expertise of an original and significant question and issue in education.

SLO 3 Skills

The student will apply clarity of written and oral expression in the qualifying examination and the dissertation.

SLO 4 Professional Behavior

The student will address professional audiences through membership in professional organizations, research presentations, and/or scholarly publications.

Elementary Education

Program Information

The School of Teaching & Learning offers the Master of Education (M.Ed.) and Master of Arts in Education (M.A.E.) degrees in Elementary Education. More information about the requirements for these degrees can be found in the Graduate Degrees (p. 778) section of this catalog.

For those interested in elementary (K-6) teacher certification, the Alternative Certification in Elementary Education (SITE) Program is an M.A.E. degree that prepares and certifies elementary school teachers.

Alternative Certification in Elementary Education (SITE) Program

The Site-based Implementation of Teacher Education (SITE) program at the University of Florida is a state-designated Educator Preparation Institute (EPI) created to attract talented college graduates and career path changers with non-education majors to the elementary classroom. The yearlong program is available online and provides an alternative, accelerated pathway to teaching experience and certification for prospective teachers who possess an undergraduate degree outside of education. The clinical internship combines supervised classroom

teaching and formal study, with successful completion leading to a master's (M.A.E.) degree in Elementary Education. The SITE program leads to eligibility for the Professional Certificate in Elementary Education K-6 and the Reading Endorsement in Florida.

Many students come to the program with degrees or professional experience in fields such as accounting, business, English, family studies, history, journalism, nursing and psychology. Selection for entry into this full-time internship requires a 3.0 or higher undergraduate GPA; a stellar essay/statement of purpose; three professional letters of recommendation; and a Statement of Status of Eligibility from the Florida Department of Education.

Interns complete 30 credit hours of study and classroom teaching over three semesters, all under the supervision of a school-based mentor and a university coach. The mentor teacher and intern teach side-by-side throughout the entire school year, while the UF coach supports the intern to problem-solve and reflect on teaching skills. Along with their planning, teaching and coursework responsibilities, the interns become familiar with the school improvement goals and new programs initiated at their host schools. SITE coursework is taught by UF education professors and teachers who all have proven expertise in K-12 teaching.

SITE is intended to culminate in certification to teach in Florida. Graduates wishing to teach in states other than Florida should contact the Department of Education in their state of choice for certification requirements there.

For additional information about the program please visit: <http://education.ufl.edu/site> (<http://education.ufl.edu/site/>).

Degrees Offered

Degrees Offered with a Major in Elementary Education

- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Elementary Education (MAE)

SLO 1 Knowledge

The student will master research-based knowledge of teaching and learning in elementary education.

SLO 2 Knowledge

The student will critique teaching practices based on knowledge of the developmental and socio-cultural context of the learner.

SLO 3 Skills

The student will investigate a problem or question within the field of elementary education.

SLO 4 Professional Behavior The student will present a written and oral presentation and defense of a topic of investigation in elementary education that demonstrates critical thinking and effective

communication skills.

Elementary Education (MEd)

SLO 1 Knowledge

The student will master research-based knowledge of best practices of teaching and learning in elementary education.

SLO 2 Skills

The student will use knowledge of teaching and learning to organize instruction, develop and apply appropriate inclusive teaching practices for elementary education, evaluate the impact of instruction on student learning, and create a positive learning environment.

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon and research their own practice, and demonstrate a sense of efficacy and ethical practice.

English Education Program Information

The School of Teaching & Learning offers the Master of Arts in Education (M.A.E.) degrees in English Education. More information about the requirements for these degrees can be found in the Graduate Degrees (p. 778) section of this catalog.

Students interested in second language learning and teaching, bilingualism, and multiculturalism might consider applying to the Advanced Studies in in ESOL Education/ Bilingual Education program (<https://education.ufl.edu/esol/degrees/>).

The **Master of Arts in Education (M.A.E.) in English Education** program is focused on teaching the skills of literacy and the subject of English (literature, writing, and the study of texts). The program offers flexible options to ensure that it can support a range of academic and professional goals. Students can choose from one of the following programs of study:

1. A **30-credit** degree option with studies focused on important issues in English education.
2. A combined **30-credit** degree option with our Educator Preparation Institute (EPI), which offers aspiring teachers an 18-credit EPI licensure program plus the additional 12 credits needed for the MAE. Students interested in this option must also apply to the EPI program by April 15th and plan to start during the summer term.

For more information, please visit the English Language Arts K-12 website (<https://education.ufl.edu/english-education/>).

Degrees Offered

Degrees Offered with a Major in English Education

- Master of Arts in Education
 - no concentration
 - concentration in Media and Digital Literacy Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

English Education (MAE)

SLO 1 Knowledge

The student will master research-based knowledge of English Education best practices of teaching and learning

SLO 2 Skills

The student will apply knowledge to investigate a significant problem or original question within the field of English Education

SLO 3 Professional Behavior

The student will complete a written thesis or project and an oral presentation of a topic of investigation within English Education

English Education (MEd)

SLO 1 Knowledge

The student will master research-based knowledge of general and specific subject area best practices of teaching and learning

SLO 2 Skills

The student will use knowledge of teaching and learning to organize content for instruction, develop and apply appropriate inclusive teaching practices, evaluate the impact of instruction on student learning, and create a positive learning environment

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon their own practice, and demonstrate a sense of efficacy and ethical practice

Mathematics Education

Program Information

The School of Teaching & Learning offers the Master of Arts in Education (M.A.E.) degree in Mathematics Education. More information about the requirements for this degree can be found in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

The Master of Arts in Education (M.A.E.) in Mathematics Education

program is designed for individuals interested in gaining expertise in mathematics education and strengthening their background in mathematics. The program offers flexible options to ensure that it can support a range of academic and professional goals. Students can choose from one of the following programs of study:

1. A **30-credit** degree option with studies focused on important issues in mathematics education.
2. A combined **30-credit** degree option with our Educator Preparation Institute (EPI), which offers aspiring teachers an 18-credit EPI licensure program plus the additional 12 credits needed for the MAE. Students interested in this option must also apply to the EPI program by April 15th and plan to start during the summer term.
3. A **36-credit** degree option that includes 18 graduate credits in mathematics. Although this is a higher-credit option, it is a

popular choice for anyone interested in teaching mathematics in a community college.

All three options require 18 credits of course offerings within the School of Teaching and Learning, including a thesis or project-in-lieu of thesis.

What kind of students typically are enrolled in the M.A.E. in mathematics education program?

- Practicing or aspiring teachers who want to strengthen their abilities to teach mathematics in a variety of instructional settings.
- Experienced teachers who have the eventual goal of earning a doctorate in mathematics education enabling them to work in a teacher education/mathematics education program at an institution of higher education.
- Individuals who plan to teach at the community college level. Requirements to teach at the community college level vary depending on the individual campus. Typically, individuals must have a minimum of 18 credits in graduate mathematics. Candidates are encouraged to consult the community college where they desire employment for the exact employment requirements.

Admission Requirements:

B.A. or B.S. in mathematics, mathematics education, or related field; 2.7 overall GPA and 3.0 upper division GPA; and completing all other general admission requirements

Graduation Requirements:

3.0 GPA (overall and in major); completion of course requirements; thesis or project-in-lieu of thesis

What might a program of study look like in the M.A.E. in mathematics education?

The program of study form is customized to address the unique needs of each student and is developed in consultation with a mathematics education advisor. While there are different requirements for each of the above options, all options require a thesis or project-in-lieu of thesis to be completed in the graduating semester.

Please visit this website for additional information about the M.A.E. degree program in Mathematics Education: <https://education.ufl.edu/math-education/masters/>.

Student Learning Outcomes

Mathematics Education (MAE)

SLO 1 Knowledge

The student will identify, describe, and explain current research on teaching and learning of mathematics

SLO 2 Skills

The student will investigate a significant problem or original question within the field of study.

SLO 3 Professional Behavior

The students will critically evaluate their own effectiveness to plan future lessons and improve the teaching of all students over time.

Mathematics Education (MEd)

SLO 1 Knowledge

The student will identify, describe, and explain research on teaching and learning of mathematics.

SLO 2 Skills

The student will create, select and implement: (1) specific learning goals, (2) appropriate teaching methods and instructional materials, and (3) evaluation strategies aligned with goals, using knowledge of subject matter, learners and classroom management.

SLO 3 Professional Behavior

The student will collaborate with other professionals, such as peers and mentor teachers, to reflect upon their mathematics teaching. Students will communicate high expectations for all PK-12 students.

Reading Education

Program Information

The School of Teaching & Learning offers the Master of Education (M.Ed.) and Master of Arts in Education (M.A.E.) degrees in Reading Education. More information about the requirements for these degrees can be found in the Graduate Degrees (p. 778) section of this catalog.

The Master of Education (M.Ed.) in Reading Education is for prospective teachers eligible for teacher certification and practicing teachers who desire to update themselves on the latest research and practice in reading/literacy instruction and to obtain K-12 reading certification. This is a non-thesis degree requiring completion of a minimum of 36 credit hours of coursework. Students learn evidence-based classroom practices and develop knowledge, skills, and strategies for supporting the literacy growth of PreK-12 students. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP). The curriculum is focused on the knowledge and methods teachers need to effectively promote literacy learning and academic achievement for all PreK-12 students. Teachers will not only gain expertise in addressing reading/writing difficulties but also learn how to support students' growth as learners who can decode, use, and create many different kinds of texts, such as textbooks, primary source documents, literature and media. Students can pursue the reading MEd degree **fully online, fully on campus, or partly online and partly on campus**.

The Master of Arts (MAE) in Reading Education is for students who want to deepen understanding about reading/literacy process and develop expertise in reading/literacy pedagogy, but for whom state certification is not a main goal. Students seeking the MAE have the option of completing 30 credits of coursework + 6 credits of thesis (or project in lieu of thesis), or 36 credits of coursework. Students can pursue the reading MAE fully online or partly online and partly on campus.

Students interested in obtaining a Florida K-12 reading certification should:

- Submit transcripts to the Florida Department of Education for course count content analysis.
- Take and receive passing scores on the Florida Teacher Certification Exam (FTCE) for Reading K-12. You can find information about the exam from the Florida Department of Education at <http://www.fldoe.org>.

Graduates of the program may be eligible for reading certification in other states and are advised to investigate that possibility if they do not plan to teach in the state of Florida.

Please visit this program area website to learn more about the M.Ed. degree in Reading Education: <https://education.ufl.edu/reading-education/masters/>.

Degrees Offered

Degrees Offered with a Major in Reading Education

- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Reading Education (MAE)

SLO 1 Knowledge

The student identifies, describes, and explains general and subject-specific best practices in Reading Education.

SLO 2 Skills

The student investigates a significant problem or an original question within the field of Reading Education.

SLO 3 Professional Behavior

The student describes and defends a thorough and valid understanding of the formal body of knowledge and area of inquiry within the field of Reading Education.

Reading Education (MEd)

SLO 1 Knowledge

The student identifies, describes, and explains best practices in Reading Education.

SLO 2 Skills

The student organizes instruction, develops and applies appropriate reading instructional practices, and evaluates the impact of instruction on student learning.

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon their own practice, and apply ethical practices.

Science Education Program Information

The Science Education master's degree program focus on theory and research-based best practices in formal and informal science teaching and learning at all age levels (preK-adult). The School of Teaching and Learning offers one master's degree in Science Education: a Master of Arts in Education (M.A.E. degree). More information about the requirements for these degrees can be found in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

Certificate Program

The School of Teaching and Learning also offers an online Educator Preparation Institute (EPI) program that leads to Florida Teacher Professional Certification (middle and high school) at the post-baccalaureate level. This certificate program is an approved Florida Department of Education Educator Preparation Institute (EPI). Our program is:

- Interdisciplinary
- Completed in 2 semesters
- Strong subject-area preparation with 1 semester of supervised student teaching
- Is completed entirely online, allowing you to complete your student teaching in your local area
- Can transfer directly and become the first half of an online Master's degree, an M.A.E. in Science Education

This 18-credit certification program is fully approved by the Florida Department of Education and leads to eligibility for Professional Educator certification in Florida. Students from out of state are welcome to apply. Be sure you understand the implications for your own state's teaching certification requirements.

Master of Arts in Education

The M.A.E. in science education offers two options: thesis or project-in-lieu of thesis. Upon admission, M.A.E. students work closely with a faculty advisor to design a program of study tailored to their professional needs and goals. Students who have completed the EPI Certificate Program may use all 18 of those credits towards the M. A. E. Students can complete science education M.A.E. programs as either part-time or full-time students. This program is also appropriate for individuals who are interested in adding to their science content background with graduate level coursework while preparing to teach at the community college level. <https://education.ufl.edu/science-education/master-of-arts/>.

Thesis Option

The thesis option is designed for experienced preK-adult formal or informal science educators interested in pursuing advanced degrees with a strong research focus. Most students completing the M.A.E. thesis option continue on to pursue doctoral degrees in science education. Thirty credits of graduate level coursework and six credits of supervised research culminating in a thesis are required.

Non-Thesis Option

The non-thesis option is primarily designed for experienced preK-adult formal or informal science educators interested in improving their own professional practice while also earning a graduate degree. A minimum of 36 total graduate credits is required for the non-thesis M.A.E. degree along with a project that is usually job-embedded.

For more detailed information about the Science programs and faculty, as well as various certificate programs please visit our website: <http://education.ufl.edu/science-education> (<http://education.ufl.edu/science-education/>).

Degrees Offered

Degrees Offered with a Major in Science Education

- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Science Education (MAE)

SLO 1 Knowledge

The student will identify and describe general and subject-area specific area best practices in teaching and learning in Science Education.

SLO 2 Skills

The student will investigate a significant problem or original question within their specific field of Science Education.

SLO 3 Professional Behavior

The student will apply knowledge of science content and pedagogy to complete a written thesis or project and an oral presentation of research that focuses on a significant problem or original question in Science Education.

Science Education (MEd)

SLO 1 Knowledge

The student will investigate, identify, describe, and explain best practices in science teaching and learning.

SLO 2 Skills

The student will organize content for instruction, develop and implement appropriate inclusive teaching practices, evaluate the impact of instruction on student learning, and create a positive learning environment.

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon their own professional practice, and demonstrate a sense of efficacy and ethical practice.

Social Studies Education

Program Information

The School of Teaching & Learning offers the Master of Arts in Education (M.A.E.) degree in Social Studies Education. More information about the requirements for this degree can be found in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

The M.A.E. degree in Social Studies Education is fully online. The degree does not confer certification; it is geared for practicing teachers who want to advance their Social Studies expertise. The thirty credits of coursework include the requirement that students complete a project in lieu of a thesis. Please visit this website for more information about this M.A.E. program: <https://education.ufl.edu/social-studies-education/degrees/mae-online/>.

For more information, please see our website: <http://education.ufl.edu/social-studies-education/> (<http://education.ufl.edu/social-studies-education/>).

Degrees Offered

Degrees Offered with a Major in Social Studies Education

- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Social Studies Education (MAE)

SLO 1 Knowledge

The student identifies, describes, and explains general and subject-specific best practices in social studies teaching and learning

SLO 2 Skills

The student investigates a significant problem or original question within the field of Social Studies Education

SLO 3 Professional Behavior

The student applies knowledge of social science content and pedagogy and uses critical mindedness and professionalism to investigate a topic within the field of Social Studies Education

Social Studies Education (MEd)

SLO 1 Knowledge

The student will investigate, identify, describe, and explain best practices in social studies teaching and learning

SLO 2 Skills

The student will organize content for instruction, develop and apply appropriate inclusive teaching practices, evaluate the impact of instruction on student learning, and create a positive learning environment

SLO 3 Professional Behavior

The student will collaborate with other professionals, reflect upon their own practice, and demonstrate a sense of efficacy and ethical practice

Special Education, School Psychology and Early Childhood Studies Department

Director: M. Leko

Graduate Coordinator: V. Gonsalves

The School of Special Education, School Psychology, and Early Childhood Studies offers online and face-to-face programs leading to the Master of Education (M.Ed., non-thesis), Master of Arts in Education (M.A.E., thesis), Specialist in Education (Ed.S.), Doctor of Education (Ed.D.), and Doctor of Philosophy (Ph.D.) degrees. Complete descriptions of the requirements for these degrees are provided in the *General Information* section of this catalog.

The School offers graduate study and research experience in 3 areas of specialization: Special Education, School Psychology, and Early Childhood Studies. Programs are accredited by the Florida Department of Education and approved by the National Council for Accreditation of Teacher Education (NCATE). The School Psychology program is approved by the NCATE and the National Association of School Psychologists (NASP). The Ph.D. program in School Psychology is accredited by the American Psychological Association (APA).

For more information, please visit <https://education.ufl.edu/special-education/>.

Majors

- Early Childhood Education (p. 178)
- School Psychology (p. 180)
- Special Education (p. 182)

Faculty

Professor

- Burns, Matthew Kevin
- Leko, Melinda
- Mccray, Erica Djuan
- Smith, Stephen W.
- Snyder, Patricia
- Waldron, Nancy L.

Associate Professor

- Anthony, Christopher James
- Irvin, Dwight W.
- Lane, Holly Barnes
- Maki, Kathrin Elizabeth
- Smith-Bonahue, Tina M.
- Splett, Joni Denise Williams

Assistant Professor

- Brunsting, Nelson Carl
- Cooley, John Lunsford
- Geer, Elyssa Aynslee
- Mathews, Hannah M.

Clinical Assistant Professor

- Chapman, Kathryn Patricia
- Mathien, Tara Dawn

Distinguished Professor

- Brownell, Mary T.

Clinical Associate Professor

- Cheyney-Collante, Kristi Lee
- Cornelius, Kyena Elrod
- Gonsalves, Vivian E.
- MacSuga-Gage, Ashley

Clinical Professor

- Colon, Elayne P.

Research Professor

- Pullen, Paige Cullen

Research Assistant Professor

- Corbin, Catherine Margaret

Affiliated Faculty

- Conroy, Maureen Almaz
Professor
- Lombardino, Linda J.

- Romero, Regilda
Clinical Assistant Professor

Early Childhood Education

Overview

The Early Childhood studies program faculty recognize the importance of the three-fold mission of the University and actively seek to prepare early childhood educators who possess the competencies to provide for the education and care of a diverse group of children in inclusive early childhood programs. Effective early childhood programs can alter the lives of children, families, and communities that result in academic, social, personal, and economic benefits. Highly qualified teachers play a critical role in ensuring the success of young children in early childhood programs.

Degrees Offered

Degrees Offered with a Major in Early Childhood Education

- Master of Arts in Education
- Master of Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Early Childhood Education (MAE)

SLO 1 Knowledge

Apply advanced levels of knowledge in the following core areas: a) curriculum and instruction; b) child development and assessment; c) family, diversity, and community relations; and, d) transition and public policy.

SLO 2 Skills

Apply advanced levels of skill in the following core areas: a) curriculum and instruction; b) child development and assessment; c) family, diversity, and community relations; and d) transition and public policy.

SLO 3 Professional Behavior

Displays ethical behavior, cultural sensitivity, and appropriate professional conduct & communication.

Early Childhood Education (MEd)

SLO 1 Knowledge

Candidates completing the M.Ed. as part of the Unified Early Childhood Teacher Education Program will know and apply early childhood concepts, principles, and teaching theory.

SLO 2 Skills

Candidates will learn and apply effective planning and implementation of classroom-based assessment and instruction.

SLO 3 Professional Behavior

Candidates will display ethical behavior and appropriate professional conduct & communication.

SLO 4 Professional Behavior

Candidates will know and apply cultural sensitivity and teamwork.

School Psychology

Overview

The mission of the University of Florida's School Psychology Program (SPP) is to prepare school psychology practitioners and scholars whose activities promote the psychological and educational development and well-being of children and youth. The program is grounded in a scientist-practitioner model as reflected in its commitment to a synthesis

between science and practice throughout all academic and professional preparation opportunities. As scientists, students develop a solid foundation of content knowledge in core areas of psychology, education, research methods, and professional school psychology. SPP students effectively utilize this body of evolving knowledge to prevent, assess, and intervene regarding psychological and educational issues impacting children, families, and institutions; and to conduct and evaluate basic and applied research. Program faculty strive to demonstrate that scholarly and applied practice roles are not distinct, and instead are inextricably linked when considering the work of school psychologists across a diverse range of practice settings.

The SPP is committed to preparing future school psychologists to assume professional leadership roles in university, school, clinical, and other community settings. Across these settings, school psychologists work to ensure positive educational outcomes for all children and youth, and utilize their professional knowledge and skills to function as change agents. School psychologists help others understand and attain their educational, legal, and individual rights and work to promote change at various levels. To fulfill these critical roles, SPP students develop competencies that sustain their ability to provide a comprehensive range of direct and indirect psychological services to children, youth, their families and educators. This includes competency to use a wide variety of assessment methods; to consult with families, educators and other professionals; to design and implement direct and indirect interventions tailored to individual and group needs; to develop prevention and other intervention programs that promote optimal development; and to evaluate the effectiveness of interventions, programs, and other school psychological services.

The SPP supports the missions of the university and college by preparing well-qualified practitioners and scholars to deliver psychological services and basic and applied research to meet the diverse needs of the diverse global community.

Degrees Offered

Degrees Offered with a Major in School Psychology

- Doctor of Education
- Doctor of Philosophy
 - concentration in Early Childhood Studies
- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

School psychology (PHD)

SLO 1 Knowledge

Candidates will identify knowledge of core school psychology content areas including: psychological foundations, assessment, consultation, academic and behavioral interventions, counseling, professional and ethical standards.

SLO 2 Skills

Candidates will design, implement, and evaluate an empirically validated intervention to demonstrate proficiency in using psychological assessment results.

SLO 3 Skills

Candidates will present orally and in writing the results and applications of their research and scholarship to demonstrate research proficiency.

SLO 4 Professional Behavior

Candidates will display professional behaviors and attitudes consistent with School Psychology professional standards and ethical principles including: effective communication and interpersonal skills, respect for diversity and individual differences, and responsive to supervisory feedback.

School psychology (edd)

SLO 1 Knowledge

Candidates will identify knowledge of core school psychology content areas including: psychological foundations, assessment, consultation, academic and behavioral interventions, counseling, professional and ethical standards.

SLO 2 Skills

Candidates will design, implement, and evaluate an empirically validated intervention to demonstrate proficiency in using psychological assessment results.

SLO 3 Skills

Candidates will present orally and in writing the results and applications of their research and scholarship.

SLO 4 Professional Behavior

Candidates will display professional behaviors and attitudes consistent with School Psychology professional standards and ethical principles including: effective communication and interpersonal skills, respect for diversity and individual differences, and responsive to supervisory feedback.

School psychology (eds)

SLO 1 Knowledge

Candidates will identify knowledge of core school psychology content areas including: psychological foundations, assessment, consultation, academic and behavioral interventions, counseling, professional and ethical standards.

SLO 2 Skills

Candidates will design, implement, and evaluate an empirically validated intervention to demonstrate proficiency in using psychological assessment.

SLO 3 Professional Behavior

Candidates will display professional behaviors and attitudes consistent with School Psychology professional standards and ethical principles including: effective communication and interpersonal skills, respect for diversity and individual differences, and responsive to supervisory feedback.

School Psychology (MAE)

SLO 1 Knowledge

Candidates will identify knowledge of core school psychology content areas including: psychological foundations, assessment, consultation, academic and behavioral interventions, counseling, professional and ethical standards.

SLO 2 Skills

Candidates will design, implement, and evaluate an empirically validated intervention to demonstrate proficiency in using psychological assessment.

SLO 3 Professional Behavior

Candidates will display professional behaviors and attitudes consistent with School Psychology professional standards and ethical principles including: effective communication and interpersonal skills, respect for diversity and individual differences, and responsive to supervisory feedback.

School Psychology (MEd)

SLO 1 Knowledge Candidates will identify knowledge of core school psychology content areas including: psychological foundations, assessment, consultation, academic and behavioral interventions, counseling, professional and ethical standards.

SLO 2 Skills

Candidates will design, implement, and evaluate an empirically validated intervention to demonstrate proficiency in using psychological assessment results.

SLO 3 Professional Behavior

Candidates will display professional behaviors and attitudes consistent with School Psychology professional standards and ethical principles including: effective communication and interpersonal skills, respect for diversity and individual differences, and responsive to supervisory feedback.

Special Education

Overview

The mission of the Special Education program area is to promote the successful inclusion of individuals with disabilities and their families in

society through excellence in the education of teachers and leaders, the generation of new knowledge, and the application of existing knowledge.

UF seeks to strengthen the human condition and improve the quality of life for the citizens of Florida, the nation, and the world by pursuing new knowledge and its dissemination while building upon the rich experiences of the past. The University values quality and inclusive public education, leading-edge research, and meaningful outreach and public service as ways to distinguish itself among the finest public universities in the nation. The University of Florida must create the broadly diverse environment necessary to foster multi-cultural skills and perspectives in its teaching and research for its students to contribute and succeed in the world of the 21st century.

In keeping with this institutional perspective, the faculty in the special education doctoral program recognizes the importance of the three-fold mission and actively seek to improve the lives and outcomes of individuals with disabilities from birth through adulthood and their families (a) by generating new knowledge through a variety of research endeavors, (b) through practical application of knowledge in real world settings, and (c) by preparing doctoral students for leadership roles in colleges, universities, research centers, public policy institutes, professional associations, school districts or human service agencies.

The Special Education doctoral program faculty is committed to fostering a research community among professors and doctoral students whose work directly contributes to the advancement and betterment of infants, toddlers, children, youth, and adults with disabilities and their families and teachers.

Degrees Offered

Degrees Offered with a Major in Special Education

- Doctor of Education
- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Early Childhood Studies
 - *optional second concentration in Clinical and Translational Science*
- Master of Arts in Education
- Master of Education
- Specialist in Education

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Special Education (PhD)

SLO 1 Knowledge

Candidates will apply advanced levels of knowledge in the following core areas: (a) trends and issues in Special Education and their relationship to practice, policy, and research; (b) acquisition, organization, and interpretation of information about research in Special Education; c) identification of research questions and methodology emanating from different knowledge paradigms; and, (d) critique of Special Education research and practice from various knowledge paradigms.

SLO 2 Skills

Candidates will attain the technical knowledge and skills to become independent scholars capable of conducting research and evaluating educational programs, products, and practices.

SLO 3 Professional Behavior

Candidates will give a presentation to other professionals or submit a paper for publication based on a research project.

Special education (edd)

SLO 1 Knowledge

Candidates will apply advanced levels of knowledge in the following core areas: (a) trends and issues in Special Education and their relationship to practice, policy, and research; (b) acquisition, organization, and interpretation of information about research in Special Education; c) identification of research questions and methodology emanating from different knowledge paradigms; and, (d) critique of Special Education research and practice from various knowledge paradigms.

SLO 2 Skills

Candidates will attain the technical knowledge and skills to become independent scholars capable of conducting research and evaluating educational programs, products, and practices.

SLO 3 Professional Behavior

Candidates will give a presentation to other professionals or submit a paper for publication based on a research project.

special education (eds)

SLO 1 Knowledge

Program participants will identify and apply effective academic and behavioral interventions for students with disabilities and other learning differences.

SLO 2 Knowledge

Program participants will identify and discuss an area of study within the field of special education (e.g. reading; transition; behavior).

SLO 3 Skills

Program participants will use a variety of techniques/tools to determine academic and behavioral needs of students with disabilities and other learning differences.

SLO 4 Skills

Program participants will use professional literature to discuss current issues in special education.

SLO 5 Professional Behavior

Program participants will demonstrate leadership and professional growth through involvement in collaborative (e.g. consultation; coteaching), participatory (e.g. attending professional conferences), and/or leadership activities (e.g. conducting school/district level inservice, conference presentations, mentoring a new teacher).

Special Education (MAE)

SLO 1 Knowledge

Program participants will identify and apply effective academic and behavioral interventions for students with disabilities and other learning differences

SLO 2 Skills

Program participants will use a variety of techniques/tools to determine academic and behavioral needs of students with disabilities and other learning differences

SLO 4 Professional Behavior

Program participants will use data to monitor progress and make decisions regarding academic and behavioral programs and instruction for students with disabilities and other learning differences

Special Education (MEd)

SLO 1 Knowledge

Program participants will identify and apply effective academic and behavioral interventions for students with disabilities and other learning differences

SLO 2 Skills

Program participants will use a variety of techniques/tools to determine academic and behavioral needs of students with disabilities and other learning differences

SLO 4 Professional Behavior

Program participants will use data to monitor progress and make decisions regarding academic and behavioral programs and instruction for students with disabilities and other learning differences

College of Health and Human Performance

Dean: M. Reid

Research and teaching in HHP have an impact on almost every aspect of the human condition. The college's three centers – the Center for Exercise Science (<http://apk.hhp.ufl.edu/index.php/departments-centers/center-for-exercise-science-ces/>), the Center for Behavioral Economic Health Research (<http://hhp.ufl.edu/faculty-research/centers-institutes/cbehr/>), and the Eric Friedheim Tourism Institute (<http://efti.hhp.ufl.edu/>) – as well as its four primary departments – Applied Physiology and Kinesiology (p. 185), Health Education and Behavior (p. 188), Sport Management (<https://gradcatalog.ufl.edu/graduate/colleges-departments/health-human-performance/sport-management/>), and Tourism, Hospitality, and Event Management (<https://gradcatalog.ufl.edu/graduate/colleges-departments/health-human-performance/tourism-hospitality-event-management/>) – place the college firmly in a position to influence and improve an array of societal problems and challenges.

For more information about the College of Health and Human Performance, please see our website: <http://hhp.ufl.edu>

Applied Physiology and Kinesiology Department

Chair: D. Vaillancourt

Graduate Coordinator: R. Seidler

Complete faculty listing by department: Follow this link (<http://hhp.ufl.edu/about/faculty-staff/apk/>).

The **Ph.D. program** is offered with concentrations in biobehavioral science and exercise physiology. Students in the biobehavioral science concentration specialize in one of four areas: biomechanics, performance psychology, motor control / learning, or sports medicine. These interdisciplinary concentrations focus on preparing students as researchers with a blend of course work and research training.

Programs leading to the **Master of Science** degree in applied physiology and kinesiology (thesis and non-thesis options) are also offered. Areas of concentration for the master's program include biobehavioral science, exercise physiology, and human performance. The thesis option gives the student an opportunity to study, conduct research, and prepare a

thesis in an area of special interest. The non-thesis option offers the student a specialization in a selected area of study, with additional work in other complimentary areas to meet the student's interests and the specialty skills needed to be leaders in the field. A comprehensive written examination is required for this option, as is a capstone internship experience. Requirements for these degrees are given in the *General Information* section of this catalog.

Biobehavioral Science: This thesis mandatory concentration is multidisciplinary and flexible, permitting students to tailor their scholarly experience to the development of research skills in one of several related disciplines: biomechanics, motor control and learning, and performance psychology. Each area of specialization is briefly described below.

- **Biomechanics:** The specialization in biomechanics draws from the fields of neuroscience, engineering, and medicine. The course work and training include kinematics and kinetics of movement. Course work also includes anatomy/kinesiology, biomechanics, engineering, neuroscience, medicine, psychology, physical therapy, and statistics.
- **Motor learning / control:** This interdisciplinary specialization draws on experiences and a knowledge base in the movement and sport sciences, cognitive sciences, and physical therapy. Students are prepared to conduct research and provide expertise in traditional motor performance and learning settings.
- **Performance psychology:** This area of specialization provides the basis for understanding and influencing the underlying thought processes and attitudes that will ultimately determine the performance of individuals involved in sport, exercise, and other achievement oriented activities. The primary emphasis is to develop the scientific background and skills necessary for doctoral training and research.

Exercise physiology: This thesis mandatory area of concentration is concerned with the scientific study of how the various physiological systems of the human body respond to physical activity. It is a multidisciplinary field with strong ties to the basic life sciences and medicine, and application to clinical, normal, and athletic populations.

Human performance: This non-thesis master's concentration merges a range of specializations within the Department into a curriculum that provides educational experiences to graduate students interested in studying the factors that determine human performance in both athletic and nonathletic domains. This flexible approach allows students to focus on specific applications that best meet their individual interests. Human performance incorporates components such as nutrition, psychology, motor behavior, and physiology that are applicable to athletic and clinical populations.

Majors

- Applied Physiology and Kinesiology (p. 187)

Faculty

Professor

- Barton, Elisabeth R.
- Cauraugh, James H.

Applied Physiology and Kinesiology Program Information

Graduate study in Applied Physiology and Kinesiology (APK) is focused on research in concentration areas including: biomechanics; motor control and learning; exercise physiology; and performance psychology. Graduate students are exposed to and directly involved in research covering the full multidisciplinary spectrum of human potential from young to old, fit to unfit, healthy to diseased, able-bodied to disabled, and from the casual recreational participant to the high-level athlete. In addition to human performance issues, APK faculty and students study the immediate and lasting effects of exercise and its use in disease prevention and rehabilitation.

For more information, please see our website: <http://apk.hhp.ufl.edu/index.php/current-students/prospective-students> (<http://apk.hhp.ufl.edu/index.php/current-students/prospective-students/>).

Degrees Offered

Degrees Offered with a Major in Applied Physiology and Kinesiology

- Doctor of Philosophy
 - concentration in Biobehavioral Science
 - *optional second concentration in Clinical and Translational Science*
 - concentration in Exercise Physiology
 - *optional second concentration in Clinical and Translational Science*
- Master of Science
 - without a concentration
 - concentration in Biobehavioral Science
 - concentration in Clinical Exercise Physiology
 - concentration in Exercise Physiology
 - concentration in Human Performance

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Applied Physiology & Kinesiology (MS)

SLO 1 Subject Matter

Discuss, explain, and defend subject matter relevant to the discipline – exercise physiology, biobehavioral science, clinical exercise physiology, human performance, athletic training

SLO 2 Discipline specific skills

Discuss, explain, and defend in the discipline specific skills - exercise physiology, biobehavioral science, clinical exercise physiology, human performance, athletic training

SLO 3 Professional Behavior

Display ethical behavior, cultural sensitivity, team work, professional conduct and professional communication

Health Education and Behavior Department

Chair: M. Maldonado-Molina

Graduate Coordinator: A. Mobley

Complete faculty listing by department: Follow this link (<http://hhp.ufl.edu/about/faculty-staff/heb/>).

The Department of Health Education and Behavior offers a Doctor of Philosophy (Ph.D.) in Health and Human Performance with a concentration in Health Behavior, a non-thesis 30-credit hour Master of Science and a 36-credit Master of Science (M.S.) in Health Education and Behavior. Requirements for the Ph.D. and M.S. degrees are given in the Graduate Degrees section of this catalog.

The Ph.D. degree program trains health behavior researchers for academic positions in federal health agencies such as the Centers for Disease Control and Prevention and the National Institutes of Health, for postdoctoral research fellowships, and for the private sector.

The 30-credit hour, non-thesis M.S. degree program is designed for students seeking an advanced practitioner's degree. A distinctive feature of this option allows students to choose a minimum of 15 credit hours of major elective coursework that matches their interests with faculty expertise to plan a program that achieves their professional goals. The degree prepares health promotion specialists to work in local, state, and federal health agencies, nongovernmental health organizations, patient care settings, and the private sector. Full-time students can complete this M.S. option in one year. This degree may also give students unique and distinguishing training experiences when applying to professional schools such as law, medicine, physician assistant, dentistry, chiropractic, osteopathy, nursing, occupational therapy, and physical therapy.

The 36-credit hour project in lieu of thesis, and the 36-credit hour thesis options are designed for students interested in developing research skills through conducting evaluation projects and empirical studies, as well as pursuing advanced graduate study, particularly the doctoral degree. Students typically can complete these options in about 4 semesters. The Department also offers an accelerated B.S./M.S. program in Health Education and Behavior to enable students to receive both B.S. and M.S.

degrees with a reduction of 12 credits (about one semester of course work).

Students who complete a graduate degree program in the Department of Health Education and Behavior acquire a range of skills required to research, plan, implement, and evaluate health promotion policies and programs aimed at improving the health and well-being of individuals, families, and communities. Specific skills include:

- Conducting needs and capacity assessments to identify health priorities
- Planning, implementing, and evaluating health promotion policies and programs
- Conducting research on questions associated with determinants of health, as well as health promotion policies and programs
- Administering and managing health promotion programs
- Advocating for health promotion policies and programs in schools, communities, health care facilities, and worksites
- Developing social marketing and health communication messages and campaigns
- Researching and developing social media and new media-based health promotion applications
- Serving as a resource person for health information and referrals
- Using a variety of teaching-learning strategies appropriate to the target audience and setting
- Writing scholarly and professional articles
- Working collaboratively with public and private agencies, nongovernmental organizations (NGOs), and the private sector to achieve the goal of a healthier population.

This degree prepares the health promotion specialists and health behavior scientists to work in:

- Local, state, and federal health, education and social agencies
- Nongovernmental health organizations
- Schools and universities
- Healthcare settings
- Private sector

Sample position titles for individuals with this degree include:

- Health education specialist
- Health promotion specialist
- Public health adviser or public health analyst
- Health promotion coordinator or health promotion consultant
- Campus health educator or patient health educator,
- Health communication specialist
- Wellness specialist
- Wellness promotion coordinator
- Prevention specialist

Health Education and Behavior

Program Information

The 30-credit hour, non-thesis Master of Science in Health Education and Behavior degree program is designed for students seeking an advanced practitioner's degree. A distinctive feature of this option allows students to choose a minimum of 15 credit hours of major elective coursework that matches their interests with faculty expertise to plan a program that achieves their professional goals. The degree prepares health promotion specialists to work in local, state, and federal health agencies, nongovernmental health organizations, patient care settings, and the private sector.

The 30-credit, non-thesis Pre-Professional Health Science Track is designed for students seeking a career in health care. This option allows you to choose a minimum of 12 credits of basic science elective coursework which are prerequisites for dental, medical, nursing, occupational therapy, physician assistant, physical therapy, and other health professional programs including 6 credits of undergraduate science courses (3000-4999). This degree track prepares students who are interested in graduate studies in the health sciences and/or pursuing health professional training. Full-time students can complete the 30-credit hour M.S. options in one year.

The 36-credit Thesis and the 36-credit Project In Lieu Of Thesis Master of Science in Health Education and Behavior degree options are designed for students interested in improving their research skills through conducting evaluation projects and empirical studies, as well as pursuing advanced graduate study, particularly the doctoral degree. Students typically complete these options in about 4 semesters.

Student Learning Outcomes

Health Education & Behavior (MS)

SLO 1 Knowledge

Identify, define, and describe principles and foundations of health education/promotion.

SLO 2 Skills

Assess needs, assets and capacity for health education/promotion.

SLO 3 Skills

Plan, implement, and conduct evaluation and research related to health education/promotion

SLO 4 Skills

Administer and manage health education/promotion programs.

SLO 5 Skills

Serve as a health education/promotion resource person.

SLO 6 Skills

Communicate and advocate for health and health education and health promotion.

SLO 7 Skills

Illustrate the highest standards of conduct and ethical behavior when making professional decisions in accordance to the Unified Code of Ethics for the Health Education Profession (Coalition of National Health Education Organizations, 2011)

Health and Human Performance

Program Information

The Ph.D. in Health and Human Performance is a single college-wide Ph.D. program with 5 concentrations that are housed and administered by the four departments, according to the following organizational structure:

- **Applied Physiology and Kinesiology (APK):** Ph.D. students in APK study the immediate and lasting effects of exercise and its use in disease prevention and rehabilitation as well as fundamental mechanisms within muscle biology, cardiovascular function, motor neuroscience, biomechanics, environmental physiology, sports medicine, and emotion regulation. APK Ph.D. concentrations include Exercise Physiology and Biobehavioral Science, with further specializations in biomechanics, motor control and learning, performance psychology, and sports medicine / athletic training.
- **Health Education & Behavior (HEB):** Ph.D. students in HEB investigate health promotion strategies aimed at modifying behaviors which will improve individual, family, workplace, and community health and well-being. The HEB Ph.D. concentration is in Health Behavior.

- **Sport Management (SPM):** SPM Ph.D. students study the business of sport and the impact of sports on individuals and the industry. SPM improves the understanding of factors that help the sport industry thrive. Sport Management students and faculty explore organizational and marketing theories, sociological concepts and sport consumption behaviors among sport organizations and sport consumers to improve the quality of the sport industry practices and the experiences of sport consumers and participants. The Ph.D. concentration in SPM is Sport Management.
- **Tourism, Hospitality, and Event Management (THEM):** THEM Ph.D. students study the impact of tourism, recreation activities, professional and amateur sports, ecotourism, parks and beaches on the personal, social, economic, environmental and resource infrastructures of society. Ph.D. concentration in THEM is Recreation, Parks, and Tourism.

Students are expected to be involved in research throughout their Ph.D. program, which requires approximately three to five years of full-time study for completion. Graduates of the program are trained to assume positions as post-doctoral research scientists, or entry level professorships at colleges and universities throughout the country. The program of study is developed by the student and the supervisory committee based on the student's background, interests, and career goals, as well as faculty expertise. By design, the program is multidisciplinary and flexible, permitting students to tailor their scholarly experience to the development of research skills in their areas of concentration.

For more information, please see our website: <http://hhp.ufl.edu/about/academics/phd/>.

Degrees Offered

Degrees Offered with a Major in Health and Human Performance

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Biobehavioral Science
 - optional second concentration in Clinical and Translational Science
 - concentration in Clinical and Translational Science
 - concentration in Exercise Physiology
 - optional second concentration in Clinical and Translational Science
 - concentration in Health Behavior
 - optional second concentration in Clinical and Translational Science
 - concentration in Historic Preservation
 - concentration in Recreation, Parks and Tourism
 - concentration in Sport Management
 - concentration in Tourism, Hospitality, and Event Management

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Health and human performance

SLO 1 Knowledge

Discuss, explain, and defend subject matter relevant to the discipline – exercise physiology, biobehavioral science, health behavior, recreation, parks and tourism, or sport management.

SLO 2 Knowledge

Discuss, explain, and defend traditional and current research methods in their discipline - exercise physiology, biobehavioral science, health behavior, recreation, parks and tourism, or sport management.

SLO 3 Skills

Discuss, explain, and defend the use of appropriate research methods as determined by the discipline and faculty committee.

SLO 4 Skills

Articulate and defend, orally and in writing, the results of their research and scholarship.

SLO 5 Professional Behavior

Ethically conduct research that is suitable for the discipline.

Faculty

Professor

- Ko, Yong Jae

Sport Management Department

Interim Chair: Y. J. Koe

Graduate Coordinator: K. Kaplanidou

Complete faculty listing: Follow this link (<http://hhp.ufl.edu/about/faculty-staff/spm/>).

The Master of Science in Sport Management is offered by the Department of Sport Management. This program offers thesis and non-thesis formats. The Department participates in the Ph.D. program in Health and Human Performance. Minimum requirements for these degrees are given in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

The Master's program provides advanced preparation of sport management professionals for positions of leadership in planning, developing, administering, and marketing of programs in a variety of

employment settings in the sports industry. Major coursework may be taken in a number of areas, such as:

- Sport Marketing
- Management and Leadership
- Sport Finance
- Sport Law
- Sport Sociology

Doctoral program: The Doctoral program in Sport Management is offered as a concentration through the College of Health and Human Performance. The doctoral program blends course work and research. The curriculum is individualized, and applicants with degrees from unrelated fields can be accepted into the program. However, their previous work will be evaluated and their programs planned according to their individual needs, interests, and career objectives.

Combination program: The Department offers a combination bachelor's/master's degree program. This program allows qualified students to earn both a bachelor's degree and a master's degree with a savings of approximately one semester. Up to 12 approved graduate credit hours can be utilized toward both degrees.

Sport Event Management Graduate Certificate: The Department offers a graduate certificate in sport event management. The sport event management graduate certificate offers a tremendous opportunity for individuals with a Bachelor's degree interested to acquire sport event management skills and gain insights into how to run large and small scale sport events. The Graduate certificate includes three courses that can be completed in three semesters (Fall, Spring, Summer). All students enrolled in the certificate program will gain knowledge in sport event management principles and applications, the management of mega events such as the Olympic Games and also how to manage the impacts of these sport events for their community.

MS/MSM Concurrent Degree Program: This joint degree program is offered through the College of Business Administration (Master of Science in Business Management [MSM]) and the College of Health and Human Performance's, Department of Sport Management (Master of Science in Sport Management [MS]). Applicants must apply to both programs and be admitted to both to participate. The MS/MSM is a non-thesis degree. The MS/MSM is designed for students who seek a graduate business degree and who lack the work experience necessary for admission to the MBA program. The MS/MSM curriculum is similar to the first year of the MBA program, giving students a good foundation in business principles. Concurrent degree students can share up to 9 credit hours of the same coursework towards both degree programs. They do not have to graduate during the same semester. Students admitted into the concurrent program must work closely with both departments to verify all requirements are being met during their course of study.

M.S./J.D. joint program: This 98-credit-hour joint degree program culminates in the Master of Science and the Juris Doctor degrees. Applicants must meet the entrance requirements for the Department of Sport Management and the College of Law. Admission to the second degree program is required no later than the end of the fourth consecutive semester after beginning one of the degree programs. The student's supervisory committee comprises faculty members from both the Department of Sport Management and the College of Law. Students admitted into the joint program are permitted to share up to 12 credit hours of the same coursework towards both degree programs. Students must graduate during the same semester from both programs.

Sport Management (MS)

SLO 1 Knowledge

Identify, define and describe current key concepts and theories in sport management

SLO 2 Knowledge

Critique emerging and critical issues in the sport industry and recommend appropriate business strategies and research methods utilized within sport management

SLO 3 Skills

Develop skills to identify, analyze and make decisions and recommendations to sport management problems

SLO 4 Professional Behavior

Conducts her/himself/themselves professionally in a manner appropriate and expected for the discipline

Tourism, Hospitality, and Event Management Department

Chair: R. Fu

Graduate Coordinator: J. Kim

The degree Master of Science in Tourism and Hospitality Management is offered by the Department of Tourism, Hospitality, and Event Management. This program offers thesis and non-thesis formats. The Department participates in the Ph.D. program in Health and Human Performance. Minimum requirements for these degrees are given in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

Master's program: The program provides advanced preparation of tourism, hospitality, and recreation management professionals for positions of leadership in planning, developing, administering, and marketing of programs in a variety of employment settings both public and private. The coursework is taken the areas of

- Tourism
- Tourism Analytics
- Destination Development
- Crisis Management and Natural Resource Recreation

Doctoral program: The program is offered through the College of Health and Human Performance with a concentration in Recreation, Parks and Tourism. This interdisciplinary specialization blends course work and research. The curriculum is individualized, and applicants with degrees from unrelated fields can be accepted into the program. However, their previous work will be evaluated and their programs planned according to their individual needs, interests, and career objectives.

Combination program: The Department offers a combination bachelor's/master's degree program. This program allows qualified students to earn both a bachelor's degree and a master's degree with a savings of approximately one semester. Up to 9 approved graduate credit hours can be utilized toward the degree.

Tourism, Hospitality and Event Management

PROGRAM INFORMATION

The Master of Science with a major in Tourism, Hospitality and Event Management offers the following areas of concentration:

1. Natural Resource Recreation
2. Tourism
3. Tropical Conservation and Development

Graduates of the Master of Science in Tourism and Hospitality Management will be trained for middle and/or upper level management positions, in their respective fields. Students can choose between three options:

1. Thesis, or
2. Non-Thesis with Practicum, or
3. Non-Thesis with Professional Paper.

For more information, please see our website: <http://hhp.ufl.edu/about/academics/ms-tourism/>.

LEI 7933 Advanced Special Topics in Tourism, Hospitality, and Event Management

Student Learning Outcomes**Tourism, Hospitality and Event Management (MS)****SLO 1 Key Concepts**

Discuss and explain key concepts and theories relevant to recreation, parks and tourism

SLO 2 Research Methods

Identify, describe, explain, and apply traditional and current research methods within recreation, parks and tourism

SLO 3 Identify and Apply Skills

Identify and apply skills to solve recreation, and tourism problems

SLO 4 Ethical Behavior

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and professional communication

College of Journalism and Communications

Dean: H. Brown

Associate Dean for Graduate Studies: M. DiStaso

Graduate Coordinators:

- (Public Relations—thesis-based) J. Hmielowski
- (Professional Communication) T. Spiker
- (Research and Theory—no concentration) J. Hmielowski

Through the Division of Graduate Studies, the College of Journalism and Communications offers the Doctor of Philosophy degree and the Master of Arts in Mass Communication (thesis or project option) degree, which is divided into two areas: PhD preparation and professional development.

For a full list of programs, please see <https://gradcatalog.ufl.edu/graduate/colleges-departments/journalism-communications/mass-communication/>. Additionally, requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Doctoral students work closely with faculty members in research leading to a dissertation embodying a humanities, law/policy, or social sciences approach. Emphases within these approaches for which faculty members have expertise include advertising, AI and emerging technology, cultural and social change, health communication, journalism, law/policy/history, media industry and consumers, media psychology, public interest communication, public relations, science communication, social media, sports communication, trust in media, visual communication, and political communication. Details of doctoral faculty research interests and other aspects of the program are given in the College's Ph.D. Handbook and is available online at: <https://www.jou.ufl.edu/home/about/faculty-staff-directory/doctoral-faculty-directory/>.

The master's program is a two-track system, one focused on PhD preparation and one on professional development. In the PhD-preparation program, you learn the ideas and skills you need for satisfying life-long careers in mass communication. You can choose to obtain a Master of Arts in Mass Communication degree by selecting either

1-3 the no concentration or public relations concentration for the PhD preparation programs or professional communication for the professional development on-campus master's program. Master's students in the PhD-preparation track may complete a thesis in many areas, including but not limited to advertising, journalism, public relations, media and technology, and science/health communication. A project in lieu of thesis option is available for some specializations.

The Professional Communication track allows recent graduates or professionals to develop additional skills for today's communication job market.

General admission: Admission is granted to applicants with and without backgrounds in mass communication. Students without academic preparation in mass communication or appropriate experience may be required to take articulation work. These courses are taken concurrently with general graduate courses, starting in the first term of registration.

The master's degree normally can be earned in three to four semesters of full-time study. Doctoral studies require three or more years of full-time study and research. Students who may require articulation courses should contact the Associate Dean of Graduate Studies.

Grading policy: Students may be placed on probation if their progress becomes unsatisfactory. Students who earn a truncated GPA less than 3.0 and/or receives a C-, C+, D+, D-, E, I, N or U grade will be placed on probation, except for courses taken from the Levin College of Law, undergraduate statistics course, or articulation classes. For these courses, any student receiving one grade that is a C-, D+, D-, E, I, N or U will be placed on probation.

If a student satisfies their probation plan but does not achieve cumulative truncated GPA of 3.00 or above as calculated by the UF graduate school, the probation period will be extended until the truncated 3.0 GPA is achieved. Students may only have one semester with grade(s) that is/are a C-, C+, D+, D-, E, I, N or U. If the student has more than one semester with grade(s) of C-, C+, D+, D-, E, I, N or U, the student will face suspension. These semesters do not need to be consecutive semesters of enrollment. Students will be allowed only one suspension..

Combination degree program: The College offers a combination bachelor's/master's program. For information, contact the Combination Degree advisor.

For additional information, please see our website: <http://www.jou.ufl.edu/grad>.

Mass Communication

Program Information

Ph.D. with a major in Mass Communication

The Ph.D. degree is a research degree. The Ph.D. program is designed to help develop knowledge, attitudes, and skills so graduates can make important contributions to understanding mass communication. Faculty members help students lay the foundation for a lifetime of significant, creative work.

The doctoral program prepares students for a variety of opportunities in mass communication. Graduates are expected to teach at colleges and universities; conduct research for organizations in advertising, journalism, public relations, telecommunication, and other mass communication fields; do consulting; and conduct research and contribute to policy in government and private organizations. Doctoral students in the College of Journalism and Communications gain valuable experience in both teaching and research. Assistantships help prepare students for academic and other research positions. Students in the program have consistently been among the nation's leaders in winning top-paper awards at national and regional scholarly meetings.

Master of Arts in Mass Communication (M.A.M.C.)

The Master of Arts in Mass Communication includes both thesis and non-thesis options on campus and several non-thesis concentrations offered fully online.

On-Campus Options

Customizable Research and Theory (thesis)

The customizable on-campus thesis option focuses on research and theory in mass communication, including courses in the areas of advertising; journalism; international and intercultural communication; and media production, management and technology. Students are required to take courses that focus on research, theory, ethics, and writing, leading to a master's thesis as the capstone. This option is appropriate for students wishing to pursue careers in research or a Ph.D.

Public Relations Concentration (thesis)

The **Public Relations Concentration** is an on-campus research-based program designed to prepare students for careers and advancement in the industry or for entering doctoral studies. Students learn the conceptual foundations of public relations and develop professional and research competency within the duration of the program. Courses in the public relations specialization focus on conceptual foundations of public relations, including mass communication and society; professional and managerial skills mastery; and research expertise.

For more information, please see our website: <https://www.jou.ufl.edu/graduate/research-and-theory/mamc-public-relations/>

Science and Health Communication Concentration (thesis)

The **Science and Health Communication Concentration** is an on-campus program designed to teach scientists and health specialists to communicate effectively via media, and to teach mass media specialists the background science to translate the language of science and health into meaningful and understandable stories for their audiences. These goals are achieved through theoretical writing and applied courses. At least two aspects of the program make it unique among science communication programs nationwide. First, other existing science communication programs in the U.S. focus on training journalists. UF's program is open to journalists who want to specialize in covering science and health, offers training for people planning to work as public affairs or public information officers for science and health organizations, for other communication specialists, and for scientists who need to be able to communicate with the public about their work. Second, the program focuses on training students to understand and communicate effectively about science and health policy.

For more information, please see our website: <https://www.jou.ufl.edu/graduate/research-and-theory/mamc-science-health/>

Professional Master's (non-thesis)

The **Professional Communication Concentration** (or "Professional Master's") is an on-campus professional program designed specifically for those who want to develop additional skills to become more competitive in the job market. The program's "mix and match" coursework structure allows students to develop their own customizable degree plans, with only six required core courses and a wide range of electives available across the college's four departments. Degree plans culminate with a capstone

project, completed over at least two semesters and supervised by a graduate faculty committee. Student projects range from documentary films and long-form journalistic narrative pieces to public relations and advertising campaigns, and many others in between. These projects allow students to explore various interests within the college and showcase a variety of skills learned during their course of studies.

The Professional Master's can be completed at your own pace, in as little as one year for those who want an accelerated program, or two years for a more traditional path.

For more information, please see our website: <https://www.jou.ufl.edu/current-students/masters/promasters/>.

Online Concentrations (non-thesis)

UF CJC Online offers eight comprehensive, current, and digitally focused online master's concentrations: Audience Analytics, Digital Strategy, Global Strategic Communication, Political Communication, Public Interest Communication, Public Relations and Communication Management, Social Media, and Web Design and Online Communication.

Audience Analytics

The **Audience Analytics Concentration** is an online program offered through the University of Florida College of Journalism and Communications designed to prepare students with the theoretical foundations, industry knowledge, and analytical tools to understand the nature, value, and behaviors of audiences across multiple media platforms and disciplines. The courses equip students with the analytical tools and methodological foundations to assess and analyze audience-related datasets. Students will also learn how to use such data and present insights in order to tell fundamental stories that will ultimately drive the ability to make informed decisions for their stakeholders.

For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/audience-analytics/>

Digital Journalism and Multimedia Storytelling

The **Digital Journalism and Multimedia Storytelling Concentration** is an online program offered through the University of Florida College of Journalism and Communications designed for students who want to master the latest reporting, writing, and technical skills for traditional journalism, digital media, and various genres of storytelling across a variety of multimedia platforms. Students will learn to explain the role and apply principles and laws of a free press, identify key events in the history of journalism, and trends in artificial intelligence and current media. They will learn to exhibit respectful collaboration and professional ethical principles and work in the pursuit of truth, accuracy, and fairness. Further, students will apply tools and technologies appropriate for various communications professions including social media.

For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/digital-journalism/>

Digital Strategy

The **Digital Strategy Concentration** is an online program offered through the University of Florida College of Journalism and Communications designed for students who want to become better digital marketers. This concentration is designed to challenge students to develop effective messaging to drive increased conversions and create loyal customers. Our courses focus on teaching students the skills they need to be effective at copywriting

for every type of social and digital channel, developing an inbound strategy, generating leads, analyzing effectiveness, designing around the user's experience, and more.

For more information, please see our the program's website: <https://onlinemasters.jou.ufl.edu/digital-strategy/>

Global Strategic Communication

The **Global Strategic Communication Concentration** is an online program offered through the University of Florida College of Journalism and Communications and is designed for students who are passionate about solving global issues. This specialization embodies three core pillars: Messaging, Communication, and Culture. Students in this concentration will learn how to communicate across cultures, influence public policy, engage audiences, and initiate dynamic change despite geographical boundaries. The Global Strategic Communication program will allow students to offer solutions to world problems, business ethics, education, and more using strategic interpersonal communication skills with attention to cultural considerations. For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/global-strategic-communication/>

Political Communication

The **Political Communication Concentration** is an online program offered through the University of Florida College of Journalism and Communications that prepares students to become digital political professionals with an understanding of cutting-edge digital advertising, engagement, and analysis techniques. Professionals in the field will prepare students to navigate the ever-evolving political landscape by giving them the tools of modern campaigning to help increase political engagement and drive change. The Political Communication Concentration is narrowly focused on communicating online for political organizations, nonprofits and corporations. Ultimately, this program provides hands on experience on how to effectively design a political campaign in the new digital age.

For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/political-communication/>

Public Interest Communication

The **Public Interest Communication Concentration** is an online program offered through the University of Florida College of Journalism and Communications that embraces the vision of creating science-based, strategic communications designed to advance the human condition. It is critical to achieving significant behavioral or social changes on an issue that transcends the particular interests of any single organization. This program offers students the opportunity to develop the skills, strategies, theory and techniques required to build movements and drive positive social change using strategic communication. This interdisciplinary concentration includes both theoretical and practical work and draws from practice and scholarship in public relations, journalism, advertising, psychology, sociology, political science, anthropology, and neuroscience. The coursework places an emphasis on working across organizations and sectors, system-level thinking, strategic planning and the core skills critical to any effective social change effort.

For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/public-interest/>

Public Relations and Communication Management

The Public Relations and Communication Management

Concentration is an online program offered through the University of Florida College of Journalism and Communications that focuses not only on strategic communication, but also incorporates elements of copywriting, graphic design, and business. This program will teach students how to effectively communicate during crises, build meaningful relationships with the media, manage a brand's reputation, evaluate and measure change, in addition to influence opinions. With the Public Relation and Communication Management Concentration, students will be able to approach Public Relations like a strategic conversation where they control the narrative to get the results clients need. For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/public-relations/>

Social Media

The **Social Media Concentration** is an online program offered through the University of Florida College of Journalism and Communications that focuses on making meaningful online connections and ensuring students have the tools and training to be effective at reaching their audience. This comprehensive program will not only teach students how to use current social media platforms, but it will also team them to approach social media marketing in a holistic way, by incorporating writing, video production, and brand marketing.

The program will also teach students how to use research to drive content creative, how to create effective advertising and public relations campaigns, and how to use new and emerging technologies to appeal to target audiences and drive meaningful social change. For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/social-media/>

Web Design and Online Communication

The **Web Design and Online Communication Concentration** is an online program offered through the University of Florida College of Journalism and Communications that takes a three-pronged approach with courses on design skills, communication theory and code. The curriculum starts off with a solid foundation of graphic design principles along with best practices of HTML5 and CSS. Students then take additional coding courses to learn how to use JavaScript, PHP, jQuery, and more. By the end of the program, students will be able to code a completely customized, mobile responsive website for a real client.

For more information, please see the program's website: <https://onlinemasters.jou.ufl.edu/web-design/>

For more help with any of our graduate degree programs, please refer to our website: <https://www.jou.ufl.edu/graduate/>

Combination Degrees:

The College of Journalism and Communications offers a robust Combination Degree program that is open to undergraduate students from any major who meet the program's admission criteria.

For more information, please see the program's website: <https://www.jou.ufl.edu/combination-degree-main/>

Degrees Offered**Degrees Offered with a Major in Mass Communication**

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
- Master of Arts in Mass Communication
 - without a concentration
 - concentration in Audience Analytics
 - concentration in Digital Journalism and Multimedia Storytelling
 - concentration in Digital Strategy
 - concentration in Global Strategic Communication
 - concentration in Political Communication
 - concentration in Professional Communication
 - concentration in Public Interest Communication
 - concentration in Public Relations
 - concentration in Public Relations and Communication Management
 - concentration in Science and Health Communication
 - concentration in Social Media
 - concentration in Web Design and Online Communication

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

- Fagan, Abigail A.

Associate Professor

- Barnes, Riche J Daniel
- Canton, David

Other

- Evans, Bianca Danyell

Lecturer

- Johns, Tracy Lynn

This listing represents faculty appointed to the College of Liberal Arts and Sciences. For individual programs' faculty lists within CLAS, please see each of the individual faculty tabs within the individual CLAS departmental pages of this catalog.

Anthropology Department

Chair: P. Collings

Graduate Coordinator: A. Strong

The Department of Anthropology offers the Master of Arts and Doctor of Philosophy Degrees. Complete descriptions of the minimum requirements for these degrees are provided in the General Information section of this catalog.

The Department provides training in the four main areas of specialization or subfields:

- Anthropological Linguistics,
- Archaeology,
- Biological Anthropology, and
- Cultural Anthropology.

Department strengths include training in Social Research Methods, Medical Anthropology, and the Archaeology of the Americas. The C.A. Pound Human Identification Lab provides opportunities for specialized training in Forensic Anthropology.

Given the holistic nature of Anthropology, the Department maintains close ties with other units in Liberal Arts and Sciences, including the Center for African Studies (CAS), the Center for Latin American Studies (LAS), the School of Natural Resources and Environment (SNRE), the African American Studies program, the Center for European Studies (CES), and the Department of Linguistics. Many department faculty hold

joint appointments or affiliations with these programs. We also maintain close ties with the Bureau of Economic and Business Research (BEER), the Florida Museum of Natural History (FLMNH), the Emerging Pathogens Institute (EPI), the Land Use and Environmental Change Institute (LUECI), the Water Institute, and the Genetics Institute.

Prospective students are encouraged to examine the research interests of individual faculty for a more detailed perspective on the Department's strengths and specialties. Applicants to the graduate program should preferably have an undergraduate major in anthropology, but the Department accepts applicants with degrees in the humanities, arts, social sciences, and physical sciences into the graduate program. All students are required to take the two Proseminar courses, which provide students with baseline knowledge of the discipline's four subfields.

Anthropology

Program Information

The department of Anthropology offers graduate work leading to the Master of Arts (thesis or non-thesis option) and Doctor of Philosophy degrees. Requirements for these degrees are given in the General Information section of this catalog. For more information, visit the departmental website: <http://anthro.ufl.edu>. Graduate training is offered in cultural anthropology, archaeology, biological anthropology, and linguistic anthropology.

Each graduate student should specify a major field of study among the four fields of anthropology. In addition, each must choose one of three tracks: the specialized track in which a student focuses on one field of anthropology, the multifield track in which a student combines two fields, or the interdisciplinary track in which a student adds study in a second discipline to anthropology. Knowledge of a foreign language or of statistics may be required by the student's supervisory committee.

The department generally requires applicants to have acceptable scores on the GRE (verbal and quantitative portions) and a 3.5 overall grade point average based on a 4.0 system. Previous work in anthropology is an asset but not a strict requirement for admission. Potential applicants are urged to visit the website to familiarize themselves with the specializations of our faculty and to indicate in their application

those faculty with whom they might work. Barring special circumstances, the Department restricts admission to applicants interested in earning a Ph.D. Entering students who have earned a master's degree in anthropology may apply for direct admission to the doctoral program. Students who enter without an M.A. in anthropology will generally work for their M.A. on the way to the Ph.D. This requires either a formally-defended thesis or written comprehensive exams combined with a publishable paper or research report. With their adviser's permission, they may opt to bypass the M.A, although this is not recommended.

Students enrolled in the M.A. program who wish to continue their studies for a Ph.D. must apply to the Department for certification.

New students are admitted into the graduate program only in the fall of each academic year. The deadline for receiving completed applications for admission into the graduate program is December 15 of the previous year.

Degrees Offered

Degrees Offered with a Major in Anthropology

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Historic Preservation
 - concentration in Tropical Conservation and Development
 - concentration in Women's/Gender Studies
- Master of Arts
 - without a concentration
 - concentration in Historic Preservation
 - concentration in Tropical Conservation and Development
- Master of Arts in Teaching
 - without a concentration
 - concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

ANG 6945	Internship in Anthropology	1-8
ANG 6971	Research for Master's Thesis	1-15
ANG 7979	Advanced Research	1-12
ANG 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Anthropology (PHD)

SLO 1 Foundational Knowledge
Identify, define and describe the foundational concepts of the discipline of Anthropology and its subfields.

SLO 2 Professionalization
Prepare and deliver conference-level presentations.

SLO 3 Methodology
Students apply appropriate research methods and skills in the discipline to formulate a cogent research problem for the Ph.D. thesis.

Anthropology (MA)

SLO 1 Foundational Knowledge
Identify, define and describe the foundational concepts of the discipline of Anthropology and its subfields.

SLO 2 Skills
Identify, describe and explain research methods in the discipline, and apply those skills to formulate a cogent research problem for the M.A. paper or thesis.

SLO 3 Professional Behavior
Conduct research and report findings in a written publication-qualify paper.

Astronomy Department

Chair: C. Telesco

Graduate Coordinator: V. Sarajedini

The University of Florida's Astronomy Department is one of the largest in the country. Research is an integral part of the graduate program. Students have opportunities to work with faculty and staff on a broad range of astronomical problems using in-house, national and international, and ground- and space-based facilities. Support for graduate studies is available through fellowships, research assistantships, and teaching assistantships. For more information on

the program, please follow the link below or visit our website (<https://www.astro.ufl.edu/academics/graduate-studies/>).

Majors

- Astronomy (p. 205)

Faculty

Professor

- Gonzalez, Anthony Hernan
- Guzman, Rafael
- Lada, Elizabeth Anne
- Telesco, Charles Michael

Associate Professor

- Ginsburg, Adam
- Hoadley, Keri
- Narayanan, Desika T.
- Slepian, Zachary Scott

Assistant Professor

- Bae, Jaehan
- Ballard, Sarah
- Dittmann, Jason
- Ezzeddine, Rana
- Tayar, Jamie N.
- Torrey, Paul Adam

Senior Lecturer

- Marinas, Naibi
- Sell, Paul

Astronomy

Program Information

The Astronomy Department offers graduate programs leading to the M.S., M.S.T. or Ph.D. degrees in astronomy. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Planetary Systems: Observational and theoretical studies concentrate in the areas of planet formation, the dynamical evolution of planetary systems and the detection and characterization of extrasolar planets. Members of the department are active in Kepler Mission and ground-based Dopple surveys to identify extrasolar planets. Researchers are also active in studying the origins and orbital evolution of interplanetary dust and small bodies in the solar system and around nearby stars.

Stellar populations: Observational studies concentrate on resolved stars in the Milky Way and nearby galaxies. Studies of particular classes of stars include various types of binary stars and blue stragglers. The goal of these studies is to apply our theoretical understanding of stellar structure and evolution to the properties of stars in a variety of environments.

Origins of stars and planets: Observational studies focus on the properties of giant molecular clouds, the collapse of molecular cloud cores, the formation of stars in clusters and in isolation, and the formation and evolution of circumstellar and protoplanetary disks.

The department is active in several star formation surveys, involving many international ground- and space-based facilities. Theoretical studies emphasize the development of analytic models and numerical simulations, as well as their testing against observational constraints.

Structure and evolution of galaxies: Observational programs use multi-wavelength photometry of stars and star clusters in galaxies throughout the Local Group and in nearby groups, including the Milky Way, to study galaxy evolution. Other observations focus on the structure and dynamics of galaxies and their interstellar medium using neutral hydrogen (HI) and molecules such as carbon monoxide.

Extragalactic astronomy and cosmology: Observational programs investigate the nature of ultra-luminous galaxies, active galactic nuclei (AGNs), and the formation and chemical evolution of distant galaxies and clusters of galaxies. Theoretical investigations focus on the emission/absorption features in AGN spectra, the star-formation and chemical-evolution properties of galaxies, and applications of general relativity and particle physics to conditions in the very early universe.

Instrumentation programs: The UF Infrared Astrophysics Laboratory is a world leader in designing and constructing advanced near-infrared and mid-infrared instrumentation for major telescopes around the world, including the 8m Gemini North and South Telescopes and the 10m Gran Telescopio Canarias. Instrumentation is also developed in the area of high precision Doppler techniques for planet searches and the development of high contrast imaging techniques for direct imaging of extrasolar planets.

Computing facilities: The Astronomy Department maintains a network of high-performance computers running Linux and OS-X. The local network is maintained by a full-time systems manager. Astronomy students have access to supercomputing facilities maintained by the UF High Performance Computing Center, including thousands of CPU cores with high-performance networking.

Degrees Offered

Degrees Offered with a Major in Astronomy

- Doctor of Philosophy
- Master of Science
- Master of Science in Teaching

Student Learning Outcomes

Astronomy (PHD)

SLO 1 Knowledge
Students identify, define and describe the fundamental astrophysics covered by the core curriculum in astronomy

SLO 2 Skills
Students will conduct original, independent research in astrophysics

SLO 3 Professional Behavior
Students will write scholarly research that conforms to academic publishing conventions

Astronomy (MS)

SLO 1 Knowledge
Students will identify, define and describe the fundamental astrophysics covered by the core curriculum

SLO 2 Skills
Students will conduct supervised research in astrophysics

SLO 3 Professional Behavior
Students will communicate their research in oral presentations in a style appropriate for conferences

SLO 4 Professional Behavior
Students will write articles at the level of a conference proceeding based upon their research

Astronomy (MST)

SLO 1 Knowledge
Students will identify, define and describe the fundamental astrophysics covered by the core curriculum

SLO 2 Skills
Students will effectively teach astronomy

SLO 3 Professional Behavior
Students will effectively communicate with their peers in a professional environment

Biology Department

Chair: M. L. Wayne

Graduate Coordinator: J. (Gordon) Burleigh

The Department of Biology offers two graduate programs: Botany and Zoology. Both programs offer graduate work leading to the degrees of Master of Science, Master of Science in Teaching, and Doctor of Philosophy. Requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog. More information regarding these programs is available by following the links below and by visiting our departmental website: <http://www.biology.ufl.edu>.

Combination Bachelor's/master's program: the Department of Biology in collaboration with the College of Medicine offer a combination Bachelor of Science with a major in Biology and Master of Science with a major in Biochemistry & Molecular Biology degree program. Eligible students may substitute up to 12 semester hours of graduate courses for undergraduate electives. These letter-graded, graduate level courses earned with a grade of B or better are double-counted toward the 30 credits required for the Master of Science (with thesis) in Biochemistry & Molecular Biology.

The combination degree program allows students to complete the M.S. degree with a research thesis in as little as one year after receiving the B.S. degree. The program is intended for students who want to complete a mentored research project while taking additional graduate coursework to gain more experience and be more competitive for applications to Ph.D. programs or professional programs (for example, Medical, Dental, or Veterinary school).

Eligibility Requirements for the admission to the undergraduate portion of the combination degree program:

1. Minimum cumulative GPA of 3.2 and minimum upper division GPA of 3.3
2. Completion of all critical-tracking requirements in the Biology B.S.
3. Completion of at least three semester hours of mentored research (e.g., through BSC 4910 Individual Mentored Research in Biology (0-3 cr.) and BSC 4912 Advanced Mentored Research in Biology (0-4 cr.)) or equivalent research experience

Eligibility Requirements for the graduate portion of the combination degree program:

1. Satisfactory completion of the undergraduate portion of the combination degree program
2. Meet the requirements for admission, including minimum GRE score, as established by the Graduate School and the Biochemistry & Molecular Biology graduate program in the College of Medicine.
3. A member of the Biochemistry & Molecular Biology graduate faculty has agreed to serve as the student's advisor.

Interested students must apply to the combination degree program by the end of the junior year. Upon acceptance, the Biology Major Undergraduate Coordinator and the Biochemistry & Molecular Biology Graduate Coordinator will identify up to 12 credits of 5000+ level courses that the student may take in the senior year. The GRE should be taken by the summer before the senior year. In the fall of the senior year, the student will apply to the M.S. Program. Upon acceptance to the M.S. program, the eligible combination degree graduate coursework will be

transferred to count toward the M.S. degree during the first semester following award of the B.S. degree.

Students should note the following regarding tuition and fees in this program:

1. the tuition for graduate courses is higher than for undergraduate courses, regardless of whether the courses are taken as an undergraduate or graduate student, and
2. there is no guarantee of a stipend or tuition waiver for graduate students in the MS program.

Botany

Program Information

Chair: M. L. Wayne

Graduate Coordinator: J. (Gordon) Burleigh

The Department of Biology offers graduate work in Botany leading to the degrees of Master of Science, Master of Science in Teaching, and Doctor of Philosophy.

The Department offers studies in the areas of biochemistry, molecular biology, cell biology, physiology, ecology, systematics, and evolution. Specific areas of specialization include anatomy/morphology with emphasis on extant and fossil vascular plants; ecology and environmental studies including ecosystem ecology, conservation biology and genetics, fire ecology, exotic invasive species, and tropical botany and ecology; cell biology with emphasis on the cytoskeleton and cell morphogenesis; physiology, biochemistry, and molecular biology with emphasis on photosynthesis, growth and development of angiosperms, protein phosphorylation and signal transduction, global analysis of spatial patterns of gene expression; plant secondary metabolism and proteomics; systematics with emphasis on DNA- and morphology-based phylogenetic analyses, phylogeographic studies, molecular evolution/development, and monographic and floristic studies. To be considered for admission to graduate studies, students should have:

- The equivalent of an undergraduate degree in botany or biology with basic course work in their area of interest
- Acceptable GRE scores (verbal, quantitative, and analytical writing)
- Letters of recommendation
- International students must submit an acceptable score on one of the following: TOEFL (Test of English as a Foreign Language: computer=213, paper=550, web=80), IELTS (International English Language Testing System: 6), MELAB (Michigan English Language Assessment Battery: 77), or successful completion of the UF English Language Institute program. The program of graduate study for each student will be determined by a supervisory committee, and deficiencies in background coursework will be made up early in the graduate program. No more than 9 credits of BOT 6905 Individual Studies in Botany (1-3 cr.) may be used to satisfy the credit requirements for a master's degree.

Degrees Offered

Degrees Offered with a Major in Botany

- Doctor of Philosophy
 - without a concentration

Student Learning Outcomes

Botany (PHD)

SLO 1 Knowledge

Students will identify, define, and describe basic fundamentals of biology and a thorough understanding of the fundamentals of botany

SLO 2 Skills

Students will design a research project, collect data, analyze and interpret the results. They will be able to present the results of original research in oral and written form

SLO 3 Skills

Students design a research project, collect data, analyze and interpret the results. They will be able to present the results of original research in oral and written form

SLO 4 Professional Behavior

Students will practice ethical behaviors and professional conduct

SLO 5 Professional Behavior

Students will be able to interact and communicate with professionals at scientific conferences

Botany (MS)

SLO 1 Knowledge

Students will identify, define, and describe the basic fundamentals of biology and botany

SLO 2 Skills

Students will design a research project, collect data, analyze and interpret the results and present this in written and oral form

SLO 3 Professional Behavior

Students will practice ethical behaviors and professional conduct

SLO 4 Professional Behavior

Students will interact and communicate with professionals at scientific conferences, and practice ethical behaviors and professional conduct

Botany (MST)

SLO 1 Knowledge

Students will identify, define, and describe the basic fundamentals of botany and pedagogy.

SLO 2 Skills

Students will teach botany and biology classroom sessions

SLO 3 Professional Behavior

Students will interact and communicate with professionals at scientific conferences, and practice ethical behaviors and professional conduct

Zoology

Program Information

Chair: M. L. Wayne

Graduate Coordinator: J. (Gordon) Burleigh

The Department of Biology offers graduate programs in Zoology leading to the Master of Science in Teaching, Master of Science, and Doctor of Philosophy degrees. The requirements for these degrees can be found in the Graduate Degrees (p. 778) section of this catalog.

Our program emphasizes Integrative Biology, with integration accomplished through a focus on the theoretical foundations provided by evolutionary biology and ecology. Our faculty has expertise in ecology, evolution, behavior, comparative and environmental physiology, genetics, development, and phylogenetics. We work in a variety of terrestrial and aquatic environments and geographic regions (tropics through subpolar), and on a range of organisms (including plants). Our faculty value integrative research (e.g., by crossing levels of organization from gene expressions to species interactions), linking theory with data (through use of statistical and mathematical tools), and using natural history to guide the development and testing of rigorous conceptual frameworks. Many of our faculty also are interested in applying and

testing basic science in applied contexts (e.g., conservation biology and ecotoxicology).

Our approach is highlighted through our first-year, required, graduate course, Integrative Principles. Each student’s supervisory committee will recommend additional courses according to the academic background and research plans of the student.

Degrees Offered

Degrees Offered with a Major in Zoology

- Doctor of Philosophy
 - without a concentration
 - concentration in Animal Molecular and Cellular Biology
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences
- Master of Science in Teaching
 - without a concentration
 - concentration in Tropical Conservation and Development
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

ZOO 6971	Research for Master’s Thesis	1-15

ZOO 7979	Advanced Research	1-12
ZOO 7980	Research for Doctoral Dissertation	1-15

Biology Departmental Courses

Code	Title	Credits
BOT 6276C	Phylogenomics	4
BOT 6656	Plant Symbiosis	3
BSC 6038	Broader Impacts of Science on Society	2
BSC 6451	Computational Tools for Research in Biology	3
BSC 6895	AI in Biology	3
PCB 6675C	Evolutionary Biogeography	3
PCB 6685	Population Genetics	4
ZOO 6930	Seminar in Molecular Evolution	2

Student Learning Outcomes

zoology (PHD)

SLO 1 Knowledge
Students will identify, define, and describe basic fundamentals of biology and a thorough understanding of the fundamentals of zoology

SLO 2 Skills
Students will design a research project, collect data, analyze and interpret the results. They will be able to present the results of original research in oral and written form

SLO 3 Skills
Students design a research project, collect data, analyze and interpret the results. They will be able to present the results of original research in oral and written form

SLO 4 Professional Behavior
Students will demonstrate ethical behaviors, professional conduct

SLO 5 Professional Behavior
Students will be able to interact and communicate with professionals at scientific conferences

Zoology (MS)

SLO 1 Knowledge
Students will identify, define, and describe the basic fundamentals of biology and zoology

SLO 2 Skills
Students will design a research project, collect data, analyze and interpret the results and present this in written and oral form

SLO 3 Professional Behavior
Students will practice ethical behaviors and professional conduct

SLO 4 Professional Behavior
Students will interact and communicate with professionals at scientific conferences

Zoology (MST)

SLO 1 Knowledge
Students will identify, define, and describe the basic fundamentals of zoology

SLO 2 Skills
Students will define, explain and communicate key concepts in zoology and biology

SLO 3 Professional Behavior

Students will engage in ethical behaviors and professional conduct

SLO 4 Professional Behavior

Students will practice ethical behaviors and professional conduct

Center for Latin American Studies

Director: P. J. Williams

Graduate Coordinator: S. Paulson

The Center for Latin American Studies offers the following graduate programs:

- Latin American Studies
- Sustainable Development Practice

The department also offers a combination bachelor's/master's program. Contact the graduate coordinator for further information regarding this option. For more information about all of our programs, please see our individual major pages, following the links below, or by visiting our website: <http://www.latam.ufl.edu>.

Majors

- Latin American Studies (p. 213)
- Sustainable Development Practice (p. 213)

Latin American Studies

Program Information

The Center for Latin American Studies offers the following graduate programs:

- An interdisciplinary Master of Arts degree in Latin American Studies
- A graduate certificate in Latin American studies
- A graduate certificate and concentration in Tropical Conservation and Development

The graduate program in Latin American studies relies on over 250 courses with Latin American content taught in more than 35 academic units of the above colleges. The degree and certificate programs in Latin American studies are described on our website www.latam.ufl.edu/academics/graduate-programs (<http://www.latam.ufl.edu/academics/graduate-programs/>). Complete course listings are also available on the Center's website: <http://www.latam.ufl.edu/academics/las-courses> (<http://www.latam.ufl.edu/academics/las-courses/>).

Degrees Offered

Degrees

- Master of Arts
 - without a concentration
 - concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

center for Latin American Studies Courses

Code	Title	Credits
FOT 6941	Translation Studies Practicum	3
INR 6708	Foundations of Economics for Sustainable Development	3
LAS 6045	Gender and Empowerment in Development	3
LAS 6046	Development Administration	3
LAS 6047	Conservation and Development Practicum	3

LAS 6905	Individual Work	1-3
LAS 6938	Seminar in Modern Latin American Studies	3
LAS 6941	Tropical Conservation and Development Practicum	3
LAS 6943	Development Theory and Practice in Latin America	3

LAS 6949	Internship In Latin American Studies	1-6
LAS 6971	Research for Master's Thesis	1-15

Student Learning Outcomes

Latin American Studies (MA)

SLO 1 Content

Students will identify, describe and explain the prevailing issues in and scholarly perspectives on Latin American Studies

SLO 2 Skills

Students will critically evaluate the significance, quality and veracity of information gathered in the literature, apply it effectively in research for a thesis, and communicate that knowledge effectively in spoken and written formats

SLO 3 Professional Behavior

Students will defend their thesis in an oral exam before their committee members. Many MALAS students will present their research in professional meetings or other academic settings

Sustainable Development Practice

Program Information

Director: G. Galloway

Program Coordinator: A. Noss

The Master of Sustainable Development Practice (MDP) Program offers the following academic programs:

- An interdisciplinary Master's degree in Sustainable Development Practice (MDP)
- A graduate certificate in Sustainable Development Practice (SDP)

The MDP Program is jointly administered by the Center for Latin American Studies and the Center for African Studies. The Master's degree is described in the Other Master's Degrees (p. 778) section of the Graduate Catalog.

The MDP prepares development practitioners to address development challenges in creative and dynamic ways, integrating the academic and development pillars of natural sciences, social sciences, health sciences and management through a vigorous and innovative program curriculum. The MDP Degree requires 45 credits of course work: 24 major or core credits across the four pillars, and 21 elective credits through which a student focuses on a specialization (for example entrepreneurship, agriculture, ecotourism, gender, community forest management, nonprofits, or M&E). The MDP is a non-thesis degree. Each student must successfully complete a set of requirements including a summer field practicum with a host organization, the development of a poster presented in a public poster session, a final practicum report approved by their committee, and a public presentation and private defense with committee members of the final report. All students will be expected to meet learning outcome objectives defined for knowledge, skills and professional behavior. Students are required to develop a study plan approved by the MDP Program Graduate Coordinator and by their supervisory committee.

The SDP certificate provides training in interdisciplinary knowledge and skills related to sustainable development practice. The 12 credits for Master's students and 15 credits for Ph.D. students include one required cross-cutting overview course plus 3-4 additional courses in the fields

of social sciences, health sciences, natural sciences, and management skills.

MDP major or core courses are listed under the listings for Sustainable Development Courses, African Studies Courses, and Latin American Studies Courses. Please visit the MDP program's website for additional information on the SDP certificate, MDP degree and curriculum, including detailed course descriptions and syllabi: <http://mdp.africa.ufl.edu>.

Student Learning Outcomes

Sustainable Development Practice

SLO 1 Knowledge Outcome

Students will define, identify and describe complex interdisciplinary dimensions of sustainable development

SLO 2 Skills Outcome

Students will plan and utilize participatory methodologies and/or tasks related to the planning, implementation, monitoring and evaluation of development initiatives

SLO 3 Professional Behavior Outcome

Students will interface with professional peers with honesty, ethical behavior, cultural sensitivity, teamwork, and effective communication

Chemistry Department

Chair: L. McElwee-White

Graduate Coordinator: A. Aponick

The Department of Chemistry granted its first master's degree in 1909 and the first Ph.D. in 1930. Specializations in biochemistry, organic, physical, inorganic and analytical are offered with extensive interdisciplinary research opportunities (e.g., bio/nano-science, particle science, green chemistry, polymer chemistry, chemical physics, health related biochemistry, chemistry-engineering, and genomics).

The Department presently offers the Master of Science and Doctor of Philosophy degrees with a major in chemistry. The non-thesis Master of Science in Teaching degree is also offered with a major in chemistry.

For more information, please visit <https://www.chem.ufl.edu/>.

Chemistry

Program Information

The department offers the Master of Science (thesis or non-thesis) and Doctor of Philosophy degrees with a major in chemistry and specialization in biochemistry, analytical, organic, inorganic, or physical chemistry. The non-thesis degree Master of Science in Teaching is also offered with a major in chemistry. New graduate students should have adequate undergraduate training in inorganic, analytical, organic, and physical chemistry. Normally this will include as a minimum a year of general chemistry, one semester of quantitative analysis, one year of organic chemistry, one year of physical chemistry, and one semester of advanced inorganic chemistry. Additional courses in instrumental analysis, biochemistry, and advanced physical and organic chemistry are desirable. Deficiencies in any of these areas may be corrected during the first year of graduate study. Such deficiencies are determined by a series of placement tests given prior to registration, and the results of these tests are used in planning the student's program. Doctoral candidates are required to complete at least 9 semester credits of courses specified by the division of the Chemistry Department in which they choose to specialize, as well as at least 9 semester credits of out-of-major-division courses. There are some minor restrictions on courses that may be used to meet this requirement. Additional courses may be required by the student's supervisory committee or major professor.

Ph.D. candidates must serve not less than one year as teaching assistants. This requirement will be waived only when, in the opinion of the department, unusual circumstances justify such action. A chemical physics option is offered for students who will be doing research in areas of physical chemistry which require a strong background in physics. For this option, a student meets the departmental requirements for

concentration in physical chemistry, except that only one out-of-major division course is required. In addition, a minimum of 14 credits in 4000 level or higher physics courses or a minimum of 7 such credits in physics and 7 in 4000 level or higher mathematics courses is required. Candidates for the master's degree are required to complete any two core courses. The Master of Science degree in chemistry has both thesis and non-thesis options. The non-thesis degree Master of Science in Teaching is offered with a major in chemistry and requires a written paper of substantial length (30 to 50 pages) on an approved topic pertaining to some phase of chemistry, under the course CHM 6905 Individual Problems, Advanced (1-5 cr.).

Degrees Offered

Degrees Offered with a Major in Chemistry

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Imaging Science and Technology
- Master of Science
- Master of Science in Teaching

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Chemistry (PHD)

SLO 1 Knowledge

Students will define, identify, and describe the fundamental science of the declared sub-discipline within chemistry (physical, biochemistry, organic, inorganic and analytical chemistry)

SLO 2 Skills

Students will formulate new research ideas and carry them out in the laboratory

SLO 3 Professional Behavior

Practice ethical behaviors, cultural sensitivity, teamwork, professional conduct and high level oral and written communication skills

Chemistry (MS)

SLO 1 Knowledge Students will define, identify, and describe the fundamental science of the declared sub-discipline within chemistry (physical, biochemistry, organic, inorganic and analytical chemistry)

SLO 2 Skills Students will formulate new research ideas and carry them out in the laboratory

SLO 3 Professional Behavior Practice ethical behaviors, cultural sensitivity, teamwork, professional conduct and high level oral and written communication skills

Chemistry (MST)

SLO 1 Knowledge

Students will define, identify, and describe the fundamental science of chemistry with a focus on teaching

SLO 2 Skills

Students will formulate and evaluate new strategies and approaches to teaching chemistry and practice them in the classroom or the teaching laboratory

SLO 3 Professional Behavior

Practice ethical behaviors, cultural sensitivity, teamwork, professional conduct and high level oral and written communication skills

Classics Department

Chair: J. Rea

Graduate Coordinators: A. Wolpert, V. Yates

The department offers the following degrees and programs: the Doctor of Philosophy with a major in classical studies; the Master of Arts degree with a major in Latin; and the Master of Latin degree. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Within the Ph.D. program are three tracks:

- Philology (prepares students for careers in colleges and universities)
- Classical civilization (available via distance course work)
- Latin and Roman studies (available via distance course work).

Requirements for the philology track of the doctoral degree include:

- 60 credit hours after the M.A. (or a total of 90 credit hours)
- Five additional seminars after the M.A. in classics at the 500 level or higher
- Three of the following seminars:

Code	Title	Credits
GRE 6425	Greek Prose Composition	3
GRW 6105	The Greek Tradition	3
LAT 6425	Latin Prose Composition	3
LNW 6105	The Roman Tradition	3
CLA 6805	The Classical Research Tradition	3

- A reading knowledge of two modern languages, one of which must be German
- Reading lists in Greek and Roman authors
- Supervised experience in teaching Latin, Greek, or civilization courses is advised
- Successful completion of a series of qualifying examinations appropriate to the chosen specialization (Greek reading; Latin reading; classical Greek literature in its historical context; classical Latin literature in its historical context; special author/topic)
- An oral preliminary examination, dissertation, and final examination

The M.A. degree with a major in Latin is recommended for students who plan to pursue a career in secondary teaching. Both M.A. programs require 30 credit hours, including 6 credits of GRW 6971 Research for Master's Thesis (1-15 cr.) or LNW 6971 Research for Master's Thesis (1-15 cr.), a thesis, and final examination.

The Master of Latin degree is a non-thesis degree, designed for currently employed and/or certified teaching professionals who wish to widen their knowledge of Latin, broaden their education in the field of classics, and enhance their professional qualifications through a program of summer course work and directed independent study and/or distance learning courses during the regular academic year. The Master of Arts in Teaching,

a non-thesis degree, is offered with a program in Latin and is intended for students preparing to teach in community colleges or high schools.

Majors

- Classical Studies (p. 217)
- Latin (p. 219)

Faculty

Professor

- Kapparis, Konstantinos
- Pagan-Wolpert, Victoria Emma

- Yates, Velvet Lenore

Classical Studies

Program Information

(The following information refers only to our on-campus programs. Please visit the Distance Learning Homepage (<https://distance.ufl.edu/online-degree-programs/>) for further details on our Distance Learning programs, especially aimed at elementary, secondary, or community college teachers.)

Ph.D. with a major in Classical Studies

The Ph.D. program with a major in classical studies is a traditional course of study in Greek and Latin language and literature that prepares students for careers in research and teaching at colleges and universities. Students awarded a TA position receive a stipend plus a full tuition waiver. The University also offers competitive fellowships. The department routinely provides research fellowships for its Ph.D. candidates. Department awards are also available for study abroad opportunities. Students are expected to become Florida residents after one year.

Admissions Requirements to the Classical Studies Programs:

Admission into the university and the program for Classics is ultimately determined and granted according to the rules established by the Graduate School of the University of Florida (see the Graduate Catalog).

All students seeking admission to the department must submit satisfactory scores on the GRE General Test (with at least 320 [old scoring scale] or 140 [new scoring scale] on the verbal portion.

Ph.D. program (Level II) requirements include:

1. M.A. in Classics or the equivalent.
2. A GPA of at least 3.25 in previous graduate work, and an undergraduate average of at least 3.0.
3. Demonstrated reading knowledge of German, French, Italian or Modern Greek (competency in the second language to be demonstrated before the completion of the second year at Level II).
4. Deficiencies that can be corrected within one year will not necessarily prevent admission, if the applicant's record gives evidence of the capacity to undertake and complete guided independent reading and research at the doctoral level.

Degrees Offered

Degrees Offered with a Major in Classical Studies

- Doctor of Philosophy

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Classical Studies (PhD)

SLO 1 Knowledge

Students identify, define, and relate knowledge of the research methods and theories that pertain to the field of Classical Studies and can bring that knowledge to the classroom in pedagogically-sound ways

SLO 2 Knowledge

Students identify and define expert knowledge of Greek and Roman languages, literatures, and cultures.

SLO 3 Skills

Students develop the skills to complete conference papers, research abstracts and chapters, and peer-reviewed publications.

SLO 4 Skills

Students will practice their interviewing skills to achieve successful job preparation.

SLO 5 Professional Behavior

Students show the capacity to work ethically and professionally with students and colleagues of all backgrounds.

SLO 6 Professional Behavior

Students illustrate a willingness to take on service commitments or leadership positions through, for example, participation in departmental, college, or university committees, service to professional or community organizations.

Classical Studies (MA)

SLO 1 Knowledge

Students identify and parse elements of Latin grammar, vocabulary, and syntax to an advanced level of competence.

SLO 2 Knowledge

Students identify and define essential aspects of Roman literature, history, and culture.

SLO 3 Skills

Students distinguish research methods and theories that pertain to the field of Classical Studies.

SLO 4 Skills

Students translate and interpret Latin passages at an advanced level of competence.

SLO 5 Professional Behavior

Students develop at least one academic research project of publishable quality.

SLO 6 Professional Behavior

Students work ethically and professionally with students and colleagues of all backgrounds.

Latin

Program Information

(The following information refers only to our on-campus programs. Please visit the Distance Learning Homepage (<http://classics.ufl.edu/programs/distance-learning/>) for further details on our Distance Learning MA and ML Programs, especially aimed at elementary, secondary, or community college teachers.)

The Department of Classics at the University of Florida offers an M.A. degree with a major in Latin, an M.A.T. degree with a major in Latin, as well as a Master of Latin degree. Students are expected to become Florida residents after one year.

The **Master of Arts with a major in Latin** is a thesis degree designed specifically for students who are aiming toward a career in secondary teaching, but who still desire the writing experience and credential that a thesis provides.

The **Master of Arts in the Teaching (M.A.T.) with a major in Latin** is recommended for students who wish to pursue a career in teaching and who want to include educational courses in their program. This is a non-thesis degree.

The **Master of Latin (M.L.) degree** is designed primarily for currently employed, and/or certified teaching professionals who wish to widen their knowledge of Latin, broaden their education in the field of Classics, and enhance their professional qualifications. This is a non-thesis degree.

For minimum degree requirements, see the Graduate Degrees (p. 778) section of the catalog. For additional requirements, please see the department website: <http://classics.ufl.edu>.

Admission Requirements to the Latin Programs:

Admission into the university and the program for Classics is ultimately determined and granted according to the rules established by the Graduate School of the University of Florida (see the Graduate Catalog).

All students seeking admission to the department must submit satisfactory scores on the GRE General Test (with at least 320 [old scoring scale] or 140 [new scoring scale on the verbal portion]).

Master's level (Level I) requirements include:

1. Extensive study of Greek and Latin, with at least three years of coursework in one language and at least two years in the other language.
2. At least six hours in one or more of the following: ancient history, ancient art, archaeology, philosophy, literary criticism, linguistics.
3. A GPA of at least a 3.0.
4. Deficiencies that can be corrected within one year will not necessarily prevent admission, if the record shows promise on other grounds.

Computer and Information Science and Engineering Department

Chair: J. Gilbert

The Department of Computer and Information Science and Engineering is concerned with the theory, design, development, and application of computer systems and information processing techniques. The mission of the CISE Department is to educate undergraduate and graduate majors as well as the broader campus community in the fundamental concepts of the computing discipline, to create and disseminate computing knowledge and technology, and to use our expertise in computing to help society solve problems.

The Department of Computer and Information Science and Engineering (CISE) offers

- Ph.D. in Computer Engineering, Computer Science, and Human-Centered Computing.
- Master of Engineering in Computer Engineering.
- Master of Science in Computer Engineering.
- Master of Science degree in Computer Science through the College of Engineering.
- Master of Science degree in Digital Arts and Sciences through the College of Engineering.
- Master of Science degree in Computer Science through the College of Liberal Arts and Sciences.

The CISE Department has six broad areas of specialization:

- **Computer systems:** computer architecture, distributed systems, networks and communication, operating systems, performance evaluation, security, mobile computing, software engineering, programming languages, multimedia systems, and web technologies
- **Database and information systems:** database management systems, database design, database theory and implementation, data mining, database machines, parallel and distributed databases, digital libraries, E-services and commerce, medical, and bio-informatics
- **High-performance computing/applied algorithms:** design and analysis of algorithms, data structures, parallel and distributed computing, medical algorithms, numerical methods, computational complexity, and applied computational geometry
- **Computer graphics, modeling, and art:** modeling methodology, simulation, virtual reality, aesthetic computing, computer arts, animation, real-time rendering, medical modeling, digital media, and musical acoustics
- **Intelligent systems and computer vision:** artificial intelligence, machine learning, visualization, image analysis and processing, pattern recognition, signal processing, biomedical imaging, and image databases
- **Computer networks and security:** wired and wireless networks, network routing and protocols, and QoS.

Applications for admission must be approved by both the Department and the college in which the student wishes to enroll. Applicants should have a strong computer science background.

All master's students must satisfy a core requirement by completing the appropriate number of core courses as specified by their degree program. According to Graduate School rule, students must maintain a 3.0 overall GPA, as well as a cumulative 3.0 GPA for all courses taken from CISE, to graduate. Students can select a thesis or non-thesis option for the master's degree. Digital Arts and Sciences students must choose either thesis or project in lieu of thesis. All options require a minimum of 30 credit hours. The thesis degree requires:

- A minimum of 6 credit hours must be taken in CIS 6971 Research for Master's Thesis (1-15 cr.).
- Specific degree requirements can be found at: <https://www.cise.ufl.edu/academics/grad> (<https://www.cise.ufl.edu/academics/grad/>)

The non-thesis option requires:

- Each nonthesis master's student is required to pass a comprehensive examination.
- Specific degree requirements can be found at: <https://www.cise.ufl.edu/academics/grad> (<https://www.cise.ufl.edu/academics/grad/>)

The Digital Arts and Sciences project in lieu of thesis option requires 6 credit hours of project/performance credits.

To demonstrate breadth and proficiency, all Ph.D. students must take required core courses. Depending upon the major, they must earn a 3.4 GPA in specific (to the major) required core courses, with no more than one of the core courses receiving a letter grade below B, to be eligible to take the Ph.D. qualifying examinations.

Ph.D. students are required to take a minimum of 90 credit hours. Of these, at least 36 hours must be graduate-level CISE course work excluding individual study and research credits. A minimum of 3 hours must be taken in CIS 7980 Research for Doctoral Dissertation (1-15 cr.). A maximum of 30 credits may be awarded toward the Ph.D. degree from an appropriate master's degree.

The Database Systems Research and Development Center, the Software Engineering Research Center, the Center for Computer Vision and Visualization Center, and a number of other campus research centers provide opportunities for students enrolled in the program.

The department offers a combination bachelor's/master's degree program. Contact the Department's Student Services Center for information.

For more information, please see the program pages below, or visit our website: <http://www.cise.ufl.edu>

Computer Science (CLAS)

Program Information

The Department of Computer and Information Science and Engineering offers the Master of Science degree in Computer Science through the College of Liberal Arts and Sciences. Minimum requirements for this degree are given in the Graduate Degrees (p. 778) section of this catalog.

The department offers graduate study and research in Algorithms, Computer Vision, Databases, Graphics and Modeling, Machine Learning, Networks, and Systems, with active labs in Bioinformatics; Computational Science and Intelligence; Vision, Graphics and Medical Imaging; Database Systems Research and Development; Data Science Research; Mobile and Pervasive Computing; Human-Centered Computing; and Cybersecurity.

Specific degree requirements and options may be found here: <http://cise.ufl.edu/academics/grad> (<http://cise.ufl.edu/academics/grad/>)

Instructions for application for admission may be found here: <http://cise.ufl.edu/admissions/graduate> (<http://cise.ufl.edu/admissions/graduate/>)

Student Learning Outcomes

Computer Science - Liberal Arts (MS)

SLO 1 Knowledge

Students identify, formulate, and solve computer science problems

SLO 2 Knowledge

Students can critically read computer science literature

SLO 3 Skills

Students use the techniques, skills, and tools necessary for computer science practice at an advanced level.

SLO 4 Professional Behavior

Professional experience: an understanding of professional and ethical responsibility

SLO 5 Professional Behavior

Professional experience: Students can communicate effectively

Department of Languages, Literatures and Cultures

Chair: A. Akinyemi

The Department of Languages, Literatures, and Cultures offers the Master of Arts degree (M.A.) and the Doctor of Philosophy degree in French and Francophone Studies and the Master of Arts degree (M.A.) in German Studies. Complete descriptions of the minimum requirements for the M.A. degree are provided in the Graduate Degrees (p. 778) section of this catalog. For more information about our programs, please follow the hyperlinks below or visit our website: <https://languages.ufl.edu/academics/graduate-studies/>.

French and Francophone Studies

Program Information

Chair: A. Akinyemi

Graduate Coordinator: R. Bloom

Bachelor's/master's program: French and Francophone Studies offers a combination 4/1 degree program that enables outstanding undergraduates to obtain both the B.A. and M.A. degrees after successful completion of 152 credit hours. The program is designed for the students who wish to continue their education in French and Francophone Studies past the bachelor's level but do not intend to pursue a doctorate or for students who wish to expand their training in a specific field before moving on to a doctoral program. Since students in the bachelor's/master's program have a graduate classification, students receiving undergraduate scholarships or Pell grants should check with the funding provider to make sure that they will not lose eligibility.

Degrees Offered

Degrees Offered with a Major in French and Francophone Studies

- Master of Arts
- Master of Arts in Teaching

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

german (PHD)

- SLO 1 Knowledge
- SLO 2 Skills

Literary/Cultural Studies: Students analyze and interpret German literary and cultural products, apply results to broader contexts and engage in academic discourse via writing and oral presentation

SLO 3 Professional Behavior
Students display knowledge of ethical human data collection, professional conduct and ethical academic writing skills (as established by the Modern Language Association)

German (MA)

SLO 1 Knowledge
Students identify, define and describe the core areas of German literary and cultural studies for the MA, as agreed upon by the faculty of the department

SLO 2 Skills
Literary/Cultural Studies: Students analyze and interpret German literary and cultural products, apply results to broader contexts and engage in academic discourse via writing and oral presentation

SLO 3 Professional Behavior
Students display knowledge of ethical human data collection, professional conduct and ethical academic writing skills (as established by the Modern Language Association)

Romance Languages (Language, Literature and Culture)

Program Information

The Language, Literature and Culture Department offers a Doctor of Philosophy degree in romance languages with a specialization in French and francophone studies.

Degrees Offered

Degrees Offered with a Major in Romance Languages

- Doctor of Philosophy
 - without a concentration
 - concentration in French and Francophone Studies

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

French and Francophone Studies Courses

See courses under French and Francophone Studies tab to the right.

Student Learning Outcomes

Romance languages & Literatures

SLO 1 Knowledge
Students will identify, define, and describe a specific area within their field of study), as agreed upon by the faculty of the department.

SLO 2 Skills
Literary/Cultural Studies: Students will analyze and interpret literary and cultural products and apply results to broader context and engage in academic discourse via writing and oral presentation. Linguistics:

Students will analyze and interpret language and language-related data apply results to broader context and engage in academic discourse via writing and oral presentation.

SLO 3 Professional Behavior

Students will describe and apply ethical human data collection, professional conduct and ethical academic writing skills.

Economics Department

Chair: R. D. Blair

Graduate Coordinator: S. M. Slutsky

The department offers the Master of Arts (thesis and non-thesis option) and Doctor of Philosophy degrees in economics with specializations in econometrics, economic theory, industrial organization, international economics, monetary economics, and public finance. Complete descriptions of the minimum requirements for the M.A. and Ph.D. degrees are provided on the Graduate Degrees (p. 778) Page of this catalog.

Economics

Program Information

The Economics Department offers the Master of Arts degree and the Doctor of Philosophy degree in economics.

M.A. requirements: A minimum of 36 credits of course work is required for the M.A. with and without thesis. A maximum of six credits of the research course ECO 6971 Research for Master's Thesis (1-15 cr.) may be included for a master's degree with thesis. The following core courses are required: ECO 7408 Mathematical Methods and Applications to Economics (1-2 cr.) and ECO 7404 Game Theory for Economists (1-2 cr.) or equivalent, ECO 7415 Statistical Methods in Economics (3 cr.) or equivalent, ECO 7115 Microeconomic Theory I (3 cr.), and ECO 7206 Macroeconomic Theory I (3 cr.).

Ph.D. requirements: Admission requirements for the Ph.D. include:

1. a minimum grade point average of 3.0,
2. an acceptable score on the GRE, and
3. for nonnative speakers of English, an acceptable score on one of the following: TOEFL (Test of English as a Foreign Language: computer=213, paper=550, web=80), IELTS (International English Language Testing System: 6), MELAB (Michigan English Language Assessment Battery: 77), or successful completion of the UF English Language Institute program.

All core courses must be completed in the first year. In addition, students must complete courses in three fields of specializations and pass qualifying examinations in two of those fields. Additional information about degree requirements can be found by visiting the Graduate Degrees (p. 778) pages of this catalog.

Combination degree program: The department offers a combination Bachelor of Arts/Master of Arts degree program. This program allows qualified students to earn both a bachelor's degree and a master's degree, with a savings of 12 credits.

Degrees Offered

Degrees Offered with a Major in Economics

- Doctor of Philosophy
- Master of Arts
 - without a concentration
 - concentration in Econometric and Data Analysis
 - concentration in Financial Economics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Economics (PHD)

SLO 1 Knowledge

Manage the technical tools (theory, methodology, statistical analyses, and reporting norms) essential to the departmental area of study

SLO 2 Skills

Interpret with technical tools to create new knowledge through original research

SLO 3 Professional Behavior

Communicate specialized information from a field of expertise verbally and in writing

SLO 4 Professional Behavior

Communicate specialized information from a field of expertise verbally at an educated layman or university undergraduate student level

Economics (MA)

SLO 1 Knowledge

Manage the technical tools (theory, methodology, statistical analyses, and reporting norms) essential to the departmental area of study

SLO 2 Skills

Utilize technical tools to apply knowledge in the area of study

SLO 3 Professional Behavior

Communicate specialized information from a field of expertise

English Department

Chair: S. I. Dobrin

Graduate Coordinator: J. Schorb

The Department of English offers a MFA degree in creative writing and a PhD degree in English. The PhD program accepts both students who have completed an MA degree and those who have completed only a BA. Complete descriptions of the minimum requirements for the MFA and PhD degrees are provided in the Graduate Degrees (p. 778) section of this catalog. For more information about our programs, please follow the hyperlinks below or visit our website: <https://english.ufl.edu/graduate-programs/>.

English

Program Information

The Department of English offers a MFA in Creative Writing and a PhD degree in English with the specializations listed below. Complete descriptions of the minimum requirements for the MFA and PhD degrees are provided in the Graduate Degrees (p. 778) section of this catalog. Specific areas of specialization for the PhD include American, African-American, and British literature; American studies; critical theory and cultural studies; film and media studies; feminisms, genders and sexualities; postcolonial studies; composition and rhetoric; comics and visual rhetoric; and children's literature.

New graduate students should have completed an undergraduate English major of at least 24 semester hours. The PhD program accepts students

with BA and MA degrees. Full information concerning courses of study is available from the graduate coordinator.

Degrees Offered

Degrees Offered with a Major in English

- Doctor of Philosophy

Student Learning Outcomes

English (PHD)

SLO 1: (Knowledge) Students identify and discuss a problem or gap in scholarship in their specialization.

SLO 2: (Skills) Students teach an entry-level college writing course and/or a lower-division course in their field in a professional manner, organizing and delivering content in a mode appropriate to audience.

SLO 3: (Professional Behavior) Students engage in professional research and writing activity at the PhD level, for example, conference-ready papers and/or materials appropriate for publication.

English (MA)

SLO 1 Knowledge
Students will identify and discuss a problem or gap in scholarship in their specialization

SLO 2 Skills
Students teach an entry-level college writing course and/or a lower-division course in their field in a professional manner, organizing and delivering content in a mode appropriate to audience

SLO 3 Professional Behavior
Students engage in professional research and writing activity at the MA level, for example, conference-ready papers

English (MFA)

SLO 1 Knowledge
Students write an extended draft of an original complete work in their genre.

SLO 2 Skills
Students learn to teach an entry-level creative writing course and/or an entry-level writing course in a professional manner, organizing and delivering content in a mode appropriate to audience

SLO 3 Professional Behavior
Students perform public readings of their original work

Gender, Sexuality, and Women's Studies Department

Director: B. Moradi

Graduate Coordinator: K. Broad

The Center for Gender, Sexualities, and Women's Studies Research offers the MA degree in Women's Studies, with thesis and non-thesis MA options, as well as two Graduate Certificate options. These options give students the opportunity to take advantage of scholarship in this dynamic field, and to become acquainted with different research perspectives and methodologies. Students pursuing interdisciplinary graduate work in the Center learn about feminist, intersectional, and other theoretical approaches and methodologies for examining the roles of gender, race/ethnicity, sexualities, and other sociocultural systems, and they learn about how to *transform* these systems.

The Center offers a regular colloquium series, frequently sponsors speakers, and distributes a newsletter each fall and spring. The Center in Ustler Hall houses archives, a small library, offices, and meeting space.

For more information about our program, please see the program page below or our website: <http://wst.ufl.edu/>.

Majors

- Women's Studies (p. 229)

Faculty

Women's Studies Program Information

The Women's Studies program is administered by the Center for Gender, Sexualities, and Women's Studies Research. The program offers both a Thesis and a Non-Thesis M.A., as well as a two graduate certificates.

The Center sponsors speakers and events, promotes interdisciplinary and multidisciplinary scholarship and community engagement, and distributes a newsletter each fall and spring.

Our MA program offers a vibrant and diverse faculty, flexible requirements, and excellent preparation for those wishing to go on for doctoral work or professional employment. Our areas of expertise include Black and Latinx feminisms; critical girlhood studies; critical health studies; feminist/ethnic studies; LGBTQ+ studies; feminist technoscience; gender, race, and sexualities; interdisciplinary history studies; Latinx, Afro-Latinx, Haitian, and Caribbean studies; media, cultural, and literary studies; migration studies; and transnational and postcolonial feminist analysis. We apply this expertise in the study of critical domains such as data science, health and medicine, history of women, crime and violence, sexual violence and exploitation, law and politics, leadership and business, literatures and cultures, media and art, work, migration, and social movement activism. In addition to our twelve core faculty members, we have over 100 affiliated faculty members who offer courses, serve on graduate committees, and collaborate in other ways with the Center.

We offer an excellent funding package to our MA students. This includes graduate assistantships with tuition remission, along with supplemental need-based scholarships. We also provide students with research and travel funds. We offer innovative teaching and research, both Thesis and Non-Thesis MAs, combination MA/JD option, and a wide range of specializations. Graduates of our program have gone on to a variety of PhD programs as well as employment in teaching and research, nongovernmental organizations, social services, advocacy, journalism and the media.

Gainesville, Florida is a great location for graduate studies. Gainesville is a medium-sized university town with a host of resources and welcoming climate. Our students come from around the country and internationally, and find UF and the wider community to provide a progressive, affordable, and culturally rich environment in which to live. Many of our students elect to carry out internships in local organizations that offer academic credit and valuable hands-on experience, preparing them for post-graduate employment and active participation as global citizens.

Master of Arts (thesis and non-thesis): The Center offers the Master of Arts (M.A.) thesis degree option, which requires the completion and defense of a thesis (30 credit hours), and the Master of Arts non-thesis degree option, which requires completion and defense of a project or paper (30 credit hours). All Master's students take a core curriculum of 12 graduate credits (4 courses). For the thesis M.A., the remaining 18 hours consist of 12 credits of approved electives and 6 thesis credits. It is strongly recommended that students take at least 3 additional credits

in research methods or skills as an elective. For the non-thesis M.A., 18 credits of approved electives are required.

Required courses for all MA students (12 credits):

Code	Title	Credits
WST 5933	Proseminar in Women's Studies	3
WST 6004	Feminist Methods in Research and Scholarship	3
WST 6508	Advanced Feminist Theory (or other approved 6000-level WST theory-designated course*)	3
WST 6935	Special Topics in Women's Studies (or other approved 6000-level WST Feminist Praxis/Public Scholarship-designated course**)	1-3

*Theory-designated courses include:

- WST 6935: Latinx Sexualities
- WST 6935: Race, Sex, Representation
- WST 6935: Global Women of Color
- WST 6908: Advanced Feminist theory
- WST 6348: Ecofeminism
- Approved courses offered each semester will be posted on the program's website

** Feminist Praxis/Public Scholarship-designated courses include:

- WST 6935: Social Justice Praxis
- WST 6596: Intersectional Activisms
- WST 6935: Critical Girlhood Studies
- WST 6935: Queer & Trans Movements
- WST 6935: Jobs, Gender & Justice
- WST 6935: Reproductive Health and Justice
- Approved courses offered each semester will be posted on the program's website

In addition to the required courses above, thesis and non-thesis options require the following:

Thesis

- 12 approved credits at 5000-level or higher
- 6 credits of WST 6971 Research for Master's Thesis (1-15 cr.) (3 of which must be taken in the final graduating term)
- (12 required courses + 12 electives + 6 MA research hours = 30 credits total for MA Thesis)

Non-thesis

- 18 approved credits at 5000-level or higher
- at least 9 of these credits must be WST classes
- (12 required courses + 18 electives = 30 credits total for MA Non-thesis)

BA/ MA Program: UF offers a number of Bachelor's/Master's programs for superior students. The university created combination degree programs to provide academically talented students an opportunity to complete both a bachelor's and a master's degree in a shorter period of time. The program allows you to double-count graduate courses toward both degrees, thus reducing the time it would normally take to graduate by a semester or more. The combination-degree program

reduces the cost of both degrees and enhances your marketability for career advancement.

M.A./J.D. Joint Degree: The faculties of the Levin College of Law and Women's Studies in the College of Liberal Arts and Sciences have approved a joint degree program culminating in both a J.D. degree, awarded by the College of Law, and an M.A. degree (thesis or non-thesis), awarded by the College of Liberal Arts and Sciences. Under this joint degree program, a student can obtain both degrees in approximately one year less than it would take to obtain both degrees if pursued consecutively. A student must satisfy the curriculum requirements for each degree before either degree is awarded. At least 12 credits must be taken in each program. The graduate program in Women's Studies will accept 12 credits of appropriate professional courses toward the M.A. degree. The 12 credits selected from the professional curriculum must be approved by the Graduate Coordinator upon the recommendation of the student's graduate supervisory committee. Reciprocally, the law school will accept 12 credits of appropriate Women's Studies courses toward the satisfaction of the J.D. degree. Admission to the second program is required no later than the end of the third consecutive semester after beginning one degree of the joint degree program. A summer term is counted as a single semester.

Concurrent Degrees: University of Florida provides a concurrent degree program allowing for simultaneous study on an individualized basis that leads to two master's degrees in two different graduate programs. Such a program is initiated by the student and requires prior approval of each academic unit and the Graduate School. If the student is approved to pursue two master's degrees, up to 9 credits of course work from one degree program may be applied toward the second master's degree, thereby allowing both degrees to be completed in less time. The forms required for approval of the concurrent program and petition for acceptance of nine credits of coursework in a second master's program may be found at <http://graduateschool.ufl.edu/media/graduate-school/pdf-files/concurrent.pdf>

PhD/MA Degrees: University of Florida provides a non-traditional degree option that allows those already in a PhD program at UF to apply to a MA program also. Up to nine credits from the doctoral degree program may be counted toward the master's degree program. The forms required for approval of such a degree arrangement are available here: <http://graduateschool.ufl.edu/media/graduate-school/pdf-files/nontraditional-20210826.pdf>

Certificates (M.A. or Ph.D. level): Two graduate certificates in Women's Studies for master's and doctoral students are offered in conjunction with degree programs in other academic units. The Graduate Certificate in Women's Studies and the Graduate Certificate in Gender and Development require specific sets of course work, designed to give students a thorough grounding in the discipline. The Graduate Certificate in Women's Studies offers students a general overview of the field. The Graduate Certificate in Gender and Development allows students to focus on issues related to gender, economic development, and globalization.

Graduate courses in women's studies are also available from the following academic units or programs:

- Agricultural and Life Sciences
- Anthropology
- Counselor Education
- English
- History

- Journalism and Communication
- Languages, Literatures, and Cultures
- Latin American Studies
- Linguistics
- Medicine
- Philosophy
- Psychology
- Religion
- Sociology
- Teaching and Learning

For more information, please see our website: <http://web.wst.ufl.edu>.

Student Learning Outcomes

Women's Studies (MA)

SLO 1 Knowledge

Students identify, define and describe gender in culture and society. Students recognize multi-cultural and transnational currents of feminist thought.

SLO 2 Skills

Students apply critical thinking, research, and writing skills in all of their courses and other graduate work;

communication skills in and out of the classroom as active participants in their own education; and meet deadlines and fulfill academic commitments.

SLO 3 Professional Behavior

Students apply professional behavior, meeting expectations in the academic community and beyond. They fulfill work obligations in a thoughtful and timely way, and display collegiality and sensitivity to faculty and other students in the program. They participate collaboratively and contribute to the life of the CWSGR.

Geography Department

Chair: J. Southworth

Graduate Coordinator: C. Simmons

The Department of Geography offers the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Complete descriptions of the minimum requirements for these degrees are provided in the General Information section of this catalog.

The focus of the Department is in human-environment interactions, with “environment” interpreted very broadly. The Department provides four main areas of specialization for graduate research:

- economic and cultural geography;
- resource management and land use and land cover change;
- medical geography; and
- physical geography.

Economic and cultural geography concerns such topics as spatial economic theory and; housing and care of the elderly. Resource management and land-use and land-cover change focus on agricultural change and resource conservation and development in the tropics and subtropics, and rural and urban land use and land cover change in tropical and temperate regions. Africa and Latin America are the primary areas of regional emphasis outside of the U.S. Physical geography in the Department concentrates on climatology, fluvial geomorphology, and hydrology. Medical geography studies the geographic aspects of human health including disease ecology and transmission and healthcare issues. The Department’s extensive geographic information system, remote sensing, and computer cartography teaching and research facilities contribute to and support all of the areas of research. Faculty from the Department are also major participants in the Emerging Pathogens Institute, Florida Climate Institute, Land Use and Environmental Change Institute (L.U.E.C.I.), and the Water Institute. Prospective students should examine the research interests of the Graduate Faculty to obtain a more detailed sense of the Department’s specialties (see the departmental website: www.geog.ufl.edu (<http://www.geog.ufl.edu>)).

To ensure the incorporation of relevant interdisciplinary perspectives in each student’s program, the Department maintains close ties with other departments in Liberal Arts and Sciences, and with programs in African studies, Latin American studies, the School of Natural Resources and Environment, the Institute on Aging, urban and regional planning, tropical agriculture, tropical ecology, water resources, the Warrington College of Business Administration, the College of Agricultural and Life Sciences, College of Public Health and Health Professions, and the Hydrological Sciences Academic Cluster. Certificates in certain of these fields may

be obtained in addition to graduate degrees in geography. Geography administers the Graduate Certificate in Applied Atmospheric Sciences.

A graduate student should preferably have an undergraduate major in geography, but applicants with degrees in one of the social or physical sciences are accepted into the Department’s graduate program.

Deficiencies in undergraduate work in geography must be corrected concurrently with registration in graduate level courses. All students in the graduate program are required to take courses in contemporary geographic thought and geographic research skills.

The Department offers a combination bachelor’s/master’s degree program. Contact the graduate coordinator for information.

For more information, please visit <https://geog.ufl.edu/>.

Students will exhibit professional behavior and ethical practice during the conduct of their research

Geography (MA)

SLO 1 Knowledge

Students will describe, identify, and discuss both orally and in writing the subject matter related to their discipline

SLO 2 Skills

Students will identify, examine and explain the emerging science in their discipline

SLO 3 Professional Behavior

Students will exhibit professional behavior and ethical practice during the conduct of their research

Geography (MS)

SLO 1 Knowledge

Students will describe, identify, and discuss both orally and in writing the subject matter related to their discipline

SLO 2 Skills

Students will identify, examine and explain the emerging science in their discipline

SLO 3 Professional Behavior

Students will exhibit professional behavior and ethical practice during the conduct of their research

Geological Sciences Department

Chair: D.A. Foster

Graduate Coordinator: R.M. Russo

The Department of Geological Sciences is composed of a group of internationally recognized faculty, graduate students, and dedicated support staff. Faculty and students in the Department of Geological Sciences are involved in exciting and groundbreaking research projects throughout the world and in Florida. The Department houses world-class analytical and computing facilities for research and teaching.

The Department has identified six primary areas of emphasis in its research and teaching programs: environmental geology and hydrology, paleoclimatology, tectonophysics, geochemistry and mineralogy/petrology, marine and coastal geology, and paleomagnetism. The Department has collaborative, interdisciplinary programs of study and research with the Florida Museum of Natural History, the Center for Wetlands Research, the Land Use and Environmental Change Institute (L.U.E.C.I.), the Florida Climate Institute, and the University of Florida Water Institute.

For information on our degree programs, current departmental activities, faculty, and research centers, please see the program page below and <http://geology.ufl.edu>.

Geology

Program Information

The Department of Geological Sciences offers programs leading to the Master of Science (thesis), the Master of Science in Teaching (non-thesis), and the Doctor of Philosophy degrees in geology. Minimum requirements for these degrees are described in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

For admission to graduate status in the Department of Geological Sciences, a student must have a baccalaureate degree with a major in geology or a related field or its equivalent. Deficiencies in undergraduate preparation can be corrected by completing the undergraduate courses without credit while enrolled as a graduate student.

Applicants should take the GRE general test. The scores of this examination must be reported to the Department of Geological Sciences. Three letters of recommendation are also required for admission to the doctoral program and for financial aid applications at any level.

A minimum of 32 semester hours of graduate level courses are required for the Master of Science in geology. At least 24 hours must be in organized graduate-level geology courses (excluding research, teaching, special projects, etc.). Six hours of thesis research credit are required. All master's degrees are terminal; a separate and new application for admission to the doctoral program is required.

For the Master of Science in Teaching degree, a minimum of 36 semester hours are required; including at least 24 hours in organized graduate-level geology courses, 2 in Seminar (6931) and 6 hours of Internship in College Teaching (6943). Master's Research (6971) can not be used toward the degree. At least one course in each of the following: Social Foundations of Education, Psychological Foundations of Education, and Community College curriculum are required. These courses may be used to comprise a minor in Education (6 hours will count toward the total of 24 geology courses). The remaining hours must be in approved electives. Passage of a final oral examination that covers the field of Geology and the students minor is required of all candidates. No thesis is required.

90 semester hours of graduate-level class work are required for the Ph.D., including organized course work, individual work, supervised research and teaching, advanced research, dissertation, special projects, or courses in a related field.

The Department offers a combination bachelor's/master's degree program. Contact the graduate coordinator for information.

For more information, please see the program page below and our department website: <http://geology.ufl.edu>.

Student Learning Outcomes

Geology (PHD)

SLO 1 Knowledge

Students will articulate orally and in writing the results and applications of their research and scholarship, using the basic concepts, theories, and observational findings related to Earth materials and processes, as they pertain to the student's research

SLO 2 Skills

Students will analyze data in the published literature; synthesize analog and digital datasets to produce original geologic maps and/or datasets; apply the scientific method to analysis of published and self-generated data

SLO 3 Professional Behavior

Students will conduct research in an ethical and responsible manner

Geology (MS)

SLO 1 Knowledge

Students will articulate orally and in writing the results and applications of their research and scholarship, using the basic concepts, theories, and observational findings related to Earth materials and processes, as they pertain to the student's research.

SLO 2 Skills

Students will analyze data in the published literature; synthesize analog and digital datasets to produce original geologic maps and/or datasets; apply the scientific method to analysis of published and self-generated data.

SLO 3 Professional Behavior

Students will conduct research in an ethical and responsible manner.

Geology (MST)

SLO 1 Knowledge

Students articulate orally and in writing the results and applications of their scholarship, demonstrating a proficiency in the basic concepts, theories, and observational findings related to Earth materials and processes, as they pertain to educational standards established at the state or national level.

SLO 2 Skills

Students will create, select and implement: (1) specific learning goals, (2) appropriate pedagogy and instructional materials and (3) evaluation strategies aligned with goals, using knowledge of subject matter, learners and classroom management.

SLO 3 Professional Behavior

Students will conduct research and teach in an ethical and responsible manner

History Department

Chair: J. Sensbach

Graduate Coordinator: M. Hart

The Department of History offers the following graduate degrees: Master of Arts with fields of specialization in African, European, Latin American, and United States history, and the Doctor of Philosophy with fields of specialization in African, European, Latin American, and United States history. We offer minor concentrations in the thematic fields of Atlantic, Gender, Legal, Religious, and World History. Students interested in transnational and comparative work may also create their own dual major. In addition to materials required by the Graduate School for admission, applicants must send directly to the History Department the following evidence of aptitude and interest:

- Three recommendations, from persons competent to evaluate your potential for graduate work;
- a 3- to 5-page essay identifying your career goals and particular areas of interest;
- a sample of your written work in history.

Interested students should consult the department web page for more information.

For more information, please visit <https://history.ufl.edu/>.

History

Program Information

The Department of History offers the following graduate degrees: Master of Arts degree with fields of specialization in African, European, Latin American, and United States history and the Doctor of Philosophy degree with fields of specialization in African, European, Latin American, and United States history, or with a dual major which allows students to combine two minor fields to create their own major fields. We offer minor concentrations in the thematic fields of Atlantic, Gender, Legal, Religious, and World History.

Master of Arts: This degree serves to prepare students for admission to a Ph.D. program, for a teaching career in high school or community colleges, or for a career in government or business.

Fields of specialization:

- African (East Africa, Southern Africa, West Africa)
- European (medieval, early modern, or modern)
- Latin American (colonial Latin America, post-Colonial Latin America, Brazil, and the Caribbean or Spanish America)
- United States history (early America, 19th century, 20th century)

Thesis option requirements:

- A minimum of 30 credit hours
- At least 15 graduate-level regular course credit hours in your major field. In European, you must take at least two seminars in your area of specialization. In U.S. history, you must take the 19th-century America readings seminar, either the 20th-century or early America readings seminar, and at least one research seminar. In Latin American and African history, you must take the relevant readings seminars in your area of specialization, one other readings seminar, and at least one research seminar.
- At least 6 graduate-level regular course credit hours outside the major field (but in the Department of History). We recommend that you invest these regular course hours in readings seminars.
- Take 3 hours of historiography (HIS 6061 Introduction to Historiography (3 cr.)) by the fourth semester of graduate study.
- Take 3 regular course credit hours from outside the Department. These should be graduate-level hours, but undergraduate 3000 or 4000 level hours may be taken subject to approval by your adviser.
- Complete a master's thesis of original historical research. The semester you graduate, you must be registered for a minimum of 3 thesis research hours (HIS 6971 Research for Master's Thesis (1-15 cr.)) in the fall or spring terms or 2 in a summer term. Your thesis should demonstrate your ability to handle the primary-source material of your field, and a working knowledge of the secondary literature; and should demonstrate your ability to present research results in a coherent, well-written study. The student must complete the thesis and make it available to readers 2 weeks before the oral examination, complete the application for the degree at the Office of the University Registrar before the deadline, and take the examination.

- Each student must pass a final comprehensive oral examination at the end of the program.

Non-thesis option requirements:

- A minimum of 30 credit hours.
- At least 15 graduate-level regular course credit hours inside your major field. In European, you must take at least two seminars in your area of specialization. In U.S. history, you must take the 19th-century American readings seminar, either the 20th-century or the early America readings seminar, and at least one research seminar. In Latin American or African history, you must take the relevant readings seminars in your area of specialization, one other readings seminar, and at least one research seminar.
- At least 6 graduate-level regular course credit hours outside your major field (but in the Department of History). We recommend that you invest these regular course hours in readings seminars.
- Take 3 hours of historiography (HIS 6061 Introduction to Historiography (3 cr.)) by your fourth semester of graduate study.
- Take 3 regular course credit hours from outside the Department; these should be graduate-level hours, but undergraduate 3000 or 4000 level hours may be taken subject to approval by your adviser.
- Complete a research seminar and/or a non-thesis project in history. Your primary goal in either is to complete an article-length essay (approximately 35 to 40 pages) of publishable or near-publishable quality. The essay should be based largely on primary sources.
- You must pass a final comprehensive oral and written examination conducted by your supervisory committee.

Supervisory committee for the M.A.: The committee normally consists of the chair and two other members of the graduate faculty. Additional members may be added if desirable. The committee assists in planning and supervising the student's program and conducts the final examination. The chair is also the thesis director if that option is chosen.

Duration: The M.A. program can be completed in 3 semesters of full-time registration but may take longer. The Department believes that normally no more than 4 semesters of full-time registration should be spent on the degree. These semesters need not be consecutive. The Board of Education has established 60 credit hours as a maximum for the master's degree. Up to 6 credits of graduate-level courses taken at another school with a grade of B or better may be transferred into the master's program if approved by the Graduate School.

Bachelor's/master's program: The Department offers a combination 4/1 degree program that enables outstanding undergraduates to obtain both the B.A. and M.A. degrees in history after successful completion of 150 credit hours. The program is designed for the students who wish to continue their education in history past the bachelor's level but do not intend to pursue a doctorate in history, or for students who wish to expand their training in a specific field before moving on to a doctoral program. The department offers a 4/1 degree program in the standard M.A. fields of study as well as oral history. Please see the Department website for more information. Students in this program are not eligible for departmentally controlled financial aid.

Doctor of Philosophy requirements:

- Professional mastery of your major field, or major fields for students pursuing a dual degree.
- Professional competence in a minor field, which may be drawn from the approved major fields of specialization for the doctorate (African,

European, Latin American, or U.S. history), from approved minor fields (Atlantic history, gender, legal history), or may be self designed as a thematic research or teaching field. It must include at least 3 hours outside the historical area that defines your major field. Note: Students pursuing a dual major do not take a department minor field.

- At least 3 regular course credit hours from outside the Department; these should be graduate-level hours, but undergraduate 3000 or 4000 level hours may be taken subject to approval by your adviser.
- Pass a set of written and oral qualifying examinations testing competence in major and additional fields and your knowledge of the nature of history and the historian's task.
- A dissertation of original historical research for which credit is given in HIS 7980 Research for Doctoral Dissertation (1-15 cr.).

History/law joint degree program: The Department of History and the College of Law offer a program in legal history leading to either the M.A. or a Ph.D. degree in history and the J.D. in law. Because the faculties of history and law stress interdisciplinary training, students admitted to the joint degree program will be allowed to count a significant number of hours toward both degrees. Applicants must be accepted by both the Graduate School and the College of Law. Normally, students will complete the course and examination requirements of both degrees in 4 years. Students may begin their first year of work in either history or law, but they must complete the first year of law school within 1 year and they must do so within the first 2 years after admission to the joint degree program. For further information write to the:

Legal History Coordinator
Department of History
University of Florida
Box 117320
Gainesville, FL 32611-7320.

Degrees Offered

Degrees Offered with a Major in History

- Doctor of Philosophy
 - without a concentration

Student Learning Outcomes

history (PHD)

SLO 1 Knowledge

Students will identify, define, and describe major issues in the history of their fields of study as well as mastery of the relevant body of historiography

SLO 2 Skills

Students will design and teach courses as teaching assistants or primary instructors

SLO 3 Professional Behavior

Students will contribute to the international community of historians in their field through the publication of their research, and through presentations at seminars, workshops and conferences

SLO 4 Skills and Content Knowledge

Students will apply and demonstrate the methods and practices of historical research and writing

History (MA)

SLO 1 Knowledge

Students will identify, define, and describe major issues in the history of their fields of study as well as mastery of the relevant body of historiography

SLO 2 Professional Behavior
Students write journal quality papers

SLO 3 Skills
Students will describe, define and apply methods and practices of historical research and writing

Genetics and Genomics (CLAS)

Program Information

Program Director: T. Burris

Program Coordinator: C. Mulligan

The University of Florida Genetics Institute is a multi-college, multi-faceted research center which offers the a degree program leading to the Ph.D. in Genetics and Genomics. Minimum requirements for this degree are available in the Graduate Degrees (p. 778) section of this catalog.

What defines the Genetics & Genomics Graduate Program is the philosophy that good geneticists are integrative geneticists, who incorporate many different subfields of genetics into their work. Accordingly, faculty interests and graduate research opportunities include a wide range of areas: advances in gene therapy, understanding the maintenance of genetic variation, understanding plant immune responses, developing improved algorithms for identifying regulatory motifs in DNA sequences, and the challenges of bioethics to strategies for controlling malaria. Due to the fundamental nature of genetics in the life sciences, our training program is distributed across several colleges at UF, including but not limited to the College of Medicine (<https://graduate.education.med.ufl.edu/>), the College of Liberal Arts and Sciences (<https://clas.ufl.edu/>), the College of Agricultural and the Life Sciences (<https://cals.ufl.edu/>), and the Florida Museum of Natural History.

Graduate Program Overview

First Year:

Code	Title	Credits
ANG 7979	Advanced Research	1-12
BCH 6415	Advanced Molecular and Cell Biology	3
GMS 6221	Ethics in Genetics	1
GMS 6231	Genomics and Bioinformatics	3

GMS 6290	Genetics/Genomics Program Graduate Seminar (begins in the first semester and continues throughout students' graduate careers)	1
GMS 7877	Responsible Conduct of Biomedical Research	2
PCB 5065	Advanced Genetics	4
PHC 6052	Introduction to Biostatistical Methods	3

The first year core training is the research rotation program, in which students "rotate" through three labs in a minimum of two colleges. Rotations are critical to selecting a graduate advisor: they provide a hands-on opportunity to participate in the research being conducted in a lab, and a mutual opportunity to evaluate fit between advisor and prospective student.

Second Year:

- Individual program of courses and requirements is developed in consultation with major professor and dissertation committee

Admission Standards: Prospective students should have strong backgrounds in biology and other hard sciences. Exceptional students with other backgrounds will also be considered. The research statement required as part of the application has a particularly important part in the admissions decision. Each applicant must describe their research interests so that Graduate Faculty can evaluate knowledge of the discipline, fit to the program, and ability to articulate and motivate an interesting research problem. The required Letters of Recommendation are also extremely important in helping identify applicants with exceptional aptitude for genetics, and with research experience and promise.

Contact the Genetics and Genomics Graduate Program by email, UFGI-Info@ad.ufl.edu or by phone, 352-273-8124.

For more information, visit our website: <http://www.ufgi.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Genetics and Genomics

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Domestic Animal Genomics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Genetics and Genomics (CLAS) Courses

Code	Title	Credits
AGR 6322	Advanced Plant Breeding	3

Linguistics Department

Chair: G.A. Broadwell

Graduate Coordinator: B. Henderson

The Linguistics Department offers graduate programs leading to the M.A. and Ph.D. degrees with specializations in

- The core areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics)
- Language documentation
- Sociolinguistics and language change
- Discourse analysis
- TESL
- Second language acquisition
- Psycholinguistics
- Neurolinguistics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog. For detailed information on the program, please visit the link below. For further information on the program, including financial aid, please visit <http://lin.ufl.edu>.

Linguistics

Program Information

The Linguistics Department offers graduate programs leading to the M.A. and Ph.D. degrees with specializations in

- The core areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics)
- Language documentation
- Sociolinguistics and language change
- Discourse analysis
- TESL
- Second language acquisition
- Psycholinguistics
- Neurolinguistics

For detailed information on the program, including financial aid, please visit the website <http://lin.ufl.edu>.

The Certificate in Second Language Acquisition and Teaching is offered to University of Florida graduate degree-seeking students in linguistics and related disciplines.

As part of its service to the University community, Linguistics also offers English as a Second Language training for international applicants and admitted students. These programs, the English Language Institute (ELI), Academic Written English (AWE), and Academic Spoken English (ASE), are described in the Student Services (p. 940) section of this catalog. This information, along with links to the application form, are available at <http://lin.ufl.edu>.

Applicants who lack a background in linguistics should develop basic competency in the core areas before commencing graduate work. These deficiencies can be met by taking LIN 3010 Introduction to Linguistics (3 cr.), LIN 3201 The Sounds of Human Language (3 cr.), and LIN 3460 The Structure of Human Language (3 cr.) or the equivalent.

The department also offers a combination degree program available to Linguistics majors that enables strong students to obtain a BA and an MA in five years. Students must apply for the program by February 15th of their junior year and should consult with the department undergraduate and graduate coordinators before applying. More details and an application form can be found here: <https://lin.ufl.edu/undergraduate/combination-ba-ma-degree/>

Degrees Offered

Degrees Offered with a Major in Linguistics

- Doctor of Philosophy
- Master of Arts

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Linguistics Departmental Courses

Code	Title	Credits
EAP 5835	Academic Spoken English I	3

LIN 7725	Topics in Second Language Acquisition	3
LIN 7885	Discourse Analysis and Pragmatics	3
LIN 7979	Advanced Research	1-12
LIN 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Linguistics (PHD)

SLO 1 Knowledge

Student defines, describes, and uses terminology and basic concept from the core areas of linguistics

SLO 2 Skills

Student critically analyzes and interprets language-related data and theories

SLO 3 Skills

Student designs and conducts a language-related program of inquiry producing original research

SLO 4 Professional Behavior

Student engages in ethical human data collection, appropriate professional conduct, and ethical academic writing practices (as established by Linguistic Society of America Ethics Statement)

Linguistics (MA)

SLO 1 Knowledge

Student defines, describes, and uses terminology and basic concept from the core areas of linguistics

SLO 2 Skills

Student critically analyzes and interprets language-related data and theories

SLO 3 Professional Behavior

Student engages in ethical human data collection, appropriate professional conduct, and ethical academic writing practices (as established by Linguistic Society of America Ethics Statement)

Mathematics Department

Chair: L. Rong

Graduate Coordinator: M. Jury

The Department of Mathematics offers the Master of Science (thesis or non-thesis) and the Doctor of Philosophy degrees. The non-thesis Master of Arts in Teaching and Master of Science in Teaching are also offered. Minimum requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog.

Areas of specialization for graduate research include algebra, number theory, analysis, geometry, topology, logic and set theory, differential equations, dynamical systems, probability theory, optimization, combinatorial theory, biomathematics, and imaging. Faculty and graduate students in mathematics interact with counterparts in biology, biostatistics, computer science, industrial and systems engineering, philosophy, statistics, and the Emerging Pathogens Institute. The department houses the Center for Applied Mathematics and participates in the Center for Applied Optimization.

Aside from the regularly scheduled courses, the department offers a variety of seminars and special topics courses which engage faculty and graduate students at the frontiers of research.

For more information, please see the program page below or our website: <http://www.math.ufl.edu>.

Mathematics

Program Information

The Department of Mathematics offers the degrees of Doctor of Philosophy, Master of Science, and the Master of Arts in Teaching and Master of Science in Teaching, each with a major in mathematics. Complete descriptions of the minimum requirements for these degrees are provided in the Graduate Degrees (p. 778) section of this catalog.

The Department has an accelerated bachelor's/master's program designed for superior undergraduate students who have the ability to pursue such a plan of study leading to the Master of Science degree. The main feature of the program is that up to 12 semester hours of approved graduate level mathematics courses may be used as dual credit for both the undergraduate and the graduate degree. All other requirements for both the bachelor's degree and the master's degree must be met.

For admission requirements for this program, see the undergraduate coordinator.

There are opportunities for concentrated study in a number of specific areas of pure and applied mathematics at both the master's and doctoral levels. The faculty directs studies and research in algebra, number theory, analysis, geometry, topology, logic and set theory, differential equations, dynamical systems, probability theory, optimization, combinatorial theory, biomathematics, and imaging.

In addition to the requirements of the Graduate School, the minimum prerequisite for admission to the program of graduate studies in mathematics is the completion, with an average grade of B or better, of at least 24 credits of undergraduate mathematics, including a full year of calculus and three semesters of appropriate work beyond the calculus. The most appropriate courses for this purpose are advanced calculus, linear algebra and abstract algebra. Students lacking part of the requirements will be required to make up the deficiency early in their graduate work.

Prerequisites to individual courses should be determined before registration by consultation with the instructor concerned. Some of the courses listed are offered only as needed. Since times of offering courses are estimated a year in advance, certain changes may be made if needs are known by the Department.

Students pursuing the master's degree in mathematics must pass two comprehensive written examinations, one in algebra and one in analysis or prepare and provide an oral defense of a thesis on original research conducted under the supervision of a faculty adviser. Students pursuing the Master of Arts in Teaching or the Master of Science in Teaching degree must prepare a teaching portfolio and pass an oral examination. Each of these programs normally requires two years for completion.

The requirements for a doctoral degree include 36 hours of 6000-level course work in mathematics; no hours of teaching, colloquium, dissertation, or individual work will count toward this requirement. To become a candidate for the doctoral degree, the student must pass a comprehensive preliminary examination with written and oral components administered by the Department. The doctoral student must also pass a reading knowledge examination in one of the following foreign languages: French, German, or Russian. The dissertation is an important requirement for the doctoral degree in mathematics. The topic for the dissertation may be chosen from a number of areas of current research in pure and applied mathematics.

Details concerning all requirements for graduate degrees in mathematics may be obtained by writing the Mathematics Department Graduate Selection Committee or consulting the Department website, <http://www.math.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Mathematics

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
- Master of Arts in Teaching
- Master of Science
- Master of Science in Teaching

MAP 6472	Probability and Potential Theory I	3	
MAP 6473	Probability and Potential Theory II	3	
MAP 6487	Biomathematics Seminar I	3	

Student Learning Outcomes

mathematics (PHD)

- SLO 1 Knowledge**
Describes and explains advanced knowledge of at least one chosen specialty and conducts research in it.
- SLO 2 Skills**
Communicates mathematical thinking through clear and compelling arguments to faculty, peers and others.
- SLO 3 Professional Behavior**
Teaches mathematical courses in a professional manner, assessing the appropriate level of presentation for the students, creating an atmosphere conducive to learning, and supporting student-teacher interactions for active learning

Mathematics (MAT)

- SLO 1 Knowledge**
Demonstrates content knowledge relevant to mathematics teaching
- SLO 2 Skills**
Communicates mathematics effectively through prior organization of material, effective use of the blackboard or other presentation media,

compelling choice of illustrative examples, and emphasis on methods of solving problems rather than on presenting solutions

SLO 3 Professional Behavior

Prepares for lessons; arrives on time; conducts themselves appropriately

Mathematics (MS)

SLO 1 Knowledge

Depth: Either solves problems in two areas from algebra/analysis/applied/topology or conducts research in mathematics at the master's level

SLO 2 Skills

Writes extended mathematical prose to the precision required by the discipline and supports mathematical arguments with logical reasoning

SLO 3 Professional Behavior

Teaches mathematical courses in a professional manner, assessing the appropriate level of presentation for the students, creating an atmosphere conducive to learning, and supporting student-teacher interactions for active learning

Mathematics (MST)

SLO 1 Knowledge

Describes and explains content knowledge relevant to mathematics and teaching

SLO 2 Skills

Communicates mathematics effectively through prior organization of material, effective use of the blackboard or other presentation media, compelling choice of illustrative examples, and emphasis on methods of solving problems rather than on presenting solutions

SLO 3 Professional Behavior

Prepares for lessons; arrives on time; conducts themselves appropriately

Philosophy Department

Chair: J. Palmer

Graduate Coordinator: S. Duncan

The Philosophy Department offers the Master of Arts and the Doctor of Philosophy degrees. General requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog, and program-specific requirements are provided on the Philosophy Program page.

The Department is dedicated both to pursuing high quality research and providing a rigorous education to its graduate students, whether pursuing just the M.A. or the Ph.D. Faculty provide philosophical expertise in a wide variety of areas, including ancient philosophy, modern philosophy, ethical theory, political theory, ethics of technology, bioethics, philosophy of education, metaphysics, epistemology, philosophy of mind, philosophy of logic, philosophy of science, philosophy of social science, philosophy of language, argument theory and Continental philosophy. For a full and updated list of areas of research see the pages of individual faculty (<http://www.phil.ufl.edu/people.html?cat=faculty>).

The M.A. program is suitable for those planning or considering a Ph.D. in Philosophy, for those who hope to gain an advanced degree prior to pursuing professional degrees in such fields as law and medicine, and for those who are considering advanced work in related fields such as

linguistics, classical studies, religious studies, psychology, and political science.

The Ph.D. program is suitable for those planning to pursue an academic career, including both those focused more on research and those focused more on teaching. Graduates should expect to be trained in doing high quality research in philosophy, to be mentored in the practice of teaching, and to have opportunities for teaching in a broader array of contexts that should serve well the ability to teach courses in writing and the humanities more generally.

For more information, please see the program page as well as our website at <http://phil.ufl.edu>.

Majors

- Philosophy (p. 249)

Faculty

Professor

- Buckner, Cameron Joseph
- Palmer, John Anderson
- Ray, Gregory Brian

Associate Professor

- Ahlberg, Jaime
- Dorst, Christopher
- Purves, Duncan W.
- Witmer, Gene

Assistant Professor

- Beddor, Robert
- Gardner, Molly Elizabeth
- Goldhaber, Charles Abraham
- Grant, David Michael
- Robitzsch, Jan Maximilian
- Ross, Amber M.

Other

- Grant, Lyndal Jennifer
- Rothschild, Nathan

Lecturer

- Borges, Rodrigo
- Pismenny, Arina
- Rick, Jonathan D.

Affiliated Faculty

- McPherson, David Lee
Professor

Philosophy

Program Information

The Department of Philosophy offers graduate degree programs leading to the M.A. and the Ph.D. degrees in Philosophy.

Graduate students enjoy a supportive community. Teaching assistants are provided with shared office space, and most graduate students participate in organizing a yearly conference, the Southeast Graduate Philosophy conference (for more information, see <http://www.phil.ufl.edu/seg> (<http://www.phil.ufl.edu/seg/>)).

Admission to either program requires either a bachelor's degree in philosophy or sufficient course work in philosophy as determined by the department. Applicants to either program are evaluated on the basis of their academic record, GRE scores, three letters of recommendation, a statement of purpose, and a writing sample. Students admitted into the Ph.D. program who do not already have an M.A. in Philosophy must complete the coursework requirements for the M.A. as part of their first two years of full-time enrollment in the Ph.D. program.

General Program Information

All graduate students must take in their first fall semester of enrollment the Graduate Proseminar (PHI 5935 Proseminar (3 cr.)), an intensive workshop requiring regular writing and presentation of philosophical papers; they must also take in that first year the foundational course on Graduate Logic (PHI 5135 Graduate Logic (3 cr.)). These two critical courses help ensure success in the core curriculum, which is designed to provide a thorough grounding in the three main divisions of philosophical work: history, value theory, and the various areas known together as M&E ("metaphysics and epistemology").

Additional core courses include surveys in ancient philosophy (PHP 5005 Ancient Philosophy I (3 cr.) and PHP 5015 Ancient Philosophy II (3 cr.)), in modern philosophy (PHH 5405 Modern Philosophy I (3 cr.) and PHH 5406 Modern Philosophy II (3 cr.)), ethical theory (PHI 5665 Ethical Theory (3 cr.)), epistemology (PHI 5365 Epistemology (3 cr.)) and foundations of analytic philosophy (PHP 5785 Foundations of Analytic Philosophy (3 cr.)).

M.A. Program Information

The M.A. degree requires 36 hours of coursework, which can be completed in two years by registering for 9 credits each fall and spring semester. Distribution requirements mandate a selection of core courses and 6000-level seminars, while electives make up 6 hours of coursework. Requirements include an oral Final Exam administered by a group of faculty selected by the Graduate Studies Committee.

Ph.D. Program Information

The Ph.D. requires 90 credit hours, which may include 36 used for the M.A., additional courses at the 6000-level, 3 proposal research hours, 12 doctoral research hours, and the successful completion and defense of a dissertation. In completing the Ph.D. advanced students will normally have an opportunity to teach their own undergraduate courses under the supervision of faculty as well as to work as a Teaching Assistant in many other courses.

Funding

Funding for graduate students is provided primarily by Teaching Assistantships. Newer teaching assistants assist with lower level courses (such as Introduction to Philosophy and Contemporary Moral

Issues) and more experienced teaching assistants may assist with more advanced courses. M.A. students who have demonstrated exceptional teaching capabilities may have the chance to teach their own course during the summer after they have completed all course requirements for the degree. Advanced Ph.D. students more regularly get these opportunities, during the fall and spring semesters as well as the summer.

Some funding for supporting graduate student travel to conferences is available.

Further Information

For more information about the department in general, see its website at <http://phil.ufl.edu>.

More details about the M.A. and Ph.D. programs, their requirements, policies, and procedures, may be found at <http://phil.ufl.edu/grad/grad-program.html>.

Prospective students can find detailed information on the admissions process at <http://phil.ufl.edu/grad.html?page=prospective>.

Questions and requests for help can be directed to the Graduate Coordinator, who may be reached at gradcoord@phil.ufl.edu.

Degrees Offered

Degrees Offered with a Major in Philosophy

- Doctor of Philosophy
 - without a concentration
 - concentration in Ethics of Technology
- Master of Arts

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Acquire specialist knowledge of one or more recognized major subfields in philosophy, understood to include the following areas, divided into the three broad categories of history, theoretical philosophy, and matters of value: history (ancient, medieval, modern, 19th century, 20th century); theoretical (metaphysics, epistemology, philosophy of science, philosophy of mind, philosophy of language); value (normative ethics, meta-ethics, aesthetics, political)

SLO 2 Original Advanced Research

Pursue an original and sustained line of philosophical research that results in a contribution to the body of philosophical knowledge

SLO 3 Professional Presentation

Produce original research and prepare it in a way that makes it adequate for presentation at a professional conference

SLO 4 Professional-level Course Design and Teaching

Design, teach, and manage an undergraduate course in philosophy entirely on one's own

SLO 5

Participate in such professional activities as (i) publishing in a professional journal; (ii) presenting work at a conference; (iii) commenting on someone else's work at a conference; (iv) refereeing submissions for a professional conference; (v) helping with the organization of a conference, including referee work, invitations for speakers, and the like.

Philosophy (MA)

SLO 1 Core Competence

Identify, describe and explain key aspects of ancient Greek philosophy, the modern era (1600-1900), and core areas of contemporary philosophy

SLO 2 Formal Logic

Employ and understand the tools of contemporary formal logic, including first-order predicate calculus and a substantial portion of meta-logical theory

SLO 3 Research Skills

Read and comprehend contemporary philosophical work, present such work to others, analyze and critically evaluate the arguments therein, and formulate one's own position clearly and defend it in the context of philosophical discussion

SLO 4 Teaching Skills

Present philosophical material in a lucid and concise fashion to audiences of varying backgrounds, lead discussions of philosophical material in a way that encourages clear and original thinking about the issues, and assess undergraduate work in philosophy classes, including grading written work for clarity of expression, comprehension of material, and cogency of argument

Physics Department

Chair: K. Ingersent

Graduate Coordinator: X. Zhang

The Department of Physics offers the Master of Science (thesis or non-thesis) and the Doctor of Philosophy degrees. The non-thesis Master of Science in Teaching is also offered. General requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog. Program specific requirements are listed under Physics

Student Learning Outcomes

Philosophy (PHD)

SLO 1 Specialist Knowledge

(p. 252) and can be found on our website (<http://www.phys.ufl.edu/academics/graduate/degrees.shtml/>).

Areas of specialization for graduate research include astrophysics and cosmology, atomic and molecular physics, biological physics, chemical physics, condensed matter physics (theory and experiment), nuclear physics, particle physics (theory and experiment), statistical physics, and low temperature physics.

Special interdisciplinary research programs include the Institute for Fundamental Theory (carried out jointly with the Department of Mathematics), the Institute for Theoretical and Computational Studies in Molecular and Materials Science (also known as the Quantum Theory Project or QTP, carried out jointly with Chemistry, Materials Science and Engineering, and Computer and Information Science and Engineering Departments), the Institute of High Energy and Particle Astrophysics, and Microfabritech (jointly with the College of Engineering). The Center for Condensed Matter Sciences provides opportunities for investigations in a diverse range of subjects and fields, including the Microkelvin Research Laboratory. The University of Florida operates the National High Magnetic Field Laboratory jointly with Florida State University and Los Alamos National Laboratory.

For more information, please see the program page below, and visit our website: <http://www.phys.ufl.edu>.

Physics

Program Information

The Department of Physics is dedicated to advancing the forefronts of knowledge in both pure and applied physics, thus providing an exciting intellectual climate for our graduate students. Our research activities include astrophysics (particle astrophysics, cosmology and gravitation), condensed matter and materials physics (experimental, theoretical and computational), low temperature physics, elementary particle physics (experimental and theoretical) and biological physics. With such diversity in research offerings you will have an opportunity to pursue research in most areas of contemporary physics. In spite of the size of our Department, we are committed to designing a program of graduate study that is tailored to your experience and interests. Our Graduate Coordinator sees that each of our graduate students receives personal attention and advice as they progress toward their advanced degree.

Graduate Program Overview

Preliminary Examination

- Covers undergraduate subject matter
- Given twice a year; two years to complete

Graduate Core Courses

- Two semesters of quantum mechanics
- Two semesters of electromagnetism
- One semester of classical mechanics
- One semester of statistical mechanics
- Waivers given for equivalent
- Work at other institutions
- Completed in first or second years

Distribution Requirement

- Advanced course work in three subfields
- Usually completed by the end of the second year

Highlights

- Involvement in research in first summer (or sooner)!
- Diversity of research interdisciplinary options!
- Individualized program designed to meet the unique background of each student!

For more information, please see our website: <http://www.physics.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Physics

- Doctor of Philosophy
 - without a concentration
 - concentration in Imaging Science and Technology
- Master of Science
- Master of Science in Teaching

Student Learning Outcomes

physics

SLO 1 Knowledge

Students who graduate with a PhD in physics from our university are expected to have a very solid and broad understanding of all fundamental aspects of the physical sciences. They are expected to be able to apply their knowledge as well as logical thinking, analysis, and higher level mathematical concepts to many problems and issues well beyond physics.

SLO 2 Knowledge

Graduate students in our PhD program are expected to delve deeply into one or two specific research projects such that they are seen as world-leaders in this particular research area when they graduate. At the same time, they are expected to have a fairly broad knowledge in a variety of sub-field in physics.

SLO 3 Skills

Students are able to dissect complex systems or problems, discuss and analyze them.

SLO 4 Skills

Students publish articles in high impact journals in their specific area of work and present their results at national and international conferences.

SLO 5 Professional Behavior

Students will demonstrate ethical behavior, cultural sensitivity, and professional conduct, and will be able to communicate their work orally as well as in writing.

Plant Molecular and Cellular Biology Department

Plant Molecular and Cellular Biology (PMB) currently has 45 faculty members in the program. They are based in the departments of Agronomy (<http://agronomy.ifas.ufl.edu/>), Biology (<https://biology.ufl.edu/>), Environmental Horticulture (<https://hort.ifas.ufl.edu/>), Forest Resources and Conservation (<http://sfrc.ufl.edu/>), Horticultural Sciences (<https://hos.ifas.ufl.edu/>), Microbiology and Cell Science (<http://microcell.ufl.edu/>), Molecular Genetics and Microbiology (<http://mgm.ufl.edu/>), and Plant Pathology (<https://plantpath.ifas.ufl.edu/>) within the colleges of Agriculture and Life Sciences (<https://>

cals.ufl.edu/), Medicine (<https://med.ufl.edu/>), and Liberal Arts and Sciences (<http://web.clas.ufl.edu/>).

Plant Molecular and Cellular Biology (CLAS)

Program Information

Director: Dr. Svetlana Folimonova
Graduate Coordinator: Dr. Gilles Basset
Program Coordinator: Eliana Kampf

Plant Molecular and Cellular Biology (PCMB) is an interdisciplinary and interdepartmental graduate degree program that emphasizes understanding the molecular and cellular mechanisms that mediate plant development, adaptation, and evolution. Students can pursue an M.S. or a Ph.D. degree through the PCMB program. All students complete core courses in Advanced Genetics, Plant Molecular Biology and Genomics, Plant Cellular and Developmental Biology, and Plant Biochemistry. In addition to the core classes, students can select from a variety of courses in biochemistry, molecular biology, physiology, breeding, genetics, evolution, microbiology, and plant pathology.

New students are exposed to a variety of faculty and experimental systems while they rotate through several laboratories during their first two semesters before selecting an adviser and dissertation research area. Both M.S. and Ph.D. students take four required courses:

PCB 5065 Advanced Genetics (4 cr.), PCB 5530 Plant Molecular Biology and Genomics (3 cr.), PCB 6528 Plant Cell and Developmental Biology (3 cr.) and BOT 6935 Special Topics (1-4 cr.), as well as journal colloquium

classes (PCB 7922 Journal Colloquy in Plant Molecular and Cellular Biology (1 cr.)). Additional elective courses are taken after approval by the student's supervisory committee. For additional information see <http://pmcb.ifas.ufl.edu>.

Successful candidates should have a strong interest in plant molecular and cellular mechanisms controlling development, metabolism, adaptation, and evolution. Applicants typically have a B.S. or M.S. in the agricultural, forestry, biological or chemical sciences.

Degrees Offered

Degrees Offered with a Major in Plant Molecular and Cellular Biology

- Doctor of Philosophy
 - without a concentration
 - concentration in Toxicology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Plant molecular & Cellular biology (phd)

SLO 1 Knowledge
Describe and explain fundamental theories and concepts in plant biochemistry, cell and developmental biology, genetics and genomics, molecular biology and general plant biology.

SLO 2 Knowledge
Use critical thinking to evaluate research design and experiments.

SLO 3 Skills
Critically evaluate the primary scientific literature.

SLO 4 Skills
Complete plant biology research of sufficient quality to be published in peer-reviewed journals.

SLO 5 Skills
Communicate effectively using scientific writing and oral presentation skills.

SLO 6 Professional Behavior

Effectively work in teams with peers interacting honestly, ethically and with cultural sensitivity

Plant Molecular & Cellular Biology (MS)

SLO 1 Knowledge

Describe and explain fundamental theories and concepts in plant biochemistry, cell and developmental biology, genetics and genomics, molecular biology and general plant biology

SLO 2 Knowledge

Use critical thinking to evaluate research design and experiments

SLO 3 Skills

Critically evaluate the primary scientific literature

SLO 4 Skills

Develop practical experimental research skills

SLO 5 Skills

Communicate effectively using scientific writing and oral presentation skills

SLO 6 Professional Behavior

Effectively work in teams with peers interacting honestly, ethically and with cultural sensitivity

Political Science Department

Chair: D. Smith

Graduate Coordinator: M. Martinez

The Department of Political Science currently offers two graduate degrees: Master of Arts (thesis or non-thesis option) and Doctor of Philosophy. The political science–international relations program currently offers the Master of Arts (thesis or non-thesis option). Requirements for these degrees are given in the Graduate Degrees Section (p. 778) of this catalog. For further information, please contact the Political Science Department (<https://polisci.ufl.edu/>) or follow the hyperlinks below to more information about the specific programs offered.

Political Science

Program Information

The Department of Political Science currently offers two graduate degrees: Master of Arts (thesis or non-thesis option) and Doctor of Philosophy. The political science–international relations program currently offers the Master of Arts (thesis or non-thesis option). Requirements for these degrees are given in the Graduate Degrees Section (p. 778) of this catalog. For further information about international relations, please contact the Political Science Department

(<https://polisci.ufl.edu/>) or visit their departmental page in this catalog (p. 255).

Admission to graduate study in the Department of Political Science normally requires the completion of an undergraduate major in political science or its equivalent. Students without this preparation may be required to make up deficiencies early in their graduate work. The core sequence begins in the fall term, providing basic knowledge that students need in later semesters. In evaluating candidates for admission, the Department considers

- Prior academic achievement
- GRE scores
- Letters of recommendation from three faculty members or others familiar with the academic potential or work habits of the applicant
- A statement of purpose that conveys intellectual ambitions, indicates how the program of study satisfies the student's interests and goals, and tells how the student would contribute to the program.

Fields of specialization offered by the Department include American government and politics, comparative politics, international relations, public policy, political theory, political behavior, and political methodology.

Master of Arts: The M.A. curricula are designed to serve students who want to pursue goals of an advanced general education, to gain skills and knowledge suitable for various types of public or private employment, or to prepare for further work at the doctoral level. M.A. students are required to complete POS 6736 The Conduct of Inquiry (3 cr.) and either POS 6737 Political Data Analysis (3 cr.) or STA 6126 Statistical Methods in Social Research I (3 cr.). Students may complete their M.A. degrees with or without writing a thesis. Students pursuing the thesis option must complete 30 hours of graduate course work. The thesis is expected to be of length and quality comparable to papers presented at professional academic conferences or published in academic journals. Students pursuing the non-thesis option must complete 36 semester hours of graduate course work and defend two qualifying papers. For both M.A. options, course work in political science, exclusive of core courses, must include a minimum of two graduate-level courses in one field of political science.

The M.A. degree may be taken in conjunction with the following certificate programs:

- Political campaigning
- Public affairs

Students in these certificate programs pursue the non-thesis option.

Public affairs: This program trains students for leadership positions in state, local, and national governments as well as for careers in nonprofit organizations by providing students with knowledge and skills in the areas of organization behavior, public budgeting and finances, public management, policy analysis, program evaluation, and computer applications. The curriculum consists of seminars in political science, public administration, public policy, process, state and local politics, and research methods. Supervised internships in selected agencies in Florida are arranged by the Department of Political Science as an integral part of the training program. This specialization requires 39 hours of course work plus satisfactory completion of a 3-hour internship at the discretion of the Department. Students must also defend a final management-policy paper that incorporates analytical and substantive expertise. Graduates of the program serve in a variety of professional positions, including city managers, heads of municipal departments, directors of nonprofit

organizations, analysts for the state legislature, and budget analysts for the federal government. In addition to the M.A. degree in political science, students receive the Certificate in Public Affairs.

Political campaigning: The program is designed to provide students with the basic political skills, insights, and experience that are critical for success in the rapidly changing profession of politics and political consulting. The program combines an awareness of the academic literature on mass and elite behavior with exposure to the increasingly sophisticated techniques used by campaigns. Students take a total of 39 hours from four major areas:

- Courses required of all M.A. students
- Courses oriented to practical aspects of political campaigning and governmental affairs (lobbying), including a 3-credit campaign-related internship
- Courses placing campaigns and elections in the broader context of American politics
- Related courses offered by the College of Journalism and Communications

Entry-level jobs have included such positions as legislative aide, campaign (or deputy campaign) manager, polling analyst, state party political coordinator, general campaign consultant, and media relations. With additional experience, some former students have gone on to become state legislator (and later, member of the U.S. House of Representatives), deputy chief of staff to the governor of Florida, partner in a major Washington area polling firm, assistant to the Minister of Justice and Attorney General of Canada, and head lobbyist for a nationwide restaurant chain. In addition to the M.A. degree in political science, students receive the Certificate in Political Campaigning.

Law/Public Affairs joint degree program: This program culminates in the Master of Arts in political science and Juris Doctor degrees. A joint degree program culminating in the Master of Arts in political science international relations and Juris Doctor degrees is also available. The joint program enables students to earn both the J.D. and the M.A. in less time than would be required to earn both degrees consecutively. Full-time students who make satisfactory progress can usually earn both degrees in 4 years. Candidates for the joint degree program must meet the entrance requirements for, and be admitted to, both the College of Law and the Department of Political Science. These requirements include both the LSAT and the GRE. Students are encouraged to announce their intent of seeking a joint degree as soon as possible. The Department of Political Science will allow 12 hours of appropriate law school courses to be credited toward the M.A. degree. The 12 credits selected from the law curriculum must be approved by the Political Science graduate coordinator on the recommendation of the student's supervisory committee. The College of Law will permit 12 hours of credit earned in political science graduate courses to be credited toward the J.D. degree. Students in the joint degree program are permitted, but not required, to pursue a companion certificate program in public affairs or political campaigning.

Combination bachelor's/master's degree program: This combination program is designed for superior students who have the ability to pursue an accelerated program leading to the Bachelor of Arts and the Master of Arts degrees in political science or political science international relations.

Up to 12 semester hours of approved graduate-level political science courses may be used as credit for both the undergraduate and graduate degree. Applicants to the program must present

- Acceptable scores on the verbal, quantitative, and analytical writing portions of the GRE
- Completion of at least 24 semester hours at the University of Florida (including at least 12 semester hours of political science) with a GPA of 3.7 or higher
- Letters of recommendation from two faculty members in the Department of Political Science

The combination program is not recommended for students considering a Ph.D. program in political science at UF but is appropriate for those considering one of the M.A. degree plus certificate programs described above. Further information concerning this program is available from the departmental undergraduate and graduate coordinators.

Doctor of Philosophy: The Ph.D. program emphasizes preparation for academic careers through seminars, independent work with faculty, and professional development experiences including graduate paper readings, placement workshops, and a distinguished lecture series. The Ph.D. prepares students for teaching and research in either an academic or governmental environment and opens doors to other career opportunities in both the private and public sectors. The Ph.D. program emphasizes the development of strong analytic skills and sophisticated research methods. As resources permit, the Department provides students with funding for travel expenses to scholarly meetings and professional (methodological) training support. As part of the preparation for careers in academia, doctoral students are also generally expected to contribute to the teaching mission of the Department. All Ph.D. students must complete the following:

- POS 6736 The Conduct of Inquiry (3 cr.)
- POS 6716 Scope and Epistemologies of Political Science (3 cr.)
- POS 6737 Political Data Analysis (3 cr.)
- POT 6505 Politics and Theory (3 cr.)
- Course work in a major and two minor fields of study
- Qualifying examinations in a major field and one minor field
- A dissertation

Fields of study open to Ph.D. students include comparative politics, American politics, public policy, international relations, political behavior, political theory, and political methodology. Applications are particularly welcome from students whose intellectual interests traverse these fields, including those with interests in religion and politics, state political institutions and policy, environmental politics, and minority and ethnic politics.

University of Florida Ph.D. students benefit from associations with faculty in numerous other departments and centers. The Centers for Latin American Studies, African Studies, and European Studies complement department faculty strengths in comparative politics and international relations. Students in the public policy concentration benefit from substantive expertise of faculty in the Institute for Child Health Policy and the Shimberg Center for Housing Studies. Several faculty in the College of Journalism and Communications have interests in media and politics.

For more information, please see our website: <http://polisci.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Political Science

- Doctor of Philosophy
 - without a concentration
 - concentration in Educational Policy
 - concentration in Tropical Conservation and Development
- Master of Arts
 - without a concentration
 - concentration in Political Campaigning
 - concentration in Public Affairs
 - concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Political science (PHD)

SLO 1 Knowledge

Identify, describe and explain the central elements of the scope, the epistemologies & methodologies of political science. Fluency in the core literature of political theory

SLO 2 Knowledge

Correctly and effectively utilize quantitative analysis up to OLS regression analysis

SLO 3 Knowledge

Synthesize and explain comprehensively two fields in political science and synthesize core attributes of a third field

SLO 4 Skills

Conduct qualitative and/or quantitative research to address substantive and theoretical questions in political science, constituting an original contribution of knowledge and understanding to the field

SLO 5 Professional Behavior

Display ethics, collegiality, cultural sensitivity and academic honesty

SLO 6 Professional Behavior

Present original research at professional conferences and workshops. Attend and critique scholarly presentations during regular departmental workshops and speakers' series

Political Science (MA)

SLO 1 Knowledge

Articulate knowledge and comprehension of theories of political science, including the historical evolution of the field, and the primary debates in the field, along with the core literature in at least two of the following subfields: Comparative Politics, International Relations, American Politics, and/or Political Theory

SLO 2 Knowledge

Identify, interpret, and appraise research in international relations

SLO 3 Skills (thesis option)

Design and conduct quantitative and/or qualitative research to address theoretical and empirical questions in American Politics, Comparative Politics or Political Theory

SLO 4 Skills (exam option)

Summarize, compare, and enumerate the current state of the field of American Politics, Comparative Politics or Political theory providing recommendations for future research directions

SLO 5 Professional Behavior

Display academic honesty, ethics, collegiality, and cultural sensitivity

SLO 6 Professional Behavior

Attend and critique scholarly presentations during regular departmental workshops and speakers' series

Political Science - International Relations

Program Information

The Department of Political Science currently offers two graduate degrees: Master of Arts (thesis or non-thesis option) and Doctor of Philosophy. The political science–international relations program currently offers the Master of Arts (thesis or non-thesis option). Requirements for these degrees are given in the Graduate Degrees Section (p. 778) of this catalog. For further information, please contact the Political Science Department (<https://polisci.ufl.edu/>) directly or visit their departmental catalog page (p. 255).

Admission to graduate study in the Department of Political Science normally requires the completion of an undergraduate major in political science or its equivalent. Students without this preparation may be required to make up deficiencies early in their graduate work. The core sequence begins in the fall term, providing basic knowledge that students need in later semesters. In evaluating candidates for admission, the Department considers

- Prior academic achievement
- GRE scores
- Letters of recommendation from three faculty members or others familiar with the academic potential or work habits of the applicant

- A statement of purpose that conveys intellectual ambitions, indicates how the program of study satisfies the student's interests and goals, and tells how the student would contribute to the program.

Political science–international relations: The M.A. degree in political science–international relations is designed to provide professional education to those whose primary interest is a career in foreign relations. In this program, students must complete course work in the core of international relations theory and in two or more of the four major subfields of international relations, international political economy, international security, foreign policy, and international organization. The M.A. is a 36-hour degree, requiring successful completion of a 6-credit political science core sequence, 15 credits of departmental or extra-department electives, and a 15-credit international relations major. Students may pursue either a thesis option or take a comprehensive examination at the end of the program.

Law/Public Affairs joint degree program: This program culminates in the Master of Arts in political science and Juris Doctor degrees. A joint degree program culminating in the Master of Arts in political science international relations and Juris Doctor degrees is also available. The joint program enables students to earn both the J.D. and the M.A. in less time than would be required to earn both degrees consecutively. Full-time students who make satisfactory progress can usually earn both degrees in 4 years. Candidates for the joint degree program must meet the entrance requirements for, and be admitted to, both the College of Law and the Department of Political Science. These requirements include both the LSAT and the GRE. Students are encouraged to announce their intent of seeking a joint degree as soon as possible. The Department of Political Science will allow 12 hours of appropriate law school courses to be credited toward the M.A. degree. The 12 credits selected from the law curriculum must be approved by the Political Science graduate coordinator on the recommendation of the student's supervisory committee. The College of Law will permit 12 hours of credit earned in political science graduate courses to be credited toward the J.D. degree. Students in the joint degree program are permitted, but not required, to pursue a companion certificate program in public affairs, or political campaigning.

Counseling Psychology

Program Information

The Department of Psychology offers the Doctor of Philosophy degree in Counseling Psychology. Students typically complete Masters of Science degree in Psychology prior to the Doctorate in Counseling Psychology. Complete descriptions of the minimum requirements for these degrees are provided in the Graduate Degrees (p. 778) section of this catalog. Students are not accepted for a terminal master's degree.

The Counseling Psychology Graduate Training Program at the University of Florida is one of five training programs offered in the Department of Psychology. The Program is accredited by the American Psychological Association. A predoctoral internship of one year is required. The Counseling Psychology Program at the University of Florida adheres to a generalist, scientist-practitioner training model that emphasizes education and training in the integration of theory, scientific thinking, assessment, research, and practice. This training model conceptualizes science and practice as inseparable and thus promotes practice that is science-based and science that is informed by practice. Furthermore, this training model promotes science and practice that consider individual, developmental, multicultural, and contextual perspectives and that emphasize human strengths with attention to aspects of psychopathology. A dedication to psychological science is essential.

Undergraduate preparation should include at least one course in experimental methods and one course in statistics. Other courses in psychology should include at least three or four of the following: cognition, developmental, learning, personality, physiological, sensory, and social. Applicants should have competitive GRE scores and GPA (3.5 or higher).

For more information, please see our website: <http://psych.ufl.edu/index.php/counselingpsychology> (<http://psych.ufl.edu/index.php/counselingpsychology/>).

Student Learning Outcomes

Counseling Psychology

SLO 1 Knowledge

Students will describe, identify, and examine subject matter in psychology and counseling psychology, including knowledge of diversity issues and multicultural perspectives.

SLO 2 Knowledge

Students will define and identify ethical principles applicable to the field of psychology.

SLO 3 Skills

Students will apply research and statistical skills relevant to their area of concentration.

SLO 4 Skills

Students will apply counseling and therapy skills in the delivery of counseling and therapy services.

SLO 5 Skills

Students will teach and transmit psychological knowledge in the classroom.

Psychology (CLAS)

Program Information

The Department of Psychology offers the Master of Science and the Doctor of Philosophy degrees. Complete descriptions of the minimum requirements for these degrees are provided in the Graduate Degrees (p. 778) section of this catalog. Students are not accepted for a terminal master's degree.

Doctoral areas of specialization include the research areas of developmental, behavior analysis, behavioral and cognitive neuroscience, social psychology, and counseling psychology. The training program in counseling psychology is accredited by the American Psychological Association. A predoctoral internship of one year is required for the counseling psychology program.

Undergraduate preparation should include at least one course in experimental methods and one course in statistics. Other courses in psychology should include at least three or four of the following: cognition, developmental, learning, personality, physiological, sensory, and social. Applicants should have competitive GRE scores and GPA (3.5 or higher).

Co-major: The Department offers a co-major program in conjunction with the College of Education leading to the Doctor of Philosophy degree in psychology and research and evaluation methodology.

For more information, please see our department website: <http://psych.ufl.edu>.

Degrees Offered

Degrees Offered with a Degree in Psychology

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Women's/Gender Studies
- Master of Arts
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Students will describe, identify, and examine subject matter in psychology and in their area of specialization

SLO 2 Knowledge

Students will define and identify ethical principles applicable to their area of research

SLO 3 Skills

Students will apply research and statistical skills relevant to their area of concentration

Religion Department

Department Chair: M. Poceski

Graduate Coordinator: B. Taylor

The graduate program in the Department of Religion at the University of Florida is designed to prepare students for careers in academia, public service, non-governmental organizations, and various forms of advocacy work. Our five areas of study include Buddhist Traditions, Global Islam, Hindu Traditions, Religion in the Americas, and Religion and Nature. For additional information, please refer to the Graduate Student Manual.

The M.A. Program

The M.A. degree provides a broad background in the study of religious traditions and theoretical orientations in the discipline. An M.A. student can choose whether they will concentrate in one of the five areas of study. If they choose to do so, they need to take the courses recommended for that field of specialization. If they choose not to, they can pick courses from across the fields. Coursework usually culminates in a thesis and an oral examination.

The department also offers a combination program designed for superior students who have the ability to pursue an accelerated program leading to the Bachelor of Arts and the Master of Arts degree in Religion.

The Ph.D. Program

A student usually enters with a religion master's degree either from this or another institution. Those admitted with master's degrees in disciplines other than religion may petition to bypass the religion master's degree with additional religion coursework. All students are admitted into one of the areas of study and should fulfill the recommended coursework as outlined in the area descriptions. Students in all fields are encouraged to take courses in other departments to support work in their area of specialization.

Coursework

Graduate students in religion ordinarily take courses of different kinds and for different purposes. One aim is to develop familiarity with leading traditions of research and analysis in religious studies. Another is to prepare for PhD examinations. A third is to pursue specific interests relevant to the student's scholarly development, especially in relation to

the thesis or dissertation. A fourth is to prepare for careers outside of academia. Students are expected to consult their supervisory committee chair and the department's graduate coordinator in designing a course of study that satisfies these aims in the limited time available.

Every year, a Method and Theory departmental seminar is offered (Method & Theory I or II in alternate years). This course is required of all first and second-year graduate students. Its purpose is to help students develop awareness of various approaches to the study of religion, the history of these approaches, and their assumptions about understanding and explaining religious texts and behavior.

Every other year, an Interdisciplinary Seminar is offered. The purpose of this course is to bridge the department's separate areas of study through the examination of topics and themes broadly relevant to the field of religious studies. The content of this course changes each time it is offered, and all first and second-year graduate students are required to take this course when it is offered during their first two years of graduate study.

Specialized instruction within the areas of study is carried on primarily in courses detailed in the area descriptions. The department also offers graduate seminars in related areas outside the specific fields. In addition, students regularly participate in individual or small reading courses with a member of the faculty, the form and content of which are tailored to the student's particular needs and interests.

Almost all graduate students in religion take courses outside the department. Most students enroll in graduate seminars and reading courses in such departments and centers as African Studies, Anthropology, Botany, English, History, Jewish Studies, Latin American Studies, Philosophy, Political Science, Sociology, Women's Studies and Gender Research, Zoology, and from the interdisciplinary School of Natural Resources and the Environment.

While specific degree requirements and interests shape a candidate's program, most generally enroll in three courses, including both seminars and reading courses, during each of the semesters prior to the M.A. thesis or Ph.D. qualifying examinations.

Mentoring

All students are assigned a faculty mentor upon admission to the program based on expressions of faculty interest and the student's intended area of study. The mentor and graduate coordinator answer questions and provide support for the student in choosing courses and planning a program. By the end of the second semester, all master's degree students must designate their supervisory committee chair and one additional department committee member. By the end of the second semester, all doctoral students must designate their committee chair. By no later than the end of the fourth semester of study, all doctoral students must designate a four-member supervisory committee, including the chairperson and one UF faculty member from outside the department.

Student Learning Outcomes

religion (PHD)

SLO 1 Knowledge

Students will identify, define, and describe classical and contemporary methods and theories in the study of religion and the sub-fields of religions of Asia, religions of the Americas, and religion and nature.

SLO 2 Knowledge

Students will translate one research language other than English as approved by their dissertation committees

SLO 3 Skills

Students will articulate orally and in writing the results, significance, and applications of their scholarship and research

SLO 4 Skills

Students will teach in their particular sub-fields, as well as in the broad field of comparative religions

SLO 5 Professional Behavior

Students will produce original research and scholarship that meet the professional standards of the field

Religion (MA)

SLO 1 Knowledge

Students will identify, define, and describe classical and contemporary methods and theories in the study of religion and the sub-fields of religions of Asia, religions of the Americas, and religion and nature

SLO 2 Skills

Students will teach in their particular sub-fields, as well as in the broad field of comparative religions

SLO 3 Professional Behavior

Students will produce research and scholarship that meet the professional standards of the field

Sociology and Criminology & Law Department

Chair: B. Zsembik

Graduate Coordinator: M. Ardel

The Department of Sociology and Criminology & Law offers several programs of graduate study leading to the Ph.D. in Sociology, the Ph.D. in Criminology, Law and Society, the MA in Sociology, the MA in Criminology, Law and Society, and a Joint MA in Criminology/JD degree. The department also partners with the School of Natural Resources and Environment Department to offer the Ph.D. or MA in Interdisciplinary Ecology. Advanced undergraduate majors may complete a combination BA/MA degree in Sociology or a combination BA/MA degree in Criminology, Law and Society.

Combination BA/MA Degree Program in Criminology & Law

Requirements and Recommendations

What is the Combination BA/MA Degree Program?

The BA/MA program provides academically talented students an opportunity to complete a bachelor's and a master's degree in a shorter period of time. The program allows students to explore graduate work in criminology before entering a graduate program. If the student then applies and is accepted into the graduate program (see application procedures for the graduate program), 12 hours of graduate coursework will double-count toward both the B.A. and the M.A., thus reducing the time it would normally take to complete both degrees. Please note, however, if a student is not serious about pursuing an M.A. in criminology, the program is not recommended.

Minimum Requirements for Competitive Admission

- at least a 3.5 overall UF GPA
- completion of CCJ 3024 Advanced Principles of Criminal Justice (3 cr.), CCJ 3701 Research Methods in Criminology (4 cr.), CCJ 4014 Criminological Theory (3 cr.), and CJL 3038 Law and Society (3 cr.) with an overall GPA of 3.5 and no grade lower than a B in any criminology course
- one letter of recommendation from a criminology faculty member
- a personal statement of purpose

Note: meeting these minimum requirements does not guarantee admission into the combination degree program.

How to Apply

Students may apply for the combination BAMA program anytime from their second year forward, but students will most likely apply during the second semester of their junior year. We require undergraduate students to submit all application materials by October 15 for admission to the spring semester and by March 15 for admission to the fall semester for full consideration. Undergraduate students in the BA/MA program must apply for admission into the graduate program just like any other graduate applicant to continue their graduate work.

The following steps should help in the application process:

1. Plan ahead when scheduling courses through the junior year (see sample schedule below). All four of the criminology required courses and all of the student's general education requirements should be completed by the end of the student's junior year.
2. At the beginning of the semester in which the student is applying to the program, the student should approach a criminology faculty member about writing a letter of recommendation. The student should also begin working on a personal statement of purpose. The following guidelines should help with writing the statement.
 - a. Length-2 to 4 pages
 - b. The statement should describe:
 - i. Applicant's reasons for undertaking graduate study in criminology
 - ii. Applicant's future career plans
 - iii. Planned area of concentration within criminology
3. By October 15th of the fall semester or March 15th of the spring semester the student must submit the following items to the Undergraduate Coordinator:
 - a. Personal statement of purpose
 - b. Letter of recommendation

- c. UF's combination BA/MA application form (<https://admissions.ufl.edu/pdf/combdegreerequest.pdf>)

Requirements Once Admitted into the Combination BA/MA Program

Once admitted into the BA/MA program, students complete 12 graduate credit hours for the combination degree before graduation. Six of the 12 credits must be the required CLS courses of Seminar in Criminological Theory (CCJ 6920 Seminar in Criminological Theory (3 cr.)) and Introduction to Quantitative Methods (CCJ 5934 Contemporary Issues in Criminology and Law (3 cr.)). The remaining 6 graduate credits are based on the student's interests. See a listing of graduate courses on our web site (<https://soccrim.clas.ufl.edu/graduate/criminology/>). Again, keep in mind that acceptance into the combination BA/MA program does not mean automatic admittance into the Master's program upon graduation. The student must still take the GRE and submit an admission application for graduate study in Criminology and Law.

Model Plan of Study for BA/MA Program

(assuming fall entry in senior year)

Criminology, Law and Society

Program Information

Requirements for the M.A. and Ph.D. degrees are given in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog. The graduate program in criminology and law has two areas of special emphasis: crime and justice, and law and society. The degree programs are research-based and prepare students to conduct original exploration into relevant problems, issues, and policies.

M.A. degree program: Admission to the master's degree program requires a bachelor's degree from a criminology/criminal justice or relevant social science or humanities program (political science, sociology, anthropology, psychology, philosophy, history, women's studies, etc.). Qualified students may enter the master's program as undergraduates through the combination B.A./M.A. program. Both M.A. options (thesis and non-thesis) require satisfactory completion of at least 36 credit hours.

Ph.D. degree program: The Doctor of Philosophy program includes a minimum of 90 semester hours of credit beyond the B.A. Students with a criminology or closely related M.A. received in the last 7 years from an accredited U.S. university may request that up to 30 hours credit from their M.A. work be counted toward this total. Those with an M.A. from this department may apply 36 hours. The Department requires Ph.D. students to complete at least 66 hours of course work (excluding research credits), including the M.A. hours. Qualifying examinations take place at the end of a student's course work.

Criminology, Law and Society/Law joint degree programs: The Department of Sociology and Criminology & Law (CLS) and the College of Law offer a joint degree program leading to an M.A. or a Ph.D. in Criminology, Law and Society and a J.D. in law. The joint degree programs enable students to earn both the degrees (the J.D. and the M.A. or the J.D. and the Ph.D.) in less time than would be required to earn both degrees consecutively. Students wishing to pursue the joint program must be admitted to both the Graduate School and the College of Law. These requirements include both the LSAT and GRE. Admission to one may precede the other. Students are encouraged to announce their intent to seek a joint degree as soon as possible. CLS allows 12 hours of appropriate law school courses to be credited toward the CLS degree. The 12 credits selected from the law curriculum must be approved by the graduate coordinator on the recommendation of the student's supervisory committee. The College of Law will permit 12 hours of credit earned in graduate courses to be credited toward the J.D.

Prospective students should examine the research interests of the Criminology Graduate Faculty to obtain a more detailed sense of faculty expertise and research areas, see the department website: <http://soccrim.clas.ufl.edu/graduate/>. Applications for admission and fellowship support are due January 15 of each year. Students planning to apply for admission should take the Graduate Record Examination at the earliest possible date.

Degrees Offered

Degrees Offered with a Major in Criminology, Law and Society

- Doctor of Philosophy
- Master of Arts

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Criminology, law & Society (PHD)

SLO 1 Knowledge

Identify, define and describe criminological and law and society theories and criminological and law and society research methods.

SLO 2 Knowledge

Identify, define and describe their primary track of interest (either Crime & Justice or Law & Society)

SLO 3 Professional Behavior

Prepare and produce documents professionally and ethically.

SLO 4 Professional Behavior

Practice the role of the professional criminologist.

SLO 5 Skills

Conduct independent empirical research with scientific integrity.

SLO 6 Skills

Apply substantive criminological and law and society knowledge in critical thinking, analysis, and communication.

Criminology, Law, & Society (MA)

SLO 1 Knowledge

Identify, define and describe criminological and law and society theories and criminological and law and society research methods.

SLO 2 Skills

Identify, define and describe their primary track of interest (either Crime & Justice or Law & Society)

SLO 3 Skills

Conduct independent empirical research with scientific integrity

SLO 4 Professional Behavior

Prepare and produce documents professionally and ethically

SLO 5 Professional Behavior

Practice role of professional criminologist

Sociology

Program Information

Sociologists conduct research to understand the social forces that shape all of our lives, often in hopes of improving everyday life and the life chances of each person. Graduate studies in sociology provide the people skills and technical skills to organize information, communicate analytical research to academic and lay audiences, and prepare well-reasoned and carefully-written reports and documents that contribute to societal well-being. Our award-winning and internationally-known faculty successfully mentor graduate students to complete their studies and become established in their professional academic and nonacademic careers.

We offer particular expertise in these areas: environment and resources, families, aging, gender, health, sexualities, life course, and race-ethnicity in US and global perspectives. There is also considerable expertise in: demography, social inequality, Latin American studies, Latino sociology, social psychology, deviance, and political sociology. We take great pride in the fact that our faculty are involved in interdisciplinary research projects that span nearly all of the University's colleges and academic programs, including: the School of Natural Resources and the Environment, the Water Institute, the Emerging Pathogens Institute, the Center for Latin American Studies, the Center for European Studies, the Center for Women's Studies and Gender Research, the Health Science Center, and the Jewish Studies Center. Wherever you go on campus, you will most likely find at least one Sociologist from our department making major contributions.

Minimum requirements for the M.A. and Ph.D. degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Admission to either Sociology graduate program requires a bachelor's degree in Sociology or related social science as approved by the Department. Current UF students may also enter the M.A. program through the combination B.A./M.A. program. The Sociology graduate programs look for mature students with outstanding potential and research interests that complement those of our faculty.

Prospective students should examine the research interests of the Sociology Graduate Faculty to obtain a more detailed sense of faculty expertise and research areas, see the department website: <http://soccrim.clas.ufl.edu/graduate/>. Applications for admission and fellowship support are due January 15 of each year. Students planning to

apply for admission should take the Graduate Record Examination at the earliest possible date.

Degrees Offered

Degrees Offered with a Major in Sociology

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Tropical Conservation and Development
 - with an additional concentration in Clinical and Translational Science
 - concentration in Women's/Gender Studies
 - with an additional concentration in Clinical and Translational Science
- Master of Arts
 - without a concentration
 - concentration in Tropical Conservation and Development

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Conduct independent empirical research with scientific integrity

SLO 4 Skills

Demonstrate advanced competencies in applying substantive sociological knowledge in critical thinking, analysis, and communication

SLO 5 Professional Behavior

Prepare and produce documents professionally and ethically

SLO 6 Professional Behavior

Practice the role of the professional sociologist.

Spanish and Portuguese Studies Department

Chair: L. Álvarez Castro

Graduate Coordinator: J. Aaron

The Department of Spanish and Portuguese Studies offers a Master of Arts degree (M.A.) in Spanish (thesis and non-thesis options) and a Doctor of Philosophy degree (Ph.D.) in Romance Languages and Literatures, with a concentration in Spanish. Descriptions of the minimum requirements for both degrees are provided in the General Information section of this catalog. For specific information about the program, please visit the graduate section of the departmental webpage:

<http://www.spanishandportuguese.ufl.edu/spanish/graduate.html>

Candidates for graduate degrees (both M.A. and Ph.D.) in Spanish can choose between two specializations—literature/culture or linguistics. In conjunction with their master's or doctoral work, students may also earn a Certificate in Latin American Studies. Though a graduate degree is not offered in Portuguese, extensive course offerings at the graduate level permit students to develop a strong specialization in Portuguese language and Luso-Brazilian literature, film and culture.

The main prerequisite for admission to the M.A. program is an undergraduate major in Spanish, ideally including advanced courses in the proposed area of specialization. Applicants for the Ph.D. should hold an M.A. or equivalent degree in Spanish. At the discretion of the Graduate Studies Committee, candidates from related fields of study (History, Sociology...) may be offered a conditional admission into the Ph.D. program pending the passing of the M.A. Comprehensive Examination within the first year of study.

All M.A. and Ph.D. students in Spanish who are appointed as teaching assistants must take Romance Language Teaching Methods (FOL / FOL 6943 Romance Language Teaching Methods (3 cr.)). Besides, all M.A. and Ph.D. students specializing in literature and culture must take Introduction to Graduate Study and Research (SPW 6806 Introduction to Graduate Study and Research (3 cr.)). Other requirements vary with degree and specialization. For details, consult the graduate section of the departmental webpage (see above).

The Department is able to offer most students a teaching assistantship that provides a maintenance stipend and includes a tuition waiver. Contingent on positive performance in teaching and graduate work, M.A. students are guaranteed four semesters of support, and Ph.D. students are guaranteed eight semesters of support beyond the M.A. In addition, there are several fellowships, supplements and stipends for which students may apply, and summer teaching may be available.

Prospective students are encouraged to review the departmental webpage in order to familiarize themselves with the program and the application process. Only those applications including all required materials and submitted by the advertised deadlines will be considered. For any questions about the program or how to apply, please contact the graduate coordinator: grad-coord@spanish.ufl.edu.

Romance Languages (Spanish and Portuguese Studies)

Program Information

The Department of Spanish and Portuguese Studies offers a graduate program leading to the degree of Ph.D. in Romance Languages and Literatures with a concentration in Spanish.

Students may choose a specialization in either literature/cultural studies or Hispanic linguistics. The program strives to achieve balance and depth. A minor is optional; it may be another Romance language or a different field related to the student's major (such as English, History, Latin American Studies, Philosophy, Portuguese/Brazilian Literature, or Women's Studies and Gender Research).

Ph.D. students determine their program of study in close consultation with their Supervisory Committee, which also prepares and administers the Qualifying Examination. Courses should be chosen to develop adequate background for teaching in the field as well as to prepare for more focused work in the area of the dissertation. In the literature/cultural studies track, all candidates must take two courses in literary theory, which will help them to achieve methodological coherence in their dissertations. In the language/linguistics track, students pursue course work in Spanish linguistics, including phonetics and phonology, morphology, syntax, sociolinguistics, historical linguistics and language acquisition. They complement these courses with work in the Linguistics Department. The Qualifying Examination normally covers the core areas listed above, the area of the anticipated dissertation, and any declared minor.

Most doctoral students will be given the opportunity to gain teaching experience through a teaching assistantship, dependent upon departmental need and availability of funds. Renewal of the assistantship is contingent upon satisfactory performance as a teaching assistant and as a graduate student.

For more information, go to: <http://spanishandportuguese.ufl.edu/graduate-programs> (<http://spanishandportuguese.ufl.edu/graduate-programs/>) or contact the Graduate Coordinator at grad-coord@spanish.ufl.edu

Spanish Program Information

The Department of Spanish and Portuguese Studies offers a graduate program leading to the degrees of Master of Arts in Spanish or Master of Arts in Teaching in Spanish.

Students may choose to specialize in literature/culture or language/linguistics. A secondary specialization in Portuguese is also offered. Qualified applicants to the M.A. program are eligible for teaching assistantships.

A Master of Arts in Spanish may be earned in one of two ways:

- Non-thesis M.A. This is considered a terminal degree for those anticipating teaching careers in secondary schools or junior colleges, as well as employment in business, government, tourism, etc. Requirements: 30 credit hours and a comprehensive examination.
- M.A. with thesis. This option prepares students for later work toward a Ph.D. Requirements: 30 credit hours, a comprehensive examination, and a thesis. (Internal candidates to the Ph.D. program at UF can submit an extended paper as an alternative to the thesis.)

For more information on the M.A. or M.A.T., go to: <http://spanishandportuguese.ufl.edu/graduate-programs> (<http://spanishandportuguese.ufl.edu/graduate-programs/>) or contact the Graduate Coordinator at grad-coord@spanish.ufl.edu.

Degrees Offered

Degrees Offered with a Major in Spanish

Student Learning Outcomes

Spanish (MA)

SLO 1 Knowledge

Identify, define, and describe the core areas of Hispanic linguistic and/or literary studies (with optional secondary-foci in Luso-Brazilian studies), as agreed upon by the faculty of the department.

SLO 2 Skills

Literary/Cultural Studies: Analyze and interpret Hispanic/Latino literary and cultural products (with optional secondary foci in Luso-Brazilian studies),

apply results to broader context and engage in academic discourse via writing and oral presentation

Hispanic Linguistics: Analyze and interpret Hispanic language and language-related data (with optional secondary foci in Portuguese), apply results to broader context and engage in academic discourse via writing and oral presentation.

SLO 3 Professional Behavior

Describe and apply ethical human data collection, professional conduct and ethical academic writing skills (as established by Linguistic Society of America Ethics Statement and/or Modern Language Association)

Statistics Department

Chair: M. Daniels

Graduate Coordinator: J.P. Hobert

Graduate programs are available leading to Master of Science in Statistics, Master of Statistics, and Doctor of Philosophy degrees. The minimum requirements for these degrees are described in the *General Information* section of this catalog.

Both master's programs usually require 2 years of course work including material covered in

Code	Title	Credits
STA 6207	Regression Analysis	3
STA 6275	Statistical Computing I: Optimization	3
STA 6276	Statistical Computing II: Monte Carlo Methods	3
STA 6326	Introduction to Theoretical Statistics I	3
STA 6327	Introduction to Theoretical Statistics II	3
STA 6246	Theory of Linear Models	3
STA 6329	Matrix Algebra and Statistical Computing	3

In addition to earning a "Ph.D. pass" on the first-year evaluation, requirements for the Ph.D. degree include the additional course requirements below:

Code	Title	Credits
STA 7233	Advanced Regression	3
STA 7249	Generalized Linear Models	3
STA 7346	Statistical Inference	3
STA 7466	Probability Theory I	3
STA 7467	Probability Theory II	3

Interdisciplinary programs: The Department offers a co-major program in conjunction with the Fisher School of Accounting leading to the Doctor of Philosophy degree in statistics and business administration accounting. The Department is also a partner in the interdisciplinary concentration in quantitative finance, along with the Departments of Mathematics; Industrial and Systems Engineering; and Finance, Insurance, and Real Estate. For information on these programs, consult the departmental graduate coordinator.

Combination program: The Department offers a bachelor's/master's degree program. Contact the graduate coordinator for information.

STA 6246	Theory of Linear Models	3
STA 6275	Statistical Computing I: Optimization	3
STA 6276	Statistical Computing II: Monte Carlo Methods	3
STA 6326	Introduction to Theoretical Statistics I	3
STA 6327	Introduction to Theoretical Statistics II	3
STA 6329	Matrix Algebra and Statistical Computing	3
STA 6505	Analysis of Categorical Data	3
STA 6707	Analysis of Multivariate Data	3
STA 6905	Individual Work	1-5
STA 6910	Supervised Research	1-5
STA 6934	Special Topics in Statistics	1-4
STA 6938	Seminar	1
STA 6940	Supervised Teaching	1-5
STA 6942	Internship	1-3
STA 6971	Research for Master's Thesis	1-15
STA 7179	Survival Analysis	3
STA 7233	Advanced Regression	3
STA 7249	Generalized Linear Models	3
STA 7334	Limit Theory	3
STA 7346	Statistical Inference	3
STA 7347	Advanced Inference	3
STA 7348	Bayesian Theory	3
STA 7466	Probability Theory I	3
STA 7467	Probability Theory II	3
STA 7828	Topics in Stochastic Processes	3
STA 7934	Special Topics in Statistics	1-9
STA 7979	Advanced Research	1-12
STA 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Statistics (PHD)

SLO 1 Knowledge

Recognize and select appropriate results, models, and methods to solve a statistical problem

SLO 2 Skills

Solve problems in statistical theory and analyze statistical methods mathematically and logically

SLO 3 Skills

Review, synthesize, and explain a body of statistical literature, and propose new areas for research

SLO 4 Skills

Create, elaborate, and apply new statistical theory and/or methodology

SLO 5 Professional Behavior

Clearly and effectively present ideas in speech and writing concerning statistical theory, methodology, and applications

Statistics (MS)

SLO 1 Knowledge

Identify and select mathematical results and statistical models appropriate for an analysis

SLO 2 Knowledge

Use mathematical results to analyze statistical methods

SLO 3 Knowledge

Apply statistical methods and models to analyze data

SLO 4 Skills

Devise novel statistical methods or mathematical results, or a novel synthesis or application of existing methods and results

SLO 5 Professional Behavior

Clearly explain, both orally and in writing, statistical methods and their application to data

Statistics (MStat)

SLO 1 Knowledge

Identify and select mathematical results and statistical models appropriate for an analysis

SLO 2 Knowledge

Use mathematical results to analyze statistical methods

SLO 3 Knowledge

Apply statistical methods and models to analyze data

SLO 4 Skills

Independently acquire and synthesize new knowledge of statistical methods and the analysis of data

SLO 5 Professional Behavior

Clearly and effectively explain, both orally and in writing, statistical methods and their application to data

College of Medicine

Interim Dean: J. Hunt

Interim Associate Dean for Graduate Education: D. Bloom

The College of Medicine offers training opportunities leading to either the Doctor of Philosophy or Master of Science degree in medical sciences. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog. For more information, please see our website: <http://graduate.education.med.ufl.edu/>.

The interdisciplinary program (IDP) in biomedical sciences is the major focus leading to the Doctor of Philosophy degree. Other graduate courses and programs are listed under departmental headings. For further information, visit <http://biomed.med.ufl.edu/>.

Departments

- College of Medicine Interdisciplinary Programs (p. 280)
 - Anatomical Sciences Education (p. 280)
 - Genetics and Genomics (Medicine) (p. 281)
 - Medical Sciences (p. 284)
- Biochemistry and Molecular Biology (p. 296)
 - Biochemistry and Molecular Biology (p. 297)
- Biostatistics (p. 299)
 - Biostatistics (Medicine) (p. 301)
- Epidemiology (p. 302)
 - Epidemiology (Medicine) (p. 303)
- Health Outcomes and Biomedical Informatics (p. 305)
- Molecular Genetics and Microbiology (p. 306)

Anatomical Sciences Education

Overview

The Anatomical Sciences Education graduate program offers the Master of Science and the Doctor of Philosophy degrees. The faculty for this program is drawn from these disciplines:

- Anatomy
- Education

For the Ph.D. program, applicants must meet the minimum requirements for the University of Florida Graduate School: Junior/Senior GPA > 3.0 and a score on the Graduate Record Exam (GRE) a minimum score of 300 for the current scale. No GRE is required for the MA program. For both the MS and the PhD program, the student will submit a minimum of three letters of reference, a statement of purpose, and a resume, which the admissions committee will use to assess the student's qualifications for admission to the program. International students must comply with current UF standards for admission to the Graduate School, including requirements for English language competency and financial responsibility.

Contact Mark Zakshevsky at zmz30@ufl.edu or visit the program's website at <https://anatomy.acb.med.ufl.edu/>.

Degrees Offered

Degrees Offered with a Major in Anatomical Sciences Education

- Doctor of Philosophy
- Master of Science
 - without a concentration
 - concentration in Medical Anatomy and Physiology

Courses

Anatomical Sciences Education Courses

Student Learning Outcomes

ANATOMICAL SCIENCES EDUCATION (PH.D.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Display appropriate behavior to instructors, fellow students and individuals who have bequeathed their bodies to medical science.

ANATOMICAL SCIENCES EDUCATION (M.S.)

SL01

Knowledge

Identify and describe the anatomical features of the human body with referent to systems, location, and planes of the body.

SL02

Skills

Develop tools to critically assess anatomical and educational research.

SL03

Professionalism

Apply ethical standards and implement excellence in all endeavors which focus on professional identity formation (i.e., development of professional values, actions and aspirations).

Associate Professor

Genetics and Genomics (Medicine)

Program Information

Program Director: T. Burris

Program Coordinator: C. Mulligan

The University of Florida Genetics Institute is a multi-college, multi-faceted research center which offers the a degree program leading to the Ph.D. in Genetics and Genomics. Minimum requirements for this degree are available in the Graduate Degrees (p. 778) section of this catalog.

What defines the Genetics & Genomics Graduate Program is the philosophy that good geneticists are integrative geneticists, who incorporate many different subfields of genetics into their work. Accordingly, faculty interests and graduate research opportunities include a wide range of areas: advances in gene therapy, understanding the maintenance of genetic variation, understanding plant immune responses, developing improved algorithms for identifying regulatory motifs in DNA sequences, and the challenges of bioethics to strategies for controlling malaria. Due to the fundamental nature of genetics in the life sciences, our training program is distributed across several colleges at UF, including but not limited to the College of Medicine (<https://graduate.education.med.ufl.edu/>), the College of Liberal Arts and Sciences (<https://clas.ufl.edu/>), the College of Agricultural and the Life Sciences (<https://cals.ufl.edu/>), and the Florida Museum of Natural History.

Graduate Program Overview

First Year:

Code	Title	Credits
ANG 7979	Advanced Research	1-12
BCH 6415	Advanced Molecular and Cell Biology	3
GMS 6221	Ethics in Genetics	1

GMS 6231	Genomics and Bioinformatics	3
GMS 6290	Genetics/Genomics Program Graduate Seminar (begins in the first semester and continues throughout students' graduate careers)	1
GMS 7877	Responsible Conduct of Biomedical Research	2
PCB 5065	Advanced Genetics	4
PHC 6052	Introduction to Biostatistical Methods	3

The first year core training is the research rotation program, in which students "rotate" through three labs in a minimum of two colleges. Rotations are critical to selecting a graduate advisor: they provide a hands-on opportunity to participate in the research being conducted in a lab, and a mutual opportunity to evaluate fit between advisor and prospective student.

Second Year:

- Individual program of courses and requirements is developed in consultation with major professor and dissertation committee

Admission Standards: Prospective students should have strong backgrounds in biology and other hard sciences. Exceptional students with other backgrounds will also be considered. The research statement required as part of the application has a particularly important part in the admissions decision. Each applicant must describe their research interests so that Graduate Faculty can evaluate knowledge of the discipline, fit to the program, and ability to articulate and motivate an interesting research problem. The required Letters of Recommendation are also extremely important in helping identify applicants with exceptional aptitude for genetics, and with research experience and promise.

Contact the Genetics and Genomics Graduate Program by email, UFGI-Info@ad.ufl.edu or by phone, 352-273-8124.

For more information, visit our website: <http://www.ufgi.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Genetics and Genomics

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Domestic Animal Genomics
- Master of Science
 - without a concentration

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Genetics and Genomics (Medicine) Courses

Code	Title	Credits
AGR 6322	Advanced Plant Breeding	3
ANG 6532	Molecular Genetics of Disease	3
ANG 7979	Advanced Research	1-12
ANG 7980	Research for Doctoral Dissertation	1-15
BCH 6415	Advanced Molecular and Cell Biology	3

STA 5328	Fundamentals of Statistical Theory	3
STA 6166	Statistical Methods in Research I	3
STA 6167	Statistical Methods in Research II	3
STA 6208	Basic Design and Analysis of Experiments	3
STA 6329	Matrix Algebra and Statistical Computing	3
STA 6934	Special Topics in Statistics	1-4
STA 7979	Advanced Research	1-12
STA 7980	Research for Doctoral Dissertation	1-15
ZOO 6927	Special Topics in Zoology	1-4
ZOO 7979	Advanced Research	1-12
ZOO 7980	Research for Doctoral Dissertation	1-15

College of Medicine Courses

Code	Title	Credits
CAI 5026	AI Ethics and Alignment in Health	3
CAI 5720	Fundamentals of Artificial Intelligence in Medicine I	3
CAI 5721	Fundamentals of Artificial Intelligence in Medicine II	3
CAI 5724	AI in Health Design Studio I	1
CAI 5730	AI in Medical Image Analysis	3
CAI 6725	AI in Health Design Studio II	3
GMS 5905	Special Topics in Biomedical Sciences	1-4
GMS 6001	Fundamentals of Biomedical Sciences I	5
GMS 6003	Fundamentals of Graduate Research and Professional Development	1
GMS 6090	Research in Medical Sciences	1-10
GMS 6096	Introduction to NIH Grant Writing for Biomedical Sciences	1
GMS 6405	Fundamentals of Endocrine Physiology	1
GMS 6406	Fundamentals of Pulmonary/Respiratory Physiology	1
GMS 6408	Fundamentals of Renal Physiology	1
GMS 6411	Fundamentals of Cardiovascular Physiology	1
GMS 6415	Fundamentals of Gastrointestinal Physiology	1
GMS 6491	Journal Club in Physiology	1
GMS 6780	Addiction: Neuroscience and Trends	3
GMS 6865	Quantitative Literacy for Translational Research	2
GMS 6875	Ethical and Policy Issues in Clinical Research	2
GMS 6895	CTS Journal Club	1
GMS 6903	Manuscript and Abstract Writing for Clinician/Scientists	2
GMS 6905	Independent Studies in Medical Sciences	1-10

GMS 6910	Supervised Research	1-5
GMS 6940	Supervised Teaching	1-5
GMS 6971	Research for Master's Thesis	1-15
GMS 7093	Introduction to Clinical and Translational Research	2
GMS 7877	Responsible Conduct of Biomedical Research	2
GMS 7944	Practicum in Biomedical Science Education	3
GMS 7950	Fundamentals of Biomedical Science Education	2
GMS 7979	Advanced Research	1-12
GMS 7980	Research for Doctoral Dissertation	1-15

Medical Sciences

Program Information

Interim Dean: J. Hunt

Interim Associate Dean for Graduate Education: D. Bloom

A complete listing of graduate programs in the College of Medicine can be found at: <https://graduate.education.med.ufl.edu>

The College of Medicine offers training opportunities leading to either the Doctor of Philosophy or Master of Science degree in medical sciences. Minimum requirements for these degrees are given in the General Information section of this catalog. The interdisciplinary program in biomedical sciences (BMS) is the major focus leading to the Doctor of Philosophy degree. Other graduate courses and programs are listed under departmental or concentration headings.

Graduate Program in Biomedical Sciences (BMS)

The Graduate Program in Biomedical Sciences (BMS Program) is an umbrella Ph.D. program that offers students the opportunity to explore one or more areas of study before choosing their mentor and concentration of study. The BMS Program has seven concentrations of study which include:

- Biochemistry and Molecular Biology
- Cancer Biology
- Genetics
- Immunology and Microbiology
- Molecular Cell Biology
- Pharmacology and Therapeutics
- Physiology and Aging

The goal of the BMS is to prepare students for a diversity of careers in research and teaching in academic, government, and commercial settings, after completion of the Ph.D. in Medical Sciences. The program provides a modern, comprehensive graduate education in biomedical sciences while providing both maximum program flexibility and appropriate specialization for advanced training. The BMS represents a cooperative effort of seven interdisciplinary advanced concentrations with participation of over 300 faculty members.

During the first semester of study, students undertake a common, comprehensive interdisciplinary core curriculum of classroom study and

a responsible conduct of research course. During the second semester, students begin to focus their coursework in one or two concentrations. Throughout the first two semesters, students participate in at least three laboratory rotations in any of the laboratories of the BMS faculty members. The advanced concentration and the supervisory committee chair are chosen no later than the end of the spring semester to maximize flexibility and facilitate an informed decision. Students entering the advanced concentrations take more specialized courses that strengthen their knowledge of these disciplines. The advanced concentration curricula are flexible enough to allow students to integrate course work offered in other advanced concentrations. In addition, journal clubs and seminars associated with their research interests allow students to further augment their scientific development.

Prospective students should have strong backgrounds in biology including genetics, chemistry (organic, quantitative, and biochemistry), physics, and calculus. Demonstrated high motivation and a serious intention to pursue research-related careers are also important considerations. This is best accomplished by performing independent study in a research laboratory for at least a semester, with a year or more being preferred. For more information, write:

BMS P.O. Box 100229 College of Medicine Gainesville, FL 32610-0229 For expanded information about the BMS, visit <http://biomed.med.ufl.edu/>.

Advanced Concentration in Biochemistry and Molecular Biology

Coordinators: Mathew E. Merritt and Craig W. Vander Kooi

The Graduate Faculty of the biochemistry and molecular biology advanced concentration share an interest in the relationships between the structure of a biological macromolecule and the function of that molecule in the cell. The structure (encoded ultimately by the genome) sets the phenotype of the organism. The uniting theme among the Graduate Faculty is their approach to research: Each uses the techniques of biochemistry and molecular biology/genetics to characterize the function of a macromolecule and show how function (and the process it is part of) is determined by the structure of that molecule and its interactions with other macromolecules. Specific research directions range from physical determination of the molecular structure of proteins to regulation of cellular processes to the genetic mapping of disease loci.

For information about other programs and courses in this field, see the Department of Biochemistry and Molecular Biology (p. 296) listing.

Advanced Concentration in Cancer Biology

Directors: Dietmar Siemann and Maria Zajac-Kaye

The Cancer Biology Concentration (CBC) provides training opportunities in cancer research ranging from basic to translational. The program spans many disciplines, including molecular and cell biology, genetics and epigenetics, biochemistry, microbiology, pharmacology, anatomy, pathology, epidemiology, bioinformatics, immunology and many others involved in the understanding of the development, progression, dissemination, and treatment of cancer.

Students in the program will have opportunities to work with outstanding cancer investigators in state-of-the-art facilities. Through combinations of courses, seminars, small group discussions, and an interdisciplinary approach to research, the program allows students to gain a unique understanding of cancer and to build a firm foundation upon which

they can build careers in academia, government, and the biotech or pharmaceutical industry

For more information please see our website: <http://BMS.med.ufl.edu/about/cancer-biology-concentration> (<http://BMS.med.ufl.edu/about/cancer-biology-concentration/>)

Advanced Concentration in Clinical and Translational Science

Director: Wayne McCormack\

The Clinical & Translational Science PhD program provides graduate students with knowledge and skills required to develop a career in multidisciplinary clinical and translational research. This program uses a team-science approach to provide didactic training and mentoring for predoctoral students performing clinical and/or translational research in health-related fields at UF. Completion of program requirements results in the award of an interdisciplinary concentration in Clinical & Translational Science. Doctoral students from all UF doctoral graduate programs who are interested in health-related research are eligible to apply.

Advanced Concentration in Genetics

Coordinators: M. R. Wallace and Lei Zhou

The concentration in genetics offers graduate training in all facets of modern molecular genetics including bacterial, viral, lower eukaryotic, mouse, developmental, and human genetics. The courses listed are taught in a 5-week modular format, ranging from 1-3 modules. For more information please see our website: <https://biomed.med.ufl.edu/about/genetics/>

Advanced Concentration in Immunology and Microbiology

Coordinators: David Ostrov, Jose Lemos, and Scott Tibbetts

The concentration in immunology and microbiology offers graduate training in cellular and molecular immunology (including immunopathology, immunogenetics, and autoimmunity) and in microbiology (including virology, bacteriology, microbial genetics, and microbial pathogenesis). The courses listed are taught in a 5-week modular format, ranging from 1-3 modules.

For more information see website: <https://biomed.med.ufl.edu/about/immunology-microbiology/>

Advanced Concentration in Medical Physics

Director: Manuel Arreola

The University of Florida's Medical Physics Graduate Program is one of the oldest medical physics programs in the United States (originating in 1961) and is accredited for graduate degrees (MS and PhD) by the Commission on Accreditation of Medical Physics Education Programs (<http://www.campep.org/>)(CAMPEP).

Academically housed in the College of Medicine (<https://med.ufl.edu/>), the program is a concentration under Medical Sciences. The

program has multiple participating departments in the Colleges of Medicine and Engineering, including Radiation Oncology, Radiology, Neurosurgery, and Biomedical Engineering. Recently, students have been conducting their research at the UF Proton Therapy Institute (<https://www.floridaproton.org/>) (UFPTI) in Jacksonville; the Mayo Clinic (<https://www.mayoclinic.org/patient-visitor-guide/florida/>) in Jacksonville, the Robert Boisenault Oncology Institute (<https://www.rboi.com/>) with multiple locations in central Florida; and the Orlando Health Cancer Institute (<https://www.orlandohealth.com/services-and-specialties/orlando-health-cancer-institute/>). Faculty from UFPTI participate in the direction of clinical training and research.

Advanced Concentration in Molecular Cell Biology

Coordinators: Alexander Ishov and William Dunn

The advanced concentration in molecular cell biology (MCB) prepares investigators for careers in biomedical research in academic or industrial settings. This multidisciplinary specialization has more than 50 participating faculty members and offers an extraordinary range of opportunities for advanced study of life at the molecular and cellular levels. The Graduate Faculty share common interests in the molecular interactions that account for functionally integrated subcellular, cellular, and tissue organization found in living organisms. The model systems in use range from yeast and cellular lime molds through *Drosophila* to birds and mammals. These systems are manipulated and analyzed using a wide range of powerful molecular, genetic, protein chemical, immunological, pharmacological, nuclear magnetic resonance (NMR), and microscopic imaging strategies. Students who select MCB take advanced course work and initiate independent research during the second year. This approach provides broad-based vision early in the program and the appropriate degree of specialization later on.

For more information see website: <https://biomed.med.ufl.edu/about/molecular-cell-biology/>

Advanced Concentration in Neuroscience

Coordinators: Benoit Giasson and Eduardo Candelario-Jalil

Graduate students in the Neuroscience Concentration of Medical Sciences are mentored by faculty who are passionate about advancing our understanding of the normal and disordered nervous system using state-of-the-art technologies. This program provides a fertile ground for trainees to develop original research that will contribute to the field and that is directly relevant to preserving brain health and combatting neural disease. As a neuroscience student at UF, you will receive broad interdisciplinary training that fosters independent critical thinking and develops problem-solving skills. This program includes rigorous coursework, specialized seminar series, and explicit training in grant writing and other professional skills. Trainees have extensive opportunities to present their research for UF colleagues and at national and

international conferences. This program prioritizes student's career development, and through a partnership with UF's McKnight Brain Institute (<https://mbi.ufl.edu/education-outreach/trainee-funding-opportunities/>), offers an array of unique training opportunities.

Advanced Concentration in Pharmacology and Therapeutics

Coordinators: Jeffrey Harrison and Gemma Casadesus

The Graduate Faculty in this advanced concentration do cutting-edge research connecting mechanisms of human disease with the

development of new medical therapies. Students learn the principals of biomedicine, such as how drugs and biological agents are discovered and developed to treat human diseases or conditions. Training in this concentration prepares graduates for career paths in academic science, pharmaceutical/biotech industry, and government/regulatory affairs.

For more information see website: <https://biomed.med.ufl.edu/about/pharmacology-concentration/>

Advanced Concentration in Physiology and Aging

Directors: Gonzalo Torres and Glenn Walter

The Graduate Faculty associated with this advanced concentration have expertise in a variety of disciplines, including molecular and cellular biology, pharmacology, physiology, neuroscience, and biochemistry. These faculty bring together unique strengths to provide the students with diverse training. Students may train in laboratories involved in cardiovascular, neuro, endocrine, and developmental physiology; pharmacology; and toxicology. Students conduct research at the molecular, cellular, and integrative levels. Many of the faculty are involved in multidisciplinary, collaborative research efforts that aim to understand basic physiological mechanisms and pathophysiological processes (e.g., cardiovascular, neurodegenerative, and neoplastic diseases).

Other Doctoral Programs in Medical Sciences

Biomedical Informatics

The Ph.D. in Medical Sciences, with a concentration in Biomedical Informatics, offers advanced training in computer science, health and medicine, biostatistics, data science and analytics, engineering, and research methodology to prepare students for academic and research careers in the growing field of biomedical informatics. Graduates will be prepared to pursue faculty-level positions and help drive innovation in health care and research.

Health Outcomes and Implementation Science

The Ph.D. in Medical Sciences, with a concentration in Health Outcomes and Implementation Science, is a specialized degree designed to put its graduates at the forefront of innovative research to develop, implement, and evaluate clinical and community-based programs that promote health and health outcomes. Throughout the curriculum, special emphasis is placed on health disparities and vulnerable populations.

Combination Degree Program: The College participates in a combination degree program between a Bachelor of Science degree with a major in Biology and a Master of Science degree with a major in Medical Sciences with or without a concentration in Pharmacology. Information on this program can be found at: <https://biology.ufl.edu/undergraduates/undergraduate-combined-degree-program-offerings/bsms-program-requirements/bachelor-of-science-in-biology-and-master-of-science-in-medical-sciences/>

Degrees Offered

Degrees Offered with a Major in Medical Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Biochemistry and Molecular Biology
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Health Outcomes and Implementation Science*
 - *optional second concentration in Health Outcomes and Policy*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Biomedical Informatics
- concentration in Cancer Biology
 - *optional second concentration in Clinical and Translational Science*
- concentration in Clinical and Translational Science
 - *optional second concentration in Health Outcomes and Implementation Science*
- concentration in Domestic Animal Genomics
- concentration in Genetics
 - *optional second concentration in Cancer Biology*
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Health Outcomes and Implementation Science*
 - *optional second concentration in Health Outcomes and Policy*
- concentration in Health Outcomes and Implementation Science
 - *optional second concentration in Clinical and Translational Science*
- concentration in Imaging Science and Technology
- concentration in Immunology and Microbiology
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Health Outcomes and Implementation Science*
 - *optional second concentration in Health Outcomes and Policy*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Medical Physics
 - *optional second concentration in Clinical and Translational Science*
- concentration in Molecular Cell Biology
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Health Outcomes and Implementation Science*
 - *optional second concentration in Health Outcomes and Policy*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Neuroscience
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Health Outcomes and Implementation Science*
 - *optional second concentration in Health Outcomes and Policy*
- concentration in Pharmacology & Therapeutics
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Physiology and Aging
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Reproductive Biotechnology
- concentration in Toxicology
- Master of Science
 - without a concentration
 - concentration in Biomedical Informatics
 - concentration in Biomedical Neuroscience

- concentration in Domestic Animal Genomics
- concentration in Forensic Medicine
- concentration in Genetics and Genomics
- concentration in Health Outcomes and Implementation Science
- concentration in Innovative Aging Studies
 - *optional second concentration in Medical Physiology and Pharmacology*
- concentration in Medical Anatomy and Physiology
- concentration in Medical Pharmacology and Toxicology
- concentration in Medical Physics
- concentration in Medical Physiology and Aging
 - *optional second concentration in Medical Anatomy and Physiology*
- concentration in Medical Physiology and Pharmacology
 - *optional second concentration in Medical Anatomy and Physiology*
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Molecular Cell Biology
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Molecular Genetics and Microbiology
- concentration in Neuroscience
- concentration in Pharmacology
 - *optional second concentration in Reproductive Biotechnology*
- concentration in Reproductive Biotechnology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Core Courses-IDP

Code	Title	Credits
GMS 6001	Fundamentals of Biomedical Sciences I	5
GMS 6003	Fundamentals of Graduate Research and Professional Development	1
GMS 6007	Fundamentals of Neuroscience	3
GMS 6009	Principles of Drug Action and Therapeutics	3
GMS 6065	Fundamentals of Cancer Biology	3
GMS 6090	Research in Medical Sciences	1-10
GMS 7877	Responsible Conduct of Biomedical Research	2
GMS 7593	Topics in Pharmacology and Toxicology	1-3

General and Advanced Courses

Code	Title	Credits
GMS 5905	Special Topics in Biomedical Sciences	1-4
GMS 6090	Research in Medical Sciences	1-10
GMS 6622	Mitochondrial Biology in Aging and Disease	2
GMS 6905	Independent Studies in Medical Sciences	1-10
GMS 6910	Supervised Research	1-5
GMS 6875	Ethical and Policy Issues in Clinical Research	2
GMS 6940	Supervised Teaching	1-5
GMS 6971	Research for Master's Thesis	1-15
GMS 7950	Fundamentals of Biomedical Science Education	2
GMS 7944	Practicum in Biomedical Science Education	3
GMS 7877	Responsible Conduct of Biomedical Research	2
GMS 7979	Advanced Research	1-12
GMS 7980	Research for Doctoral Dissertation	1-15

Advanced Concentration Courses

Advanced Concentration in Biochemistry and Molecular Biology Courses

Code	Title	Credits
BCH 6040	Research Discussion in Biochemistry and Molecular Biology	1
BCH 6206	Advanced Metabolism	3
BCH 6207	Advanced Metabolism: Role of Membranes in Signal Transduction and Metabolic Control	1
BCH 6208	Advanced Metabolism: Regulation of Key Reactions in Carbohydrate and Lipid Metabolism	1
BCH 6209	Advanced Metabolism: Regulation of Key Reactions in Amino Acid and Nucleotide Metabolism	1
BCH 6415	Advanced Molecular and Cell Biology	3
BCH 6740	Physical Biochemistry/Structural Biology	3
BCH 6741C	Magnetic Resonance Imaging and Spectroscopy in Living Systems	3
BCH 6744	Molecular Structure Determination by X-ray Crystallography	1
BCH 6745	Molecular Structure and Dynamics of NMR Spectroscopy	1
BCH 6746	Structural Biology: Macromolecular Structure Determination	1
BCH 6747	Structural Biology/Advanced Physical Biochemistry: Spectroscopy and Hydrodynamics	1
BCH 6749C	Numerical Methods in Structural Biology	1
BCH 6876	Recent Advances in Membrane Biology	1
BCH 6877	Recent Advances in Structural Biology	1
BCH 6936	Biochemistry Seminar	1
BCH 7410	Advanced Gene Regulation	1
BCH 7412	Epigenetics of Human Disease and Development	1
BCH 7515	Structural Biology/Advanced Physical Biochemistry: Kinetics and Thermodynamics	1
GMS 6195	Epigenetics Journal Club	1

Advanced Concentration in Cancer Biology Courses

Code	Title	Credits
BCH 5413	Mammalian Molecular Biology and Genetics	3
BCH 7410	Advanced Gene Regulation	1
BCH 7412	Epigenetics of Human Disease and Development	1
GMS 5905	Special Topics in Biomedical Sciences	1-4
GMS 6009	Principles of Drug Action and Therapeutics	3
GMS 6053	Cancer Biology and Therapeutics	1
GMS 6061	Nuclear Structure and Dynamics	1
GMS 6064	Tumor Biology	1
GMS 6065	Fundamentals of Cancer Biology	3
GMS 6090	Research in Medical Sciences	1-10
GMS 6232	Advanced Applications of Bioinformatics in Genetics	1
GMS 6335	Advanced Stem Cell Biology: Tissue Engineering	1
GMS 6338	Recent Advances in Cancer Metastasis	1
GMS 6421	Cell Biology	4
GMS 6647	Transcriptional and Translational Control of Cell Growth and Proliferation	1

GMS 6683	Fundamentals of Vascular Physiology and Pathology	2
GMS 6691	Special Topics in Cell Biology and Anatomy	1-4
GMS 6812	Health Outcomes Research in Cancer	3
PHC 6937	Special Topics in Public Health	1-6

Advanced Concentration in Genetics Courses

Code	Title	Credits
BCH 7410	Advanced Gene Regulation	1
GMS 6012	Human Genetics	1
GMS 6013	Developmental Genetics	1
GMS 6014	Applications of Bioinformatics to Genetics	1
GMS 6034	Advanced Virology I: Genetics and RNA	1
GMS 6038	Bacterial Genetics and Physiology	1
GMS 6153	Advanced Bacterial Genetics	1
GMS 6195	Epigenetics Journal Club	1
GMS 6231	Genomics and Bioinformatics	3
GMS 6232	Advanced Applications of Bioinformatics in Genetics	1
GMS 6290	Genetics/Genomics Program Graduate Seminar	1
GMS 6506	Biologic Drug Development	1
GMS 6920	Genetics Journal Colloquy	1
GMS 7192	Journal Colloquy	1

Advanced Concentration in Health Outcomes and Implementation Science Courses

Code	Title	Credits
GMS 5905	Special Topics in Biomedical Sciences	1-4
GMS 6802	Health Outcomes Research for Chronic Diseases	3
GMS 6803	Data Science for Clinical Research	3
GMS 6804	Translational Bioinformatics	3
GMS 6805	Information Modeling in Biomedicine	3
GMS 6806	Security and Privacy for Clinical Research	3
GMS 6812	Health Outcomes Research in Cancer	3
GMS 6813	Pragmatic Clinical Trials	3
GMS 6820	Qualitative Inquiry and Analysis in Health Intervention Development and Implementation	3
GMS 6822	Measuring and Analyzing Health Outcomes II	3
GMS 6829	Longitudinal Research Design	2
GMS 6833	Health Outcomes Research in Vulnerable Populations	3
GMS 6836	Foundations of Learning Health Systems Research	1
GMS 6846	Systematic Review and Meta-Analysis in Clinical, Health Services Research and Public Health	2
GMS 6848	Ensuring Rigor and Reproducibility in Clinical and Translational Research	2
GMS 6850	Foundations of Biomedical Informatics	3
GMS 6851	Implementation Science Fundamentals	3
GMS 6852	Collaborative Clinical and Health Research Methods	2
GMS 6853	Implementation Science in the Learning Health System	3
GMS 6856	Introduction to Biomedical Natural Language Processing	3
GMS 6857	Clinical Decision Support Systems	3

GMS 6859	Foundations of Programming in Biomedical Studies	3
GMS 6885	Translational Health Research Design	3
GMS 6889	Systematic Review Methods	3
GMS 6893	Clinical and Translational Science Seminar Series	2
GMS 7858	Causal Artificial Intelligence for Health Research	3
GMS 7866	Principles of Referent Tracking in Biomedical Informatics	3
GMS 7886	Health Outcomes and Policy PhD Seminar: Applied Research	3
GMS 7887	Health Outcomes & Policy PhD Research Seminar	1
GMS 7906	Grant Writing for Health Outcomes Studies	2
STA 5503	Categorical Data Methods	3
STA 5701	Applied Multivariate Methods	3
STA 6166	Statistical Methods in Research I	3
STA 7179	Survival Analysis	3
STA 7249	Generalized Linear Models	3
STA 7346	Statistical Inference	3
STA 7347	Advanced Inference	3

Advanced Concentration in Immunology and Microbiology Courses

Code	Title	Credits
VME 6505	Autoimmunity	1
GMS 6034	Advanced Virology I: Genetics and RNA	1
GMS 6035	Advanced Virology II: RNA Viruses	1
GMS 6036	Molecular Virology III: DNA Viruses	1
GMS 6038	Bacterial Genetics and Physiology	1
GMS 6040	Host-Pathogen Interactions	1
GMS 6121	Infectious Diseases	3
GMS 6140	Principles of Immunology	4
GMS 6193	Research Conference in Oral Biology	1-3
GMS 6196	Virology Journal Club	1
GMS 6198	Bacterial Pathogenesis Journal Club	1
GMS 6337	B Cell Development in Health and Disease	1
GMS 6382	Special Topics in Immunology	1-3
GMS 6921	Immunology/Microbiology Journal Colloquy	1
GMS 7192	Journal Colloquy	1
VME 6934	Topics in Veterinary Medical Sciences	1-4

Advanced Concentration in Medical Physiology and Pharmacology Courses for the Master of Science Degree

Required core pharmacology courses (9 credits):

GMS 6551 Fundamentals of Medical Pharmacology and Therapeutics (1 cr.)

GMS 6520 Medical Pharmacology and Therapeutics I: The Nervous System (2 cr.)

GMS 6530 Medical Pharmacology and Therapeutics II: Cardiovascular, Renal and Respiratory Systems (2 cr.)

GMS 6531 Medical Pharmacology and Therapeutics III: Endocrine, Musculoskeletal and Reproductive Systems (2 cr.)

GMS 6540 Medical Pharmacology and Therapeutics IV: Cancer, Antimicrobial and Antiparasitic Agents (2 cr.)

Select an additional 6 pharmacology credits from the list below (6 Credits):

GMS 6510 Pharmacology of Cannabis, Tobacco, and Vaping (2 cr.)

GMS 6070 Sensory and Motor Systems (3 cr.)

GMS 6504 Advanced Medical Pharmacology (2 cr.)
 GMS 6552 Cell Signaling & Therapeutics (2 cr.)
 GMS 6594 Pharmacology Literature (1 cr.)
 GMS 6591 Communicating Pharmacology (1 cr.)

Required core physiology courses (9 credits):

GMS 6440 Fundamentals of Medical Physiology (1 cr.)
 GMS 6401 Medical Renal Physiology (2 cr.)
 GMS 6402 Medical Respiration Physiology (3 cr.)
 GMS 6474 Medical Cardiovascular and Muscle Physiology (3 cr.)

Select an additional 6 physiology credits from the list below (6 credits):

GMS 6419 Medical Endocrinology and Reproduction (3 cr.)
 GMS 6479 Medical Gastrointestinal Physiology (2 cr.)
 GMS 6410 Physiology of the Circulation of Blood (2 cr.)
 GMS 6413 Advances in Hypertension Research (2 cr.)
 GMS 6414 Advanced Renal Physiology (2 cr.)
 GMS 6470 Adv. Respiration Physiology 1 (3 cr.)
 GMS 6475 Adv. Respiration Physiology 2 (3 cr.)

Advanced Concentration in Molecular Cell Biology Courses

Code	Title	Credits
GMS 5905	Special Topics in Biomedical Sciences	1-4
GMS 6013	Developmental Genetics	1
GMS 6061	Nuclear Structure and Dynamics	1
GMS 6062	Protein Trafficking	1
GMS 6063	Cell Biology of Aging	1
GMS 6064	Tumor Biology	1
GMS 6065	Fundamentals of Cancer Biology	3
GMS 6331	Stem Cell Biology	1
GMS 6335	Advanced Stem Cell Biology: Tissue Engineering	1
GMS 6336	Advanced Stem Cell Biology: Regenerative Medicine	1
GMS 6421	Cell Biology	4
GMS 6622	Mitochondrial Biology in Aging and Disease	2
GMS 6635	Organization of Cells and Tissues	3
GMS 6647	Transcriptional and Translational Control of Cell Growth and Proliferation	1
GMS 6690	Molecular Cell Biology Journal Club	1
GMS 6691	Special Topics in Cell Biology and Anatomy	1-4
GMS 6692	Research Conference in Anatomy and Cell Biology	1

Advanced Concentration in Neuroscience Courses

Code	Title	Credits
GMS 5924	Navigating the Neuroscience PhD Program	1
GMS 6007	Fundamentals of Neuroscience	3
GMS 6021	Organization and Development of the Nervous System	2
GMS 6022	Principles of Neurophysiology	2
GMS 6023	Molecular Neuroscience and Neuropharmacology	3
GMS 6025C	Statistics for Neuroscientists	4
GMS 6029	Brain Journal Club	1
GMS 6073	Disorders of the Developing Nervous System	1
GMS 6080	Basic Magnetic Resonance Imaging	1
GMS 6082	Introduction to Functional Magnetic Resonance Imaging	1

GMS 6701	Functional and Comparative Neuroanatomy for Professionals	3
GMS 6705	Functional Human Neuroanatomy	4
GMS 6711	Neurobiology of Pain	1
GMS 6712	Biological Clocks in Neural Health and Disease	3
GMS 6713	Neurobiol of Behav Disorders	3
GMS 6719	Computational Skills for Neuroscience	2
GMS 6741	Neuropathology	1
GMS 6750	Molecular Pathobiology of Neural Disease	1
GMS 6757	Introduction to Alzheimer's Disease and Related Dementias: Clinical and Mechanistic Principles	2
GMS 6790	New Developments in Neuroscience	2
GMS 6791	Visual Neuroscience Journal Club	1-2
GMS 6792	Neuroscience Graduate Research Seminar	1
GMS 6793	Neuroimaging	1
GMS 6796	Aging and the Brain	3
GMS 6797	Neuroscience Professional Survival Skills	3
GMS 7794	Neuroscience Seminar	1
GMS 7795	Special Topics in Neuroscience	1-4

Advanced Concentration in Oral Biology Courses

Code	Title	Credits
DEN 6680	Principles and Craniofacial Biology and Emerging Therapies	2
DEN 6681	Craniofacial Pathobiology	2

GMS 6847	Translational Research and Therapeutics: Bench, Bedside, Community, & Policy	3	GMS 7906	Grant Writing for Health Outcomes Studies	2
GMS 6848	Ensuring Rigor and Reproducibility in Clinical and Translational Research	2	GMS 7944	Practicum in Biomedical Science Education	3
GMS 6850	Foundations of Biomedical Informatics	3	GMS 7950	Fundamentals of Biomedical Science Education	2
GMS 6851	Implementation Science Fundamentals	3	GMS 7979	Advanced Research	1-12
GMS 6852	Collaborative Clinical and Health Research Methods	2	GMS 7980	Research for Doctoral Dissertation	1-15
GMS 6853	Implementation Science in the Learning Health System	3	Student Learning Outcomes		
GMS 6856	Introduction to Biomedical Natural Language Processing	3	Medical sciences (PHD)		
GMS 6857	Clinical Decision Support Systems	3	SLO1 Knowledge		
GMS 6865	Quantitative Literacy for Translational Research	2	Students will identify and explain the core knowledge for the Interdisciplinary Program (genetics, cell biology, biochemistry/ molecular biology) followed by concentration-specific core knowledge (genetics, molecular cell biology, immunology/microbiology, physiology/ pharmacology, biochemistry/molecular biology, or neuroscience). At the most basic level, this will include recognizing and explaining fundamental facts in the disciplines. At the intermediate level this will include explaining relationships between facts and explanation of mechanisms of biological processes. At the most advanced level this will include interpreting experimental data and designing experiments.		
GMS 6867	Big Data for the Biologist	3	SLO2 Research Skills		
GMS 6873	Introduction to Medical Bioethics	3	Students will read, interpret and critically analyze published literature in their field to formulate hypotheses; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; and then reformulate the hypotheses.		
GMS 6874	Medicine and the Law	3	SLO3 Professional Behavior		
GMS 6875	Ethical and Policy Issues in Clinical Research	2	Students apply professional behavior in their conduct of research, specifically identification and illustration of ethical conduct, including employment of appropriate safety, administrative, and regulatory rules		
GMS 6876	Law & Ethics of Aging	3	Medical Sciences (MS)		
GMS 6885	Translational Health Research Design	3	SLO1 Knowledge		
GMS 6889	Systematic Review Methods	3	Identifies, describes, and explains key concepts, study designs, and research methodologies necessary to conduct research in medical and health care disciplines		
GMS 6893	Clinical and Translational Science Seminar Series	2	SLO2 Research		
GMS 6895	CTS Journal Club	1	Explains research ideas, designs, and produces a scientifically sound clinical/translational research project in an ethically sound manner, which includes testable hypotheses and specific aims, presenting scientific relevancy, stating appropriate statistical and ethical considerations, detailing subject enrollment, data collection and analysis, and reporting how the project will lead to improvement of human health		
GMS 6903	Manuscript and Abstract Writing for Clinician/Scientists	2	SLO3 Professionalism		
GMS 6905	Independent Studies in Medical Sciences	1-10	Organize activities that promote self-improvement, scientific teamwork, and improvement in human health		
GMS 6910	Supervised Research	1-5	Faculty		
GMS 6920	Genetics Journal Colloquy	1	Professor		
GMS 6921	Immunology/Microbiology Journal Colloquy	1	• Ahmed, Mustafa Mohammed		
GMS 6934	Cancer Biology Data Discussion	1	• Berceli, Scott A.		
GMS 6940	Supervised Teaching	1-5	• Mehrad, Borna		
GMS 6943	Master's Translational Biotechnology Internship	3	• Morris, John Glenn		
GMS 6945	Team Science	1	• Scali, Salvatore		
GMS 6951	Teaching Biomedical Science	2			
GMS 6952	Curricular Models for Biomedical Science	3			
GMS 6953	Art and Science of Mentoring	1			
GMS 6954	Assessing Effectiveness of Biomedical Science Teaching and Curricula	3			
GMS 6971	Research for Master's Thesis	1-15			
GMS 6975	Team Science	1			
GMS 7093	Introduction to Clinical and Translational Research	2			
GMS 7122	Advanced Tropical Medicine	3			
GMS 7133	Advanced Molecular Virology	2			
GMS 7191	Research Conference	1			
GMS 7192	Journal Colloquy	1			
GMS 7194	Biotechnology Seminar	1-2			
GMS 7593	Topics in Pharmacology and Toxicology	1-3			
GMS 7794	Neuroscience Seminar	1			
GMS 7795	Special Topics in Neuroscience	1-4			
GMS 7858	Causal Artificial Intelligence for Health Research	3			
GMS 7866	Principles of Referent Tracking in Biomedical Informatics	3			
GMS 7877	Responsible Conduct of Biomedical Research	2			
GMS 7886	Health Outcomes and Policy PhD Seminar: Applied Research	3			
GMS 7887	Health Outcomes & Policy PhD Research Seminar	1

Biochemistry and Molecular Biology Department

Chair: J. B. Flanagan

Graduate Coordinator: A. Berglund

Biochemistry and Molecular Biology Department faculty mentor M.S. and Ph.D. students in the College of Medicine interdisciplinary program (IDP) in medical sciences. Students interested in pursuing a doctoral degree can view specific features of the biochemistry and molecular biology concentration at <http://biochem.med.ufl.edu/> and <http://idp.med.ufl.edu>. For admission information, visit the IDP website. Department faculty also mentor Ph.D. students in other college programs and participate actively

in the research and teaching functions of various centers such as the Center for Epigenetics and the Center for Structural Biology.

The Biochemistry and Molecular Biology Department also offers a combination BS/MS program that allows students to earn both a Bachelor's and Master's degree at an accelerated pace by counting 12 credit hours of approved courses towards both degrees. Students who are Interdisciplinary Science majors with a focus in Biochemistry or majoring in a related field and doing research with a faculty member in the Department of Biochemistry and Molecular Biology are eligible to apply. This program is considered to be a 4 + 1 program because students may finish both degrees within 5 years. To be considered with this program, students need to work with the department at the beginning of their junior year or earlier to identify courses that can count towards both degrees.

Majors

- Biochemistry and Molecular Biology (p. 297)

Faculty

Professor

- Bloom, Linda B.
- Bungert, Jorg
- Flanagan, James B.
- Kladde, Michael P.
- Long, Joanna R.
- Mareci, Thomas H.
- McKenna, Robert
- Merritt, Matthew E.
- Purich, Daniel L.
- Stacpoole, Peter W.

Associate Professor

- Bubbs, Michael Raymond
- Lu, Jianrong J.
- Xie, Mingyi

Assistant Professor

- Caglayan, Melike

Research Associate Professor

- Koroly, Mary J.

Research Assistant Professor

- Douma, Lauren G.

Affiliated Faculty

- Brusko, Todd Michael
Professor
- Cousins, Robert J.
Eminent Scholar
- Denslow, Nancy D.
Professor
- Fujii, Kotaro
Assistant Professor

- Gentry, Matthew Shawn
Professor
- Gumz, Michelle L.
Associate Professor
- Khemtong, Chalermchai
Associate Professor
- Li, Chenglong
Professor
- LI, ZHIPENG
Assistant Professor
- Licht, Jonathan D.
Professor
- Nemudryi, Artem A.
Assistant Professor
- Qian, Zhijian
Professor
- Southwick, Frederick Seacrest
Professor
- Sun, Ramon C.
Associate Professor
- Vander Kooi, Craig W.
Professor
- Wallace, Margaret R.
Professor
- Zarrinpar, Ali
Professor
- Zhao, Chen
Assistant Professor

Biochemistry and Molecular Biology Program Information

In addition to offering the Masters program in Biochemistry and Molecular Biology, the Biochemistry and Molecular Biology Department faculty mentor Ph.D. students in the College of Medicine interdisciplinary program (IDP) in medical sciences as well. Students interested in pursuing a doctoral degree can view specific features of the biochemistry and molecular biology concentration at <http://biochem.med.ufl.edu/> and <http://idp.med.ufl.edu>. For admission information, visit the IDP website.

The Department offers a wide variety of courses for graduate students studying in the life sciences. The research expertise of the faculty spans the areas from cell biology, metabolism, and molecular biology to physical biochemistry/structural biology. Current research interests include viral protease inhibitors, viral RNA replication, bioenergetics and proton translocation, X-chromosome structure and function, cytoskeletal assembly and dynamics, enzyme mechanism and control, chromatin structure, gene expression and regulation, mitochondrial biogenesis and evolution, the genetics of inherited disease, nutrient membrane transporters, protein site-directed mutagenesis, ribosome structure and function, signal transduction, structural biology and dynamics of macromolecules, protein-nucleic acid interactions, transgenic animal models, and virus crystal structure.

Prospective graduate students should have adequate training in chemistry and biology. Minor deficiencies may be made up immediately after entering graduate school. Previous undergraduate experience in a research laboratory is highly recommended. Doctoral students are required to take a core IDP course in fall term of their first year; and

beginning in spring term, students take advanced classes in areas of interest. Specific advanced-level courses may be recommended by the student's supervisory chair and committee. Courses are open to all graduate students and advanced undergraduates. Additional courses may be listed in the Advanced Concentration in Biochemistry and Molecular Biology section under the major of Medical Sciences.

Degrees Offered

Degrees Offered with a Major in Biochemistry and Molecular Biology

- Master of Science
 - no concentration
 - concentration in Reproductive Biotechnology

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Biochemistry and Molecular Biology Courses

Code	Title	Credits
BCH 5205	Medical Metabolism	3
BCH 5404	Fundamentals of Biochemistry & Molecular Biology	4
BCH 5413	Mammalian Molecular Biology and Genetics	3
BCH 6040	Research Discussion in Biochemistry and Molecular Biology	1
BCH 6206	Advanced Metabolism	3
BCH 6207	Advanced Metabolism: Role of Membranes in Signal Transduction and Metabolic Control	1
BCH 6208	Advanced Metabolism: Regulation of Key Reactions in Carbohydrate and Lipid Metabolism	1
BCH 6209	Advanced Metabolism: Regulation of Key Reactions in Amino Acid and Nucleotide Metabolism	1
BCH 6415	Advanced Molecular and Cell Biology	3
BCH 6740	Physical Biochemistry/Structural Biology	3
BCH 6741C	Magnetic Resonance Imaging and Spectroscopy in Living Systems	3
BCH 6744	Molecular Structure Determination by X-ray Crystallography	1
BCH 6744L	Molecular Structure Determination by X-Ray Crystallography Laboratory	1
BCH 6745	Molecular Structure and Dynamics of NMR Spectroscopy	1
BCH 6745L	Molecular Structure and Dynamics by NMR Spectroscopy Laboratory	1
BCH 6746	Structural Biology: Macromolecular Structure Determination	1
BCH 6747	Structural Biology/Advanced Physical Biochemistry: Spectroscopy and Hydrodynamics	1
BCH 6749C	Numerical Methods in Structural Biology	1
BCH 6876	Recent Advances in Membrane Biology	1
BCH 6877	Recent Advances in Structural Biology	1
BCH 6905	Independent Studies in Biochemistry and Molecular Biology	1-5

BCH 6906	Readings in Medical Biochemistry & Molecular Biology	1
BCH 6910	Supervised Research	1-5
BCH 6936	Biochemistry Seminar	1
BCH 6971	Research for Master's Thesis	1-15
BCH 7410	Advanced Gene Regulation	1
BCH 7412	Epigenetics of Human Disease and Development	1
BCH 7515	Structural Biology/Advanced Physical Biochemistry: Kinetics and Thermodynamics	1
GMS 5905	Special Topics in Biomedical Sciences	1-4

College of Medicine Courses

Code	Title	Credits
CAI 5026	AI Ethics and Alignment in Health	3
CAI 5720	Fundamentals of Artificial Intelligence in Medicine I	3
CAI 5721	Fundamentals of Artificial Intelligence in Medicine II	3
CAI 5724	AI in Health Design Studio I	1
CAI 5730	AI in Medical Image Analysis	3

GMS 6940	Supervised Teaching	1-5
GMS 6971	Research for Master's Thesis	1-15
GMS 7093	Introduction to Clinical and Translational Research	2
GMS 7877	Responsible Conduct of Biomedical Research	2
GMS 7944	Practicum in Biomedical Science Education	3
GMS 7950	Fundamentals of Biomedical Science Education	2
GMS 7979	Advanced Research	1-12
GMS 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Biochemistry & Molecular Biology (MS)

SLO1 Competency: Knowledge of Biochemistry & Molecular Biology

Students will identify and explain fundamental principles in biochemistry and molecular biology by applying this knowledge to solve problems, to explain the background to a research project, and to answer novel questions in a research setting

SLO2 Competency: Research Methods

Students will perform an independent research project that requires students to: develop technical expertise required to independently perform experimental work, independently analyze data, report key results from experiments in both written and oral formats, critically evaluate primary literature, and reproduce experimental methods from the literature

SLO3 Professionalism

Students will be professional in their conduct of research. They will adhere to and practice ethical conduct of research and implement established safety, regulatory, and administrative rules

Associate Chair for Education: B. Brumback

Graduate Coordinator: K. Cason

The Department of Biostatistics offers the Doctor of Philosophy degree in biostatistics (p. 301), the Master of Science degree in biostatistics (<http://biostat.ufl.edu/education/ms-in-biostatistics/>), and the Master of Public Health degree with concentration biostatistics, which is described in detail in the Public Health section of the catalog. These programs in the Department are designed to prepare students for research and faculty positions; careers in health agencies and health-related institutions; and for consultation, especially in the biomedical fields. Although each graduate program has a set of required courses, there is ample flexibility in the programs to allow each student to develop strengths and interests through elective courses, seminars, and tutorials.

Doctor of Philosophy

The biostatistics doctoral program requires a minimum of 90 semester credits beyond the bachelor's degree. All students must complete a minimum of 54 credits of biostatistics/statistics course work (30 credits can be transferred from a previously earned Master of Science program if applicable), 6 credits of public health course work, 3 credits of a consulting requirement, 6 credits of the cognate requirement, and 21 credits of dissertation work.

All graduates of the program are expected to be able to

- Conduct independent research in the development of new biostatistical methodology

- Engage in successful collaborations with investigators in new quantitative fields
- Write statistical methodology papers for peer-reviewed statistical and biostatistical journals
- Write collaborative papers for peer-reviewed subject matter journals
- Compete successfully for research and teaching positions in academic institutions, federal and state agencies, or private institutions

Specific course requirements are described at the program website <http://biostat.ufl.edu/education/phd-in-biostatistics/>.

Master of Science

The Master of Science in Biostatistics Program in the Department of Biostatistics requires a minimum of 36 post-baccalaureate credit hours. The program is designed to facilitate students' development of a strong theoretical foundation in biostatistics, broad-based understanding of biostatistical methods, and expertise in a cognate field. A typical student will be enrolled full-time for two years. Upon successful completion of the program, graduates will be awarded an M.S. degree in biostatistics. We currently offer the Master of Science program in both traditional (campus) and online learning delivery methods.

The principal goal of the M.S. program is to prepare highly qualified individuals for future Ph.D. training and for careers in biostatistics practice. This training is conducted in the innovative and interdisciplinary public health culture of the college of public health and health professions and the college of medicine and will produce graduates who will help address the shortage of biostatisticians. We expect our graduates to be highly competitive in three primary settings: academic university-based settings, industry, and federal agencies that involve research and/or public health practice.

Specific course requirements are described at the program website <http://biostat.ufl.edu/education/ms-in-biostatistics/> (Campus) and <http://biostat.ufl.edu/education/msonline/> (Online).

Student Learning Outcomes

Biostatistics (PHD)

SLO 1 Knowledge

Communicate the underpinning of biostatistics concepts and methods

SLO 2 Skills

Identify, research, and acquire new biostatistical concepts and methods on one's own

SLO 3 Skills

Develop and apply new biostatistical concepts and methods independently

SLO 4 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, conduct and communications

SLO 5 Professional Behavior

Participation in academic conferences to disseminate knowledge and represent the university

Biostatistics (MS)

SLO 1 Knowledge

Communicate the underpinning of biostatistics concepts and methods

SLO 2 Skills

Apply biostatistical concepts and methods, interpret results, communicate

SLO 3 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, conduct and communications

Epidemiology Department

Chair: L. Cottler

Ph.D. Program Director: C. Prins

M.S. Program Director: C. Woodstock Striley

The Department of Epidemiology – jointly governed by both the College of Public Health and Health Professions and the College of Medicine – offers the Doctor of Philosophy degree in epidemiology, Masters of Science in epidemiology, as well as the Master of Public Health degree with a concentration in epidemiology (described here (p. 331)). Minimum requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog. The programs in the Department are designed to prepare students for careers in academic research environments, careers in public health agencies and health-related institutions, and for consultation, especially in the biomedical fields.

More information on these programs is available at the program page below and at the department website: <http://epidemiology.phhp.ufl.edu>.

Epidemiology (Medicine) Program Information

The **Ph.D. in Epidemiology program** is in the Department of Epidemiology, which is jointly governed by the College of Public Health and Health Professions and the College of Medicine. The program requires a minimum of 90 semester credits beyond the bachelor's degree. All students must complete at least 36 credits of epidemiology core courses, 6 credits of statistics electives, 18 credits of epidemiology electives, 15 credits of general electives, and 15 credits of dissertation research. Students may also apply to graduate with one or two concentrations selected from one of seven concentration areas. All entering students

who do not hold MPH or equivalent degrees are also required by the College of Public Health and Health Professions to complete an Introduction to Public Health course.

All students admitted to the Ph.D. program in Epidemiology are fully funded for four years, including a tuition waiver and a stipend. Depending on a student's source of funding, the student may work for up to 20 hours per week as a research assistant, a teaching assistant, or some combination of the both. Funding sources for students may include the student's research mentor, the department, the college, the Graduate School, or external fellowships or scholarships pursued by the student.

The core course work is designed to incorporate competencies recommended in the report of the 2002 workshop on doctoral education in epidemiology from the American College of Epidemiology and the Association of Schools and Programs of Public Health, and criteria for applied epidemiology competencies. The overall outcomes expected of all graduates are as follows:

1. Apply epidemiological methods to address critical and/or emerging public health issues through the use of:
 - Appropriate epidemiological research designs
 - Advanced statistical analysis methods for health studies
 - Data structures and measurement methods for health research
 - Depth of knowledge in an area of specialization
2. Apply ethical thinking to a questionable ethics case from the current news
3. Develop grant proposals and manage research projects
4. Write scientific papers for publication in peer-reviewed journals, and communicate research results to scientists, policy makers, and the public

Students in the Ph.D. program in Epidemiology may apply to graduate with a concentration in up to two of the following areas:

- Cancer Epidemiology
- Genetic Epidemiology
- Gero-Epidemiology
- Infectious Disease Epidemiology
- Psychiatric Epidemiology
- Clinical and Translational Science

Concentrations allow PhD students to focus their elective coursework toward specialized content areas that interest them. All concentrations offered by the Department of Epidemiology are completely optional, and students may enroll in up to two concentrations. Enrollment in a concentration requires the approval of the student's academic advisor, research mentor, PhD Program Director, and Curriculum Committee Chair.

All concentrations require that students submit either (a) dissertation aims or (b) a first-authored publication that documents research in the area of the concentration in addition to the required courses.

The overarching goal of each concentration is to provide learners with advanced training in each respective field. This training will help prepare researchers for the frontlines of interdisciplinary team science targeted towards improving the quality of life, health, and society using epidemiologic tools and methods.

Details of the Ph.D. in Epidemiology program and application information are available at our website: <http://epidemiology.php.ufl.edu/about/>

ph-d-in-epidemiology-2 (<http://epidemiology.phhp.ufl.edu/about/ph-d-in-epidemiology-2/>).

The **Master of Science in Epidemiology (MSE) program** is a 36-credit program that prepares students for careers in the public health arena that are focused on the surveillance and prevention of illnesses among diverse populations around the world. Students will be trained in the foundational aspects of epidemiology, including person, place, and time; risk and protective factors; and the social determinants of health. Areas of focus may include chronic disease, infectious disease, geriatric, environmental, psychiatric, social, cancer, and maternal and child health epidemiology.

The thesis is required to demonstrate skill in independent inquiry and investigation, under the tutelage of a mentor. All students must complete at least 15 credits of epidemiology core courses, 8 credits of biostatistics courses, 4 credits of professional development courses, 5 credits of electives, and 4 credits of thesis research.

Graduates of the MS in Epidemiology program will be able to:

- Apply surveillance, assessment, evaluation, and other foundational epidemiological research designs to all areas of interest,
- Choose appropriate measurement and analytic methods to study health and disease in a population,
- Utilize biological, behavioral and social theory to understand how to prevent and intervene to promote the public health.

Details of the Master of Science in Epidemiology program and application information are available at our website: <https://epidemiology.phhp.ufl.edu/academics/mse/>.

Degrees Offered

Degrees Offered with a Major in Epidemiology

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Gero-Epidemiology
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Epidemiology (PHD)

SLO1 Research Studies

Design epidemiologic research studies and analyze data to answer health-related research questions that are currently relevant to the population.

SLO2 Independent Research

Prepare to become an independent researcher in the field of Epidemiology.

SLO3 Epidemiology Concepts

Illustrate a thorough understanding of epidemiology concepts.

SLO4 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication, and build academic skills such as grant writing

Epidemiology (MS)

SLO 1 MSE Knowledge

Apply surveillance, assessment, evaluation, and other foundational epidemiological research designs to all areas of interest

SLO 2 MSE Skills

Utilize biological, behavioral and social theory to understand how to prevent and intervene to promote the public health

SLO 3 MSE Skills Choose appropriate measurement and analytic methods to study health and disease in a population

SLO 4 MSE Professional Behavior

Display ethical behavior, cultural sensitivity, integrity in research conduct, honesty, and teamwork

Health Outcomes and Biomedical Informatics Department

Graduate Coordinator/Director: C. Bylund

At the Department of Health Outcomes and Biomedical Informatics (HOB), we conduct innovative research and leverage data to promote population health, improve health care delivery and outcomes, and advance health research. We offer master's and doctorate-level degrees in Medical Sciences with individual concentrations in **Health Outcomes and Implementation Science** and **Biomedical Informatics**. We also offer certificate-level degrees in **Implementation Science** and **Biomedical Informatics**. Minimum requirements for these degrees are described in the Graduate Degrees (<https://gradcatalog.ufl.edu/graduate/degrees/>) section of this catalog.

In an effort to train the next generation of researchers and health care professionals, HOB draws from the multi-disciplinary strengths of its faculty, which includes health services researchers, epidemiologists, prevention scientists, economists, medical anthropologists, biostatisticians, psychologists and medical sociologists to teach students how to develop and evaluate health interventions, treatments, prevention practices and policies and determine what works on a large-scale level and why.

More information about HOB can be found at hobi.med.ufl.edu. (<https://hobi.med.ufl.edu/>)

Molecular Genetics and Microbiology Department

Chair: D. C. Bloom

Graduate Coordinator: P. A. Gulig

The Graduate Faculty of the Department of Molecular Genetics and Microbiology participates in the Biomedical Sciences (BMS) graduate program in the College of Medicine, leading to the Doctor of Philosophy degree, with specialization in one of the 7 advanced concentration areas of the BMS (see *Medical Sciences*). Departmental areas of research associated with the BMS focus on topical problems in gene expression, RNA processing, DNA replication, genomics, gene therapy, molecular basis of disease, and the mechanisms of viral pathogenesis. Faculty in the Department of Molecular Genetics and Microbiology also participate in the Medical Sciences M.S. concentration in Molecular Genetics and Microbiology (see *Medical Sciences*). In addition to courses associated with the BMS, the Department of Molecular Genetics and Microbiology maintains the courses noted on the courses tab here.

College of Nursing

Dean: S.Henderson

The nationally ranked College of Nursing offers the graduate degree of Doctor of Philosophy in Nursing Sciences. Requirements for this degree are given in the Graduate Degrees (p. 778) section of this catalog. Students may request special review by the College of Nursing

Admissions Committee if they believe they are strong candidates for graduate study but do not fully meet all criteria.

The College also offers the professional degree of Doctor of Nursing Practice. The degree is a practice-focused doctorate designed to prepare expert nurses in specialized advanced practice. The DNP is an advanced educational credential for those who desire advanced practice knowledge but do not need or want a research focus. The focus of DNP program is on innovative and evidence-based practice. The DNP prepares advanced practice nurses with the knowledge, skills and abilities needed in today's and tomorrow's complex healthcare environment and to provide advanced practice nurses with educational backgrounds comparable to healthcare practitioners in other fields. As a professional degree, the rules and regulations, as well as the courses for the DNP are not covered under this Catalog; please see the College of Nursing website for more information: <https://nursing.ufl.edu/programs/doctor-of-nursing-practice-dnp/>. (<https://nursing.ufl.edu/programs/doctor-of-nursing-practice-dnp/>)

For additional information about the Nursing programs, please see the programs listed below and our website: <http://www.nursing.ufl.edu> or call (352) 273-6331.

Nursing Sciences Program Information

Ph.D. Program Director: A. R. Starkweather

Complete faculty listing by department: Follow this link (<https://gradschool.ufl.edu/GimsPublic/Acalog/Faculty.aspx>).

The College of Nursing's Ph.D. program prepares scientists, scholars, advanced practitioners, and leaders in nursing. Comprehensive research and practice preparation is achieved by pairing students with faculty. Students have access to an array of faculty members for interdisciplinary study, clinical practice, and research. Individually directed dissertation research is a major aspect of the Ph.D. program. Research in the College includes aging and health, women's health, bio-behavioral interventions, and health policy.

Progression in the program depends on the student's ability to meet academic standards and clinical competencies as defined by College policy.

To be considered for admission to the Ph.D. program, students must meet the following minimum requirements:

- A BSN or master's degree in nursing from a CCNE/NLN AC accredited program.
- International students or students whose native language is not English are required to pass one of the following tests with a satisfactory score of:
 - Test of English as a Foreign Language (TOEFL):
 - Computer-based: 213
 - Paper-based: 550
 - Web-based: 80
 - iBT Speaking Component: 26
 - International English Language Testing System (IELTS):
 - Overall score: 6.5
 - Speaking Component: 7
 - Michigan English Language Assessment Battery (MELAB):
 - Overall score: 79
 - Successful completion of the University of Florida English Language Institute Program.
- International students or students whose native language is not English with unsatisfactory scores on the TOEFL, and TOEFL iBT Speaking Component, IELTS, or MELAB; unsuccessful completion of the UF English Language Institute Program; or an unacceptable score on the verbal part of the GRE must achieve an acceptable score on an essay administered by the Academic Written English Program at UF.
- Current licensure (or eligibility) as a Registered Nurse in the State of Florida.

- Availability of a primary mentor who is a College of Nursing faculty member with expertise consistent with the students' research focus area.
- Students must be either a U.S. citizen, legal U.S. resident or hold a valid visa.

Please see our website for more information: <https://nursing.ufl.edu/admissions/>

Degrees Offered

Degrees Offered with a Major in Nursing Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science

The PhD in Nursing Sciences prepares nurse scholars to develop and conduct scientific research that advances the theoretical foundations of nursing practice and health care delivery. It is also the gateway to a career in nursing education, where qualified faculty members are greatly needed to alleviate a growing nursing faculty shortage. Our program offers comprehensive research preparation with one of the strongest cores of nursing research faculty in Florida. The UF College of Nursing offers two options for research-focused doctoral studies in nursing. Select a program to learn more. <https://nursing.ufl.edu/admissions/>

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Nursing sciences

Upon completion of the program, the PhD graduate is expected to engage in the following:

- Research: Synthesizes and generates knowledge for the discipline of nursing.
- Scholarly Activity: Disseminates findings to researchers, practitioners, and other stakeholders in healthcare.
- Leadership: Assumes leadership and advocacy positions to advance healthcare.
- Ethics: Synthesizes ethical issues and standards related to science and knowledge development.
- Collaboration: Develops and engages in interdisciplinary teams within the scientific and healthcare practice communities.

College of Pharmacy

Dean: P. Swaan

The College of Pharmacy offers the Doctor of Philosophy and the Master of Science in Pharmacy degrees in the pharmaceutical sciences, with concentrations in medicinal chemistry, pharmacodynamics, pharmaceutical outcomes and policy, and pharmacy which includes pharmaceuticals. There are additional concentrations in the Master of Science in Pharmacy program in pharmaceutical sciences offered in a distance-learning, nonthesis format: forensic science, forensic drug chemistry, forensic serology and DNA, clinical toxicology, pharmaceutical chemistry, medication therapy management and clinical pharmacy. Complete descriptions of the minimum requirements for the M.S.P. and Ph.D. degrees are provided in the Graduate Degrees (p. 778) section of this catalog.

The Graduate Faculty and courses offered are listed under department headings in this catalog. The courses listed below consist of seminar, supervised teaching and research, and research for thesis or doctoral dissertation. These courses are offered in each of the departments.

Students who wish to pursue graduate studies in the College of Pharmacy must have an undergraduate degree in pharmacy, chemistry, biology, or related sciences.

Satisfactory completion of a thesis or dissertation based on research is a requirement for a graduate degree in the pharmaceutical sciences.

Inquiries regarding applications and general information about the graduate programs are processed through the College of Pharmacy Graduate Programs Office at graduateadmissions@cop.ufl.edu.

For more information, please see the program pages listed below and our website: <http://pharmacy.ufl.edu>.

Medicinal Chemistry Department

Chair: H. Luesch

Graduate Coordinator: C. Li

The mission of the Department of Medicinal Chemistry is to conduct basic research in chemistry and biochemistry as it relates to drug discovery, to teach these principles in the professional and graduate programs, and to provide service to the scientific community.

The Department of Medicinal Chemistry is located in the College of Pharmacy and is an integral part of the University of Florida's Health Science Center. Medicinal Chemistry is a unique blend of the physical and biological sciences. The scope of the field is sufficiently broad to give students with many different science backgrounds a rewarding and challenging program of study. Areas of active interest include drug discovery, organic synthesis of medicinal agents, natural products chemistry, prodrugs, topical drug delivery, peptide chemistry, molecular modeling, drug metabolism, and molecular toxicology. The department has excellent facilities for research in the major areas of Medicinal Chemistry and faculty have been highly successful in attracting extramural research support for the past several years. The Department faculty members are involved in teaching, research, and service.

Medicinal Chemistry areas of research in drug design, marine natural products, and toxicology are a unique blend of the physical and biological sciences. The scope of the field is sufficiently broad to give students with many different science backgrounds a rewarding and challenging program of study. Areas of active interest include drug discovery, organic synthesis of medicinal agents, natural products chemistry, prodrugs, topical drug delivery, peptide chemistry, molecular modeling, drug metabolism, and molecular toxicology. This Department also participates in the interdisciplinary concentration of toxicology.

For more information, please visit our website: <http://pharmacy.ufl.edu/mc> (<http://pharmacy.ufl.edu/mc/>).

Pharmaceutical Sciences (Medicinal Chemistry Department Concentrations)

Program Information

The College of Pharmacy offers the Doctor of Philosophy degree in Pharmaceutical Sciences with a concentration in Medicinal Chemistry. Medicinal chemistry is a unique blend of the physical and biological sciences. The scope of the field is sufficiently broad to give students with many different science backgrounds a rewarding and challenging program of study. Areas of active research include organic synthesis of medicinal agents, metal chelate design, prodrugs and topical drug delivery, drug metabolism, molecular toxicology, molecular biology, combinatorial chemistry, neurochemistry, analytical chemistry, molecular modeling, natural products, and drug discovery.

The College also offers the Master of Science in Pharmacy degree in Pharmaceutical Sciences (non-thesis option) with concentrations in both forensic drug chemistry and forensic serology and DNA in a distance learning format. Minimum requirements for the M.S.P. and Ph.D. degrees are described in the Graduate Degrees (p. 778) section of this catalog.

The applicant should have an undergraduate degree in pharmacy, chemistry, biology, or premedical sciences. A background in calculus and physical and organic chemistry is required. In addition to graduate medicinal chemistry courses in the College of Pharmacy, graduate courses in chemistry and biochemistry are required for the program.

For more information, please see our websites: <http://pharmacy.ufl.edu/education/graduate-programs> (<http://pharmacy.ufl.edu/education/graduate-programs/>) and <http://pharmacy.ufl.edu/mc> (<http://pharmacy.ufl.edu/mc/>)

Degrees Offered**Degrees Offered With a Major in Pharmaceutical Sciences through the Department of Medicinal Chemistry**

- Doctor of Philosophy
 - concentration in Medicinal Chemistry
 - *optional second concentration in Clinical and Translational Science*
 - *optional second concentration in Toxicology*
- Master of Science in Pharmacy
 - concentration in Clinical Toxicology
 - concentration in Drug Development and Optimized Pharmacotherapy
 - concentration in Forensic DNA and Serology
 - concentration in Forensic Drug Chemistry
 - concentration in Forensic Science
 - concentration in Medicinal Chemistry
 - concentration in Pharmaceutical Chemistry

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

PHARMACEUTICAL SCIENCES (PH.D.)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences as it relates to the student's research. At the most advanced level, this will include interpreting experimental data and designing experiments.

SLO 2

Problem Solving/Critical Thinking

Apply discipline- and research project-related knowledge to complete the student's dissertation research by formulating hypotheses, designing experiments, interpreting results, and forming conclusions from their experiments.

SLO 3

Skills

Discuss and defend the published literature of the Pharmaceutical Sciences field. The students will present analysis of the literature in a formal, structured class setting to clearly convey the background, methods, results, and significance of the literature to faculty and students.

SLO 4

Research Skills

Utilize the scientific method to formulate hypotheses based on their ability to use the literature, their own experimental observations, and those of others; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; reformulate the hypotheses.

SLO 5

Professional Behavior

Exhibit behaviors and values that are consistent with ethical standards in research appropriate to safety, administrative, and regulatory rules. Professionalism, safety and adherence to regulations will be monitored by the student's mentor.

SLO6

Professional Presentations

Deliver a formal scholarly presentation of their original research results in oral and written formats at an internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutical Sciences - Medicinal Chemistry (MSP)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences.

SLO 2

Problem-Solving/Critical Thinking

Analyze and apply material from foundation courses in the curriculum, interpret data, and synthesize a response to a complex problem or case.

SLO 3

Professional Communication

Deliver a presentation of a discipline-specific topic related to Pharmaceutical Sciences for internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutical Outcomes and Policy Department

Chair: A. Winterstein

Interim Graduate Coordinator: R. Segal

Integral to the University of Florida's Health Science Center, the Department of Pharmaceutical Outcomes and Policy offers a unique blend of research and training in patient safety, pharmacoepidemiology, pharmacoeconomics, and social-behavioral issues surrounding medication use.

Pharmaceutical Outcomes and Policy offers a broad spectrum of opportunities for training, including a residential PhD and a residential MS program, for students in the health and related sciences. Students can choose between several specialty areas and have the opportunity to immerse themselves in research early in their training with ongoing faculty research programs.

The Ph.D. degree provides individuals with the credentials to develop and direct clinical research units in universities, pharmaceutical companies and contract research organizations, and government organizations. Successful graduates have a range of technical and disciplinary competencies in research design, measurement, inferential statistics, the communication and evaluation of research, research ethics, healthcare delivery and the medication use system, the drug product, and behavioral

and policy issues surrounding medication use. Those successful graduates of the residential MS degree who have a desire to continue their studies can apply for the Ph.D. program, with MS course work and other scholastic requirements applicable.

The Department has excellent facilities for quantitative and qualitative research, and faculty have been highly successful in attracting extramural research support. Qualitative research infrastructure includes conference facilities with state-of-the art equipment for focus groups or patient interviews. Quantitative research facilities include computer labs for students, a department-owned secure research server that houses various population-based datasets, and a variety of software packages.

For more information, please see the program page below and visit our website: <http://pop.pharmacy.ufl.edu>.

Pharmaceutical Sciences (Pharmaceutical Outcomes and Policy Department Concentrations)

Program Information

The College of Pharmacy offers the Master of Science in Pharmacy and Doctor of Philosophy degrees in Pharmaceutical Sciences with a concentration in Pharmaceutical Outcomes and Policy, and an additional concentration in Medication Therapy Management in the M.S.P. Minimum requirements for these degrees are provided in the *Graduate Degrees* section of this catalog.

Research in the department emphasizes the epidemiological, socio-behavioral, administrative, regulatory, and economic aspects of drug therapy and pharmaceutical services, including assessment of safety, effectiveness, efficiency and quality aspects of patient-oriented pharmaceutical services and medication use.

The department offers both a research-oriented residential M.S.P. and Ph.D. degree programs as well as an online M.S.P. program. For the research oriented degree programs, graduate studies include core curricula and four specializations in patient safety and program evaluation, pharmacoeconomics, pharmacoepidemiology and social-behavioral research in medication use. Electives and required courses draw from the resources of the entire University. Graduates are prepared for leadership positions in academia, public service, pharmaceutical industry, and health service industry with a focus on the evaluation of drugs and related services.

The online non-thesis M.S.P. program is designed for working professionals, and focuses on pharmaceutical regulation and outcomes. Prior pharmacy experience/knowledge is not required and the program is available to persons located in the United States only. Coursework is delivered in both asynchronous and live, synchronous sessions. Students may choose among six specialty tracks including Pharmacy Regulation & Policy, Applied Pharmacoeconomics, Drug Regulatory Affairs, Clinical Research Regulation in Pharmacy, Patient Safety & Medication Risk Management, and Institutional Pharmacy Leadership.

For more information, please visit our websites: <http://pop.pharmacy.ufl.edu/education/prospective-students> (<http://pop.pharmacy.ufl.edu/education/prospective-students/>) and <http://pop.pharmacy.ufl.edu>.

Degrees Offered

Degrees Offered With a Major in Pharmaceutical Sciences through the Department of Pharmaceutical Outcomes and Policy

- Doctor of Philosophy
 - concentration in Pharmaceutical Outcomes and Policy
 - *optional second concentration in Clinical and Translational Science*
- Master of Science in Pharmacy
 - concentration in Drug Development and Optimized Pharmacotherapy
 - concentration in Managed Care Pharmacy

- concentration in Pharmaceutical Outcomes and Policy
- concentration in Pharmaceutical Policy
- concentration in Pharmaceutical Value Communications
- concentration in Pharmacoeconomics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Medicinal Chemistry Courses

Code	Title	Credits
PHA 6242	Artificial Intelligence in Clinical Toxicology	3
PHA 6354	Natural Medicinal Products	3
PHA 6356	Structure Determination of Complex Natural Products	3
PHA 6357	Herbal & Dietary Supplements	3
PHA 6416	Pharmaceutical Analysis I	3
PHA 6417	Pharmaceutical Analysis II	3
PHA 6425	Drug Biotrans and Molecular Mechanisms of Toxicity	3
PHA 6432	Fundamentals of Pharmaceutical Chemistry	1
PHA 6435	Biosynthetic Logic of Medicinal Natural Products	3
PHA 6444	Pharmaceutical Chemistry I	3
PHA 6447	Drug Design	3
PHA 6452	Metabolic Biochemistry	3
PHA 6460	Principles of Drug Action & Development I	3
PHA 6461	Principles of Drug Action & Development II	3
PHA 6467C	Drug Design II	3
PHA 6468	Biotransformation Considerations in Drug Design	2
PHA 6471	Synthetic Medicinal Chemistry	3
PHA 6472	Organic Synthesis of Drug Molecules	3
PHA 6532	Occupational Toxicology	3
PHA 6533	Epidemiology & Biostatistics in Clinical Toxicology	3
PHA 6534	Toxicology of Chemical Weapons	3

PHA 6934	Seminar in Medicinal Chemistry	1
PHA 6935	Selected Topics in Pharmacy	1-4
PHA 6936	Advanced Topics in Pharmaceutical Sciences	1-2
PHA 6938	Research Seminar	1

PHA 6940	Supervised Teaching	1-5
PHA 6971	Research for Master's Thesis	1-15
PHA 7979	Advanced Research	1-12
PHA 7980	Research for Doctoral Dissertation	1-15

Pharmacodynamics Courses

Code	Title	Credits
MCB 5252	Microbiology, Immunology, and Immunotherapeutics	4
PHA 6189	CNS Drug Discovery	3
PHA 6508	Systems Physiology and Pathophysiology I	3
PHA 6509	Systems Physiology and Pathophysiology II	3
PHA 6512L	Experiential Research Training in Pharmacodynamics	1-4
PHA 6521C	Research Techniques in Pharmacodynamics	1
PHA 6563	Pathophysiology of Diseases I	3
PHA 6564	Pathophysiology of Diseases II	3
PHA 6910	Supervised Research	1-5
PHA 6935	Selected Topics in Pharmacy	1-4
PHA 6936	Advanced Topics in Pharmaceutical Sciences	1-2
PHA 6938	Research Seminar	1
PHA 6940	Supervised Teaching	1-5
PHA 6971	Research for Master's Thesis	1-15
PHA 7900	Journal Club in Pharmaceutical Research	1
PHA 7939	Journal Club in Pharmaceutical Sciences	1
PHA 7979	Advanced Research	1-12
PHA 7980	Research for Doctoral Dissertation	1-15

Pharmacology Courses

Code	Title	Credits
GMS 6590	Seminar in Pharmacology	1
GMS 6592	Ion Channels Journal Club: Pharmacology, Biophysics, and Neuroscience of Excitable Membranes	1
GMS 6847	Translational Research and Therapeutics: Bench, Bedside, Community, & Policy	3
GMS 7593	Topics in Pharmacology and Toxicology	1-3

Pharmaceutical Outcomes and Policy Departmental Courses

Code	Title	Credits
PHA 5270	Health Care and Patient Safety	3
PHA 5271	Health Care Risk Management	3
PHA 6041	Principles of Peer-Reviewed Biomedical Publications	3
PHA 6186	Pharm Outcomes/Policy Found 1	3
PHA 6187	Pharm Outcomes/Policy Found 2	3
PHA 6211	Applied Pharmacy Benefit Design	3
PHA 6213	Advanced Case Studies in Managed Care Pharmacy	3
PHA 6227	Institutional Pharmacy Leadership I	3
PHA 6228	Institutional Pharmacy Leadership II	3
PHA 6246	Medication Safety & Technology	3
PHA 6264	Pharmaceutical Health Technology Assessment	3
PHA 6265	Introduction to Pharmaceutical Outcomes and Policy I	3
PHA 6268	Pharmacoepidemiology and Patient Safety	3
PHA 6269	Pharmaceutical Products and Public Policy	3

PHA 6273	Structure, Process, and Outcomes of Regulation	3	PHA 6134	Foundations in Precision Medicine: Genomic Technologies	1
PHA 6274	Federal Regulations of Drugs and Pharmacy	3	PHA 6135	Clinical Applications of Precision Medicine: Pharmacogenomics	2

Student Learning Outcomes

PHARMACEUTICAL SCIENCES (PH.D.)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences as it relates to the student's research. At the most advanced level, this will include interpreting experimental data and designing experiments.

SLO 2

Problem Solving/Critical Thinking

Apply discipline- and research project-related knowledge to complete the student's dissertation research by formulating hypotheses, designing experiments, interpreting results, and forming conclusions from their experiments.

SLO 3

Skills

Discuss and defend the published literature of the Pharmaceutical Sciences field. The students will present analysis of the literature in a formal, structured class setting to clearly convey the background, methods, results, and significance of the literature to faculty and students.

SLO 4

Research Skills

Utilize the scientific method to formulate hypotheses based on their ability to use the literature, their own experimental observations, and those of others; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; reformulate the hypotheses.

SLO 5

Professional Behavior

Exhibit behaviors and values that are consistent with ethical standards in research appropriate to safety, administrative, and regulatory rules. Professionalism, safety and adherence to regulations will be monitored by the student's mentor.

SLO6

Professional Presentations

Deliver a formal scholarly presentation of their original research results in oral and written formats at an internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutical Sciences - Pharmaceutical Outcomes & Policy (MSP)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences.

SLO 2

Problem-Solving/Critical Thinking

Analyze and apply material from foundation courses in the curriculum, interpret data, and synthesize a response to a complex problem or case.

SLO 3

Professional Communication

Deliver a presentation of a discipline-specific topic related to Pharmaceutical Sciences for internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutics Department

Chair: H. C. Derendorf

Graduate Coordinator: S. Song

The focus of the Department of Pharmaceutics, which houses the Center for Drug Discovery, differs sufficiently from that of other College of Pharmacy departments as to justify a specialization. The uniqueness of the department is evident in present research activities which encompass basic, applied and clinical investigations in the areas of Biopharmaceutics and Pharmacokinetics, Pharmaceutical Biotechnology, Pharmaceutical Analysis, Drug Delivery, and Drug Discovery.

In addition to teaching, faculty members in the Department of Pharmaceutics are involved in collaborative research projects with clinical and other basic scientists within the Health Center or on campus. Many maintain collaborative ties with scientists in other universities and the pharmaceutical industry worldwide.

Currently, the Department of Pharmaceutics offers a Ph.D. in Pharmaceutical Sciences with a concentration in Pharmacy. A foundation in physical chemistry, chemistry, mathematics, and in the life sciences is required for applicants to be successful in the program. Many graduates of the Ph.D. program have built international careers in drug discovery and in the pharmaceutical industry. *Please note that all students enter directly into the Ph.D. program as the department does not accept student applications for an M.S. degree.*

The Department of Pharmaceutics is located in the University of Florida J. Hillis Miller Health Science Center complex, which includes colleges of Dentistry (<https://dental.ufl.edu/>), Medicine (<https://med.ufl.edu/>), Nursing (<https://nursing.ufl.edu/>), Pharmacy (<https://pharmacy.ufl.edu/>), Public Health and Health Professions (<https://phhp.ufl.edu/>), and Veterinary Medicine (<https://www.vetmed.ufl.edu/>). The UF&Shands system also encompasses six research institutes: the Clinical and Translational Science Institute, the McKnight Brain Institute, the Genetics Institute, the UF&Shands Cancer Center, the Institute on Aging and the Emerging Pathogens Institute. The location of the College of Pharmacy in this complex offers a broad variety of opportunities for learning and research collaboration.

For more information, please visit our website: <http://pharmacy.ufl.edu/> pc (<http://pharmacy.ufl.edu/pc/>).

Pharmaceutical Sciences (Pharmaceutics Department Concentrations)

Program Information

The College of Pharmacy offers the Doctor of Philosophy degree in Pharmaceutical Sciences with / without a concentration in Pharmacy, and the Master of Science in Pharmacy (M.S.P) in Pharmaceutical Sciences with / without a concentration in Pharmacy. The minimum requirements for these degrees are listed in the Graduate Degrees (p. 778) section of this Catalog.

Pharmaceutics is the scientific endeavor concerned with the design, formulation, evaluation, and use of drug delivery systems. Its domain extends from studies of the physiochemical properties of drugs and related molecules to investigations of the mechanisms of physiological processes affecting drug delivery and therapeutic effectiveness.

The Department's general focus involves studying the design and evaluation of traditional and novel dosage forms for delivering drug molecules and macromolecules. The design involves physical chemical studies and development of analytical techniques involving spectroscopy and chromatography. Evaluation includes development of sensitive analytical techniques for the drug in biological fluids and subsequent biopharmaceutical and clinical pharmacokinetic studies.

Applicants are required to have a foundation in physical chemistry, chemistry, mathematics, and in the life sciences. *Please note that all students enter directly into the Ph.D. program as the department does not accept student applications for an M.S. degree.*

For more information, please see our websites: <http://pharmacy.ufl.edu/pc/education/phd> (<http://pharmacy.ufl.edu/pc/education/phd/>) and <http://pharmacy.ufl.edu/pc> (<http://pharmacy.ufl.edu/pc/>).

Degrees Offered

Degrees Offered With a Major in Pharmaceutical Sciences through The Department of Pharmaceutics

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Pharmaceutics
 - *optional second concentration in Clinical and Translational Science*
- Master of Science in Pharmacy
 - without a concentration
 - concentration in Drug Development and Optimized Pharmacotherapy
 - concentration in Pharmaceutics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

PHA 6830	Nanomedicine-based Immunotherapy	3
PHA 6894	Introduction to Graduate Studies	1
PHA 6910	Supervised Research	1-5
PHA 6935	Selected Topics in Pharmacy	1-4
PHA 6936	Advanced Topics in Pharmaceutical Sciences	1-2
PHA 6938	Research Seminar	1
PHA 6940	Supervised Teaching	1-5
PHA 6971	Research for Master's Thesis	1-15
PHA 7979	Advanced Research	1-12
PHA 7980	Research for Doctoral Dissertation	1-15

College of Pharmacy Courses

Code	Title	Credits
PHA 6356	Structure Determination of Complex Natural Products	3
PHA 6418	Model-Informed Drug Development	3
PHA 6471	Synthetic Medicinal Chemistry	3

Student Learning Outcomes

PHARMACEUTICAL SCIENCES (PH.D.)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences as it relates to the student's research. At the most advanced level, this will include interpreting experimental data and designing experiments.

SLO 2

Problem Solving/Critical Thinking

Apply discipline- and research project-related knowledge to complete the student's dissertation research by formulating hypotheses, designing experiments, interpreting results, and forming conclusions from their experiments.

SLO 3

Skills

Discuss and defend the published literature of the Pharmaceutical Sciences field. The students will present analysis of the literature in a formal, structured class setting to clearly convey the background, methods, results, and significance of the literature to faculty and students.

SLO 4

Research Skills

Utilize the scientific method to formulate hypotheses based on their ability to use the literature, their own experimental observations, and those of others; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; reformulate the hypotheses.

SLO 5

Professional Behavior

Exhibit behaviors and values that are consistent with ethical standards in research appropriate to safety, administrative, and regulatory rules. Professionalism, safety and adherence to regulations will be monitored by the student's mentor.

SLO6

Professional Presentations

Deliver a formal scholarly presentation of their original research results in oral and written formats at an internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutical Sciences - Pharmaceutics (M.S.P.)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences.

SLO 2

Problem-Solving/Critical Thinking

Analyze and apply material from foundation courses in the curriculum, interpret data, and synthesize a response to a complex problem or case.

SLO 3

Professional Communication

Deliver a presentation of a discipline-specific topic related to Pharmaceutical Sciences for internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmacodynamics Department

Chair: M. Keller-Wood

Graduate Coordinator: C. Frazier

The Department of Pharmacodynamics offers a Doctor of Philosophy degree in Pharmaceutical Sciences with a concentration in Pharmacodynamics, and the Master of Science in Pharmacy (M.S.P) in Pharmaceutical Sciences with a concentration in Pharmacodynamics. The minimum requirements for these degrees are listed in the Graduate Degrees (p. 778) section of this Catalog. The department also participates in the Interdisciplinary Toxicology concentration. *Please note that all students enter directly into the Ph.D. program as the department does not accept student applications for an M.S. degree.*

Pharmacodynamics is an integrated field of study involving pharmacology, physiology, and toxicology in a holistic approach to drug action in living systems. The Department of Pharmacodynamics focuses on neuroendocrinology, cardiovascular pharmacology, and neuropharmacology with diverse research interests in aging, hypertension, reproduction, glaucoma, neurotoxicity, and environmental physiology. Students graduating with a Ph.D. in Pharmacodynamics can compete for jobs in the areas of academia, industry, research institutes, and government laboratories/regulatory agencies.

An undergraduate degree in pharmacy, chemistry, biology, or related sciences is required for students to be successful in the program. In

addition to graduate courses in pharmacy, courses are taken in the College of Medicine and in statistics in the College of Liberal Arts and Sciences.

The Department of Pharmacodynamics is located in the University of Florida J. Hillis Miller Health Science Center complex, which includes colleges of Dentistry (<https://dental.ufl.edu/>), Medicine (<https://med.ufl.edu/>), Nursing (<https://nursing.ufl.edu/>), Pharmacy (<https://pharmacy.ufl.edu/>), Public Health and Health Professions (<https://phhp.ufl.edu/>), and Veterinary Medicine (<https://www.vetmed.ufl.edu/>). The UF&Shands system also encompasses six research institutes: the Clinical and Translational Science Institute, the McKnight Brain Institute, the Genetics Institute, the UF&Shands Cancer Center, the Institute on Aging and the Emerging Pathogens Institute. The location of the College of Pharmacy in this complex offers a broad variety of opportunities for learning and research collaboration.

For more information, please see the program page below and visit our website: <http://pharmacy.ufl.edu/pd> (<http://pharmacy.ufl.edu/pd/>).

Pharmaceutical Sciences (Pharmacodynamics Department Concentrations)

Program Information

The College of Pharmacy offers the Doctor of Philosophy in Pharmaceutical Sciences with a concentration in Pharmacodynamics, and the Master of Science in Pharmacy (M.S.P) in Pharmaceutical Sciences with a concentration in Pharmacodynamics. The minimum requirements for these degrees are listed in the Graduate Degrees

(p. 778) section of this Catalog. The department also participates in the Interdisciplinary Toxicology concentration.

Pharmacodynamics is an integrated field of study involving pharmacology, physiology, and toxicology in a holistic approach to drug action in living systems. The department focuses on neuroendocrinology, cardiovascular pharmacology, and neuropharmacology with diverse research interests in aging, hypertension, reproduction, glaucoma, neurotoxicity, and environmental physiology.

The program is designed for students committed to pursuing a career in the basic and health related sciences. In addition to graduate courses in pharmacy, courses are taken in the College of Medicine and in statistics in the College of Liberal Arts and Sciences. *Please note that all students enter directly into the Ph.D. program, as the department does not accept students who wish to receive only the M.S. degree.* An undergraduate degree in pharmacy, chemistry, biology, or related sciences is required of applicants.

For more information, please visit our websites: <http://pharmacy.ufl.edu/pd/education/phd/prospective-students-3> (<http://pharmacy.ufl.edu/pd/education/phd/prospective-students-3/>) and <http://pharmacy.ufl.edu/pd> (<http://pharmacy.ufl.edu/pd/>).

Degrees Offered

Degrees Offered With a Major in Pharmaceutical Sciences through The Department of Pharmacodynamics

- Doctor of Philosophy
 - concentration in Pharmacodynamics
 - *optional second concentration in Clinical and Translational Science*
- Master of Science in Pharmacy
 - concentration in Drug Development and Optimized Pharmacotherapy
 - concentration in Pharmacodynamics

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Pharmacodynamics Courses

Code	Title	Credits
MCB 5252	Microbiology, Immunology, and Immunotherapeutics	4
PHA 6189	CNS Drug Discovery	3
PHA 6508	Systems Physiology and Pathophysiology I	3
PHA 6509	Systems Physiology and Pathophysiology II	3
PHA 6512L	Experiential Research Training in Pharmacodynamics	1-4
PHA 6521C	Research Techniques in Pharmacodynamics	1
PHA 6563	Pathophysiology of Diseases I	3
PHA 6564	Pathophysiology of Diseases II	3
PHA 6910	Supervised Research	1-5
PHA 6935	Selected Topics in Pharmacy	1-4
PHA 6936	Advanced Topics in Pharmaceutical Sciences	1-2
PHA 6938	Research Seminar	1
PHA 6940	Supervised Teaching	1-5
PHA 6971	Research for Master's Thesis	1-15

PHA 7900	Journal Club in Pharmaceutical Research	1
PHA 7939	Journal Club in Pharmaceutical Sciences	1
PHA 7979	Advanced Research	1-12
PHA 7980	Research for Doctoral Dissertation	1-15

PHA 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

PHARMACEUTICAL SCIENCES (PH.D.)

SLO 1

Knowledge

Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences as it relates to the student's research. At the most advanced level, this will include interpreting experimental data and designing experiments.

SLO 2

Problem Solving/Critical Thinking

Apply discipline- and research project-related knowledge to complete the student's dissertation research by formulating hypotheses, designing experiments, interpreting results, and forming conclusions from their experiments.

SLO 3

Skills

Discuss and defend the published literature of the Pharmaceutical Sciences field. The students will present analysis of the literature in a formal, structured class setting to clearly convey the background, methods, results, and significance of the literature to faculty and students.

SLO 4

Research Skills

Utilize the scientific method to formulate hypotheses based on their ability to use the literature, their own experimental observations, and those of others; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; reformulate the hypotheses.

SLO 5

Professional Behavior

Exhibit behaviors and values that are consistent with ethical standards in research appropriate to safety, administrative, and regulatory rules. Professionalism, safety and adherence to regulations will be monitored by the student's mentor.

SLO 6

Professional Presentations

Deliver a formal scholarly presentation of their original research results in oral and written formats at an internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmaceutical Sciences - Pharmacodynamics (M.S.P.)

SLO 1

Knowledge

Demonstrate comprehensive knowledge related to a specific discipline within the pharmaceutical sciences.

SLO 2

Problem-Solving/Critical Thinking

Analyze and apply material from foundation courses in the curriculum, interpret data, and synthesize a response to a complex problem or case.

SLO 3

Professional Communication

Deliver a presentation of a discipline-specific topic related to Pharmaceutical Sciences for internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature and will utilize appropriate audiovisual aids that are clearly constructed.

Pharmacotherapy and Translational Research Department

Chair: R. Frye

Graduate Coordinator: J. Lamba

The Department of Pharmacotherapy and Translational Research provides classroom and clinical instruction for pharmacy students and trains graduate students in clinical translational research. The department is proud of its national reputation as a leader in the areas of pharmacy practice, education and clinical translational research. Faculty members in the department are successful in obtaining research funding from numerous sources, including the National Institutes of Health.

The Department of Pharmacotherapy and Translational Research offers a variety of excellent clinical residencies and research fellowships, and offers a PhD program in Clinical Pharmaceutical Science. The goal of the Clinical Pharmaceutical Sciences training program is to prepare motivated individuals to pursue independent research careers in academia, industry, or government. The current research focus of the program is on understanding genetic and non-genetic factors that contribute to variability in drug response.

The Department of Pharmacotherapy and Translational Research is located in the University of Florida J. Hillis Miller Health Science Center complex, which includes colleges of Dentistry (<https://dental.ufl.edu/>), Medicine (<https://med.ufl.edu/>), Nursing (<https://nursing.ufl.edu/>), Pharmacy (<https://pharmacy.ufl.edu/>), Public Health and Health Professions (<https://phhp.ufl.edu/>), and Veterinary Medicine (<https://www.vetmed.ufl.edu/>). The UF&Shands system also encompasses six research institutes: the Clinical and Translational Science Institute, the McKnight Brain Institute, the Genetics Institute, the UF&Shands Cancer Center, the Institute on Aging and the Emerging Pathogens Institute. The location of the College of Pharmacy in this complex offers a broad variety of opportunities for learning and research collaboration.

For more information, please see the program page below and visit our website: <http://ptr.pharmacy.ufl.edu>.

Pharmaceutical Sciences (Pharmacotherapy and Translational Research Department Concentrations)

Program Information

The College of Pharmacy offers the Doctor of Philosophy degree in Pharmaceutical Sciences with a concentration in Clinical Pharmaceutical Sciences and the Master of Science in Pharmacy (M.S.P.) in Pharmaceutical Sciences with a concentration in Clinical Pharmacy. The minimum requirements for these degrees are listed in the Graduate Degrees (p. 778) section of this Catalog.

The Clinical Pharmaceutical Sciences training program is a collaborative effort between the Departments of Pharmacotherapy and Translational Research and Pharmaceutics with the goal of preparing motivated individuals to pursue independent research careers in academia,

industry, or government. The current research focus of the program is on understanding genetic and non-genetic factors that contribute to variability in drug response.

Students in the program conduct hypothesis-driven clinical research that includes a strong laboratory component. Excellent research facilities are available including state-of-the art bioanalytical and pharmacogenomics laboratories, and an NIH-funded Clinical Translational Science Institute (CTSI) and Clinical Research Center (UF CRC (<https://www.ctsi.ufl.edu/research/uf-clinical-research-center/>)) for clinical study conduction. Upon completion of the core/elective curriculum and dissertation, the Doctor of Philosophy (Ph.D.) Degree is awarded.

Graduate students in the Clinical Pharmaceutical Sciences program are expected to actively participate in clinical practice experiences and are required to spend 200 hours (minimum) to 600 hours (recommended) in a clinical practice setting. These experiences strengthen clinical background and foster development of the student as a translational research scientist. Preference will be given to candidates who have earned a PharmD degree from an accredited school of pharmacy.

For more information, please see our websites: <http://ptr.pharmacy.ufl.edu/education/clinical-pharmaceutical-sciences> (<http://ptr.pharmacy.ufl.edu/education/clinical-pharmaceutical-sciences/>) and <http://ptr.pharmacy.ufl.edu>.

Degrees Offered

Degrees Offered With a Major in Pharmaceutical Sciences through the Department of Pharmacotherapy and Translational Research

- Doctor of Philosophy
 - concentration in Clinical Pharmaceutical Sciences
- Master of Science in Pharmacy
 - concentration in Clinical Pharmaceutical Sciences
 - concentration in Clinical Pharmacogenomics and Precision Medicine
 - concentration in Drug Development and Optimized Pharmacotherapy
 - concentration in Individualized Medicine
 - concentration in Medication Therapy Management
 - concentration in Personalized Medicine

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Pharmaceutics Departmental Courses

Code	Title	Credits
PHA 5729	Intentional Living: Developing a Wellness Mindset (AKA, The Happiness Course)	1

PHA 6116	In Vivo and In Vitro Stability of Drugs	3	Identify, interpret, and utilize core knowledge across the spectrum of Pharmaceutical Sciences as it relates to the student's research. At the most advanced level, this will include interpreting experimental data and designing experiments.
PHA 6122	Population Pharmacokinetics and Pharmacodynamics	3	
PHA 6123	Quantitative Systems Pharmacology (QSP) Modeling	3	SLO 2
PHA 6125	Introduction to Quantitative Pharmacology	3	Problem Solving/Critical Thinking
PHA 6131	Physiologically-Based Modeling	3	Apply discipline- and research project-related knowledge to complete the student's dissertation research by formulating hypotheses, designing experiments, interpreting results, and forming conclusions from their experiments.
PHA 6133	Translational Clinical Pharmacology	3	
PHA 6170C	Pharmaceutical Product Formulation	3	SLO 3
PHA 6183	Pharmaceutical Gene Delivery	3	Skills
PHA 6185	Life Cycle of a Drug	1	Discuss and defend the published literature of the Pharmaceutical Sciences field. The students will present analysis of the literature in a formal, structured class setting to clearly convey the background, methods, results, and significance of the literature to faculty and students.
PHA 6416	Pharmaceutical Analysis I	3	
PHA 6418	Model-Informed Drug Development	3	SLO 4
PHA 6449	Pharmacogenomic and Genomic Data Analysis	3	Research Skills
PHA 6630	Foundations of Medication Management: Pharmacotherapy of Chronic Disease	3	Utilize the scientific method to formulate hypotheses based on their ability to use the literature, their own experimental observations, and those of others; design a technically sound and up-to-date experimental plan with appropriate controls; execute the experimental plan in a technically proficient manner; interpret the data; reformulate the hypotheses.
PHA 6631	Foundations of Medication Management: Patient Care and Practice	3	
PHA 6632	Foundations of Medication Therapy Management II	3	SLO 5
PHA 6633	Foundations of Medication Management: Individualized Pharmacotherapy I	3	Professional Behavior
PHA 6634	Foundations of Medication Management: Individualized Pharmacotherapy II	3	Exhibit behaviors and values that are consistent with ethical standards in research appropriate to safety, administrative, and regulatory rules. Professionalism, safety and adherence to regulations will be monitored by the student's mentor.
PHA 6635	Medication Therapy Management: A Renal Focus	3	
PHA 6636	Medication Therapy Management: A Gastrointestinal Focus	3	SLO6
PHA 6637	Medication Therapy Management: A Psychiatric Focus	3	Professional Presentations
PHA 6638	Medication Therapy Management: A Neurologic Focus	3	Deliver a formal scholarly presentation of their original research results in oral and written formats at an internal academic review. These presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.
PHA 6639	Medication Therapy Management: A Respiratory Focus	3	
PHA 6740	Fundamentals of Grant Writing in the Pharmaceutical Sciences	2	
PHA 6830	Nanomedicine-based Immunotherapy	3	
PHA 6894	Introduction to Graduate Studies	1	
PHA 6910	Supervised Research	1-5	
PHA 6935	Selected Topics in Pharmacy	1-4	
PHA 6936	Advanced Topics in Pharmaceutical Sciences	1-2	
PHA 6938	Research Seminar	1	
PHA 6940	Supervised Teaching	1-5	
PHA 6971	Research for Master's Thesis	1-15	
PHA 7979	Advanced Research	1-12	
PHA 7980	Research for Doctoral Dissertation	1-15	

College of Pharmacy Courses

Code	Title	Credits
PHA 6356	Structure Determination of Complex Natural Products	3
PHA 6418	Model-Informed Drug Development	3
PHA 6471	Synthetic Medicinal Chemistry	3

Student Learning Outcomes

PHARMACEUTICAL SCIENCES (PH.D.)

SLO 1
Knowledge

Professional Communication
Deliver a presentation of a discipline-specific topic related to Pharmaceutical Sciences for internal academic review. These

presentations will be clear in providing information at an appropriate level to the audience, complete in providing the necessary and relevant background from the literature, and will utilize appropriate audiovisual aids that are clearly constructed.

College of Public Health and Health Professions

Dean: B. Virnig

Executive Associate Dean: S. L. Hanson

The University of Florida College of Public Health and Health Professions has established a new educational model that focuses on the integration of public health problem-solving and individual patient care. The college's mission is to preserve, promote and improve the health and well-being of populations, communities and individuals. To fulfill this mission, we foster collaborations among public health and the health professions in education, research and service.

For more information, please see our website: <http://phhp.ufl.edu> (<http://phhp.ufl.edu/>)

Both a 48-credit program for students without terminal health science degrees and a 42-credit program for students with a terminal degree are offered. A combination bachelor's/master of public health program is available, as well as a 15-credit college certificate program. Students interested in collaborative programs may pursue joint MPH and DVM, MD, JD, PharmD, DPT, or DMD degrees, or concurrent master's and PhD programs. The MPH degree program and the Public Health certificate are available on campus and online. For program descriptions and information on applying, visit the website: www.mph.ufl.edu (<http://gradcatalog.ufl.edu/graduate/colleges-departments/public-health-professions/interdisciplinary-departments/public-health-mph/www.mph.ufl.edu>).

48-credit Master of Public Health: Students who do not hold a terminal degree in a health science discipline are eligible to apply for the 48-credit program. The program provides comprehensive coverage of core public health content and allows selection of a concentration. Students must complete 18 credits of core public health course work, 12 to 15 credits of concentration core courses, up to 12 credits of elective courses, and three credits of applied practice experience. The course work representing these requirements is described below.

42-credit accelerated Master of Public Health: Students who hold a terminal degree (usually a doctoral degree) in a health science discipline may be eligible for the 42-credit accelerated program. This program requires completion of 16 credits of core public health course work, 21 credits of concentration and elective course work, and a five-credit internship.

Combination degree program: The College offers a combination degree program to allow qualified undergraduates to earn both a bachelor's degree and the Master of Public Health degree efficiently. Seniors with any undergraduate major are eligible for the combination degree program as long as they have an undergraduate GPA of at least 3.2 and competitive scores on the verbal and quantitative portions of the GRE, and their career interests match the MPH program. Students accepted into the combination degree program complete 15 credits of public health course work while still undergraduates, leaving only 33 credits after admission to graduate school. Students must achieve a B or better in public health courses taken as an undergraduate and be accepted to graduate school to complete the program.

Core Courses: All MPH students take five public health core courses. The core courses in environmental health, epidemiology, public health management and policy, and social and behavioral sciences are taken by all students. The core biostatistics course varies across concentration areas. Students in the biostatistics, environmental health, epidemiology and social and behavioral sciences concentrations must take PHC 6052: Introduction to Biostatistical Methods. All other MPH students must take PHC 6050: Statistical Methods for Health Sciences Research I. In addition, all students must take a three-credit Master of Public Health Capstone course and three credits of PHC 6946: MPH Applied Practice Experience.

Applied Practice Experience (APE): Each student completes an internship during their APE course, which provides an opportunity to apply knowledge acquired in the classroom to a real public health problem in a practice setting. Students may engage in many activities during an internship, but each student must produce at least two portfolio products that demonstrate achievement of at least five Public Health Competencies.

Interdisciplinary Departments

Majors

- Public Health (M.P.H.) (p. 331)
- Public Health (Ph.D.) (p. 335)
- Rehabilitation Science (p. 337)

Public Health (M.P.H.)

Program Information

Director: J. Varnes

The Master of Public Health degree is offered as a non-thesis program and is designed to prepare students to become effective public health practitioners, scientists, and educators.

Students select one of six concentration areas:

- Biostatistics
- Environmental health
- Epidemiology
- Population health management

MPH Capstone: This course serves as the required integrative learning experience for students in the MPH program. Students will demonstrate synthesis of foundational and concentration competencies through an individual or group project that addresses the needs of a public health agency. Students will produce a high-quality written report for their agency and present their project on Public Health Day near the end of the semester.

Master of Public Health with a Concentration in Biostatistics

The contribution of biostatisticians is far reaching and includes both core public health research and consultation with other health professionals. The biostatistics concentration is designed primarily for students with a previous graduate degree (particularly in the health sciences) who want to obtain a solid background in quantitative and analytical methods for public health research. The course work exposes students to methodology typically used to analyze different types of public health data and gives them opportunities to apply these methodologies themselves.

Graduates of the MPH program with a concentration in biostatistics return to their careers with an improved understanding of quantitative methods for public health research. This increased knowledge will facilitate their own research programs and will enhance their ability to critically read the literature in their field. The biostatistics concentration requires completion of four concentration core courses: Regression Methods for the Health and Life Sciences, Epidemiology Research Methods I, Public Health Computing, and Survival Analysis. Remaining courses include the public health internship and electives in statistics and public health. Visit the biostatistics concentration website for the most up-to-date information about course options: <http://mph.ufl.edu/programs/master-of-public-health/biostatistics>. (<http://mph.ufl.edu/programs/master-of-public-health/biostatistics.html>)

See the department Biostatistics website for information about other programs offered by the department: <http://biostat.ufl.edu/>.

Master of Public Health with a Concentration in Environmental Health

Professionals trained in environmental health study the impact of our surroundings on our health. They understand how environmental risk factors can cause diseases like asthma, cancer, and food poisoning. Environmental health professionals make up approximately half of public health personnel and the field accounts for about half of public health expenditures. Students interested in environmental health typically have a background in biological or physical sciences, engineering, nursing, medicine, and veterinary medicine. Prior experience in chemistry, biology, statistics, and Microsoft Excel software is desirable. Please note the prerequisites for Environmental Health courses and speak with the instructor if you have not successfully completed the prerequisites. The following courses are required for all students pursuing the environmental health concentration: Environmental Toxicology Applications in Public Health, Environmental Policy and Risk Management in Public Health, Exposure Measurement and Assessment, Environmental Ecology of Human Pathogens, Global Health and Development I, and MPH Capstone. Students may also choose from elective course work listed on the department website below. Environmental health students complete their programs with an internship and electives on a wide variety of environmental health and public health topics.

Visit the environmental health concentration website for the most up-to-date information about course options:

<http://mph.ufl.edu/programs/master-of-public-health/environmental-health> (<http://mph.ufl.edu/programs/master-of-public-health/environmental-health/>). And visit the Website of the Department of Environmental and Global Health for information about other academic programs and activities in the department: <http://egh.phhp.ufl.edu>.

Master of Public Health with a Concentration in Epidemiology

Epidemiology focuses on the study of the distribution and determinants of health in populations and communities. It is the scientific foundation of public health research that seeks to reduce risk factors and improve health. The discipline also contributes to public health practice and policy, and research in other health-related fields such as medicine and pharmacy. This concentration area is designed to train professionals to apply the principles and methods of epidemiological investigation in a broad range of settings. The required concentration core courses in epidemiology are Epidemiology Research Methods I, Epidemiology Research Methods II, Epidemiology of Infectious Diseases, Epidemiology of Chronic Disease, and MPH Capstone. Epidemiology concentration students complete their programs with an internship and electives in epidemiology and public health.

Additional detail and options for epidemiology elective course work are at the website: <http://mph.ufl.edu/programs/master-of-public-health/epidemiology> (<http://mph.ufl.edu/programs/master-of-public-health/epidemiology/>). Please also visit the website of the Department of Epidemiology for up-to-date information about other epidemiology programs and activities: <http://epidemiology.phhp.ufl.edu>.

Master of Public Health with a Concentration in Population Health Management (PHM)

This concentration focuses on the structure and administration of health organizations and the policies that impact health programs and reimbursement of health services. The concentration encompasses two of the major roles of leaders in public health. Essential skills for managing a health agency or organization include accounting, financial management, human resource management, strategic and program planning, operations research, economics, and monitoring outcome measures. Development, analysis, interpretation, and evaluation of government policies require analytical skills and social skills, as well as a deep understanding of politics.

The required concentration core courses in PHM are Evidence-Based Management of Public Health Programs, Health Economics, Public Health Quality & Outcomes, Survey Research Methods, Systems Thinking and Public Health, and MPH Capstone. PHM students complete their programs with an internship and electives in population health management. Visit the population health management concentration website for the most up-to-date information about course options: <http://mph.ufl.edu/prospective-students/mph/traditional-mph-degree/concentrations/public-health-management-and-policy/>. (<http://mph.ufl.edu/prospective-students/mph/traditional-mph-degree/concentrations/public-health-management-and-policy/>)

The website of Department of Health Services Research, Management, and Policy provides additional information about activities and other academic programs in the department: <http://hsrmp.phhp.ufl.edu>.

Master of Public Health with a Concentration in Public Health Practice

This concentration provides the opportunity to develop breadth in public health by taking coursework in two, three, or four of the core public

health concentrations. Such breadth is often required of professionals who assume positions of leadership in public health. It is available to students in joint and concurrent degree programs, medical and other health scientists, and working professionals. The Public Health Practice concentration is available on-campus and online.

The campus curriculum for this concentration follows the same model as the other concentrations. Students pursuing public health practice begin their programs with the five core courses required of all MPH students. Instead of a specified set of concentration core courses, however, these students may choose two or more courses from advanced course options in two to four of the other concentrations. Students complete their degree with a capstone course and an internship. All students in this concentration must hold a prior health professional degree or be enrolled in a joint or concurrent graduate program. To be eligible for the accelerated option, applicants must hold a terminal degree in a health or health-related field.

The online Public Health Practice curriculum begins with the five core courses and then offers two or more courses in epidemiology, environmental health, public health management and policy and social and behavioral sciences. Students complete their degree with a capstone course and an internship. Online students are not available to pursue the MPH on campus in Gainesville, either due to employment or geographic distance.

Master of Public Health with a Concentration in Social and Behavioral Sciences

The social and behavioral sciences concentration is based on the understanding that health and health behavior are influenced by multiple psychological, behavioral, social, and cultural factors. Central to addressing health problems and eliminating health disparities and inequalities, these factors must be understood and addressed using a framework exploring multiple levels (individual, interpersonal, organizational, community, and population) and the interactions among them. Through classroom instruction, research, and field practice, MPH students who concentrate in social and behavioral sciences explore the unique issues faced by diverse groups and populations and acquire skills to achieve social and behavioral change. Students in the social and behavioral sciences concentration are required to take six courses: Assessment and Surveillance in Public Health, Public Health Program Planning and Evaluation, Social and Behavioral Research Methods, Public Health Information for Diverse Populations: Theory & Methods, Theoretical Foundations of Public Health, and MPH Capstone. Social and behavioral science students complete their programs with an internship and elective courses in public health or related fields.

Visit the social and behavioral science concentration website for the most up-to-date information about course options.

Degrees Offered

Degrees Offered with a Major in Public Health

- Master of Public Health
 - without a concentration
 - with a concentration in Biostatistics
 - with a concentration in Environmental Health
 - with a concentration in Epidemiology
 - with a concentration in Public Health Management
 - with a concentration in Public Health Practice
 - with a concentration in Social and Behavioral Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Student Learning Outcomes

Public Health (MPH)

SLO 1: MPH Core Knowledge & Skills

Demonstrate competence in the practice of public health.

SLO 2: Public Health Concentration Knowledge

Communicate a thorough understanding of one public health core discipline

SLO 3: Professional Behavior

Display professional conduct

SLO 4: Public Health Integration

Demonstrate synthesis of core and concentration competencies.

Public Health (Ph.D.)

Program Information

Coordinators:

Environmental Health and One Health: J. Bisesi

Health Services Research: S. Datta

Social and Behavioral Sciences: J. Pomeranz

The College of Public Health and Health Professions does not offer the Ph.D. in Public Health without a concentration. All students accepted into the program must choose one of four concentrations: Environmental Health (p. 346), Health Services Research (<https://hsrmp.phhp.ufl.edu/>), One Health (p. 346), or Social and Behavioral Sciences (<http://gradcatalog.ufl.edu/graduate/colleges-departments/public-health-professions/behavioral-science-community/public-health/>). Please see those program pages for more information.

Degrees Offered

Degrees Offered with a Major in Public Health

- Doctor of Philosophy
 - concentration in Environmental Health
 - concentration in Health Services Research
 - concentration in One Health
 - concentration in Social and Behavioral Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

public health

SLO 1 Knowledge

Generate new knowledge in the field of public health.

SLO 2 Teaching Skills

Demonstrate competence in class preparation, engagement and contributions to a positive learning environment

SLO 3 Problem-Solving Skills

Demonstrate problem-solving skills by applying, analyzing and synthesizing content knowledge in public health.

SLO 4 Professional Behavior

Display behavior appropriate to scientific discourse and communication

Rehabilitation Science Program Information

Director: D. D. Fuller

Graduate Coordinator: L. Quintana

The interdisciplinary Ph.D. program in rehabilitation science is offered through the College of Public Health and Health Professions. Rehabilitation science describes those disciplines which focus on both basic and applied aspects of health science and services, the social sciences, and engineering as they relate to restoring human functional capacity and improving a person's interaction with the surrounding environment. An important point of emphasis is that rehabilitation science should encompass research ranging from molecular biology through population health. The program embraces a wide range of disciplines, and supports the view that collaboration is the best way to advance human health. Students work closely with their faculty mentor within three broad concentrations/emphasis areas: Neuromuscular Plasticity, Disability, Occupation and Participation Science, and Communication and Swallowing Sciences and Disorders. On successful completion of the program, graduates typically take positions in research universities and research centers. Requirements for the Ph.D. degree are provided elsewhere in this catalog.

Admissions decisions are determined by an interdisciplinary admissions committee. The program is a minimum of 90 credit hours of study beyond the bachelor's degree. The curriculum includes 10 credit hours in rehabilitation science application; 6 credit hours in rehabilitation science teaching; 13 graduate credits in research methods and statistics; 31 credit hours in research; 18 credit hours within the student's concentration/emphasis area; 12 credit hours of elective courses. Course work should be selected with guidance and approval from the faculty mentor and when applicable, the supervisory committee. Up to 30 credit hours may be transferred in from a master's degree program with the approval of the faculty mentor, supervisory committee, and steering committee.

For more information, including admissions requirements and deadlines, please see our website: <http://rehabsci.phphp.ufl.edu> (<http://rehabsci.phphp.ufl.edu/>).

Degrees Offered

Degrees Offered with a Major in Rehabilitation Science

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Communication and Swallowing Sciences and Disorders

- concentration in Disability, Health, and Participation
- concentration in Neuromuscular Plasticity

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Biostatistics Department

Chair: P. Qiu

Associate Chair for Education: B. Brumback

Graduate Coordinator: K. Cason

The Department of Biostatistics offers the Doctor of Philosophy degree in biostatistics (p. 339), the Master of Science degree in biostatistics (<http://biostat.ufl.edu/education/ms-in-biostatistics/>), and the Master of Public Health degree with concentration biostatistics, which is described in detail in the Public Health section of the catalog. These programs in the Department are designed to prepare students for research and faculty positions; careers in health agencies and health-related institutions; and for consultation, especially in the biomedical fields. Although each graduate program has a set of required courses, there is ample flexibility in the programs to allow each student to develop strengths and interests through elective courses, seminars, and tutorials.

Doctor of Philosophy

The biostatistics doctoral program requires a minimum of 90 semester credits beyond the bachelor's degree. All students must complete a minimum of 54 credits of biostatistics/statistics course work (30 credits can be transferred from a previously earned Master of Science program if applicable), 6 credits of public health course work, 3 credits of a consulting requirement, 6 credits of the cognate requirement, and 21 credits of dissertation work.

All graduates of the program are expected to be able to

- Conduct independent research in the development of new biostatistical methodology
- Engage in successful collaborations with investigators in new quantitative fields
- Write statistical methodology papers for peer-reviewed statistical and biostatistical journals
- Write collaborative papers for peer-reviewed subject matter journals
- Compete successfully for research and teaching positions in academic institutions, federal and state agencies, or private institutions

Specific course requirements are described at the program website <http://biostat.ufl.edu/education/phd-in-biostatistics/curriculum-overview/>.

Master of Science

The Master of Science in Biostatistics Program in the Department of Biostatistics requires a minimum of 36 post-baccalaureate credit hours. The program is designed to facilitate students' development of a strong theoretical foundation in biostatistics, broad-based understanding of biostatistical methods, and expertise in a cognate field. A typical student will be enrolled full-time for two years. Upon successful completion of the program, graduates will be awarded an M.S. degree in biostatistics. We currently offer the Master of Science program in both traditional (campus) and online learning delivery methods.

The principal goal of the M.S. program is to prepare highly qualified individuals for future Ph.D. training and for careers in biostatistics practice. This training is conducted in the innovative and interdisciplinary public health culture of the college of public health and health professions and the college of medicine and will produce graduates who will help address the shortage of biostatisticians. We expect our graduates to be highly competitive in three primary settings: academic university-based settings, industry, and federal agencies that involve research and/or public health practice.

Specific course requirements are described at the program website <http://biostat.ufl.edu/education/ms-in-biostatistics/> (Campus) and <http://biostat.ufl.edu/education/msonline/> (Online).

RSD 6110	Rehabilitation Science Theory and Application I	3

RSD 6905	Individual Work	1-4
RSD 6910	Supervised Research	1-5
RSD 6930	Special Topics in Rehabilitation Science	1-4
RSD 6940	Supervised Teaching	1-3
RSD 7979	Advanced Research	1-12
RSD 7980	Research for Doctoral Dissertation	1-15

Student Learning Outcomes

Biostatistics (PHD)

SLO 1 Knowledge

Communicate the underpinning of biostatistics concepts and methods

SLO 2 Skills

Identify, research, and acquire new biostatistical concepts and methods on one's own

SLO 3 Skills

Develop and apply new biostatistical concepts and methods independently

SLO 4 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, conduct and communications

SLO 5 Professional Behavior

Participation in academic conferences to disseminate knowledge and represent the university

Biostatistics (MS)

SLO 1 Knowledge

Communicate the underpinning of biostatistics concepts and methods.

SLO 2 Skills

Apply biostatistical concepts and methods, interpret results, communicate.

SLO 3 Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, conduct and communications.

Clinical and Health Psychology Department

Department Chair: S. Hanson

Program Director and Graduate Coordinator: D. Janicke

Academic Coordinator: M. Naidu

The Department of Clinical and Health Psychology is a unit of the College of Public Health and Health Professions. The department's programs are its doctoral clinical psychology studies leading to the Ph.D. degree in psychology; doctoral internship program; and postdoctoral studies and research all accredited by the American Psychological Association. Requirements for the Ph.D. degree is given in the Graduate Degrees (p. 778) section of this catalog.

The clinical psychology doctoral curriculum adheres to the scientist-practitioner model of education and training. Program strengths include research, education, and professional training in health care psychology, with organized areas of concentration in clinical health psychology, clinical child/pediatric psychology, neuropsychology, neurorehabilitation and clinical neuroscience, and cognitive and emotion neuroscience. Education and training experiences are also available in rural psychology.

Interested students can also apply for acceptance into the Public Health Program and obtain dual M.P.H./Ph.D. degrees.

Progress in the program is determined by departmental policies which are consistent with American Psychological Association accreditation standards. The doctoral curriculum has been continuously accredited by the American Psychological Association since 1953.

Admission to the Department is through appropriate application to the Department's admission committee. A bachelor's degree is generally adequate preparation for graduate admission. It should include undergraduate courses in both experimental psychology and statistics, along with at least two courses from the following psychology areas: developmental, social, affective, biological, and cognitive.

For more information, please see the program page below and our website: <http://chp.php.ufl.edu>.

Psychology (Clinical and Health Psychology - PHHP)

Program Information

The department of Clinical and Health Psychology is an academic and professional unit in the College of Public Health and Health Professions at the Health Science Center on the University of Florida campus in Gainesville. The doctoral program in clinical psychology has been accredited by the American Psychological Association since 1953 and adheres to the Scientist-Practitioner Model of education and training. The Clinical Psychology Doctoral program is unique in the country in that it is housed in an independent department of Clinical and Health Psychology in a major academic health science setting along with an APA accredited internship and postdoctoral program. These features foster program strengths in research, teaching, and professional training in health care psychology.

The **Scientist-Practitioner Model** allows the student to obtain broad clinical, academic, and research training that readies them for careers anywhere along the science-practice continuum. The student obtains focused research mentorship in a faculty member's laboratory and obtains broad training in clinical assessment and intervention both in and outside of their designated area of concentration.

The Doctoral Program provides the student with training in the concepts, tools, roles, and functions of the clinical psychologist. The overall goals of the graduate program are to prepare the student to:

1. investigate meaningful, empirically testable questions in the quest for understanding a behavioral process, a patient's problem, or a professional issue;
2. function as a professional psychologist;

3. practice competently in the applied areas of psychological assessment/diagnosis, intervention/therapy, and consultation; and
4. contribute to the advancement of psychological knowledge through research or other creative scholarly activity.

Through a combination of general and specialized experiences in the classroom, laboratory, and clinic students develop knowledge and skills as scientist-practitioners. Attitudes are developed toward the practice of psychology and toward related professions which enable effective personal interaction and participation in the interdisciplinary approach to problems of research and practice. As students progress in the program, they develop professional identity through acceptance of increased responsibility for professional decisions, through the execution of significant research projects, and through their contributions to the understanding of psychological problems and processes.

For more information please see our website: <http://chp.phhp.ufl.edu>

Degrees Offered

Degrees Offered with a Major in Psychology (Clinical and Health Psychology - PHHP)

- Doctor of Philosophy
 - concentration in Clinical and Health Psychology
 - *optional second concentration in Clinical and Translational Science*
 - concentration in Clinical and Translational Science
 - *optional second concentration in Clinical and Health Psychology*
- Master of Arts
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Clinical & Health Psychology

SLO 1 Knowledge

Students will analyze and discuss selected topic areas in general clinical psychology and in the student's area of specialization

SLO 2 Skills

Students will deliver a broad variety of assessment, intervention, and consultation service

SLO 3

Students will contribute to the knowledge base of clinical psychology through production of empirical research

SLO 4 Professional Behavior

Students will deliver professional services to patients and conduct professional research in a manner that shows dedication to applicable ethical, professional practice, and legal standards

Environmental and Global Health Department

Chair: T. Sabo-Attwood

Ph.D. Program Director: J. Bisesi

Graduate Coordinator: V. Houghton

The Department of Environmental and Global Health offers graduate work leading to the degrees of Doctor of Philosophy, Master of Health Science, and Master of Public Health. The official minimum requirements for these degrees are listed in the Graduate Degrees (p. 778) section of this catalog.

The Department of Environmental and Global Health conducts cutting edge research at the nexus of human and environmental systems, blending research focused on how emerging pathogens, chemical contaminants, climate change, nutrition, and socio-economic factors influence the health of humans and animals on a global scale. Department faculty, scientists, and students employ numerous disciplines in studying these environmental exposure-health links and prevention/control measures: virology, bacteriology, parasitology, entomology, toxicology, epidemiology, water sciences, veterinary health, environmental engineering, aerosol biology, etc. A central theme for the department is the interdisciplinary thinking called One Health (https://www.youtube.com/watch/?feature=player_embedded&v=u6ewl8Sbypl) which reflects the collaborations necessary to tackle public health's most difficult problems. Faculty, students and staff often perform research in the laboratories in the Emerging Pathogens Institute (<http://www.epi.ufl.edu/>), the Center for Environmental and Human Toxicology (<https://toxicology.vetmed.ufl.edu/>), the Center for African Studies (<https://africa.ufl.edu/>), or the Aquatic Pathobiology Laboratory (<https://aquaticpath.php.ufl.edu/>).

For more information, please see the program pages below and our website: <http://egh.php.ufl.edu>.

Epidemiology Department

Chair: S. Kimmel

Ph.D. Program Director: C. Prins

M.S. Program Director: H. Stark

The Department of Epidemiology – jointly governed by the College of Public Health and Health Professions and the College of Medicine – offers the Doctor of Philosophy degree in epidemiology, Master of Science degree in epidemiology (MSE), the Certificate in Psychiatric Epidemiology (CPE), and the Master of Public Health degree with a concentration in epidemiology (described here (p. 331)). Minimum requirements for these degrees are described in the Graduate Degrees (p. 778) section of this catalog. The programs in the department are designed to prepare students for careers in academic research environments, public health agencies and health-related institutions, and consultation, especially in the biomedical fields.

More information on these programs is available at the program page below and at the department website: <http://epidemiology.phhp.ufl.edu>.

Epidemiology (PHHP)

Program Information

The **Ph.D. in Epidemiology program** is in the Department of Epidemiology, which is jointly governed by the College of Public Health and Health Professions and the College of Medicine. The program requires a minimum of 90 semester credits beyond the bachelor's degree. All students must complete at least 36 credits of epidemiology core courses, 6 credits of statistics electives, 18 credits of epidemiology electives, 15 credits of general electives, and 15 credits of dissertation research. Students may also apply to graduate with one or two concentrations selected from one of seven concentration areas. All entering students who do not hold MPH or equivalent degrees are also required by the College of Public Health and Health Professions to complete an Introduction to Public Health course.

All students admitted to the Ph.D. program in Epidemiology are fully funded for four years, including a tuition waiver and a stipend. Depending on a student's source of funding, the student may work for up to 20 hours per week as a research assistant, a teaching assistant, or some combination of the both. Funding sources for students may include the student's research mentor, the department, the college, the Graduate School, or external fellowships or scholarships pursued by the student.

The core course work is designed to incorporate competencies recommended in the report of the 2002 workshop on doctoral education in epidemiology from the American College of Epidemiology and the Association of Schools and Programs of Public Health, and criteria for applied epidemiology competencies. The overall outcomes expected of all graduates are as follows:

1. Apply epidemiological methods to address critical and/or emerging public health issues through the use of:
 - Appropriate epidemiological research designs
 - Advanced statistical analysis methods for health studies
 - Data structures and measurement methods for health research
 - Depth of knowledge in an area of specialization
2. Apply ethical thinking to a questionable ethics case from the current news
3. Develop grant proposals and manage research projects
4. Write scientific papers for publication in peer-reviewed journals, and communicate research results to scientists, policy makers, and the public

Students in the Ph.D. program in Epidemiology may apply to graduate with a concentration in up to two of the following areas:

- Cancer Epidemiology
- Genetic Epidemiology
- Gero-Epidemiology
- Infectious Disease Epidemiology

- Psychiatric Epidemiology
- Clinical and Translational Science

Concentrations allow PhD students to focus their elective coursework toward specialized content areas that interest them. All concentrations offered by the Department of Epidemiology are completely optional, and students may enroll in up to two concentrations. Enrollment in a concentration requires the approval of the student's academic advisor, research mentor, PhD Program Director, and Curriculum Committee Chair.

All concentrations require that students submit either (a) dissertation aims or (b) a first-authored publication that documents research in the area of the concentration in addition to the required courses.

The overarching goal of each concentration is to provide learners with advanced training in each respective field. This training will help prepare researchers for the frontlines of interdisciplinary team science targeted towards improving the quality of life, health, and society using epidemiologic tools and methods.

Details of the Ph.D. in Epidemiology program and application information are available at our website: <http://epidemiology.phhp.ufl.edu/about/ph-d-in-epidemiology-2> (<http://epidemiology.phhp.ufl.edu/about/ph-d-in-epidemiology-2/>).

The **Master of Science in Epidemiology (MSE) program** is a 36-credit program that prepares students for careers in the public health arena that are focused on the surveillance and prevention of illnesses among diverse populations around the world. Students will be trained in the foundational aspects of epidemiology, including person, place, and time; risk and protective factors; and the social determinants of health. Areas of focus may include chronic disease, infectious disease, geriatric, environmental, psychiatric, social, cancer, and maternal and child health epidemiology.

The thesis is required to demonstrate skill in independent inquiry and investigation, under the tutelage of a mentor. All students must complete at least 15 credits of epidemiology core courses, 8 credits of biostatistics courses, 4 credits of professional development courses, 5 credits of electives, and 4 credits of thesis research.

Graduates of the MS in Epidemiology program will be able to:

- Apply surveillance, assessment, evaluation, and other foundational epidemiological research designs to all areas of interest,
- Choose appropriate measurement and analytic methods to study health and disease in a population,
- Utilize biological, behavioral and social theory to understand how to prevent and intervene to promote the public health.

Details of the Master of Science in Epidemiology program and application information are available at our website: <https://epidemiology.phhp.ufl.edu/academics/mse/>.

Degrees Offered

Degrees Offered with a Major in Epidemiology

- Doctor of Philosophy
 - without a concentration
 - concentration in Cancer Epidemiology

- optional second concentration in Data Sciences Epidemiology
- optional second concentration in Genetic Epidemiology
- optional second concentration in Gero-Epidemiology
- optional second concentration in Infectious Disease Epidemiology
- optional second concentration in Psychiatric Epidemiology
- concentration in Clinical and Translational Science
 - optional second concentration in Cancer Epidemiology

Student Learning Outcomes

Epidemiology (PHD)

SLO 1 Skills

Design epidemiologic research studies and analyze data to answer health-related research questions that are currently relevant to the population.

SLO 2 Skills

Prepare to become an independent researcher in the field of Epidemiology.

SLO 3 Knowledge

Illustrate a thorough understanding of epidemiology concepts.

SLO 4: Professional Behavior

Display ethical behaviors, cultural sensitivity, teamwork, professional conduct and communication, and build academic skills such as grant writing.

Epidemiology (MS)

SLO 1 Knowledge

Apply surveillance, assessment, evaluation, and other foundational epidemiological research designs to all areas of interest.

SLO 2 Skills

Choose appropriate measurement and analytic methods to study health and disease in a population.

SLO 3 Skills

Utilize biological, behavioral and social theory to understand how to prevent and intervene to promote the public health.

SLO 4 Professional Behavior

Display ethical behavior, cultural sensitivity, integrity in research conduct, honesty, and teamwork.

Health Services Research, Management and Policy Department

Chair: L. Revere

Graduate Coordinator: B. Crown

The Department of Health Services Research, Management and Policy offers degree programs at the master's level. The Master of Health Administration (M.H.A.) prepares individuals for management positions in the health care field. The Department also participates in the Master of Public Health (M.P.H.) degree by offering a concentration in Public Health Management and Policy (more information available here (p. 331)). Health services research is a multidisciplinary field that examines the delivery, organization, financing, and outcomes of health care services.

Minimum requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog.

For more information, please see the degree program pages listed on the following tab and our website: <http://hsrmp.php.ufl.edu>.

Majors

- Health Administration (p. 351)

Health Administration

Program Information

The Master of Health Administration (M.H.A.) is a two-year, lock-step program with a summer internship between the first and second years. Small class size permits individual attention and guidance from faculty members. The program prepares qualified individuals motivated by a social mission and responsibility to the community for various management positions in the health services industry. Organizations seek individuals who have the ability to solve business problems and build strategic relationships in a climate of continuous change.

The UF M.H.A. program develops engaged early health care careerists to use evidence-based strategies to improve healthcare quality, affordability, and access. We provide students with fundamental knowledge using a cohort model in a campus-based setting that emphasizes experiential learning and data-driven problem solving both in the classroom and in the practice environment. Students will develop proficiency to detect, analyze, manage and respond to critical administrative issues in both provider and non-provider healthcare organizations. Our program embraces ethical conduct and professionalism, diversity and inclusion, practitioner involvement and team-based learning. Faculty inform practice with research and service to the community.

Applicants from any undergraduate major are considered. For more information about our program, please see our website: <http://hsrmp.php.ufl.edu/academic-programs/master-of-health-administration> (<http://hsrmp.php.ufl.edu/academic-programs/master-of-health-administration/>).

Student Learning Outcomes**Health Administration (MHA)****SLO 1 Knowledge and Skill**

Students will apply in-depth knowledge and skill in the healthcare delivery, organization, and financing, and management

SLO 2 Skills

Students will exhibit mastery of a set of 16 competencies in 4 domains (healthcare environment and community; healthcare organizations and performance; business analysis and techniques; leadership and professionalism)

SLO 3 Professional Behavior

Students will gain experience in healthcare management and develop professional behavior skills in a summer internship

Speech, Language, and Hearing Sciences Department

Chair: C. Ellis

Graduate Coordinators: K. J. Logan and J. Raney

Graduate programs in the Department lead to Master of Arts and Doctor of Philosophy degrees in Communication Sciences and Disorders and to the Doctor of Audiology degree. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Master of Arts in Communication Sciences and Disorders and the Doctor of Audiology degrees are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association.

The **Master of Arts (M.A.) Program** offers comprehensive academic and clinical training for students who are interested in a career in speech-language pathology. The five-semester program culminates in the completion of either a clinical externship or a Master's thesis, and it provides graduates with entry level knowledge and skills for obtaining employment in a variety of professional work settings. Students have the opportunity to complete clinical practica at sites within the University of Florida's Health Science Center and at other medical, rehabilitative, and educational facilities on or near the campus. These sites allow students to gain experience with providing clinical services to a range of patient populations.

Applicants to the Master's program must demonstrate successful completion of pre-requisite coursework in both normal bases of communication and introductory concepts in communication disorders. Additional information about these pre-requisites is available on the Department website. Graduates of the program are eligible for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) from the American Speech-Language-Hearing Association as well as state licensure in speech-language pathology. For more information, contact Kenneth J. Logan, Ph.D. (klogan@ufl.edu).

The **Doctor of Audiology (Au.D.) Program** in the Department of Speech, Language, and Hearing Sciences is a four-year graduate degree. Graduate students take course work in theoretical and applied audiologic sciences and research. There are no specific undergraduate courses required for admission to the Au.D. degree program, although applicants with a strong science background are encouraged to apply. Graduates of this program are eligible for the Certificate of Clinical Competence in Audiology (CCC-A) administered by the American Speech-Language-Hearing Association, Board Certification in Audiology administered by the American Academy of Audiology, and for state licensure in audiology. For more information, contact Jill Raney, Ph.D. (jraney@phhp.ufl.edu (<http://gradcatalog.ufl.edu/graduate/colleges-departments/public-health-professions/speech-language-hearing-sciences/jraney@phhp.ufl.edu>)).

The **Ph.D. Program in Rehabilitation Sciences:** Communication and Swallowing Sciences and Disorders (CSSD) concentration

focuses on the scientific investigation of all aspects of communication and swallowing disorders and their rehabilitation. This concentration includes a range of interdisciplinary, conceptually broad subfields, unified by the anatomical and neurophysiological structures they share. Students may focus on the mechanisms and rehabilitation of swallowing and the upper aerodigestive tract, and/or speech, language, and hearing sciences and disorders. The required courses in the concentration reflect broad conceptual frame underlying CSSD as well as the wide range of

science being conducted by the Graduate Faculty from Departments and Institutes across the University of Florida. Students may choose from a variety of courses to fulfill their core requirements to create a unique program preparing them to do research in their field of interest.

For more information about the **PhD in Rehabilitation Science: Concentration in Communication and Swallowing Sciences and Disorders**, see the degree program website:

Audiology Program Information

The Department of Speech, Language, and Hearing Sciences offers the Doctor of Audiology degree. The official minimum requirements for the degree are available in the Graduate Degrees (p. 778) section of this catalog.

The Doctor of Audiology degree program is a campus-based program that:

- Prepares students for a professional career in audiology.
- Provides a wide array of experiences in the practice of diagnostic and rehabilitative audiology.
- Provides students with complex and diverse skills necessary to meet the challenges of the rapidly changing hearing health care field.

The clinical and academic curriculum includes coursework in the basic sciences, applied audiology, clinical research, statistics, audiologic rehabilitation, medical neuroscience, neuro-otology, cochlear implants, health care administration, programmable hearing aids, counseling, and aging. Graduates of this program are eligible for the Certificate of Clinical Competence in Audiology (CCC-A) administered by the American Speech-Language-Hearing Association, Board Certification in Audiology administered by the American Academy of Audiology, and for state licensure in audiology.

The on-campus program for bachelors-level applicants is a four-year graduate degree totaling 110 semester hours. The curriculum includes 78 hours of coursework in basic sciences, applied audiology, clinical research, statistics, audiologic rehabilitation, medical neuroscience, neuro-otology, cochlear implants, pharmacology, health care administration, programmable and digital hearing aids, counseling, communication and aging, and speech-language pathology.

In the remaining 32 hours of the on-campus program, students gain extensive clinical practicum experience. These practicum experiences utilize various resources at the University of Florida Health Science Center and affiliated hospitals in the North Florida area, as well as the Veterans Administration Medical Center. The final clinical training hours occur during the fourth year of the program as part of an audiology externship placement.

Student Learning Outcomes

Audiology (Aud)

SLO 1 Knowledge

Identifies, describes, explains and applies acoustic, anatomical, psychological, developmental and social aspects of normal and disordered hearing

SLO 2 Knowledge

Identifies, plans, and applies the range of appropriate management steps for persons with hearing and balance disorders and the methods for determining the effectiveness of each

SLO 3 Skills

Through advanced professional practice obtains accurate information about hearing and balance function, including via case history interview, and through the appropriate selection and completion of behavioral, electrophysiological and psycho-social assessments

SLO 4 Skills

Applies clinical decision making and problem-solving skills in a clinical audiology context

SLO 5 Professional Behavior

Critically evaluates research relevant to audiology practice

SLO 6 Professional Behavior

Communicates critical, clinically relevant information verbally and/or in writing

Communication Sciences and Disorders

Program Information

The Department of Speech, Language, and Hearing Sciences offers a Master of Arts in Communication Sciences and Disorders. A Doctor of Philosophy (Ph.D.) degree is offered through the Rehabilitation Sciences Doctor of Philosophy Program: Communication and Swallowing Sciences and Disorders (CSSD) concentration. For more information about a Ph.D. in Speech Pathology and Audiology related topics, see <https://rehabsci.phphp.ufl.edu/programs/course-requirements/communication-and-swallowing-sciences-and-disorders-track/>

The **Master of Arts program** is designed to prepare students for entry-level professional practice in speech-language pathology. The program offers students a comprehensive learning experience – one that combines active classroom-based learning with an assortment of “hands on” learning opportunities at the many clinical sites available on or near the University of Florida campus. Graduates of the program can expect to develop the knowledge and skills that are needed to deliver evidence-based clinical services to a wide range of populations in a variety of clinical settings. The Master of Arts program is primarily oriented toward developing students’ clinical competence; however, students who elect to enter the “thesis track” of the program have the opportunity to conduct original research in laboratory and real-world settings under the mentorship of faculty who are widely recognized for their research contributions.

For more information, please see the department website: <http://slhs.phphp.ufl.edu/academics> (<http://slhs.phphp.ufl.edu/academics/>).

Student Learning Outcomes

Communication Sciences & Disorders (Ph.D.)

SLO1

Communicate theoretical understanding

Students communicate theoretical understandings and the evidence for them to audiences which may include members with varying degrees of experience and/or expertise

SLO2

Evaluate and discuss research

Students critically evaluate research design and discuss the impact of research findings on relevant theory.

SLO3

Supervised Teaching

Students teach an undergraduate class.

SLO4

Grantsmanship

Students understand the grant mechanisms available to our field and how to write proposals to secure grant funding.

SLO5

Publications

Students produce original data-based research papers suitable for publication in top-tier, peer-reviewed journals.

Communication Sciences & Disorders (M.A.)

SLO 1

Knowledge

Students will demonstrate knowledge of speech, language, hearing, and swallowing processes, including their biological, neurological, acoustic, psychological, developmental, linguistic, and cultural bases in academic and clinical settings

SLO 2

Knowledge

Students will demonstrate knowledge of the principles and methods of prevention, assessment, and intervention for people with communication and swallowing disorders, including consideration of anatomical/physiological, psychological, developmental, social, linguistic and cultural correlates of the disorders, in academic and clinical settings

SLO 3

Skills

Students will display clinical skills needed to assess and diagnose speech, language, and swallowing disorders

SLO 4

Skills

Students will apply clinical skills needed to provide efficacious and appropriate intervention for individuals with speech, language, and swallowing disorders

SLO 5

Professional Behavior

Students will demonstrate ethical behavior and compliance with the University's rules and policies during interactions with program faculty and staff, clients/patients and their families/caregivers, as well as with other professionals

SLO 6

Professional Behavior

Students will apply professional knowledge and skills to implement evidence-based assessment and intervention practices that incorporate the needs, values, and cultural/linguistic background of the client/patient and/or their caregivers

College of the Arts

Interim Dean: J. Setlow

Interim Associate Dean: M. Haning

The arts program at UF began in the 1920s to serve the state of Florida's needs. Meeting these needs over the past 80 years has propelled the college to excel on a national and international level and has defined its mission to provide instruction for students seeking professional careers in the arts. In addition to providing rich educational experiences and programs in the arts, the college brings national and international recognition to the university through the high-level professionalism associated with the faculty and alumni, and the competence of students and graduates.

For more information about the College of the Arts, please see our website: <http://www.arts.ufl.edu>. (<http://www.arts.ufl.edu>)

Arts in Medicine Program Information

Center for Arts in Medicine Director: F. Carytsas

Center for Arts in Medicine Graduate Advisor: E. K. Sommer

The Center for Arts in Medicine is committed to advancing research, education, and practice in the arts in healthcare, locally and globally. The Center offers an online Master of Arts (MA) in Arts in Medicine. Minimum requirements for the degree are available in the Graduate Degrees (p. 778) section of this catalog.

Prerequisites and Requirements

Admission to the MA in Arts in Medicine program requires a bachelor's degree in an arts, health, or related field of study; a GRE exam score (no minimum score is required) or previous graduate degree; and completion of one of the following prerequisites: the Introduction to Arts in Medicine in a Global Context course at UF; completion of an Arts in Medicine Summer Intensive, completion of the online course Creating for the Health of It, or a minimum of one year of professional experience as an artist or administrator in the arts in health field. Requirements of the degree include completion of 35 credits of coursework with a 3.0 or higher GPA.

Commitment of Time

The MA in Arts in Medicine is designed to be completed in two years when students are enrolled in two classes per 16-week semester (most of the courses are offered in 8-week terms). Students should expect to dedicate 16 hours per week to each 8-week, 3-credit-hour course and 8 hours per week for 16-week courses.

The College participates in a combination degree between the Bachelor of Music and the Master of Arts with a major in Arts in Medicine,

For more information, please go the Center for Arts in Medicine website: <http://www.arts.ufl.edu/cam> (<http://www.arts.ufl.edu/cam/>).

Student Learning Outcomes

Arts in Medicine (Master of Arts)

SLO1
Knowledge

Students will be able to identify and articulate the theoretical foundations, ethical frameworks, core issues, and contemporary trends that inform the field and practice of arts in health.

SLO2
Skills

Demonstrate professional-level skills in using the arts to safely facilitate the arts in healthcare and community settings.

SLO3

Professional Behavior

Identify and articulate conceptual and procedural knowledge to develop, administer, and evaluate arts in health programming.

Digital Worlds Institute

Director: T. Difato

Graduate Coordinator: J. Marlin

The Digital Worlds Institute exists to nurture leading edge education between the arts, communications, engineering and the sciences, utilizing advanced media systems and digital culture. By bringing together the diverse talents of University of Florida faculty, students, and staff in a multifaceted collaborative environment, the Institute serves as a platform for interdisciplinary research and teaching that would not have occurred within the confines of any one college or department. Through the use of interactive tools and technologies, the Institute promotes transdisciplinary creativity across classrooms, continents and cultures.

For more information, please see the program page below and our website: <http://www.digitalworlds.ufl.edu>.

Digital Arts and Sciences (Arts)

Program Information

The Master of Arts in Digital Arts & Sciences (DAS) degree seeks to allow students from diverse academic backgrounds the opportunity to develop fluency in the technologies, design practices and collaborative interdisciplinary teamwork increasingly required by the media, communications and entertainment industries. Graduates holding the M.A. in DAS degree would typically seek employment in the creative services sector, applying digital techniques and technologies in a variety of professions. Opportunities range from traditional cinema to interactive games; from broadcast media to online international networks to emergent industries.

Although this is a thesis degree, students usually produce a creative project in lieu of thesis. Students should see the graduate coordinator for the requirements for the creative project, which are also provided in the DAS Student Handbook.

Students seeking admission are expected to have an undergraduate background including:

- A degree in one of the fine arts or liberal arts
- A body of work that demonstrates accomplishment in the intended area
- A body of work that can clearly be enhanced with skills to be acquired in the DAS program.

Deficiencies may be corrected before beginning graduate study. In addition to appropriate academic credentials and prior scholastic achievement, admission into the program requires a well-constructed Statement of Purpose and media-related support material (i.e. samples of design, programming, video, web, writing, etc.) that demonstrates both prior interest and/or achievement in New Media/Digital Arts & Sciences.

Degrees Offered

Degrees Offered with a Major in Digital Arts and Sciences

- Master of Arts

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Digital arts and sciences (MA)

SLO 1 Knowledge
Explains the sociotechnical academic domain of Digital Arts & Sciences (DAS), and describes the transdisciplinary foundations of DAS design, inquiry and expression

SLO 2 Knowledge
Identifies the principles involved in the creation of interactive digital media artifacts

SLO 3 Skills
Solves problems and integrates systems thinking skills necessary to develop advanced media systems

SLO 4 Skills
Collaborates in cross-functional design and development teams

SLO 5 Professional Behavior

Exhibits the professional behaviors required in the field

Digital arts and sciences (MS)

SLO 1 Knowledge

Students identify, formulate, and solve computer science and engineering problems.

SLO 2 Knowledge

Students can critically read computer science and engineering literature.

SLO 3 Skills

Students use the techniques, skills, and tools necessary for computer science and engineering practice at an advanced level.

SLO 4 Professional Behavior

an understanding of professional and ethical responsibility.

SLO 5 Professional Behavior

Students can communicate effectively.

School of Art and Art History

Director: E. Ross

Graduate Coordinator: P. Grigsby

The School of Art and Art History offers the M.F.A. degree in art with specializations in art + technology, ceramics, creative photography, drawing, graphic design, painting, printmaking, and sculpture. The school also offers Master of Arts degrees in art education, art history, and museology (museum studies) and the Doctor of Philosophy degree in art history. Requirements for these degrees can be found in the Graduate Degrees (p. 778) section of this catalog, and information about each of these graduate programs can be found at the links below.

Art

Program Information

Master of Fine Arts degree: The school offers the M.F.A. degree in art with specializations in art + technology, ceramics, creative photography, drawing, graphic design, painting, printmaking, and sculpture. Enrollment is competitive and limited. Candidates for admission should have adequate undergraduate training in art. Deficiencies may be corrected before beginning graduate study. Applicants must submit a portfolio for admission consideration (for comprehensive admission information: <http://www.arts.ufl.edu/programs/grad.aspx>). A minimum of 3 years

residency is normally needed to complete the requirements for this degree, which for studio students culminates with an M.F.A. exhibition.

The M.F.A. requires a minimum of 60 credit hours:

- 24 hours must be in an area of specialization.
- Normal course requirements include:
 - 12 hours of studio electives outside the area of specialization
 - 6 hours of art history electives
 - 3 hours of outside SA+AH electives (research/discipline appropriate)
 - 6 hours of electives
 - 6 hours of individual project or thesis research.

Although the M.F.A. is a thesis degree, students usually produce a creative project in lieu of thesis. Students should see the graduate program adviser for the School's requirements for the creative project.

Degrees Offered

Degrees Offered with a Major in Art

- Master of Fine Arts
- Master of Arts
 - *without a concentration*
 - *concentration in Digital Arts and Sciences*

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Art (MFA)

SLO 1 Knowledge

Develop a body of artwork or design that reflects conceptual cohesiveness, creativity/originality, and contribution to the field.

SLO 2 Skills

Solve creative problems within their field of art and design, including research and synthesis of technical, aesthetic, and conceptual knowledge.

SLO 3 Professional Behavior

Organize and communicate their ideas and work products at a professional level with their intended audience using visual, oral, and written skills.

SLO 4 Skills

Execute technical, aesthetic, and conceptual decisions based on an understanding of art and design principles within a student's stated intention.

SLO 5 Knowledge

Describes and explains the relevance of the student's work to major cultural and/or aesthetic models.

Art Education

Program Information

Master of Arts degree in Art Education: The School offers the M.A. in art education. In addition to meeting requirements of the Graduate School for admission, prospective students should:

- Hold a degree in studio art, art history, design, or art education
- Send up to 10 images of original works of art (on CD or in slide form) and a research paper, article, or other sample of academic writing
- Official transcripts from all colleges/universities previously attended
- Statement of professional goals for attending graduate school and earning an M.A. degree in art education
- Current Curriculum Vitae or Resume
- Submit three current letters of recommendation.

The M.A. in art education requires a minimum of 36 credit hours.

The student describes and executes the project proposal, making appropriate adjustments as necessary.

SLO 3 Skills

Synthesizes knowledge obtained in art education literature courses in planning and executing the project.

SLO 4 Skills

Explains and supports their thesis or project and the project's underlying ideas.

SLO 5 Professional Behavior

Connects the thesis or capstone project to current or past art education scholarship.

Art History

Program Information

The School of Art & Art History offers graduate programs leading to the M.A. and Ph.D. degrees. Minimum requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog. For complete details of the M.A. and Ph.D. degree requirements, see the Director of Graduate Studies—Art History. Art History students may participate in courses offered by the State University System's programs in Paris, London, and Florence. Other study-abroad programs may be approved by the director of graduate studies.

For the M.A. degree, the School offers areas of emphasis in Ancient, Medieval, Renaissance/Baroque, Modern, and non-Western art history (including African, Asian, and Oceanic). A minimum of 36 credit hours is required:

Code	Title	Credits
Required Courses		
ARH 5816	Methods of Research and Bibliography	3
ARH 6971	Research for Master's Thesis	6
Required Coursework		
Coursework		6
Select a graduate seminar in each of the following areas		12
Ancient		
Renaissance/Baroque		
Modern/Contemporary		
Non-West		
Select 9 credits in related areas with the graduate program adviser's approval		9
Total Credits		36

Reading proficiency in a foreign language appropriate to the major area of study must be demonstrated before thesis research is begun. Language courses cannot apply toward degree credit.

For the Ph.D. degree, the School offers the same areas of specialization as for the M.A. degree. Up to 30 credits from the M.A. degree may apply toward the 90 credit Ph.D. degree. A program of 60 credit hours beyond the M.A. degree is required. Core courses will consist of a minimum of 30 hours in art history:

- 18 hours in a primary area (5000-level or above)
- 9 hours in a secondary area (5000-level or above)
- 3 hours of theory/methodology of art history (if ARH 5816 Methods of Research and Bibliography (3 cr.) or its equivalent has not been taken as part of the M.A.)

- An additional 12 hours of outside electives taken in other schools or departments are required in a discipline(s) related to the primary area of study
- Finally, 27 hours of dissertation research and writing is required.

By the end of the second semester or equivalent full-time study, students should form their supervisory committee that must include a minimum of four Graduate Faculty members; one of whom must agree to serve as primary dissertation adviser and supervisory committee chair. The supervisory committee will also act as the qualifying examination committee. Normally students will take the qualifying examination during the spring term of the third year in residence. The examination is both written and oral. It will cover the major and minor art history areas of emphasis as well as the student's preliminary formulation of a dissertation topic and provisional statement of the approaches to that topic as expressed in the dissertation prospectus. On successful completion of the qualifying examination, the approval by the supervisory committee of the dissertation prospectus, and fulfilling all other course and language requirements, the student makes formal application for a change of status to Ph.D. candidacy. Normally, a student will be expected to present the completed dissertation and defend it at an oral defense conducted by the supervisory committee by the end of the sixth year in the program. For Ph.D. students, reading knowledge of two research languages other than English must be demonstrated by the end of the second year of course work, or by the end of the first semester in the case of transfer students. Language courses are not applicable toward degree credit.

For more information, please see our website: <http://arts.ufl.edu/academics/art-and-art-history> (<http://arts.ufl.edu/academics/art-and-art-history/>).

Produces written scholarly research that conforms to academic publishing conventions

SLO 4 Skill

Verbally describes thesis research, relevant historiography, and theory

Art history (MA)

SLO 1 Knowledge

Recalls and describes historiography, methodology, and theory of art

SLO 2 Skills

Identifies a thesis project that contributes to the state of the field

SLO 3 Professional Behavior

Produces written scholarly research that synthesizes the primary and secondary source materials

SLO 4 Skills

Student is engaging primary and secondary resource materials

SLO 5 Professional Behavior

Student verbally communicates the claims of the thesis

Design and Visual Communications

Director of Graduate Studies: M. Rogal

Program Coordinator: P. Grigsby

Summary: The Master of Fine Arts degree in Design and Visual Communications is a terminal degree with the goal of preparing designers to address complex problems through an expanded design framework. The curriculum envisions design as an integrated activity, emphasizing co-design and horizontal practices in its teaching and application of research, theory, methods, and practice. A key aspect of the program is to design with people in context in order to address complex problems that matter to people and the environment and we believe Florida is an excellent laboratory to explore pressing problems of our time. Students benefit from Florida's complexity and diversity. As the third largest US state and gateway to Latin America and the Caribbean, the state offers a unique lab to explore collaborative design interventions in context. Through this program, we use design as a catalyst for change and sustainable development to make Florida, and the world, better through design. We also encourage students to consider how what they learn is transferrable to other contexts and environments. Students will encounter the world through a framework that is respectful of context and culture and that values collaboration and many knowledges as ways of making design that is responsible and meaningful.

Admissions: Enrollment is competitive and limited. Applicants should have the background and proficiency in communication design or a related field and demonstrate potential for successful study at the graduate level. This includes the ability to craft appropriate communication design artifacts, excellent verbal and written articulation of ideas, and an understanding of and interest in this program specifically rather than design more generally. Preferred applicants will have professional practice experience in design or a design-related field. Certain deficiencies, such as some formal technical competencies, may be corrected before beginning graduate study. Applicants must submit a portfolio and other materials for admission consideration (for comprehensive admission information: <https://arts.ufl.edu/academics/art-and-art-history/programs/mxd/>). (<https://arts.ufl.edu/academics/art-and-art-history/programs/mxd/>).html)

Enrollment Options: This program offers two-and three-year residency tracks. Students on a three-year track will enroll in 9 credits each semester and students on the two-year track will enroll in 12–15 credits during the academic year and both tracks require summer coursework. Students who wish to obtain teaching experience should pursue the three-year track and apply for a graduate assistantship (teaching assignments are based on faculty recommendation and availability).

Curriculum: We offer a design-centered curriculum that allows you to dive deep into research, theory, methods, practice, and designing in and with communities. Our curriculum, built on our 20+ year history of graduate education and research in design, allows you to learn from diverse knowledges, approaches, experiences, and modalities. We emphasize culture, inclusivity, social justice, and sustainability so we make design matter. We recognize the value of exploring other disciplinary knowledges, particularly at such a comprehensive university. The program, known as the MXD, allows you to inform your design practice by identifying and exploring other interests (the "x") to inform your design trajectory, making your studies at the University of Florida even more rewarding.

The M.F.A. requires a minimum of 60 credit hours for the terminal degree. Normal course requirements include the following: 24 hours of design and visual communications courses (12 hours of seminar, 12 hours of research and practice); 6 hours of practica; 15 hours of project-in-lieu-of-thesis research; and 15 hours of elective coursework.

All major coursework is designed to provide opportunities for professional development in design. Students develop knowledge in design theory, methods, discourse, and issues in the seminar courses, while the research & practice courses provide frameworks to apply this learning in context. Students will study and use a range of methods appropriate for an expanded design practice. Their use is addressed and applied through discussions, case studies, writing, fieldwork, project work, deliverables, and presentations. Projects will engage students to design in a complex environment for diverse audiences and explore the many aspects necessary to design for 'real world problems' and constraints. Throughout the program, students will be mentored in ways to disseminate research at conferences and in publications in order to share their work and build their careers. Six hours of practicum provide an opportunity to conduct research and practice with an approved entity; and elective courses are intended to support an area of interest and expertise. In consultation with program faculty, the program director may recommend specific courses to support the student's knowledge-base (for example, in design, writing, subject matter knowledge, and/or teaching). The program culminates with a 15-credit project-in-lieu-of-thesis, which is selected, researched, and carried out under the direction of the supervisory chair and committee. This committee is formed in consultation with and approval from the program's director of graduate studies during the first year for students on the two-year track and during the second year for students on the three-year track. The objective is to contribute original research and disseminate it to the field.

Expected Outcomes: Every student in the program will develop a body of work that includes design and visual communication artifacts, systems, and strategies, that reflect original contributions to the discipline; demonstrate the ability to frame and incorporate research methods and related research activities and findings into tangible outcomes; create a dossier that organizes and communicates research (including creative activity), findings, proposals, and work products at a professional level; demonstrate the ability to collaborate and work effectively in interdisciplinary/multidisciplinary teams to develop approaches and solutions to complex problems; be prepared to present project work

at professional conferences and publish in professional venues; and demonstrate the ability to design with people, in context.

Assessment: Student achievement is assessed in multiple ways from admission through graduation. University and program regulations state that a student must achieve a 3.0 GPA in order to graduate from the program, which is the result of assessment in courses. In addition, students must present their work product at the end of each semester to a faculty review committee who determines if the student, on the whole, is making sufficient progress towards candidacy and completion. Reviews consider the momentum, direction, and performance as a whole. Outcomes of semester reviews include continuation based on appropriate progress; recommendations for improvement; and recommendation of dismissal for continued performance below expectations.

Futures: With this credential, program graduates will be prepared to enter leadership positions in design consultancies, non-profit organizations, government agencies, and corporations, as well as form their own consultancies and studios, within design proper and in a range of industries. They will also be eligible to teach at universities and colleges in the US and abroad.

Museology

Program Information

Master of Arts degree in Museology (Museum Studies): The School offers this interdisciplinary program that consists of both academic and practical work. The curriculum allows students to do graduate work in a disciplinary emphasis (art history, anthropology, history, education, or the natural sciences, for example) and at the same time complete a concentrated study in professional museum practice. The M.A. degree in museology requires 48 credit hours including:

- 15 credits of museum studies courses (museology seminar, 3 credits; collections management, 3 credits; museum education, 3 credits; exhibitions, 3 credits; special topics, 3 credits)
- 15 graduate credits in a disciplinary focus
- 6 credits of internship
- 6 credits of electives
- 6 credits of individual credit.

Several on-campus sites provide the program with laboratories for training students in museum work, including the University Galleries, Harn Museum of Art, Florida Museum of Natural History, and the gallery at the Reitz Union. Students must complete a 6-credit internship of at least 320 hours at an approved museum. In this experience, students undertake specific projects in which they gain first-hand experience in museum work. The Harn Museum of Art or the Florida Museum of Natural History may be able to oversee a few interns, but students are encouraged to apply for internships at other U.S. institutions or abroad.

A project-in-lieu-of-thesis (or thesis) is selected, researched, and carried out under the direction of a supervisory committee.

Degrees Offered

Degrees Offered with a Major in Museology

- Master of Arts
 - without a concentration
 - concentration in Historic Preservation

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Museology (MA)

SLO 1 Knowledge

Indicates broad knowledge of the responsibilities of museum departments and how they function together

SLO 2 Skills

Constructs coherent written articulation about specific knowledge of a specialized area of museum work

SLO 3 Professional Development

Assembles skills needed for a specific museum job.

SLO 4 Skills

Appraises pertinent issues raised by the project and evaluates them.

SLO 5 Professional Behavior

Produces a coherent verbal presentation.

School of Music

Director: K. Orr

Graduate Coordinator: C. Pickeral

The School of Music offers programs leading to the Master of Music degree in music and music education. Program concentrations in music include choral conducting, composition, instrumental conducting, musicology, ethnomusicology, music theory, performance, and sacred music. In addition, the School of Music offers the Doctor of Philosophy degree in music and in music education.

The Ph.D. program in music education emphasizes college music teaching. The Ph.D. program in music includes concentrations in:

- Music history and literature, with options in traditional musicology and ethnomusicology
- Composition, with options in acoustic and electroacoustic specialization

All Ph.D. students are encouraged to find opportunities to teach and lecture in their specializations; and with the assistance of their principal professors, to prepare papers, workshops, and clinics for presentation at professional conferences, in the public schools, and at colleges and universities. Students also are encouraged to publish their research in appropriate journals. Minimum requirements for the M.M. and Ph.D. degrees are given in the General Information section of this catalog. The week before classes begin, students must take placement examinations in music history and in music theory. Students wanting to study privately in a performance studio must be auditioned and accepted by the appropriate area faculty. Voice students must demonstrate appropriate skills in language and diction. All deficiencies must be remedied.

For more information, please see the program pages below and our website: <http://www.arts.ufl.edu/welcome/music> (<http://www.arts.ufl.edu/welcome/music/>).

Music

Program Information

The Master of Music (M.M.) degree is offered in music or music education. The music program offers the following concentrations: choral conducting, composition, electronic music, ethnomusicology, instrumental conducting, music education, music history and literature, music theory, performance, and sacred music. The M.M. degree prepares students for careers as teachers in studios, schools, and universities; performers; music historians; music critics; church musicians; composers; conductors; and accompanists. There is also an available online master's program (<https://musiceducation.arts.ufl.edu/>).

For more information, please see our website: <http://www.arts.ufl.edu/welcome/music> (<http://www.arts.ufl.edu/welcome/music/>).

Degrees Offered

Degrees Offered with a Major in Music

- Doctor of Musical Arts
 - without a concentration
 - concentration in Choral Conducting
 - concentration in Composition
 - concentration in Instrumental Conducting
 - concentration in Performance

- [illegible]

- concentration in Performance
 - *optional second concentration in Choral Conducting*
 - *optional second concentration in Composition*
 - *optional second concentration in Electronic Music*
 - *optional second concentration in Ethnomusicology*
 - *optional second concentration in Instrumental Conducting*
 - *optional second concentration in Music Business and Entrepreneurship*
 - *optional second concentration in Music Education*
 - *optional second concentration in Music History and Literature*
 - *optional second concentration in Music Theory*
 - *optional second concentration in Piano Pedagogy*
 - *optional second concentration in Sacred Music*
- concentration in Sacred Music
 - *optional second concentration in Choral Conducting*
 - *optional second concentration in Composition*
 - *optional second concentration in Electronic Music*
 - *optional second concentration in Ethnomusicology*
 - *optional second concentration in Instrumental Conducting*
 - *optional second concentration in Music Business and Entrepreneurship*
 - *optional second concentration in Music Education*
 - *optional second concentration in Music History and Literature*
 - *optional second concentration in Music Theory*
 - *optional second concentration in Performance*
 - *optional second concentration in Piano Pedagogy*

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

MUSIC (D.M.A.)

SLO 1

Knowledge

Identify, describe and explain appropriate research methodologies.

SLO 2

Skills

Master essential methods of research relevant to their area of expertise within the performance area and outside cognate area.

SLO 3

Professional Behavior

Orally present integrated research of performance and cognate areas at an advanced level.

Music (PH.D.)

SLO 1

Knowledge

Identify, describe and explain appropriate research methodologies.

SLO 2

Skills

Master essential methods of research relevant to their area of expertise within the discipline.

SLO 3

Professional Behavior

Orally present musical research at an advanced level.

Music (M.M.)

SLO1

Knowledge

Utilize appropriate research methodologies.

SLO2

Skills

Master techniques of formal musical analysis.

SLO3

Professional Behavior

Communicate appropriately in oral format.

Music Education

Program Information

The Master of Music (M.M.) degree is offered in music or music education. The music education program offers the following concentrations: choral conducting, composition, electronic music, ethnomusicology, instrumental conducting, music history and literature, music theory, performance, and piano pedagogy. The M.M. degree prepares students for careers as teachers in studios, schools, and universities; performers; music historians; music critics; church musicians; composers; conductors; and accompanists.

For more information, please see our website: <http://www.arts.ufl.edu/welcome/music> (<http://www.arts.ufl.edu/welcome/music/>)

Student Learning Outcomes

music education (Ph.D.)

SLO 1

Knowledge

Describe, analyze, apply, and discuss, orally and in writing, content knowledge related to music education, music teacher education, and music education research.

SLO 2

Skills

Examine questions in music education through the collection and analysis of data that results in informed conclusions communicated in writing.

SLO 3

Professional Behavior

Effectively communicate through a prepared and purposeful oral presentation designed to increase knowledge, foster understanding, and inform listeners' attitudes, values, beliefs, or behaviors.

MUSIC EDUCATION (M.M.)

SLO 1

Research Project

Identify and carry out a research project that is appropriate and contributes to the discipline of music education.

SLO 2

Synthesis & Application

Synthesize and apply knowledge from the major area of emphasis, as well as from any pertinent secondary and cognate areas.

SLO 3

Practical Application

Translate knowledge into practical application in teaching, research, and written scholarship.

SLO 4

Essential Techniques

Identify and apply essential techniques of research and theory relevant to their area of expertise within the discipline.

SLO 5

Professional Behavior

Employ ethical behaviors, cultural sensitivity, teamwork skills, collegiality, and communication skills relevant to working in the music education profession.

School of Theatre and Dance

Director: T. Garland

Graduate Performance Program Coordinator: T. Altmeyer

Graduate Design Program Coordinator: J. Dasher

The graduate program offered by the School of Theatre and Dance leads to the degree of Master of Fine Arts in Theatre. Minimum requirements for this degree are given in the *General Information* section of this catalog.

The M.F.A. degree prepares students for professional entry in acting, production, or teaching. Placement in the M.F.A. program is determined

by audition/portfolio review, academic credentials, and personal interview. Candidates for admission should have adequate training in theatre. Deficiencies may be corrected before beginning graduate study.

The program emphasizes the study and practice of theatre as an art and discipline. Students of acting and design study concepts of theatre together while working in their areas of specialization. Focus is on the collaboration and synthesis of theatre artistry. Each incoming class is composed of approximately 12 to 18 students in acting and all design areas.

The student's artistic and academic progress will be reviewed at the end of each semester. The *School of Theatre Handbook* gives details on the form and focus of each review. This information is online at <https://arts.ufl.edu/academics/theatre-and-dance/forms-manuals-handbooks/>

During the final year of study, each student must successfully complete the comprehensive examination and oral defense. The project in lieu of thesis includes research, analysis, rehearsal process, and evaluation. Development and execution of the project includes public performance (acting or design). The written document and oral defense of the project which follow must demonstrate the ability to communicate the creative process.

Graduate acting students audition for all departmental productions.

Majors

- Theatre (p. 377)

Faculty

Professor

- Frosch, Joan D.
- Mata, Tony
- Ozuzu, Onyekwere P.
- Soledade, Augusto Cesar

Student Learning Outcomes

Theatre (MFA)

SLO 1 Knowledge

Explain, summarize and critique subject matter relevant to the discipline of performance or design, including theory, history, and practice in theatre

SLO 2 Skills

Translate knowledge into practical application in the context of live performance

SLO 3 Professional Behavior

Employ ethical behaviors, cultural sensitivity, teamwork skills, collegiality, and communication skills relevant to working in professional theatre and related fields

College of Veterinary Medicine

Dean: D. N. Zimmer

The UF College of Veterinary Medicine is the state's only veterinary college. UF's College of Veterinary Medicine offers comprehensive services to the public through teaching, research, extension and state-of-the-art patient care.

For more information, please see our website: <http://www.vetmed.ufl.edu>

Comparative Biomedical Sciences

Overview

Program Information

The College of Veterinary Medicine strengths and areas of emphasis in research graduate training include, but are not limited to discovery and translational solutions for (i) infectious diseases and immunology, (ii) physiological sciences, (iii) forensic sciences, (iv) microbiology, virology, and parasitology, (v) zoo medicine (vi) aquatic animals and ecosystem health, (vii) livestock and wildlife population health, (viii) equine gastroenterology; (ix) orthopedic bioengineering using animal models, (x) clinical and translational research in selected disciplines such as cardiology, dermatology, oncology, and ophthalmology, and (xi) novel diagnostic and therapeutic applications to improve human and animal health using artificial intelligence. UF CVM is uniquely situated to pursue these investigations with emphasis on non-human species, and in comparative medicine in animals and humans.

The Doctor of Philosophy (Ph.D.) with a major in Comparative Biomedical Sciences is structured to be completed (in-residence) in four to five years. PhD students will take 90 credits of coursework, including 14 credits in required courses: VME 6937L VMS Graduate Seminar Series or equivalent (6 credits), VME 6767 Responsible Conduct in Research or equivalent (1), Grant Writing (1), Statistics (3), Biochemistry or Molecular Biology (3). The Qualifying Exam will be completed within seven terms after enrollment. At the end of the graduating semester, the PhD candidate must successfully complete a final examination or defense.

The Master of Science with a major in Comparative Biomedical Sciences is structured to be completed (in-residence) in two years. Master's students will take 30 credits of coursework. At least 12 of the 30 credits must be in the major, including 8 credits in required courses: VME 6937L VMS Graduate Seminar Series or equivalent (1 credit), VME 6767 Responsible Conduct in Research or equivalent (1), Statistics (3), and Biochemistry or Molecular Biology (3). At the end of the graduating semester, the student must successfully complete a final defense of the thesis.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN Comparative Biomedical Sciences

- Doctor of Philosophy (Ph.D.)
- Master of Science (M.S.)

Preventive Veterinary Medicine

Overview

Program Information

The Master of Preventive Veterinary Medicine (M.P.V.M.) program will prepare veterinarians for leadership roles in management or research of diseases in livestock, poultry, and wildlife populations in Florida, USA, and globally. Areas of emphasis are: (a) health and reproduction in livestock populations (b) food safety; (c) health in wildlife populations. The M.P.V.M. is a non-thesis program and is structured to be completed in 1 or 2 years. Only veterinarians (DVM degree or equivalent) will be eligible to enroll in the program.

M.P.V.M. students will complete, in residence, 12 credits of required graduate coursework in veterinary epidemiology (3 credits), biostatistics (3 credits), department/college graduate seminars (2 credits), responsible conduct of research (1 credit), and a special project addressing a health problem in livestock, poultry, and wildlife populations in Florida, USA, or globally (3 credits), as well as 18 credits in elective coursework. The total number of credit hours is 30 (including 15 credits in the major).

M.P.V.M. graduates will have epidemiologic and diagnostic tools to solve complex health problems in livestock and wildlife populations at the state, national, or international levels (e.g., mastitis in dairy cattle, abortion in beef cattle, enhanced surveillance and enhanced biosecurity for management of diseases in livestock, and poultry populations, outbreak investigation of foodborne pathogens, contamination of animal products, diseases and mortality in wildlife). In addition, M.P.V.M. graduates will be better prepared to pursue PhD research training opportunities for future success in research-related positions in industry or in research-intensive positions in academia.

Veterinary Medical Sciences Program Information

Chair: C. Risco

Graduate Coordinator (Large Animals): I. Larkin

Graduate Coordinator (Small Animals): D. Lewis

Complete faculty listing by department: Follow this link (<https://www.vetmed.ufl.edu/about-the-college/directory/>).

The College of Veterinary Medicine offers graduate study leading to the Master of Science and Doctor of Philosophy degrees in veterinary medical sciences. The College also offers certification and a non-thesis concentration in forensic toxicology via web-based distance education. Minimum requirements for the Master of Science and Doctor of Philosophy degrees are described in the *Graduate Degrees* section of this catalog.

The program provides extensive training in basic and applied research for qualified students with a baccalaureate degree or a D.V.M. or equivalent degree. Applicants are expected to have a background in the biological sciences, mathematics, chemistry, and physics. Particular attention is paid to the advanced education of veterinarians, those interested solely in research, and those interested in combining their graduate study with residency training in a clinical specialty. The College offers three areas of specialization within the veterinary medical sciences program:

Large and Small Animal Clinical Sciences: Physiology, endocrinology, aquatic animal health, fish diseases, gastroenterology, immunology, vision sciences, perinatology, reproductive biology, pharmacokinetics, veterinary sports medicine, and wildlife and zoological medicine (I. Larkin and D. Lewis Graduate Coordinators).

Physiological Sciences: Comparative anatomy, physiology, pharmacology, biochemistry, neurobiology, nutrition, reproductive biology, and toxicology (R. Johnson, Graduate Coordinator).

Infectious Diseases and Experimental Pathology: Bacteriology, parasitology, virology, immunopathology, molecular mechanisms of disease and host defense, epidemiology, and veterinary public health (M.T. Long, Graduate Coordinator).

The College participates in the interdisciplinary specialization in toxicology, in cooperation with other departments and colleges in both

the Health Science Center and the Institute of Food and Agricultural Sciences and with the Center for Environmental and Human Toxicology (see the Toxicology description under *Interdisciplinary Graduate Studies*).

The following courses in related areas are acceptable for graduate major credit in veterinary medical sciences:

Code	Title	Credits
Physiological Sciences		
ANS 6704	Mammalian Endocrinology	2
ANS 6751	Physiology of Reproduction	3
BCH 5413	Mammalian Molecular Biology and Genetics	3
BCH 6206	Advanced Metabolism	3
BCH 6415	Advanced Molecular and Cell Biology	3
BCH 6740	Physical Biochemistry/Structural Biology	3
GMS 6400C	Principles of Physiology	6
Infectious Disease and Experimental Pathology		
BCH 5413	Mammalian Molecular Biology and Genetics	3
BCH 6415	Advanced Molecular and Cell Biology	3
GMS 6140	Principles of Immunology	4
GMS 6382	Special Topics in Immunology	1-3
GMS 6421	Cell Biology	4
STA 6208	Basic Design and Analysis of Experiments	3
STA 6166	Statistical Methods in Research I	3
Large and Small Animal Clinical Sciences		
All of the above		

Degrees Offered

Degrees Offered with a Major in Veterinary Medical Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Animal Molecular and Cellular Biology
 - concentration in Clinical and Translational Science
 - concentration in Domestic Animal Genomics
 - concentration in Toxicology
- Master of Science
 - without a concentration
 - concentration in Domestic Animal Genomics
 - concentration in Forensic Toxicology
 - *optional second concentration in Veterinary Forensic Sciences*
 - concentration in Shelter Medicine
 - *optional second concentration in Veterinary Forensic Sciences*
 - concentration in Veterinary Forensic Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses

Veterinary Medical Sciences PROGRAM Courses

Code	Title	Credits
GMS 6070	Sensory and Motor Systems	3
PHA 5270	Health Care and Patient Safety	3
PHA 5271	Health Care Risk Management	3
PHA 6116	In Vivo and In Vitro Stability of Drugs	3
PHA 6125	Introduction to Quantitative Pharmacology	3
PHA 6170C	Pharmaceutical Product Formulation	3

PHA 6183	Pharmaceutical Gene Delivery	3	VME 6574	Aquatic Animal Pathology and Forensic Science	3
PHA 6185	Life Cycle of a Drug	1	VME 6575	Veterinary Forensic Medicine	3
PHA 6227	Institutional Pharmacy Leadership I	3	VME 6576	Veterinary Forensic Pathology	3
PHA 6228	Institutional Pharmacy Leadership II	3	VME 6577	Practicing Pathology	3
PHA 6264	Pharmaceutical Health Technology Assessment	3	VME 6578	Forensic Veterinary Osteology	3
PHA 6265	Introduction to Pharmaceutical Outcomes and Policy I	3	VME 6579	Veterinary Forensic Radiology and Imaging	3
PHA 6268	Pharmacoepidemiology and Patient Safety	3	VME 6580	Cybercrime in Wildlife Investigations	3
PHA 6269	Pharmaceutical Products and Public Policy	3	VME 6581	Working Dogs in Conservation and Forensic Science	3
PHA 6274	Federal Regulations of Drugs and Pharmacy	3	VME 6602	General Toxicology	3
PHA 6275	Federal Regulations of Controlled Substances	3	VME 6603	Advanced Toxicology	3
PHA 6276	Pharmacy Benefit Design & Management	3	VME 6604	Literature Survey in Toxicology	1-2
PHA 6277	Ethics in Drug Development Production and Use	3	VME 6605	Toxic Substances	3
PHA 6278	State Regulation of Drugs and Pharmacy	3	VME 6607	Human Health Risk Assessment	4
PHA 6279	Pharmaceutical Outcomes and Policy Capstone	3	VME 6613	Forensic Toxicology I	3
PHA 6286	Pharmaceutical Microeconomics	3	VME 6614	Forensic Toxicology II	3
PHA 6287	Pharmaceutical Health Economics	3	VME 6615	Veterinary Forensic Toxicology	3
PHA 6288	Critical Review of Research Methods	3	VME 6616	Veterinary Drug Ecotoxicology	3
PHA 6289	Regulating Clinical Research	3	VME 6617	Environmental Risk Assessment of Veterinary Drugs	3
PHA 6416	Pharmaceutical Analysis I	3	VME 6650	Principles of Mammalian Pharmacology	4
PHA 6417	Pharmaceutical Analysis II	3	VME 6766	Laboratory Quality Assurance/Quality Control	3
PHA 6427	Pharmacogenetics of Drug Metabolism	3	VME 6767	Issues in the Responsible Conduct of Research	1
PHA 6717	Measurement in Pharmaceutical Outcomes and Policy Research	3	VME 6771	Veterinary Epidemiologic Research	3
PHA 6793	Evidentiary Basis of Pharmaceutical Use	3	VME 6800	Welfare and Wellness for Pets and People	1
PHA 6796	Study Design in Pharmaceutical Outcomes & Policy Research	3	VME 6810	Integrating Veterinary Medicine with Shelter Systems	3
PHA 6799	Medication Safety & Quality Program Evaluation	3	VME 6811	Shelter Animal Physical Health	3
PHA 6805	Applied Data Interpretation and Reporting of Findings in Pharmacy	3	VME 6812	Problem-Oriented Approach to Shelter Animal Behavior and Welfare	3
PHA 6891	Introduction to Pharmacoepidemiology	3	VME 6813	Behavioral Health for Shelter Dogs and Cats	3
PHA 6892	Practices and Procedures of the IRB	3	VME 6814	Principles of Teaching for Animal Shelters	3
PHA 6893	Research Ethics	3	VME 6815	Animal Shelter Population Management by the Metrics	3
PHA 6894	Introduction to Graduate Studies	1	VME 6816	The Role of the Animal Shelter in Protecting Community and Public Health	3
PHA 6937	Topics in Pharmaceutical Administration	2	VME 6817	Humane Euthanasia Practices for Animal Shelters	3
VME 5244	Physiology: Organ Systems	4	VME 6818	High Quality High Volume Spay Neuter	3
VME 6010	Aquatic Animal Conservation Issues	3	VME 6820	Introduction to Veterinary Disaster Response	1
VME 6011	Introduction to Aquatic Wildlife Health Issues	3	VME 6905	Problems in Veterinary Medical Sciences	1-4
VME 6017	Manatee Health & Conservation	3	VME 6910	Supervised Research	1-5
VME 6051	Cruelty to Animals and Interpersonal Violence	3	VME 6931	Seminar in Veterinary Medical Sciences	1
VME 6052	Animal Crime Scene Processing	3	VME 6932	Seminar in Physiological Sciences	1
VME 6053	Skeletal Trauma Analysis in Animals	3	VME 6933	Seminar in Infectious Diseases and Experimental Pathology	1
VME 6054	Scientific and Legal Principles of Forensic Evidence	3	VME 6934	Topics in Veterinary Medical Sciences	1-4
VME 6056	Animal Law	3	VME 6936	Seminar in Pathophysiology	1
VME 6140	VMS Graduate Journal Club: Mucosal Immunology	1	VME 6938	Topics in Aquatic Animal Health	1
VME 6430C	Contemporary Issues in Small Animal Surgery	3	VME 6939	Topics in International Shelter Medicine	3
VME 6464	Molecular Pathogenesis	3	VME 6940	Supervised Teaching	1-5
VME 6505	Autoimmunity	1	VME 6950	Capstone Project Presentation	1-3
VME 6570	Wildlife Conservation and Forensic Science	3	VME 6951	Communicating Research About Shelter Medicine	1
VME 6571	Forensic Applied Animal Behavior	3	VME 6971	Research for Master's Thesis	1-15
VME 6572	Forensic Aspects of Agricultural Animal Welfare	3	VME 7979	Advanced Research	1-12
VME 6573	Applications of DNA for Companion Animal and Wildlife Cases	3	VME 7980	Research for Doctoral Dissertation	1-15
			WIS 5562	Conservation Medicine	3
			WIS 6557	International Wildlife Conservation Law, Policy and Ethics	3

Pharmacodynamics Courses

Code	Title	Credits
PHA 6472	Organic Synthesis of Drug Molecules	3
PHA 6508	Systems Physiology and Pathophysiology I	3
PHA 6509	Systems Physiology and Pathophysiology II	3
PHA 6512L	Experiential Research Training in Pharmacodynamics	1-4
PHA 6521C	Research Techniques in Pharmacodynamics	1
PHA 7939	Journal Club in Pharmaceutical Sciences	1

Pharmacology Courses

Code	Title	Credits
GMS 6590	Seminar in Pharmacology	1
GMS 6592	Ion Channels Journal Club: Pharmacology, Biophysics, and Neuroscience of Excitable Membranes	1
GMS 6847	Translational Research and Therapeutics: Bench, Bedside, Community, & Policy	3
GMS 7593	Topics in Pharmacology and Toxicology	1-3

College of Pharmacy Courses

Code	Title	Credits
PHA 6356	Structure Determination of Complex Natural Products	3
PHA 6418	Model-Informed Drug Development	3
PHA 6471	Synthetic Medicinal Chemistry	3

College of Veterinary Medicine Courses

Code	Title	Credits
VME 6934	Topics in Veterinary Medical Sciences	1-4
VME 6936	Seminar in Pathophysiology	1

Student Learning Outcomes

Veterinary medical sciences (phd)

SLO 1 Knowledge

Students identify, describe, explain and apply the literature, research, and practices relevant to their area of specialization.

SLO 2 Skills

Students analyze and critically evaluate new information and ideas contained in books and journal articles, as well as information and ideas presented at scientific meetings, seminars and/or informal discussions with other scientists.

SLO 3 Skills

Students apply speaking skills needed to communicate orally in formal and informal settings.

SLO 4 Skills

Students write effectively in a manner appropriate to veterinary medical sciences.

SLO 5 Professional Behavior

Students exhibit ethical and professional behavior throughout their studies and research.

Veterinary Medical Sciences (MS)

SLO 1 Knowledge

- For students in the programs that require a Master's thesis, successful completion of the thesis and thesis defense.
- For students in the non-thesis programs, successful completion of
 - the capstone project (Shelter Medicine)
 - the final comprehensive examination (Veterinary Forensic Science and Forensic Toxicology)

SLO 2 Skills

Students analyze and critically evaluate new information and ideas contained in books and journal articles, as well as information and ideas

presented at scientific meetings, seminars and/or informal discussions with other scientists

SLO 3 Skills

Students apply speaking skills needed to communicate orally in formal and informal settings

SLO 4 Skills

Students write effectively in a manner appropriate to veterinary medical sciences

SLO 5 Professional Behavior

Students exhibit ethical and professional behavior during their studies and research

SLO 6 Professional Behavior

Students exercise the etiquette of constructive criticism and respond appropriately to criticism in a professional manner

Herbert Wertheim College of Engineering

Dean: F. J. Masters

The Herbert Wertheim College of Engineering is organized into a number of departments focusing on today's most pressing engineering questions. There is an interdisciplinary culture at the core of Gator Engineering, and

researchers regularly collaborate with colleagues in departments and colleges beyond their own.

For more information, please see our website: <http://www.eng.ufl.edu>

Agricultural and Biological Engineering Department

Chair: D. Z. Haman

Graduate Coordinator: G. Kiker

The degrees of Master of Science, Master of Engineering and Doctor of Philosophy are offered with graduate programs in agricultural and biological engineering through the College of Engineering. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

A combination B.S./M.S. program allows up to 12 graduate credits to be double-counted toward fulfillment of both degrees. Contact the graduate coordinator for qualifications and details.

The Master of Science, Master of Engineering, and Doctor of Philosophy degrees are offered in the following areas of research:

Agricultural production engineering includes development and application of precision agriculture concepts and tools, weather and climate risk in agriculture, decision support systems, food security, pesticide application, post-harvest operations, robotics and other machine systems and environmental control systems. Applications to space biology are included in cooperation with NASA at Kennedy Space Center.

Biological engineering includes biocomplexity analysis, ecological modeling, risk and decision analysis, bioprocess design, plant biotechnology, process microbiology, food process engineering, environmental biotechnology, bioreactors, and packaging science.

Information systems includes development and application of GIS and remote sensing, communications, mathematical modeling, data solutions and expert systems techniques to biological and agricultural systems.

Land and water resources includes soil-water-plant relations, irrigation, water quality, watershed hydrology, BMP and TMDL studies, hydrologic modeling, ecological restoration, environmental fate and transport of nanoparticles, waste management, and water reuse.

Students also may choose to participate in interdisciplinary concentrations in hydrologic sciences, geographic information sciences, particle science and technology, and interdisciplinary ecology.

For more information about the program, please visit the program link below and the graduate studies pages on the departmental website at <http://www.abe.ufl.edu>.

Agricultural and Biological Engineering (Engineering)

Program Information

The degrees of Master of Science, Master of Engineering, and Doctor of Philosophy are offered with graduate programs in agricultural and biological engineering through the College of Engineering. Students must have an undergraduate or graduate degree in Engineering or meet

specific articulation requirements in order to pursue an advanced degree in engineering.

For students without an engineering degree, The Master of Science and Doctor of Philosophy degrees in agricultural and biological engineering are offered in the areas of agricultural operations management and applied science through the College of Agricultural and Life Sciences. Students must have a degree in a related field or meet specific articulation requirements.

A combination B.S./M.S. or B.S./M.E. for Engineering students program allows up to 12 graduate credits to be double-counted toward fulfillment of both degrees. Contact the graduate coordinator for qualifications and details. A 30-credit, nonthesis master's degree program is also available to students interested in completing the requirements in 1 year.

The Master of Science, Master of Engineering, and Doctor of Philosophy (Engineering) degrees are offered in the following areas of research:

Agricultural production engineering includes development and application of precision agriculture concepts and tools, weather and climate risk in agriculture, decision support systems, food security, pesticide application, post-harvest operations robotics and other machine systems and environmental control systems. Applications to space biology are included in cooperation with NASA at Kennedy Space Center.

Biological engineering includes includes biocomplexity analysis, ecological modeling, risk and decision analysis, bioprocess design, plant biotechnology, process microbiology, food process engineering, environmental biotechnology, bioreactors, and packaging science.

Information systems includes development and application of GIS and remote sensing, communications, mathematical modeling, data solutions, and expert systems techniques to biological and agricultural systems.

Land and water resources includes soil-water-plant relations, irrigation, water quality, watershed hydrology, BMP and TMDL studies, hydrologic modeling, ecological restoration, environmental fate and transport of nanoparticles, waste management, and water reuse.

Students also may choose to participate in interdisciplinary concentrations in hydrologic sciences, geographic information sciences, particle science and technology, and interdisciplinary ecology.

The Master of Science and Doctor of Philosophy (CALS) in the **agricultural operations management** area of specialization provide for scientific training and research in technical agricultural management. Typical plans of study focus on advanced training in environmental systems management, production systems management, construction and process management and technical sales management.

In addition, for students with basic science degrees, the Master of Science and Doctor of Philosophy programs with a specialization in **applied sciences** through the College of Agricultural and Life Sciences provides advanced training in problem-solving capabilities, interdisciplinary research, and methods for applying science to real-world problems and issues. Typical emphasis is on:

1. the use of engineering methods and approaches, such as mathematical modeling, optimization, and information technologies, in application of science to problems of various spatial and temporal scales; and
2. an interdisciplinary experience in research at the doctoral level.

The requirements for a master's degree normally take 2 years to complete. The length of time required for the Doctor of Philosophy degree depends partly on the research topic, but normally takes 3 to 4 years.

Additional information can also be found on the graduate studies pages on the department website at www.abe.ufl.edu (<http://www.abe.ufl.edu>).

Degrees Offered

Degrees Offered with a Major in Agricultural and Biological Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Engineering
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Agricultural & Biological Engineering (PHD)

SLO 1 Knowledge

Employ mathematics, science and engineering principles to solve problems in the discipline of Agricultural and Biological Engineering

SLO 2 Skills

Apply, analyze, and synthesize content knowledge to plan and conduct scholarly activities that make original contributions to the knowledge base in the field of study by identifying components or processes of agricultural and/or biological systems to meet desired needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability constraints.

SLO 3 Professional Behavior

Display ethical behavior, cultural sensitivity, teamwork, professional conduct and effective communication.

Agricultural & Biological Engineering (MS and ME)

SLO 1 Knowledge

Identifies, describes, explains, and applies the mathematics, science and engineering principles of the discipline of Agricultural and Biological Engineering.

SLO 2 Skills

Apply, analyze, and synthesize content knowledge to solve problems by identifying components or processes of agricultural and/or biological systems to meet desired needs within realistic economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability constraints.

SLO 3 Professional Behavior

Display ethical behavior, cultural sensitivity, teamwork, professional conduct and effective communication

Chemical Engineering Department

Chair: C. Rinaldi

Graduate Coordinator: K. Ziegler

Master Students Coordinator: Y. Tseng

The Chemical Engineering Department offers the degrees of Doctor of Philosophy, Master of Science (thesis and non-thesis options), and Master of Engineering in Chemical Engineering. Minimum requirements

for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The Ph.D., M.E., and M.S. degrees in chemical engineering require course work in three core areas:

- *The chemical engineering basis* area, consisting of three core courses in the mathematical, the molecular, and the continuum bases of chemical engineering
- *The chemical engineering science and systems* area, consisting of a selection of courses in such areas as transport phenomena, electrochemical engineering, thermodynamics, kinetics, reaction engineering, process control, separation processes, and heat and mass transfer
- *The research specialty* area, consisting of courses designed to build depth in a field of specialization. Courses may be from other academic units, or may be chemical engineering courses such as colloid science, corrosion, polymer science, advanced materials, and biochemical engineering.

For more information, please see the program page below and our website: <http://che.ufl.edu/apply-to-che> (<http://che.ufl.edu/apply-to-che/>).

Distinguished Professor

Chemical Engineering Program Information

The Chemical Engineering Department offers the degrees of Doctor of Philosophy, Master of Science (thesis and non-thesis options), and Master of Engineering in Chemical Engineering. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Master of Science Degree – Thesis Option

Completion of the program is possible in 16 months, and its usual duration ranges from 16 to 24 months. The principal requirements for the M.S. degree are 30 semester hours and a research thesis approved by the student's supervisory committee. These credits include:

- Twelve graduate semester hours in the basis of chemical engineering courses (Mathematical Basis, Continuum Basis, Molecular Basis, and Chemical and Bio Lab). Molecular Basis can be replaced with an Elective for students on Applied Track.
- Six credits of Chemical Engineering Science courses, including at least one course in reaction engineering, bioengineering, or kinetics.
- Up to six semester hours of supervised research.

Students must submit a final thesis and pass an oral thesis-defense examination.

Master of Science Degree – Non-Thesis Option

This program is designed for completion in 12 months, although some students prefer longer durations. The M.S.-Non-Thesis provides an opportunity to develop an in-depth knowledge of chemical engineering fundamentals, to emphasize a specific specialization area, and to acquire basic experience in research or industrial practice through a short internship. The principal requirements are 30 credits of courses including an option for 7 credits of research work in a laboratory or of work in an industrial internship. The core course requirements for this program are identical to that for the M.S.-Thesis. A final thesis document is not required but a written report on a project, internship or a contemporary Chemical Engineering topic is required for graduation.

All new students for the M.S. program are admitted to the non-thesis option at the time of admission, and some are converted to the thesis option upon approval by the Research Advisor and the Director of Graduate Programs.

Master of Engineering Degree

A student with a B.S. degree in biology, chemistry, physics, mathematics, or another branch of engineering may obtain a graduate degree in Chemical Engineering by meeting the necessary academic requirements and taking selected undergraduate courses. Students intending to obtain a professionally oriented M.E. degree would normally complete their undergraduate requirements in 1-2 semesters. The graduate course requirements of 30 credits of coursework require another 3-4 semesters. The M.E. students can apply for conversion to the M.S.-NT or M.S.-Thesis program after satisfactory completion of the undergraduate courses.

Ph.D. Degree

The Ph.D. degree plan is primarily a research program. The granting of the degree is based essentially on general proficiency and distinctive attainments in Chemical Engineering and particularly on the demonstrated ability to conduct an independent investigation as exhibited in the doctoral dissertation. Briefly, the formal requirements for the Ph.D. degree are:

- Maintaining a GPA of 3.0 or higher with B- or higher in all Basis courses.
- Successful completion of written and oral examinations for advancement to candidacy. The written examination is comprised of the candidate's objectives and achievements towards their doctoral dissertation. The oral examination is based on the written part and related areas. The oral section also includes the Qualifying

Examination to test the student's breadth of knowledge in Chemical Engineering fundamentals.

- Preparing a dissertation based on original research.
- Passing the final examination based on the dissertation.
- The graduation requirements include 90 credits including at least 30 credits in coursework. Details and minor changes in any of these requirements will be given upon the student's arrival.

The department offers a combination bachelor's/master's degree program. Contact graduate coordinator for information.

Civil and Coastal Engineering Department

Chair: K. Hatfield

Graduate Coordinator: D. Hiltunen

The Department of Civil and Coastal Engineering offers two distinct graduate programs: civil engineering and coastal and oceanographic engineering. All degrees except the Ph.D. are available in a thesis or nonthesis option.

Civil and Coastal Engineering degree programs include areas of specialization in: Coastal & Oceanographic Engineering, Coastal Ecosystem Dynamics, Geosystems Engineering, Materials & Pavements, Public Works, Structural Engineering, Sustainable Construction Engineering, Transportation Engineering and Water Systems

Minor or supporting work is encouraged from a variety of related or allied fields of study. Ph.D. students are required to take a preliminary examination. Requirements for the M.S., M.E., and Ph.D. degrees are given in the Graduate Degrees (p. 778) section of this catalog.

For information about our Graduate Admissions process and deadlines, please go to https://www.essie.ufl.edu/student_resources/admissions/graduate/.

Civil Engineering

Program Information

The civil engineering program is offered through the Department of Civil and Coastal Engineering with the following degrees:

- Doctor of Philosophy
- Master of Engineering
- Master of Science

The master's degree in civil engineering is also offered through the Electronic Delivery of Graduate Engineering (EDGE) program, which is a distance learning program delivered either via streaming video or DVD directly to the students. Subject to approval by the supervisory committee, graduate-level courses taken through the College of Engineering (EGN), Departments of Environmental Engineering Sciences, Geological Sciences, and Mechanical and Aerospace Engineering are considered as major credit.

For courses taken through the Department of Civil and Coastal Engineering, credit hours graded S/U will not count toward graduation except for

- 6 hours of CGN 6971 Research for Master's Thesis (1-15 cr.) or EOC 6971 Research for Master's Thesis (1-15 cr.) for thesis students
- 3 hours of CGN 6974 Master of Engineering or Engineer Degree Report (1-6 cr.) for students working on the M.E. report
- CGN 7979 Advanced Research (1-12 cr.) or EOC 7979 Advanced Research (1-12 cr.)
- CGN 7980 Research for Doctoral Dissertation (1-15 cr.) or EOC 7980 Research for Doctoral Dissertation (1-15 cr.)

The department offers a combination bachelor's/master's degree program for current UF undergraduate students who intend to complete a graduate degree at UF. Please contact the undergraduate coordinator for information.

Degrees Offered

Degrees Offered with a Major in Civil Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Engineering

Student Learning Outcomes

Civil Engineering (phd)

SLO 1 Knowledge

An ability to critically read engineering literature in the student's graduate program area (Civil Engineering Materials, Water Resources, Geotechnical Engineering, Construction, Structures, and Transportation); and an ability to identify, formulate new solutions to engineering problems in the student's program area.

SLO 2 Skills

An ability to develop new techniques, skills, and modern engineering tools necessary for engineering practice at an advanced level in the students program area (Civil Engineering Materials, Water Resources, Geotechnical Engineering, Construction, Structures, and Transportation).

SLO 3 Professional Behavior

Effectively communicate technical knowledge and information.

Civil Engineering (ME & MS)

SLO 1 Knowledge

An ability to identify, formulate and solve engineering problems in the student's program area. (Civil Engineering Materials, Water Resources, Geotechnical Engineering, Construction, Structures, and Transportation)

SLO 2 Skills An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice at an advanced level in the student's program area (Civil Engineering Materials, Water Resources, Geotechnical Engineering, Construction, Structures, and Transportation)

SLO 3 Professional Behavior Effectively communicate technical knowledge and information

Coastal and Oceanographic Engineering

Program Information

The coastal and oceanographic engineering program is offered through the Department of Civil and Coastal Engineering with the following degrees: Master of Engineering, Master of Science, and Doctor of Philosophy degree. Subject to approval by the supervisory committee,

graduate-level courses taken through the College of Engineering (EGN), the Departments of Environmental Engineering Sciences, Geological Sciences, and Mechanical and Aerospace Engineering are considered as major credit.

For courses taken through the Department of Civil and Coastal Engineering, credit hours graded S/U will not count toward graduation except for

- 6 hours of CGN 6971 Research for Master's Thesis (1-15 cr.) or EOC 6971 Research for Master's Thesis (1-15 cr.) for thesis students
- 3 hours of CGN 6974 Master of Engineering or Engineer Degree Report (1-6 cr.) for students working on the M.E. report
- CGN 7979 Advanced Research (1-12 cr.) or EOC 7979 Advanced Research (1-12 cr.)
- CGN 7980 Research for Doctoral Dissertation (1-15 cr.) or EOC 7980 Research for Doctoral Dissertation (1-15 cr.)

The department offers a combination bachelor's/master's degree program for current UF undergraduate students who intend to complete a graduate degree at UF. Please contact the undergraduate coordinator for information.

Degrees Offered

Degrees Offered with a Major in Coastal and Oceanographic Engineering

- Doctor of Philosophy
- Master of Engineering
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Coastal & Oceanographic Engineering (phd)

SLO 1 Knowledge

An ability to critically read engineering literature in Coastal and Oceanographic Engineering and an ability to identify, formulate new solutions to engineering problems in Coastal and Oceanographic Engineering.

SLO 2 Skills

An ability to develop new techniques, skills, and modern engineering tools necessary for engineering practice at an advanced level in Coastal and Oceanographic Engineering.

SLO 3 Professional Behavior

Effectively communicate technical knowledge and information.

Coastal & Oceanographic Engineering (ME & MS)

SLO 1 Knowledge

An ability to identify, formulate and solve engineering problems in Coastal and Oceanographic Engineering

SLO 2 Skills

An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice at an advanced level in Coastal and Oceanographic Engineering

SLO 3 Professional Behavior

Effectively communicate technical knowledge and information

Computer and Information Science and Engineering Department

Chair: J. Gilbert

Graduate Coordinator: J. Wilson

The Department of Computer and Information Science and Engineering is concerned with the theory, design, development, and application of computer systems and information processing techniques. The mission of the CISE Department is to educate undergraduate and graduate majors as well as the broader campus community in the fundamental concepts of the computing discipline, to create and disseminate computing knowledge and technology, and to use our expertise in computing to help society solve problems.

The Department of Computer and Information Science and Engineering (CISE) offers

- Ph.D. degree in computer engineering through the College of Engineering
- Master of Engineering degree in computer engineering through the College of Engineering
- Master of Science degree in computer engineering through the College of Engineering
- Ph.D. degree in computer science through the College of Engineering
- Ph.D. degree in human-centered computing through the College of Engineering
- Master of Science degree in computer science through the College of Engineering
- Master of Science degree in digital arts and sciences through the College of Engineering
- Master of Science degree in computer science through the College of Liberal Arts and Sciences

The department also offers a combination bachelor's/master's degree program. Contact the Department's Student Services Center for information.

The CISE Department has six broad areas of specialization:

- **Computer systems:** computer architecture, distributed systems, networks and communication, operating systems, performance evaluation, security, mobile computing, software engineering, programming languages, multimedia systems, and web technologies
- **Database and information systems:** database management systems, database design, database theory and implementation, data mining, database machines, parallel and distributed databases, digital libraries, E-services and commerce, medical, and bio-informatics
- **High-performance computing/applied algorithms:** design and analysis of algorithms, data structures, parallel and distributed computing, medical algorithms, numerical methods, computational complexity, and applied computational geometry
- **Computer graphics, modeling, and art:** modeling methodology, simulation, virtual reality, aesthetic computing, computer arts,

animation, real-time rendering, medical modeling, digital media, and musical acoustics

- **Intelligent systems and computer vision:** artificial intelligence, machine learning, visualization, image analysis and processing, pattern recognition, signal processing, biomedical imaging, and image databases
- **Computer networks and security:** wired and wireless networks, network routing and protocols, and QoS.

Applications for admission must be approved by both the Department and the college in which the student wishes to enroll. Applicants should have a strong computer science background.

All master's students must satisfy a core requirement by completing the appropriate number of core courses as specified by their degree program. According to Graduate School rule, students must maintain a 3.0 overall GPA, as well as a cumulative 3.0 GPA for all courses taken from CISE, to graduate. Students can select a thesis or non-thesis option for the master's degree. Digital Arts and Sciences students must choose either thesis or project in lieu of thesis. All options require a minimum of 30 credit hours. The thesis degree requires:

- A minimum of 6 credit hours must be taken in CIS 6971 Research for Master's Thesis (1-15 cr.).
- Specific degree requirements can be found at: <https://www.cise.ufl.edu/academics/grad> (<https://www.cise.ufl.edu/academics/grad/>)

The non-thesis option requires:

- Each non-thesis master's student is required to pass a comprehensive examination.
- Specific degree requirements can be found at: <https://www.cise.ufl.edu/academics/grad> (<https://www.cise.ufl.edu/academics/grad/>)

The Digital Arts and Sciences project in lieu of thesis option requires 6 credit hours of project/performance credits.

To demonstrate breadth and proficiency, Ph.D. students who major in Computer Engineering or Computer Science must take 4 required core courses obtaining a 3.4 GPA in 3 of the 4 required core courses, with no more than one of the core courses receiving a letter grade below B, to be eligible to take the Ph.D. qualifying examinations.

To demonstrate breadth and proficiency, Ph.D. students who major in Human-Centered Computing must take 3 required core courses obtaining a 3.4 GPA in 2 of the 3 required core courses, with no more than one of the core courses receiving a letter grade below B, to be eligible to take the Ph.D. qualifying examinations.

Ph.D. students are required to take a minimum of 90 credit hours. Of these, at least 36 hours must be graduate-level CISE course work excluding individual study and research credits. A minimum of 3 hours must be taken in CIS 7980 Research for Doctoral Dissertation (1-15 cr.). A maximum of 30 credits may be awarded toward the Ph.D. degree from an appropriate master's degree.

The Database Systems Research and Development Center, the Software Engineering Research Center, the Center for Computer Vision and Visualization Center, and a number of other campus research centers provide opportunities for students enrolled in the program.

Human Centered Computing (HCC) Ph.D.

The degree is focused on the design, construction, and evaluation of computational technologies as they relate to the human condition and impacts on society in general. The purpose of the HCC PhD degree is to train a new generation of computing researchers/developers that design, implement, and evaluate computing systems and technologies in real world, or applied, contexts.

HCC PhD degrees exist because the expertise required for this degree does not fit in traditional Computer Science (CS) or Computer Engineering (CE) PhD programs. CS & CE PhD programs have requirements for computer systems and theory.

For more information, please see the program pages below, or visit our website: <http://www.cise.ufl.edu>

Computer Engineering Program Information

The Department of Computer and Information Science and Engineering offers the Master of Science and the Doctor of Philosophy degrees in Computer Engineering through the College of Engineering. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

The department offers graduate study and research in Algorithms, Computer Vision, Databases, Graphics and Modeling, Machine Learning, Networks, and Systems, with active labs in Bioinformatics; Computational Science and Intelligence; Vision, Graphics and Medical Imaging; Database Systems Research and Development; Data Science Research; Mobile and Pervasive Computing; Human-Centered Computing; and Cybersecurity.

Specific degree requirements and options may be found here: <http://cise.ufl.edu/academics/grad> (<http://cise.ufl.edu/academics/grad/>).

Instructions for application for admission may be found here: <http://cise.ufl.edu/admissions/graduate> (<http://cise.ufl.edu/admissions/graduate/>).

Degrees Offered

Degrees Offered with a Major in Computer Engineering

- Doctor of Philosophy
- Master of Engineering
- Master of Science
 - without a concentration
 - concentration in Digital Arts and Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Computer engineering (phd)

SLO 1 Knowledge

Students identify, formulate, and solve computer science and engineering problems

SLO 2 Knowledge

Students can critically read computer science and engineering literature

SLO 3 Skills

Students use the techniques, skills, and tools necessary for computer science and engineering practice at an advanced level

SLO 4 Professional Behavior

An understanding of professional and ethical responsibility

SLO 5 Professional Behavior

Students can communicate effectively

Computer Engineering (ME & MS)

SLO 1 Knowledge

Students identify, formulate, and solve computer science and engineering problems

SLO 2 Knowledge

Students can critically read computer science and engineering literature

SLO 3 Skills

Students use the techniques, skills, and tools necessary for computer science and engineering practice at an advanced level

SLO 4 Professional Behavior

Professional experience: an understanding of professional and ethical responsibility

SLO 5 Professional Behavior

Professional experience: Students can communicate effectively

Computer Science (Engineering)

Program Information

The Department of Computer and Information Science and Engineering offers the Master of Science degree in Computer Science through the College of Engineering. Minimum requirements for this degree are given in the Graduate Degrees (p. 778) section of this catalog.

Degrees Offered**Degrees Offered with a Major in Computer Science**

- Doctor of Philosophy
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses**Computer and Information Science and Engineering Departmental Courses**

Student Learning Outcomes

Computer Science (phd)

SLO1 Knowledge

Students identify, formulate, and solve computer science and engineering problems

SLO2 Knowledge

Students can critically read computer science and engineering literature

SLO3 Skills

Students use the techniques, skills, and tools necessary for computer science and engineering practice at an advanced level

SLO4 Professional Behavior

An understanding of professional and ethical responsibility

SLO5 Professional Behavior

Students can communicate effectively

Computer Science - Engineering (MS)

SLO 1 Knowledge

Students identify, formulate, and solve computer science and engineering problems.

SLO 2 Knowledge

Students can critically read computer science and engineering literature.

SLO 3 Skill

Students use the techniques, skills, and tools necessary for computer science and engineering practice at an advanced level.

SLO 4 Professional Behavior

Professional experience: an understanding of professional and ethical responsibility.

SLO 5 Professional Behavior

Professional experience: Students can communicate effectively.

Digital Arts and Sciences (Engineering)

Program Information

The Department of Computer and Information Science and Engineering offers the Master of Science degree in Digital Arts and Sciences through the College of Engineering. Minimum requirements for this degree are given in the Graduate Degrees (p. 778) section of this catalog.

This specialized program integrates engineering and design and was created for students with an interest in video games, human-computer interaction, 3D modeling and animation, virtual reality, and computer graphics. The curriculum includes core computer science with a special emphasis on human-centered computing and provides students the flexibility to focus on both computer science and design, and to create software that is computationally complex, user friendly and aesthetically pleasing.

Specific degree requirements and options may be found here: <http://cise.ufl.edu/academics/grad> (<http://cise.ufl.edu/academics/grad/>)

Instructions for application for admission may be found here:

<http://cise.ufl.edu/admissions/grad> (<http://cise.ufl.edu/admissions/grad/>)

Human-Centered Computing

Program Information

The Department of Computer and Information Science and Engineering offers doctorate in Human-Centered Computing through the College of Engineering. Minimum requirements for this degree are given in the Graduate Degrees (p. 778) section of this catalog.

Human-Centered Computing (HCC) draws on the disciplines of digital media, engineering psychology, assistive technologies, architecture, industrial and systems engineering, industrial design, music, and public policy to name a few. HCC research meets industrial and societal needs for education and research in humanizing computer technology through understanding how computers affect human quality of life, relationships, and culture, while also designing cutting edge technologies, and exploring the underlying issues of science, engineering, art, and design.

Degrees Offered

Degrees Offered with a Major in Human-Centered Computing

- Doctor of Philosophy

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Electrical and Computer Engineering Department

Chair: J. Harris

Graduate Coordinator: Y. K. Yoon

The Department of Electrical and Computer Engineering (ECE) offers the Master of Science and Doctor of Philosophy degrees. Minimum requirements for these degrees are given in the Graduate Degrees Section (p. 778) of this catalog. For more information about the ECE program, please visit: <https://www.eng.ufl.edu/academics/degree-programs/> and the accompanying ECE major pages in this catalog.

In addition to the thesis and non-thesis master's degree options and the research-based Doctor of Philosophy degree, the Department of Electrical and Computer Engineering also offers a combination bachelor's/master's degree program. This program allows qualified students to earn both a bachelor's degree and master's degree with a saving of one semester. Qualified students may begin their master's programs while seniors, counting up to 12 hours of specified electrical and computer engineering graduate courses for both bachelor's and master's degree requirements. Bachelor's/master's program admission requirements are

- satisfaction of Graduate School admission requirements for the master's degree,
- an upper-division (undergraduate) GPA of at least 3.3, and

- completion of at least 7 EEL core courses and 2 EEL laboratories.

Students with a GPA between 3.3 and 3.59 can double count up to 6 hours, while students with a GPA of 3.6 or higher can double count up to 12 hours.

Majors

- Electrical and Computer Engineering (p. 409)

Faculty

Professor

- Arnold, David P.
- Bhunia, Swarup
- Bobda, Christophe
- Eisenstadt, William R.
- Feng, Philip
- Figueiredo, Renato Jansen
- Forte, Domenic J.
- Fuchs, Wesley Kent
- Glenn, Alina Zare
- Guo, Jing
- Judy, Jack
- Lampotang, Samsun
- Li, Jian
- Mcnair, Janise Y.
- Moore, Robert C.
- Nishida, Toshikazu

Electrical and Computer Engineering Program Information

The Department of Electrical and Computer Engineering (ECE) offers the Master of Science and Doctor of Philosophy degrees. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog. ECE offers graduate study and research in computer engineering, devices, electromagnetics and energy systems, electronics, and signals and systems.

The Department of Electrical and Computer Engineering offers both thesis and non-thesis options for the master's degrees offered.

In the *thesis option* a student shall complete a minimum of 30 semester credit hours with a maximum of 6 semester credit hours of EEL 6971 Research for Master's Thesis (1-15 cr.). While the Graduate School sets the minimum requirements, the supervisory committee determines the appropriate number of thesis hours a student shall be required to take for the thesis. Other course requirements include a minimum of 18 hours at the 5000 or 6000 level in electrical and computer engineering. Excluded from satisfying these course requirements are EEL 5905 Individual Work (1-4 cr.) and EEL 6905 Individual Work (1-4 cr.), EEL 6910 Supervised Research (1-5 cr.), EEL 6940 Supervised Teaching (1-5 cr.), and EEL 6971 Research for Master's Thesis (1-15 cr.). No more than 6 hours of Individual Work (EEL 5905 Individual Work (1-4 cr.) or EEL 6905 Individual Work (1-4 cr.)) may be counted toward the degree.

In the non-thesis option a student shall complete a minimum of 30 semester credit hours with a maximum of 6 semester credit hours of Individual Work (EEL 5905 Individual Work (1-4 cr.) or EEL 6905 Individual Work (1-4 cr.)). The course requirements include a minimum of 21 semester credit hours at the 5000 or 6000 level in electrical and computer engineering. Excluded from satisfying these course requirements are EEL 5905 Individual Work (1-4 cr.) and EEL 6905 Individual Work (1-4 cr.), EEL 6910 Supervised Research (1-5 cr.), EEL 6940 Supervised Teaching (1-5 cr.), and EEL 6971 Research for Master's Thesis (1-15 cr.).

In addition to other requirements, all prospective doctoral students must take the written part of the Ph.D. qualifying examination within the first year of enrollment. Other requirements for the doctoral degree, as well as requirements for master's and engineering degrees, are given in the Electrical and Computer Engineering Department's Graduate Guidelines (see <http://www.ece.ufl.edu/content/graduate-academics> (<http://www.ece.ufl.edu/content/graduate-academics/>)) and in the front section of this catalog.

The following course listing indicates the major areas of faculty interest. Special topics courses EEL 5934 Special Topics in Electrical Engineering (1-3 cr.) and EEL 6935 Special Topics in Electrical Engineering (1-4 cr.) cover a wide variety of subjects for which there are no present courses.

Degrees Offered

Degrees Offered with a Major in Electrical and Computer Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
- Master of Engineering
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Electrical & Computer engineering (PHD)

SLO 1 Knowledge

Ability to identify, formulate and solve engineering problems. Ability to critically read and integrate engineering research literature

SLO 2 Skills

Ability to use applied mathematical and/or modern experimental techniques. Ability to use modern engineering tools for practice at an advanced level

SLO 3 Professional Behavior

Ability to communicate effectively

Electrical & Computer Engineering (Me & Ms)

SLO 1 Knowledge

Ability to identify, formulate and solve electrical and computer engineering problems

SLO 2 Skills

Ability to use applied mathematical techniques. Ability to use modern engineering tools for practice at an advanced level

Engineering Education Department

Chair: H. van Oostrom

The Department of Engineering Education was formed in June 2019.

The department specializes in engineering education research and the delivery of innovative and effective instructional methods in engineering courses, as well as assessment. Faculty design and teach engineering courses that span multiple majors using methods that promote conceptual understanding and student retention, performing research into the effectiveness of learning methods, while continually striving to improve and adapt course content and delivery methods to serve students and faculty throughout the Herbert Wertheim College of Engineering.

The department offers the Master of Science degree with a major in Applied Data Science and the Master of Science and Doctor of Philosophy degrees with majors in Engineering Education. Minimum requirements for these degrees are given in the Graduate Degrees Section (p. 778) of this catalog.

For more information about this interdisciplinary program offering, please contact the department through one of the means listed below.

Via telephone: 352-392-9672

Via email for M.S. degrees: phs@ufl.edu (Administration) and Catia Silva catiaspsilva@ece.ufl.edu

Via email for Ph.D. degrees: phs@ufl.edu (Administration) and Idalis Villanueva i.villanueva@ufl.edu (<http://gradcatalog.ufl.edu/graduate/colleges-departments/engineering/engineering-education/i.villanueva@ufl.edu>)

Majors

Applied Data Science

Overview

PROGRAM INFORMATION

The Master of Science with a major in Applied Data Science degree will provide students with a working knowledge of techniques and software commonly used in Data Science. The degree is designed for engineering students and working professional engineers with a B.S. degree in a non-computing engineering field, that is, for engineering students and professional engineers who have engineering degrees other than Computer Science or Computer Engineering and possibly Industrial and Systems Engineering. The degree will prepare engineering students to work as data scientists in industry and can also be used by engineering

students working towards a Ph.D. degree in non-computing focused engineering degree programs.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN applied data science

- Master of Science

Courses

applied data SCIENCE PROGRAM COURSES

Core/Required Courses:

Code	Title	Credits
CAP 5771	Introduction to Data Science	3
COT 5615	Mathematics for Intelligent Systems	3
EEE 5776	Applied Machine Learning	3
EEE 6778	Applied Machine Learning II	3
EGN 6446	Mathematical Foundations for Applied Data Science	3
EGN 5442	Programming for Applied Data Science	3
EGN 6933	Special Topics	1-3
LAW 6930	Selected Legal Probs	1-4

Example Specialization Courses

Code	Title	Credits
ABE 5038	Recent Developments and Applications in Biosensors	3
ABE 5643C	Biological Systems Modeling	3
ABE 6035	Advanced Remote Sensing: Science and Sensors	3
ABE 6649C	Advanced Biological Systems Modeling	3
ABE 6840	Data Diagnostics	3
BME 6522	Biomedical Multivariate Signal Processing	3
BME 6938	Special Topics in Biomedical Engineering	1-4
BME 6938	Special Topics in Biomedical Engineering	1-4
EIN 6905	Special Problems	1-6
OCP 6168	Data Analysis Techniques for Coastal and Ocean Engineers	3
TTE 6505	Discrete Choice Analysis	3

Student Learning Outcomes

Applied data SCIENCE

- SLO 1 Knowledge

To analyze, design, implement, and evaluate Data Science systems solution to meet a given set of system requirements.
- SLO 2 Skills

To recognize professional responsibilities and make informed decisions when developing Data Science systems based on legal, ethical, and policy principles.
- SLO 3 Professional Behavior

To function effectively as a member of a team engaged to develop a Data Science systems solution.

Artificial Intelligence Systems

PROGRAM INFORMATION

The Master of Science with a major in Artificial Intelligence Systems degree will provide students with a working knowledge of techniques and software commonly used in Artificial Intelligence Systems. The degree is designed for students with strong analytical and computing backgrounds. For example, students with strong computing backgrounds and B.S. degrees in areas such as computer engineering or science, industrial and systems engineering, or physics would qualify to pursue this degree. Students working toward a Ph.D. in other engineering fields, such as agricultural and biological, biomedical, civil and coastal, chemical, electrical, environmental, mechanical, and aerospace and materials science engineering, may also be interested in and qualified to pursue this degree.

The Master of Science with a major in Artificial Intelligence Systems is a 30- credit hour, non-thesis degree that consists of a set of 6 core courses (18 credit hours), one project course (3 credit hours), and 3 electives options selected from Table 1 (9 credit hours). The students will also have the option to have a committee chair/program faculty advisor reflected in UF GIMS.

Degrees Offered

DEGREES OFFERED WITH A MAJOR IN Artificial intelligence systems

- Master of Science

Student Learning Outcomes

Artificial intelligence Systems

SLO 1 Knowledge

To analyze, design, implement, and evaluate an AI systems solution to meet a given set of system requirements.

SLO 2 Skills

To recognize professional responsibilities and make informed decisions when developing AI systems based on legal, ethical, and policy principles.

SLO 3 Professional Behavior

To function effectively as a member of a team engaged to develop an AI systems solution.

Engineering Education

Program Information

This program aims to prepare graduate students to become researchers, practitioners, future leaders, and agents of positive change in engineering education. Graduates are prepared to conduct educational research, informing evidence-based practice in an engineering context through a core curriculum in engineering education, experiential learning, and further graduate work within their disciplinary concentration.

Ph.D. with a major in Engineering Education

Admission Requirements

- B.S. in a STEM-related field or B.S. and related experience or a master's degree in an engineering or Computer Science discipline

- GPA requirements as defined by the Graduate School
- No GRE is required for admission into this program.

M.S. with a major in Engineering Education

Admission Requirements

- B.S. in a STEM-related field or B.S. and related experience or a bachelor's degree and experience as a teacher of a STEM-related topic
- GPA requirements as defined by the Graduate School
- No GRE is required for admission into this program.

Degrees Offered

Degrees Offered with a Major in Engineering Education

- Master of Science
- Doctor of Philosophy

Courses

Ph.D. Requirements

Minimum of 90 credits beyond the bachelor's degree

- EED Core Courses: 15 credit hours
- Experiential Learning: 5 credit hours
- Elective Requirement: 6 credit hours
- Disciplinary Concentration: 15 credits of graduate work in computer science or a single engineering discipline outside EED. This requirement is waived if a student is admitted with a master's degree in an engineering or computer science discipline.
- Up to 30 credits may be transferred from another graduate degree program with the approval of the student's advisor and the Graduate School. Transfer credits must be appropriate for the student's graduate program, and the student must have earned a B or better.
- Research for doctoral dissertation (remaining credits)

Successful presentation and defense of the

- Qualifying exam (limited to 2 attempts) in core areas of engineering education
- Dissertation proposal in an individual area of engineering education, designed by the student with support from their advisor and supervisory committee
- The doctoral dissertation, based on the proposal, will be the culminating experience of the degree.
- Submission of one peer-reviewed journal article AND acceptance of one conference presentation or one seminar presentation or one workshop presentation, both as first author
- One semester of research to practice experience, such as a teaching experience, a practical internship, or curriculum development/creation/transformation
- Creation of a reflective engineering education portfolio, which highlights EED teaching, research, service, and practical application of the student's research toward the discipline. The portfolio will be reviewed and evaluated by the entire supervisory committee.

M.S. with a major in Engineering Education

Core Courses (15 credits)

- EGS 6050 Foundations in Engineering Education (3 cr.)
- EGS 6054 Cognition, Learning, and Pedagogy in Engineering Education (3 cr.)
- EGS 6051 Instructional Design in Engineering Education (3 cr.)
- EGS 6020 Research Design in Engineering Education (3 cr.)
- EGS 6012 Research Methods in Engineering Education (3 cr.)

Experience (5 credits)

- EGS 6940 Foundations of Research to Practice in Engineering Education (1 cr.)
- EGS 6949 Research to Practice Experience in Engineering Education (3 cr.)
- EGS 6930 Engineering Education Seminar (1 cr.)

Electives Required (6 credits)

Students must take 6 credits of graduate courses related to their dissertation research topic and/or career goals. The courses must be approved by the student's advisor.

Disciplinary Concentration (15 credits)

Students must take 15 credits of graduate courses in a single engineering or computer science discipline. At least 9 credits must be at the 6000 level. This requirement is waived if a student is admitted with a master's in an engineering discipline or computer science.

Admission to Candidacy

Successful completion of both the Qualifying Exam and Dissertation Proposal will result in admission to Ph.D. candidacy.

Qualifying Exam

The student's supervisory committee will prepare a set of questions for the student. The student will have two weeks from the date the questions are delivered to the student to submit written answers to the committee. The student will then meet with the committee as a panel to discuss those answers.

Dissertation Proposal

The student must write an original proposal that will serve as the basis for the dissertation research. The student will then meet with their dissertation committee to defend the proposal.

Final Dissertation and Defense

The student will write a dissertation based on their research activities. The student will then meet with their dissertation committee to present and defend the dissertation. The dissertation and defense serve as the culminating activity for the Ph.D. program.

M.S. Requirements (without a thesis)

The MS without thesis option requires a total of 30 credits of coursework and a final comprehensive examination. Up to 9 credits may be transferred from another graduate degree program with the approval of the student's advisor and the Graduate School. Transfer credits must be

appropriate for the student's graduate program and the student must have earned a B or better. The specific requirements are

Core Courses (9 credits)

- EGS 6050 Foundations in Engineering Education (3 cr.)
- EGS 6054 Cognition, Learning, and Pedagogy in Engineering Education (3 cr.)
- EGS 6051 Instructional Design in Engineering Education (3 cr.)

Elective Requirement (21 credits)

Students must take 21 credits of engineering education-related graduate courses. The courses must be approved by the student's advisor and the graduate coordinator. A minimum of 6 credits must be graduate-level courses within the major. A maximum of 6 credits of the 21 may be S/U courses.

Comprehensive Examination

A final comprehensive exam, as required by the Graduate School, must be completed at the end of the student's graduate program. This exam is separate from any coursework. In conjunction with the student's advisor, the student will design a culminating experience related to the student's career goals. Students are encouraged to be creative in designing the experience, but it must be approved by the student's advisor, who will evaluate the student's performance.

M.S. Requirements (with a thesis)

The MS with thesis option requires a total of 30 credits and successful completion of an MS thesis. The specific requirements are

Core Courses (15 credits)

- EGS 6050 Foundations in Engineering Education (3 cr.)
- EGS 6054 Cognition, Learning, and Pedagogy in Engineering Education (3 cr.)
- EGS 6051 Instructional Design in Engineering Education (3 cr.)
- EGS 6020 Research Design in Engineering Education (3 cr.)
- EGS 6012 Research Methods in Engineering Education (3 cr.)

Up to 9 credits may be transferred from another graduate degree program with the approval of the student's advisor and the Graduate School. Transfer credits must be appropriate for the student's graduate program and the student must have earned a B or better.

Research Requirement (6 credits)

Students must take 6 credits of EGS 6971 Research for Master's Thesis.

Additional Course Requirements

Students must take 9 credits of graduate courses and/or EGS 6971. The courses must be approved by the student's advisor. Note that only 6 credits of EGS 6971 may count toward the degree.

Master's Thesis

The student will write a thesis based on their research activities. The student will then meet with their thesis committee to present and defend

the thesis. The thesis and defense serve as the culminating activity of the M.S. with thesis option.

Student Learning Outcomes

Ph.D. Student Learning Outcomes

After completion of the Ph.D., the candidate will be able to

- Synthesize the literature to identify research topics;
- Create relevant research question(s);
- Conduct independent research in engineering education to address the research question(s);
- Conduct an analysis of needs and context to identify gaps between research and practice;

- Collaborate with others in academia, industry, and other organizations to conduct research and develop evidence-based best practices
- Apply engineering education research findings, methodologies, concepts, and frameworks to real-world contexts such as industry or academic training experiences, professional development, classroom innovation, or assessment

Environmental Engineering Sciences Department

Director: K. Hatfield

Graduate Coordinator: M. Annable

The Department of Environmental Engineering Sciences offers graduate study in the following areas: Air Resources; Biogeochemical Systems; Environmental Nanotechnology; Solid and Hazardous Waste Management; Storm Water, Water Supply and Waste Water; Sustainability Science & Engineering; Systems Ecology and Ecological Engineering; and Water Resources. Students graduated from the program will demonstrate depth in individual focus areas as well as breadth of core knowledge concepts in all areas.

Please visit the program page below and our website: <http://www.essie.ufl.edu> for more information about our program in Environmental Engineering Sciences.

Environmental Engineering Sciences Program Information

Graduate study is offered leading to the degrees Master of Engineering, Master of Science, and Doctor of Philosophy in the field of environmental engineering sciences. Our graduate research and education areas are

Air Resources

- Monitoring of air pollutants: indoor, ambient, industrial, and occupational
- Monitoring methodology and instrumentation development
- Formation and fate of air pollutants
- Air quality modeling
- Air pollution control: system, process and materials
- Sustainability of air quality
- Health effects and environmental impact of air pollutant

Environmental Nanotechnology

- Manufacturing and tailoring of nanomaterials and nanodevices for application in environmental and human health research
- Environmental fate and transport of nanomaterials
- Environmental implications of nanomaterials

Engineering Education Collaborative

- Student-centered learning and design based apprenticeship
- Problem solving and critical thinking
- Diversity and cultures of inclusion
- Role of informal learning environments
- Universal design for STEM students with (learning) disabilities

GeoSystem Engineering/Waste Management

- Bioreactor Landfills
- Combustion and Thermal Treatment Residuals
- Contaminated Soil Characterization and Treatment
- Construction and Demolition Debris

- Electronic Waste
- Hazardous Waste
- Landfill Design and Operations
- Landfill Gas and Leachate
- Recycling and Beneficial Use of Wastes
- Treated Wood
- Waste Characterization and Leaching
- Solid Waste Management in Developing Countries

Stormwater, Water Supply and Wastewater

- Fundamental characterization of aqueous and particulate-phase contaminants including emerging contaminants: representative ambient monitoring, methodology and load quantification.
- Sourcing and generation of aqueous and particulate phase contaminants, physics and chemistry of contaminant transport and fate.
- Water contaminant control: systems, unit operation and processes, and materials development, in particular innovative mass transfer materials and low impact development materials.
- Water reuse as part of the urban water cycle: volumetric and contaminant load impacts
- Unit operation and process modeling: scalable physical models and computational fluid dynamics (CFD).
- Integrated physical, chemical, biological and thermal treatment phenomena for water cycle components.
- Coupling fundamental monitoring and material balance testing with urban water modeling.
- Fundamental and applied studies of physical-chemical water treatment processes, such as adsorption, coagulation, ion exchange, and oxidation, for a wide range of water qualities including surface water, groundwater, membrane concentrate, landfill leachate, and human urine.
- Innovative applications of ion exchange for water treatment.
- Fundamental studies in aquatic chemistry with a focus on the role of natural organic matter.
- Fundamental and applied studies of adsorption and photocatalysis, including surface optimization
- Bottom up integrated urban water system simulation and optimization

Sustainability Science & Engineering

- Rational design of nanomaterial through acute and full-life-cycle toxicity assessment
- Life cycle assessment calculations and comparisons of alternative energy and materials options
- Industrial ecology
- Corporate water resources sustainability
- Campus green building codes
- Green laboratory techniques
- Operation of buildings to meet green energy requirements

Systems Ecology and Ecological Engineering

- Ecological Engineering
- Energy Analysis and Environmental Economics
- Wetlands and Watershed Ecology
- Ecological Modeling

- Community and Conservation Ecology
- Environmental Policy
- Microbiology of Natural and Engineered Systems
- Biological and Chemical Remediation of Contaminated Systems
- Effects of Climate and Land Use Changes on Biogeochemical Cycles

Water Systems

- Contaminant transport and fate
- Decision support systems
- Ecohydrology and hydrologic restoration
- Hydrology
- Stormwater control
- Water resources planning and management
- Water conservation
- Fundamental characterization of aqueous and particulate-phase contaminants including emerging contaminants: representative ambient monitoring, methodology and load quantification.
- Sourcing and generation of aqueous and particulate phase contaminants, physics and chemistry of contaminant transport and fate.
- Water contaminant control: systems, unit operation and processes, and materials development, in particular innovative mass transfer materials and low impact development materials.
- Water reuse as part of the urban water cycle: volumetric and contaminant load impacts
- Unit operation and process modeling: scalable physical models and computational fluid dynamics (CFD).
- Integrated physical, chemical, biological and thermal treatment phenomena for water cycle components.
- Coupling fundamental monitoring and material balance testing with urban water modeling.
- Fundamental and applied studies of physical-chemical water treatment processes, such as adsorption, coagulation, ion exchange, and oxidation, for a wide range of water qualities including surface water, groundwater, membrane concentrate, landfill leachate, and human urine.
- Innovative applications of ion exchange for water treatment.
- Fundamental studies in aquatic chemistry with a focus on the role of natural organic matter.
- Fundamental and applied studies of adsorption and photo catalysis, including surface optimization
- Bottom up integrated urban water system simulation and optimization
- Aqueous Geochemistry and Water Treatment

Graduate students can also combine one or more of the above areas with specialties in other departments at the University of Florida.

The department participates in the hydrologic sciences interdisciplinary concentration that is offered through 9 departments in 3 colleges. This concentration is described under Interdisciplinary Graduate Studies.

Direct admission into the Master of Science and Doctor of Philosophy programs requires a bachelor's degree in engineering or in a basic science such as chemistry, geology, physics, biology, or mathematics. Persons with a degree in a nontechnical field may also be admitted into this program after completing appropriate technical courses. Direct

admission into the Master of Engineering program requires a bachelor's degree in engineering from an ABET-accredited institution.

Requirements for a master's degree normally take 12 to 24 months to complete. The length of time required for the Doctor of Philosophy degree depends partly on the research topic, and may be completed in 3 years, but often takes longer, depending on prior academic experience.

Combination degree program: The department offers a combination bachelor's/master's degree program. This program allows qualified students to earn both a bachelor's degree and a master's degree, with a savings of 12 credits.

Joint program: The Environmental Engineering Sciences Department, in partnership with the Levin College of Law, offers a joint program leading to the M.S. or M.E. degree in environmental engineering sciences and the Juris Doctor degree. Twelve credits of appropriate course work are counted toward both degrees.

For more information, please see our website: <http://www.essie.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Environmental Engineering Sciences

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Engineering
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences
- Master of Science
 - without a concentration
 - concentration in Geographic Information Systems
 - concentration in Hydrologic Sciences
 - concentration in Wetland Sciences

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Environmental Engineering Sciences (PHD)

SLO 1 Knowledge

Knowledge an ability to identify, formulate, and solve environmental problems using scientific and engineering methods and tools

SLO 2 Skills

An ability to critically read and evaluate engineering or science literature.
An ability to use the techniques, methods, and appropriate professional tools necessary for professional practice at an advanced level
An ability to communicate effectively

SLO 3 Professional Behavior

An understanding of professional and ethical responsibility

Environmental Engineering Sciences (ME & MS)

SLO 1 Knowledge

An ability to identify, formulate, and solve environmental problems using scientific and engineering methods and tools

SLO 2 Skills

An ability to critically read and evaluate engineering or science literature

An ability to use the techniques, methods, and appropriate professional tools necessary for professional practice at an advanced level
An ability to communicate effectively

SLO 3 Professional Behavior

An understanding of professional and ethical responsibility

Industrial and Systems Engineering Department

Chair: I. Rivero

Graduate Coordinator: J. Sefair

The Department of Industrial and Systems Engineering offers the Master of Engineering and the Master of Science degrees, each with a thesis or non-thesis option, with specialization in engineering management, manufacturing and logistics systems engineering, operations research, quality engineering, and special interest options such as health systems. In addition, the Department offers the Doctor of Philosophy degree with specialization in linear, combinatorial, nonlinear, and global optimization; supply chain management and e-commerce; financial engineering;

manufacturing management; facilities location and layout; quality engineering; and stochastic processes.

Complete descriptions of the requirements for the M.E., M.S., and Ph.D. degrees are provided in the *General Information* section of this catalog.

A degree in one of the engineering disciplines or in mathematics, statistics, physics, computer sciences, quantitative management, or similar fields is prerequisite. Where the student's background is deficient, an articulation program of foundation courses will be required.

The Department offers a combination bachelor's/master's degree program of B.S.I.S.E./Master of Science (Management), B.S.I.S.E./Master of Engineering or Master of Science, and a B.S. from disciplines within the College of Engineering/Master of Science or Master of Engineering. Contact the graduate coordinator for information.

Industrial and Systems Engineering Program Information

The Department of Industrial and Systems Engineering offers the Master of Engineering degree, the Master of Science degree, the Engineer degree, and the Doctor of Philosophy degree. Complete descriptions of the

minimum requirements for the M.E., M.S., Engineer, and Ph.D. degrees are provided in the Graduate Degrees (p. 778) section of this catalog.

Master of Science (M.S.) Program

Admission to the Master of Science program is open to students with an undergraduate degree in engineering, mathematics, statistics, computer science, physics, quantitative management, or similar field. The M.S. degree does not require a thesis, although a student interested in pursuing research or possibly continuing their education beyond a master's degree is encouraged to write one.

Master of Engineering (M.E.) Program

Students seeking admission to the Master of Engineering program must have a bachelor's degree from an ABET-accredited curriculum or have taken sufficient articulation coursework to meet the minimum requirements specified by ABET. The M.E. degree does not require a thesis and is generally considered a terminal degree.

Ph.D. Program

The doctoral program in Industrial and Systems Engineering covers the areas of data analytics, health systems engineering, human-systems engineering, operations research (including deterministic and stochastic processes), risk management and financial engineering, and supply chain and logistics systems. Application areas include energy systems, financial engineering, healthcare, manufacturing systems, security systems, supply chain management, and transportation systems.

For more information, please see our website: <http://www.ise.ufl.edu>.

Degrees Offered

Degrees Offered with a Major in Industrial and Systems Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Quantitative Finance
- Master of Engineering
 - without a concentration

Student Learning Outcomes

Industrial and Systems Engineering (PHD)

SLO 1 Knowledge

Basic proficiency in the core methodological areas of operations research and industrial engineering, including mathematical modeling and optimization theory and algorithms

SLO 2 Professional Behavior

Ability to effectively and professionally communicate industrial engineering concepts and information in lecture format

SLO 3 Skills

Ability to assimilate foundational material, describe important research contributions, and independently plan future research activities that advance the state-of-the-art in the student's field of expertise

SLO 4 Knowledge

Contribution of significant new research to the student's field of expertise, either in theoretical foundations or practical applications

Industrial & Systems Engineering (ME & MS)

SLO 1 Knowledge

Proficiency in the core methodological areas of operations research and industrial engineering, including mathematical modeling and analysis of business problems

SLO 2 Skills

Ability to apply methodology in the customized development of solutions for business problems, and the use of information technologies for solution delivery

SLO 3 Professional Behavior

Ability to effectively and professionally communicate industrial engineering concepts and information in written and oral forms

J. Crayton Pruitt Family Department of Biomedical Engineering

Chair: G. Hudalla

Graduate Coordinator: C. Stabler

The mission of the J. Crayton Pruitt Family Department of Biomedical Engineering (BME) is to educate students with strong engineering and science backgrounds for Master's and/or Ph.D. degrees in biomedical engineering. Graduates in BME typically apply their skills and training directly to engineering solutions to clinical problems in medicine. The BME mission is accomplished through a core program of study that has strong collaborations with faculty in the Colleges of Engineering and Medicine.

Degrees offered include: Doctor of Philosophy, Master of Science (thesis and non-thesis options), and Master of Engineering (thesis and non-thesis options). More details regarding these degrees and the minimum entry requirements are provided at <http://www.bme.ufl.edu/academics/graduate> (<http://www.bme.ufl.edu/academics/graduate/>).

The Biomedical Engineering Department faculty members work collaboratively with joint, affiliate, and adjunct faculty from many other departments in the College of Engineering, the College of Medicine, and local industry. This diversity ensures students the highest-quality education and varied opportunities for cutting-edge research.

Areas of Research within these graduate programs include:

- Biomaterials and Regenerative Medicine
- Biomechanics and Bionics
- Biomedical Imaging and Applications
- Molecular and Cellular Engineering
- Modeling and Biomedical Data Science
- Neural Engineering

More information about our dynamic and collaborative department is available at: <http://www.bme.ufl.edu>.

Biomedical Engineering

Program Information

The Master's degree (thesis or nonthesis) requires at least 30 semester hours. The Doctoral degree requires at least 90 semester credit hours beyond the bachelor's degree. No more than 30 hours of a master's degree from another institution will be transferred to the Ph.D. degree. If a student holds a master's degree in a discipline different from the doctoral program, the master's work will not be counted toward the doctoral degree unless the BME Department successfully petitions the Dean of

the Graduate School. Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Complete BME program details and courses available are listed in the Biomedical Engineering Graduate Guidelines, on the BME website (<https://www.bme.ufl.edu/>) (which also offers information on available research areas).

Combination program: Biomedical Engineering also offers a combination bachelor's/master's degree program in collaboration with the other departments in the College of Engineering. This program allows qualified students to earn both a bachelor's degree and a master's degree within 5 years for a net savings of 1 year. Contact the BME academic services office for more information or see <https://www.bme.ufl.edu/academics/bme-graduate-program/>

Degrees Offered

Degrees Offered with a Major in Biomedical Engineering

- Doctor of Philosophy
 - without a concentration
 - concentration in Clinical and Translational Science
- Master of Engineering
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

SLO 6 Professional Behavior

An ability to communicate effectively and work collaboratively

Materials Science and Engineering Department

Chair: M. V. Manuel

The Department of Materials Science and Engineering offers the Master of Science, Master of Engineering, and Doctor of Philosophy degrees in Materials Science & Engineering (MSE) and Nuclear Engineering (NE). Requirements for these degrees are described in the General Information section of this catalog.

Degrees in MSE include specific areas of research and study in biomaterials, ceramics, composites, computational materials science, electronic materials, metals, polymers, nanomaterials, and nuclear materials. Degrees in NE include specific areas of research and study in advanced nuclear power concepts and systems, digital control of nuclear reactor power plant technology and operations, reactor dynamics and control, advanced radiation detectors and analysis in support of nuclear forensics and homeland security.

Nontraditional Degree Programs: The Department offers combination bachelor/master's degree programs: MSE BS/MS, NE BS/MS, and students may also combine the MSE BS with the MS awarded through the Dept. of Biomedical Engineering (BME). The combination bachelor/master's program allows qualified students to earn both degrees in materials science and engineering with savings of a tangible number of credit hours. Qualified students are allowed to begin master's course work in their junior years and double count specific graduate courses for both degrees. The master's degree may be completed within 2 to 3 semesters after completing the bachelor's degree. Program admission requirements are:

1. satisfaction of Graduate School admission requirements prior to the beginning of the senior year,
2. an upper division GPA of at least 3.5 in MSE and 3.4 in NE,
3. for MSE, completion of a minimum of 18 credit hours of courses,

4. admission by the Department's Graduate Admission Committee and approval by the College of Engineering and the Graduate School.

For more information, contact the Department.

The J.D./M.S. in MSE (thesis/non-thesis) is a joint degree program culminating in both the Juris Doctor degree, awarded by the College of Law, and the Master of Science (thesis/non-thesis), awarded by the College of Engineering. Under this program, a student can earn both degrees in approximately 1 year less than it would take to attain both degrees if pursued consecutively.

The concurrent M.D./Ph.D. degree in MSE is a joint degree program offered through a collaborative program between the College of Medicine and Materials Science and Engineering. For more information, please contact the Department.

To be eligible for regular admission to the graduate program within the Department, the student must hold a B.S. in an appropriate major. Because of the breadth of MSE graduate programs, students with degrees in materials, ceramics, metallurgy, other engineering, mathematics, or science areas (such as biology, chemistry, or physics) have found ample opportunities to pursue their research and training areas of interest.

Materials Science and Engineering

Graduate Coordinator: W. M. Sigmund

The University of Florida's Materials Science and Engineering (MSE) graduate program offers students a world-class education in a world-class research environment, offering two graduate degrees: a Master of Science and a Doctor of Philosophy.

UF's MSE graduate program includes more than 40 graduate faculty members across multiple colleges and departments and numerous research institutes. Faculty routinely conduct multidisciplinary research

with researchers in other departments. This provides graduate students exposure to a broad spectrum of concepts and skills, access to state-of-the-art research instrumentation, and the experience of a vibrant collaborative culture.

MSE graduate students master a set of core concepts and principles critical to a fundamental understanding of materials science and engineering, but also have tremendous flexibility in designing a sequence of coursework and research.

Student Learning Outcomes

Materials science & Engineering (PHD)

SLO 1 Knowledge

Identify unknown aspects of structure-property-processing relationships for a materials system and formulate an approach to elucidating those aspects using engineering and/or scientific principles at a level appropriate to a doctoral research.

SLO 2 Knowledge

Demonstrate proficiency on appropriate experimental or computational techniques used for materials characterization, and uses these techniques to investigate structure-property-relationships in material systems at a level appropriate to doctoral research.

SLO 3 Skills

Obtain information from primary literature and technical reports, and integrate that information to reach conclusions regarding the current state of the art and areas in which further research is needed.

SLO 4 Skills

Write and/or orally present the results of a research project or literature review in a manner that clearly communicates one or more of the following: current state of the art, areas in which additional research is needed, research objectives, procedures, results, and conclusions.

SLO 5 Professional Behavior

Write reports and research papers following ethical standards regarding appropriate citation and plagiarism.

SLO 6 Professional Behavior

Work cooperatively with others, interact with supervisors, follow guidelines for appropriate management of data, and follow safety requirements for working in a research laboratory. develop leadership skills

Materials Science & Engineering (ME & MS)

SLO 1 Knowledge

Identify unknown aspects of structure-property-processing relationships for a materials system and formulate an approach to elucidating those aspects using engineering and/or scientific principles at a level appropriate to a master student.

SLO 2 Skills

Obtain information from primary literature and technical reports, and integrate that information to reach conclusions regarding the current state of the art and areas in which further research is needed

SLO 3 Skills

Write and/or orally present the results of a research project or literature review in a manner that clearly communicates one or more of the following: current state of the art, areas in which additional research is needed, research objectives, procedures, results, and conclusions

SLO 4 Professional Behavior

Write reports and research papers following ethical standards regarding appropriate citation and plagiarism

Nuclear Engineering Sciences

Graduate Coordinator: D. Schubring

Housed within the Herbert Wertheim College of Engineering's Department of Materials Science & Engineering, this program offers students an opportunity to work on research teams related to backscatter radiation, extreme environment testing and nuclear fuel cycles. Students also conduct research alongside academics and in partnership with national labs and government agencies, including Idaho National Laboratory and the U.S. Department of Energy. At UF, we're developing the next generation of nuclear engineering leaders by performing high-impact research and providing exceptional educational programs. Please contact the Department of Materials Science & Engineering for more information about this program.

Degrees Offered**Degrees Offered with a Major in Nuclear Engineering Sciences**

- Doctor of Philosophy
 - without a concentration
 - concentration in Imaging Science and Technology
- Master of Engineering
- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Courses**Nuclear Engineering Sciences Program Courses**

Code	Title	Credits
ENU 5142	Risk Assessment and Economic Analysis of Nuclear Systems.	3

Student Learning Outcomes

Nuclear engineering sciences (PHD)

SLO 1 Knowledge

Identify unknown aspects of nuclear and/or radiological systems and formulate an approach to elucidating those aspects using engineering and/or scientific principles at a level appropriate to a doctoral research.

SLO 2 Knowledge

Demonstrate proficiency on appropriate experimental or computational techniques used for nuclear engineering research, and use these techniques to investigate various relationships (atomic, nuclear, mechanical, materials performance, etc.) in nuclear systems at a level appropriate to doctoral research.

SLO 3 Skills

Obtain information from primary literature and technical reports, and integrate that information to reach conclusions regarding the current state-of-the-art and areas in which further research is needed.

SLO 4 Skills

Write and/or orally present the results of a research project or literature review in a manner that clearly communicates one or more of the following: current state-of-the-art, areas in which additional research is needed, research objectives, procedures, results, and conclusions.

SLO 5 Professional Behavior

Follow requirements for writing reports and research papers, and do so based on ethical standards regarding appropriate citation and plagiarism.

SLO 6 Professional Behavior

Work cooperatively with others, interact with supervisors, follow guidelines for appropriate management of data, and follow safety requirements for working in a research laboratory

Nuclear Engineering Sciences (Me & Ms)

SLO 1 Knowledge

Identify unknown aspects of nuclear and/or radiological systems and formulate an approach to elucidating those aspects using engineering and/or scientific principles at a level appropriate to a Master of Science degree in nuclear engineering

SLO 2 Skills

Obtain information from primary literature and technical reports, and integrate that information to reach conclusions regarding the current state of the art and areas in which further research is needed

SLO 3 Skills

Write and/or orally present the results of a research project or literature review in a manner that clearly communicates one or more of the following: current state-of-the-art, areas in which additional research is needed, research objectives, procedures, results, and conclusions

SLO 4 Professional Behavior

Follow requirements for writing reports and research papers, and does so based on ethical standards regarding appropriate citation and plagiarism

Mechanical and Aerospace Engineering Department

Chair: W. Dixon

Graduate Coordinators: H. Greenslet and D. Spearot

The Department of Mechanical and Aerospace Engineering offers the degrees of Master of Science (thesis or non-thesis), Master of Engineering (thesis or non-thesis), and Doctor of Philosophy in Aerospace Engineering and Mechanical Engineering. Minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Prospective students are expected to have strong backgrounds in engineering. For the first year of study, each student is generally required to take a minimum of three regular courses each semester.

The Department offers a combination bachelor's/master's degree program. Contact the undergraduate coordinator for information.

For more information, please see the program pages below and our website: <http://www.mae.ufl.edu/current/graduate> (<http://www.mae.ufl.edu/current/graduate/>).

- Aerospace Engineering (<https://gradcatalog.ufl.edu/graduate/colleges-departments/engineering/mechanical-aerospace/aerospace/>)
- Mechanical Engineering (<https://gradcatalog.ufl.edu/graduate/colleges-departments/engineering/mechanical-aerospace/mechanical/>)

Majors

- Aerospace Engineering (p. 430)
- Mechanical Engineering (p. 433)

Faculty

Professor

- Angelini, Thomas Ettor
- Arakere, Nagaraj Keshavamurthy
- Chen, Youping
- Crane, Carl D.
- Greenslet, Hitomi
- Huang, Yong
- Ifju, Peter G.
- Kim, Nam Ho
- Moghaddam, Saeed
- Mohseni, Kamran
- Rao, Anil
- Roy, Subrata
- Sankar, Bhavani V.
- Sarntinoranont, Malisa
- Schueller, John Kenneth
- Segal, Corin
- Sheplak, Mark
- Sherif, Sherif Ahmed
- Spearot, Douglas

- Subhash, Ghatu
- Ukeiley, Lawrence S.

Associate Professor

- Aifantis, Katerina Elias
- Carroll, Bruce F.
- Conklin, John
- Dunn, Alison Campbell
- Fitz-Coy, Norman G.
- Houim, Ryan W.
- Kamalapurkar, Rushikesh L.
- Lind, Richard C.
- Menezes, Amor
- Scheffe, Jonathan
- Taylor, Curtis

Assistant Professor

- Allen, Jessica Lynn
- Hale, Matthew
- Musgrave, Patrick Francis
- Pan, Jing
- Petersen, Alicia Kathryn
- Petersen, Christopher Daniel
- Shi, Jingjing
- Shin, Jaejeong
- Song, Youngsup
- Tang, Xin
- Wang, Yu

Other

- Stewart, Donald Scott

Eminent Scholar

- Chung, Jacob Nan-Chu

Distinguished Professor

- Balachandar, Sivaramakrishnan
- Dixon, Warren E.
- Fan, Zhonghui Hugh

Research Assistant Scientist

- Guralnik, Dan

Senior Lecturer

- Dickrell, Daniel John
- Griffis, Michael W.
- Niemi, Sean Russell
- Traum, Matthew J.

Research Scientist

- Jackson, Thomas L.
- Wass, Peter James

Master Lecturer

- Kumar, Ashok V.

Affiliated Faculty

- Chu, Henry Chi-Wah
Assistant Professor
- Costello, Kerry E.
Assistant Professor
- Du, Jing
Professor
- Fairbanks, James Paul
Assistant Professor
- Ferris, Daniel Perry
Professor
- Fu, Jie
Assistant Professor
- Harley, Joel
Associate Professor
- Nichols, Jennifer A.
Associate Professor
- Ray, Sandip
Professor
- Tonks, Michael
Professor
- Williams, Lakiesha Nicole
Professor

Aerospace Engineering

Program Information

The Department of Mechanical and Aerospace Engineering offers the degrees of Master of Science (thesis or non-thesis), Master of Engineering (thesis or non thesis), and Doctor of Philosophy in Aerospace Engineering. Official minimum requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Master of Science & Master of Engineering

Any Master's degree candidate will pursue the Master of Science degree (M.S.), however only those holding ABET-accredited baccalaureate degrees in engineering may choose the Master of Engineering degree (M.E.). All other degree requirements remain the same. A Master's degree candidate should establish a Plan of Study by the end of the second term of enrollment. As the candidate progresses toward their degree, any deviations in their program from an approved Plan of Study should be recorded by the submission of a revised Plan of Study. A Master's degree candidate seeking a thesis option must form a supervisory committee by the end of the second term of enrollment and the supervisory committee must approve the Plan of Study. A Master's degree candidate seeking a non-thesis option submits a self-guided Plan of Study.

A total of 30 credit hours is required for the Master's degree. Of this total, at least 18 credits of coursework (excluding S/U courses) must be in the student's major field of study. Technical courses from other fields may be used to satisfy remaining credits, so long as they are graduate level courses (5000 and above, excluding S/U courses).

The Master's degree, with thesis option, includes a minimum of 24 graded credit hours of coursework (excluding S/U courses), up to 6 credit hours

Student Learning Outcomes

Aerospace Engineering (PHD)

SLO 1 Knowledge

Ability to identify, formulate, and solve engineering problems. Ability to critically read and integrate engineering research literature.

SLO 2 Skills

Ability to use applied mathematical and/or modern experimental techniques. Ability to use modern engineering tools for practice at an advanced level.

SLO 3 Professional Behavior

Ability to communicate effectively.

Aerospace Engineering (MS)

SLO 1 Knowledge

Ability to identify, formulate, and solve engineering problems.

SLO 2 Skills

Ability to use applied mathematical techniques. Ability to use modern engineering tools for practice at an advanced level.

Student Learning Outcomes

mechanical engineering (Ph.D.)

SLO 1 Knowledge

Ability to identify, formulate, and solve engineering problems. Ability to critically read and integrate engineering research literature

SLO 2 Skills

Ability to use applied mathematical and/or modern experimental techniques. Ability to use modern engineering tools for practice at an advanced level

SLO 3 Professional Behavior

Ability to communicate effectively

Mechanical Engineering (M.e. & M.s.)

SLO 1 Knowledge

Ability to identify, formulate, and solve engineering problems

SLO 2 Skills

Ability to use applied mathematical techniques. Ability to use modern engineering tools for practice at an advanced level

SLO1 Comprehensive Knowledge

Describe knowledge of the normal structure and physiologic function of the human body and how the failure of normal function is associated with disease

Nuclear and Radiological Engineering Department

The graduate degrees offered with a major in Nuclear Engineering Sciences are now administered through the Materials Science and Engineering Department (p. 424).

Warrington College of Business

Dean: S. Mitra

The mission of the Warrington College of Business is to build a better society by creating influential research and educating tomorrow's business leaders. The mission emphasizes service to society, a key feature of a Land Grant university. The activities through which the College achieves this global aim are research and teaching. These two activities are highly complementary, indeed intertwined, and both are vital to the continued excellence of the Warrington College. The Hough Graduate School of Business has specialized programs tailored to fit students' strengths and interests.

Graduate degrees offered (<http://warrington.ufl.edu/graduate/academics/>) by the Warrington College of Business are the Doctor of Philosophy with major programs in business administration; the Master of Science with major programs in Business Administration, in Finance, in Management, and in Real Estate; the Master of Business Administration; the Master of Entrepreneurship; the Master of Science in Information Systems and Operations Management; the Master of International Business; and the Master of Accounting. Fields of concentration and minimum requirements for the M.B.A. are given in the Graduate Degrees

(p. 778) section of this catalog, as well as admission and degree requirements for the Ph.D.

For more information, please see the associated department and program pages in this catalog, and our website: <http://warrington.ufl.edu>.

Business Administration (M.B.A.)

Program Information

The Master of Business Administration (M.B.A.) degree gives students

1. conceptual knowledge for understanding the functions and behaviors common to business organizations and
2. analytical, problem-solving, and decision-making skills essential for effective management.

Emphasis is on developing the student's capacities and skills for business decision making.

The traditional MBA curriculum is structured so that students may extend their knowledge in a specialized field. The program offers concentrations in business analytics, competitive strategy, finance, human capital, marketing, real estate and supply chain management.

Admission: All program options require at least two years of full-time professional work experience, along with two professional recommendation letters, a resume, written essays, and official transcripts for all previous academic work. Applicants for admission into a Full-Time MBA program must submit official scores from the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) and are required to interview as part of the admissions process. If English is not your native language and you do not have a bachelor's degree or higher from a country where English is the official language, a TOEFL, IELTS, or MELAB score must be submitted.

A diverse student body is seen as an important asset of the program. Accordingly, the backgrounds of students include a wide range of disciplines and cultures. With the exception our 32 credit programs, the curriculum requires no prerequisites in business coursework.

For more specific information on other aspects of the program, contact the UF MBA Program:

310 Hough Hall, P.O. Box 117152
Gainesville FL 32611-7152

or visit the website, <http://www.floridamba.ufl.edu> (<http://www.floridamba.ufl.edu/>)

Course work: A minimum of 48 qualified credits of course work are required for the two-year option, and one-year All Major. The one-year Business Majors program requires a minimum of 32 credits. Credits cannot be transferred from another institution or program..

Options

Traditional MBA Two-Year Option: This 48 credit program requires 4 terms of full-time study over two academic years. Students are admitted for the fall term only; many students spend the summer between academic years working at internships. This option requires at least two years of full-time, post-undergraduate work experience as well as a bachelor's degree from an accredited four year institution.

Traditional One-Year, All Majors: This 48 credit program starts in late spring/ early summer and students are expected to complete all coursework within 12 months. Successful candidates are expected to have a bachelor's degree from an accredited four year institution and two years of post-undergraduate work experience.

Traditional One-Year, Business Majors: This 32 credit program starts in mid-summer and students expected to complete all course work within 10 months. Applicants to this program are required to have a bachelor's degree in business from a four-year accredited institution (conferred within the last seven years) and at least two years of post-undergraduate work experience. Students take primarily graduate business electives during summer B, fall, and spring terms and graduate in May.

Executive MBA Program: A 20-month program for working professionals, students attend classes four weekends per term (Saturday-Sunday). The program is divided into seven terms. The program starts in August, and includes a one-week two credit international experience. The international study tour is a program requirement; students travel abroad in May for a week of experiential learning through lectures or discussions with local business and government leaders. The tour will include a combination of lectures, group projects and/or site visits. This option requires eight years of post-undergraduate work experience, and students are expected to have people or project management responsibilities in their current positions.

Professional Two-Year MBA: This 24-month program starts in August and January and is designed for professionals who work full time while pursuing their degrees part time. Students attend classes one weekend per month (Saturday-Sunday) and must complete an immersive experiential learning course for one week during their enrollment. This option requires two years of post-undergraduate work experience.

Professional One-Year MBA: For students with acceptable undergraduate degrees in business (completed within seven years before starting the program), this 16-month option starts in January. Students attend classes one weekend per month (Saturday-Sunday) and must complete an immersive experiential learning course for one week during their enrollment. In order to begin the One Year MBA program, students must complete and pass a Foundations Review course. This option requires two years of post-undergraduate work experience.

Online Two-Year MBA: This 24-month program starts in August and January and allows students to earn their MBA primarily through asynchronous class lectures. Students interact with faculty and classmates via email, synchronous group discussion software, asynchronous class presentation software, and multimedia courseware. This option requires two years of post-undergraduate work experience.

Online One-Year MBA: For students with acceptable undergraduate degrees in business (completed within seven years before starting this program), this 16-month option starts in August and January and gives students and faculty the same interactive technology as the Online One-Year MBA. In order to begin the One Year MBA program, students must

complete and pass a Foundations Review course. This option requires two years of post-undergraduate work experience.

Professional MBA in South Florida: This 24 month program starts during the late summer, and is designed for professionals who wish to continue working full time while pursuing their degrees part time. This program includes a one-week two credit international experience. The international study tour is a program requirement; students travel abroad in June for a week of experiential learning through lectures or discussions with local business and government leaders. The tour will include a combination of lectures, group projects, and/or site visits. Students attend classes once every three weeks (Saturday-Sunday) at the UF MBA Center in Miramar, Florida. This option requires two years of post-undergraduate work experience.

M.B.A./Ph.D. in medical sciences program: Concurrent studies leading to the Master of Business Administration and Doctor of Philosophy degrees are offered in cooperation with the College of Medicine. This 120-credit program trains research scientists to assume responsibilities as managers of biotechnical industries. Estimated time to complete both degrees is 5 to 7 years. Students must meet the admission and curriculum requirements of both programs. Requirements of the M.B.A. program are those in effect when an applicant is admitted to the program. Applicants are expected to have previous professional work experience prior to starting the MBA program.

MBA./J.D. program: A program of joint studies leading to the Master of Business Administration and Juris Doctor degrees is offered under the joint auspices of the Warrington College of Business Administration and the Levin College of Law. Current M.B.A. or J.D. students must declare their intent to apply for the second degree during their first year. Applications are then due according to admission schedules for that year. Both degrees are awarded after a 4-year course of study. Students must take both the LSAT and the GMAT/GRE before admission and meet the admission and curriculum requirements of both degrees. Requirements of the M.B.A. program are those in effect when an applicant is admitted to the program. Applicants are expected to have previous professional work experience prior to starting the MBA program.

M.B.A./Pharm.D. program in management and pharmacy administration: A program of concurrent studies culminating in both the Master of Business Administration and Doctor of Pharmacy degrees allows students interested in both management and pharmacy administration to obtain the appropriate education in both areas. Candidates must meet the entrance requirements and follow the entrance procedures of both the Warrington College of Business Administration and the College of Pharmacy. The degrees may be granted after 5 years of study. Requirements of the M.B.A. program are those in effect when an applicant is admitted to the program. Applicants are expected to have previous professional work experience prior to starting the MBA program.

Exchange programs: The Warrington College of Business has many partner institutions from which full-time MBA students may choose to study. Programs vary in length from one semester to a modular format similar to ours. Students who study abroad are able to select a variety of business courses and options depending on location. Students work closely with their academic advisors to develop a customized plan since careful consideration of the UF MBA curriculum and career planning is necessary to make a study abroad experience successful. For a complete list of exchange partners, see <https://warrington.ufl.edu/academics/go-global/>

Degrees Offered

Degrees Offered with a Major in Business Administration

- Master of Business Administration
 - without a concentration
 - concentration in Business Analytics
 - concentration in Competitive Strategy
 - concentration in Finance
 - concentration in Human Capital
 - concentration in Marketing
 - concentration in Real Estate
 - concentration in Supply Chain Management

- Quantitative Finance (p. 451)
- Marketing (p. 485)
- Real Estate and Urban Analysis (p. 451)

Minimum requirements for the various departments and specialties are given in the Graduate Degrees (p. 778) section in this catalog.

All candidates for the Ph.D. in business administration must satisfy the following general requirements:

Breadth requirement: All applicants for Ph.D. in the business administration program are expected to have completed prior business-related course work at either the advanced undergraduate or graduate level. Students entering without prior work are required to take a minimum of three graduate courses in at least two fields other than their chosen area of concentration. Most often, the appropriate courses will be found in the M.B.A. first-year core; the particular courses to be taken by a student will be decided in consultation with the student's academic adviser. After a student enters the Ph.D. program, the courses taken to satisfy the breadth requirement must be taken in the College of Business Administration.

Research foundations requirement: All students must complete a six-course research skills sequence that prepares them for scholarly research in their chosen area of concentration. Research foundations are defined as essential methodological tools (e.g., statistics, quantitative analysis) and/or substantive content domains (e.g., psychology, economics) outside the student's major field that are considered essential to conducting high quality research in the chosen field. The specific research skills required by each area of concentration can be found in the field descriptions in this Catalog.

Other requirements include satisfactory completion of graduate course work in the major field of concentration, as well as one or two minor fields designed to add depth to the student's research training. Minors are selected by the student in consultation with their advisory committee, and may be within or outside the College of Business Administration.

For more information, please see the links above and our website: <http://warrington.ufl.edu/graduate/academics> (<http://warrington.ufl.edu/graduate/academics/>).

Degrees Offered

Degrees Offered with a Major in Business Administration

- Doctor of Philosophy

Student Learning Outcomes

Business Administration

2017-18 PhD SLO 1 Knowledge
Manage the technical tools (theory, methodology, statistical analyses, and reporting norms) essential to the departmental area of study.

2017-18 PhD SLO 2 Skills
Interpret with technical tools to create new knowledge through original research.

2017-18 PhD SLO 3 Professional Behavior
Communicate specialized information from a field of expertise verbally and in writing.

2017-18 PhD SLO 4 Professional Behavior
Communicate specialized information from a field of expertise verbally at an educated layman or university undergraduate student level.

Finance, Insurance, and Real Estate Department

Chair: A. Naranjo

Graduate Coordinator: M. Nimalendran

The Department of Finance, Insurance, and Real Estate offers graduate work leading to the Master of Science degree with major programs in finance and real estate; the Master of Science in Entrepreneurship (M.S.E.); and the Doctor of Philosophy degree in business administration with a concentration in finance, insurance, quantitative analysis, or real estate. Complete descriptions of the minimum requirements for the M.S., M.S.E., and Ph.D. degrees are provided in the Graduate Degrees (p. 778) section of this catalog.

Finance, Real Estate, and Entrepreneurship are also available as concentrations within the M.B.A. program. For information about the M.B.A. program, please consult that listing in the Graduate Degrees (p. 778) section.

For more information see the program pages below, and visit our website: <http://warrington.ufl.edu/departments/fire> (<http://warrington.ufl.edu/departments/fire/>).

Majors

- Business Administration (Finance, Insurance, and Real Estate) (p. 451)
- Entrepreneurship (p. 455)
- Finance (p. 456)
- Finance and Technology (p. 457)
- Real Estate (p. 458)

Business Administration (Finance, Insurance, and Real Estate)

Program Information

The Ph.D. in Business Administration - Finance and Real Estate program prepares students to engage in productive scholarly research and teaching in the broad area of financial and real estate economics. Graduates of this program typically are placed with major universities in the United States, although some students choose to work in research positions at non-academic institutions.

The Ph.D. program has a strong emphasis on scholarly research training. Admissions are based on several criteria including academic performance in the undergraduate and graduate programs, standardized test scores, proficiency in English, and potential for research and teaching. For more specific admission information on our Ph.D. program, please visit our website at <http://warrington.ufl.edu/graduate/academics/phd-fre/>. Generally, admitted students will also be considered for financial aid.

Finance

The student pursuing a concentration in finance typically specializes in corporate finance, financial markets and institutions, or investments. The Ph.D. curriculum consists of course work of four types: research foundations, the major field, a minor or supporting field, and a breadth requirement.

The research foundation requirements are comprised of courses in microeconomic theory, macroeconomic theory, mathematical methods and applications to economics, mathematical statistics, and econometrics. The actual courses will depend on the student's background and proposed thesis research.

The major field in finance consists of at least 16 credit hours in graduate course work in finance including financial theory, corporate finance, and seminars in empirical methods, market micro structure, and special topics. Students may elect to have one "strong" minor (16 credit hours), two "weak" minors (8 credit hours each), or a supporting field which is not declared as a minor. If a supporting field is chosen, at least 16 hours of course work acceptable to the student's supervisory committee must be taken. The supporting field option is selected when a student wishes to take courses across a number of departments. The department offers a combination B.S./M.S. program. Contact the graduate coordinator for information.

The breadth requirement applies only to students with no prior course work in business and consists of financial and managerial accounting or their equivalents, plus two courses out of the following areas: managerial economics, production operations management, or problems and methods in marketing management.

Real Estate

The research foundations are identical to those listed above for finance. The major field, minor, and supporting field requirements have the same credit stipulation as those outlined above for finance, except that the major work is in real estate.

The breadth requirement, as in all concentrations for the business administration program, applies only to students entering without prior course work in business. It consists of at least three courses from the following list (two or more fields must be represented): managers and legal environment of business, finance, money and capital markets, problems and methods of marketing management, consumer behavior, and financial and managerial accounting.

Other degree requirements are listed in the Graduate Degrees (p. 778) section of this catalog.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/phd-fre> (<http://warrington.ufl.edu/graduate/academics/phd-fre/>).

Degrees Offered

Degrees Offered with a Major in Business Administration

- Doctor of Philosophy
 - concentration in Finance
 - concentration in Insurance
 - concentration in Quantitative Finance
 - concentration in Real Estate and Urban Analysis

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Entrepreneurship

Program Information

The Masters of Science in Entrepreneurship (M.S.E.) program is a one-year, 36-credit, campus-based program designed for young and aspiring entrepreneurs and change-makers. Offered to both business and non-business majors alike, the program is a combination of classroom delivery and experiential learning activities with a focus on opportunity assessment, feasibility analysis, lean entrepreneurial concept testing, business plan development, entrepreneurial leadership, and the sourcing of capital. Students are exposed to cutting edge entrepreneurial theory, which they apply immediately by consulting for small business, commercializing UF technology, and creating their own businesses.

Combination Degree: The Master of Science in Entrepreneurship offers a combination bachelor's/master's degree option for students pursuing a bachelor's degree in any discipline.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/mse> (<http://warrington.ufl.edu/graduate/academics/mse/>).

Degrees Offered

Degrees Offered with a Major in Entrepreneurship

- Master of Science in Entrepreneurship

Student Learning Outcomes

Entrepreneurship (MS)

SLO 1 Knowledge

Assess and evaluate potential new value-driven creative venture opportunities in ways that convey a vision

SLO 2 Professional Behavior

Apply professional entrepreneurial skills to leverage resources, manage risk, plan when nothing exists, develop an action orientation and be tenacious in the face of setbacks.

SLO 3 Skills

Utilize professional experience effectively to adapt and build action-oriented networks in the pursuit of entrepreneurial opportunities

Finance

Program Information

The student pursuing a major in finance typically specializes in corporate finance, financial markets and institutions, or investments.

Master of Science degree in Finance, non-thesis option: This M.S. program option consists of at least 32 credits in letter-graded courses. It is designed to ensure that each student acquires a basic knowledge of the major financial economics subject areas: corporate finance, derivatives, fixed income securities, investments, international finance, and real estate. The program is designed to prepare students for positions in commercial banking, asset management, investment banking, securities markets and more. See the program's website or contact the Associate Director for further information and criteria. This program is predominantly a **combination bachelor's/master's program**, with applications due early in the sophomore year at UF.

Master of Science degree in Finance/Juris Doctorate joint degree program: This joint degree program culminates in the M.S. and J.D. degrees. Applicants must meet the entrance requirements for both the Warrington College of Business Administration and the Levin College of Law. Admission to the second degree program is required no later than the end of the second consecutive semester after beginning one degree in the joint program.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/msf> (<http://warrington.ufl.edu/graduate/academics/msf/>).

Student Learning Outcomes

Finance (MS)

SLO 1 Knowledge

Produce a valuation of financial claims.

SLO 2 Skills

Synthesize financial and economic data, apply the appropriate framework, and recommend a financial strategy.

SLO 3 Skills

Independently assess financial strategies.

SLO 4 Professional Behavior

Write business documents and make clear, concise presentations that are supported by convincing analysis.

Finance and Technology

Overview

Program Information

Master of Science degree with a major in Finance and Technology, non-thesis option:

The M.S. with a major in Finance and Technology consists of a minimum of 30 credit hours. It is designed to ensure that students have exposure related to investments, derivatives, valuation, and current trends in financial intermediation and financial services, while also giving students an extensive grounding in the technologies being employed in finance today related to AI and blockchain. The program will primarily be a combination bachelor's/master's program beginning when students enter their senior year, with the possibility of entering the program on a stand-alone basis with the same set of master's level requirements.

Degrees Offered

Degrees Offered with a Major in Finance and Technology

- Master of Science

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Student Learning Outcomes

Finance and Technology (MS)

SLO 1 Knowledge

Produce a valuation of a financial claim and understanding of blockchain technologies and machine learning in finance.

SLO 2: Skills

Synthesize financial and economic data, apply the appropriate framework, and recommend a financial strategy.

SLO 3: Skills

Ability to process financial and economic data for finance applications using machine learning and generative AI.

SLO4: Skills

Ability to strategize and analyze “fintech” products using blockchain technology.

Real Estate

Program Information

The ten-month, full-time in residence, Nathan S. Collier Master of Science in Real Estate (MSRE) Program, housed in the Warrington College of Business Administration (WCBA), thrives on innovation, a dynamic student body, significant interaction with high-level working

professionals, and nationally recognized professors. The program is a unique combination of theory and practice that will both enhance your real estate education and develop your professional skills.

Master of Science degree in real estate, non-thesis option: This M.S. option consists of at least 34 credits of letter-graded courses. It is designed to ensure that each student acquires a basic knowledge of the various functional areas in real estate, real estate finance and investment, real estate development, real estate law and institutions, real estate asset management, international real estate, and advanced training in specialized areas. The capstone course (REE 6948 Capstone Seminar and Applied Project (2 cr.)) involves actual projects in which students work in teams to undertake a real estate problem for real clients. This two-tiered program of study provides both a firm theoretical foundation for later professional effectiveness and an applied bridge to professional practice.

Master of Science degree in real estate/juris doctorate joint program:

This joint degree program culminates in the M.S. and J.D. degrees. Applicants must meet the entrance requirements for both the Warrington College of Business Administration and the Levin College of Law. Admission to the second degree program is required no later than the end of the second consecutive semester after beginning one degree of the joint program.

The Department also offers a combination bachelor's / master's program for all undergraduate disciplines.

For more information, please contact the admissions director and see our website: <http://warrington.ufl.edu/graduate/academics/msre> (<http://warrington.ufl.edu/graduate/academics/msre/>).

Student Learning Outcomes

Real estate (MS)

SLO 1 Knowledge

Identify elements in construction methods and materials, market analysis, real estate finance and investment, real estate law, real estate appraisal, business statistics, and ethical and social responsibility.

SLO 2 Skills

Specify and implement a framework for identifying a real estate problem/decision, apply appropriate decision making tools, techniques, and evaluation criteria to the problem/decision, and develop alternative solutions.

SLO 3 Skills

Predict the outcomes of a decision or course of action and make appropriate adjustments to changing conditions and information.

SLO 4 Skills

Critically assess the impact of various courses of action on multiple stakeholders, including investors, lenders, and the local community.

SLO 5 Professional Behavior

Write business documents clearly, concisely, and analytically.

SLO 6 Professional Behavior

Speak in groups and in public clearly, concisely, and analytically, with appropriate use of visual aids.

Fisher School of Accounting

Director: Gary A. McGill

Graduate Coordinators: J. Laibson and J. Tucker

As a professional school in a major public research university, the Fisher School of Accounting (FSOA) is committed to scholarly research, teaching, and service to advance knowledge and prepare future leaders for business, professional, and academic careers.

The Fisher School of Accounting offers graduate work leading to the Master of Accounting (M.Acc.) degree with a major in accounting and optional concentrations in auditing and taxation, and the Ph.D. degree with a major in business administration and an accounting concentration. Requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog.

For more information, please see the program pages below, or visit our website: <http://warrington.ufl.edu/about/fisher> (<http://warrington.ufl.edu/about/fisher/>).

Accounting

Program Information

Master of Accounting: Three variations of the Master of Accounting degree program are available. These allow students to select one of three options: a concentration in Auditing, a concentration in Taxation, or no concentration. Minimum admission requirements include an acceptable score on the Graduate Management Admission Test (GMAT), with a minimum score of 550 and completion of essays with a minimum score of 4. International students must submit a satisfactory score on the following: TOEFL (Test of English as a Foreign Language: internet based, minimum score 100), or IELTS (International English Language Testing System: minimum overall score 7.0). Minimum scores on individual test sections are also required. Additional information,

including minimum GPA standards for admission, may be viewed at <http://warrington.ufl.edu/master-of-accounting/requirements> (<http://warrington.ufl.edu/master-of-accounting/requirements/>).

Combination degree program: The recommended curriculum to prepare for a professional career in accounting is the 3/2 five-year program with a joint awarding of the Bachelor of Science in Accounting and Master of Accounting degrees upon completion of the 150-hour program. The entry point into the 3/2 program is the beginning of the senior year.

Traditional Master of Accounting program: Students who have already completed an undergraduate degree in accounting may enter the 1-year M.Acc. degree program which requires satisfactory completion of 34 hours of course work. A minimum of 28 credits must be in graduate-level courses; a minimum of 20 credits must be in graduate-level accounting courses. The remaining credits are selected from business core courses and elective courses. Students are cautioned to seek early advisement, since many graduate courses are offered only once a year.

J.D./M.Acc. program: A joint program leading to the Juris Doctor and Master of Accounting degrees is offered by the Fisher School of Accounting and Levin College of Law.

Specific details for the M.Acc., J.D./M.Acc., and Ph.D. programs are available at <http://warrington.ufl.edu/Jd-macc/requirements> (<http://warrington.ufl.edu/Jd-macc/requirements/>).

Student Learning Outcomes

Accounting (MACC)

SLO 1 Knowledge
Conduct effective professional tax research.

SLO 2 Knowledge
Conduct effective professional accounting research.

SLO 3 Professional Behavior
Write clearly and concisely.

SLO 4 Professional Behavior
Write effective business reports.

SLO 5 Skills
Solve complex business problems.

SLO 6 Professional Behavior
Identify and interpret professional standards of conduct.

SLO 7 Professional Behavior
Identify legal, ethical, and social responsibilities to stakeholders.

Business Administration (Accounting)

Program Information

The Ph.D. program offers a broad-based interdisciplinary training that prepares students to conduct empirical research. The curriculum consists of course work of three types: the major field, a breadth requirement, and a research foundation requirement. In addition, students must demonstrate competence in conducting research and teaching, and must complete a dissertation on an accounting topic.

The major field in accounting consists of course work including research analysis, archival research, experimental research, readings, a research project, and dissertation. The breadth requirement consists of course work including microeconomic theory, game theory,

information economics, corporate finance theory, and asset pricing. The research foundation requirement consists of graduate course work in mathematical economics, statistics, or econometrics. Students demonstrate competency in conducting research by completing a research project in the summer of the first year. Teaching competence is demonstrated by completing a teaching training class and by teaching for at least one 1 semester.

Admission requirements include a history of academic excellence, adequate score on the GMAT (the average score of recently admitted applicants is 720 for GMAT) with a writing score of at least 5, competence in written and spoken English (TOEFL Internet-Based test (iBT) required for applicants whose native language is not English), appreciation of accounting issues, and institutional and math competency. The school requires a total score of 100 on the TOEFL, including a minimum of 26 on the speaking section.

Degrees Offered

Degrees Offered with a Major in Business Administration

- Doctor of Philosophy
 - concentration in Accounting

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Information Systems and Operations Management Department

Chair: H.K. Cheng

Graduate Coordinator: A. Kumar

The primary mission of the Department of Information Systems & Operations Management is a commitment to scholarly research, teaching and service to advance the state of knowledge in information systems and supply chain management and to train future leaders for professional and academic careers.

The Department offers graduate courses leading to the Master of Science in Information Systems and Operations Management (M.S.ISOM); the Ph.D. degree in Business Administration; and a concentration in the Master of Business Administration (M.B.A.) program. Minimum requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog.

Combination Bachelor/Master of Science: The Department also offers a combination bachelor's/master's degree program. This program allows qualified students to earn both the bachelor's and master's degrees, using 12 to 16 credit hours of graduate-level courses for both degrees.

For more information, please see the program pages below and our website: <http://warrington.ufl.edu/departments/isom> (<http://warrington.ufl.edu/departments/isom/>).

Majors

- Business Administration (Information Systems and Operations Management) (p. 465)
- Business Analytics (p. 469)
- Information Systems and Operations Management (p. 470)

Faculty

Professor

Professor

Business Administration (Information Systems and Operations Management)

Program Information

The Department of Information Systems & Operations Management offers graduate courses leading to the Master of Science in Information Systems and Operations Management (M.S.ISOM); the Ph.D. degree in Business Administration; and a concentration in the Master of Business Administration (M.B.A.) program. Minimum requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog.

Doctor of Philosophy: The mission of the Ph.D. Program is to educate scholars who will make substantial contributions in their field of research. Our primary goal is to train graduate students to make such contributions. To achieve this goal, we attempt to place students in productive academic research environments. The major areas of study within the department are Information Systems/Information Technology (IS/IT) and Operations Management (OM).

Students come from a variety of backgrounds, with the most common being engineering computer sciences, mathematics, business, and statistics. Students admitted for the Ph.D. choose to specialize either in information systems/information technology or in operations management. The course schedule taken by each student is always personalized to fit the background of the student and is developed in consultation with the Ph.D. program coordinator and/or chair of the dissertation committee. Additionally, doctoral students will be required to attend all ISOM Workshops and the Department Seminar Series (regardless of area of specialization) held at the University of Florida.

Admission requirements for the Ph.D. include

- A minimum grade point average of 3.2
- A minimum GMAT score of 650, or GRE scores acceptable to the program
- For nonnative speakers of English, submit an acceptable score on one of the following: TOEFL (Test of English as a Foreign Language: computer=213, paper=550, web=80), IELTS (International English Language Testing System: 6), MELAB (Michigan English Language Assessment Battery: 77), or successful completion of the UF English Language Institute program.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/phd-isom> (<http://warrington.ufl.edu/graduate/academics/phd-isom/>).

Degrees Offered

Degrees Offered with a Major in Business Administration

- Doctor of Philosophy
 - concentration in Information Systems and Operations Management

Requirements for these degrees are given in the Graduate Degrees (p. 778) section of this catalog.

Business Analytics

Overview

PROGRAM INFORMATION

The Master of Science in Business Analytics (M.S.B.A.) program provides analytic, computing, business, and communications skills to prepare students to work in various industries. In the M.S.B.A. program, students will learn how to become a crucial translator of functional business needs into analytics processes and analyses. This program combines business knowledge and related data with analytics skills to meet the growing needs of analytics teams supporting businesses. The curriculum consists of 36 credit hours. Courses taken include a business core including accounting, finance, marketing, management, and communications. Also, sample technical courses include artificial intelligence, database, data visualization, and marketing analytics.

Admission standards: The admission standards will be similar to those already established for the current M.S.I.S.O.M. program. In particular, students will need to submit (a) to transcript certifying a bachelor's degree from an accredited college or university with a minimum GPA of 3.0, (b) GMAT or GRE scores, (c) a current resume, and (d) three letters of recommendation. International students will also need to complete a personal interview and submit TOEFL or IELTS scores. Details for admissions are included in the following : <https://warrington.ufl.edu/master-of-science-in-information-systems-and-operations-management/admissions/>.

Graduation requirements: Students will need to complete 36 credits consisting of 22 credits for required courses, an additional 14 credits of electives and satisfaction of all UF Graduate Council policies governing master level graduate degree programs (including but not limited to the requirements for graduate student oversight, a final comprehensive examination, time limitation, and a minimum 3.0 (truncated) GPA (in overall, major, and, where applicable, minor credits) in order to graduate.

All courses are offered in a modular (i.e., half-semester) format, most of which consists of 2 units of credit. The required courses consist of (a) required business core functional courses (such as accounting and marketing) (b) required analytics tools courses (such as systems analysis and design, database, statistics, Python, Business Intelligence), (c) required communications courses (such as writing and communications), and (d) required practicum courses. The elective courses consist of choices for (i) functional analytics courses (such as organizational staffing, human capital management, marketing analytics, corporate finance, and AI & ML for FINTECH, (ii) technical analytics courses (such as Data Mining, Data Visualization, Managerial Quantitative Analysis, and Artificial Intelligence Methods).

For more information, please see our website: <https://warrington.ufl.edu/graduate-current-students/>

Student Learning Outcomes

Business Analytics (MS)

SLO 1 Knowledge

Interpret and explain elements of economics, finance, accounting, marketing, operations management, organizational behavior, business law, information technology, business statistics, and social responsibility.

SLO 2 Skills

Specify and implement a framework for identifying a business problem and develop alternative solutions and a set of evaluation criteria.

SLO 3 Skills

Assess the outcomes of a course of action and make appropriate adjustments.

SLO 4 Skills

Solve intricate problems by applying expanded knowledge of ever evolving technologies, processes, and technical skills.

SLO 5 Skills

Critically assess the impact of business decisions on stakeholders.

SLO 6 Professional Behavior

Write business documents clearly, concisely, and analytically.

SLO 7 Professional Behavior

Speak in groups and in public clearly, concisely, and analytically, with appropriate use of visual aids

Information Systems and Operations Management

Program Information

The Department of Information Systems & Operations Management offers graduate courses leading to the Master of Science in Information Systems and Operations Management (M.S.ISOM); the Ph.D. degree in Business Administration; and a concentration in the Master of Business Administration (M.B.A.) program. Minimum requirements for these degrees are available in the Graduate Degrees (p. 778) section of this catalog.

Master of Science: The M.S.ISOM program provides computing, analytical, and application skills to be used in a business setting. The primary areas of emphasis in the M.S.ISOM program are business intelligence and analytics, information systems/information technology, and supply chain management. Requirements span traditional academic disciplines to produce a multiple-discipline focus. Typical positions for graduates include decision support specialist, information systems specialist, systems analyst, and logistic support specialist.

For a student with a bachelor's degree in business, the M.S.ISOM non-thesis on-campus program consists of a minimum of 36 credit hours, normally requiring a minimum of three semesters of study, not including summer. For students without a bachelor's degree in business, the M.S.ISOM non-thesis on-campus program consists of a minimum of 40

credit hours, normally requiring a minimum of four semesters of study, not including summer.

All M.S.ISOM candidates must complete 26 credits of core coursework:

Code	Title	Credits
GEB 5212	Professional Writing in Business	1-3
GEB 5215	Professional Communication in Business	1-3
ISM 6128	Advanced Business Systems Design and Development I	2
ISM 6129	Advanced Business Systems Design and Development II	2
ISM 6215	Business Database Systems I	2
ISM 6222	Business Telecom Strategy and Applications I	2
ISM 6223	Business Telecom Strategy and Applications II	2
ISM 6257	Intermediate Business Programming	2
ISM 6258	Advanced Business Programming	2
ISM 6485	Electronic Commerce and Logistics	2
MAN 6581	Project Management	2
QMB 6358	Statistical Analysis for Managerial Decisions I	2
QMB 6755	Managerial Quantitative Analysis I	2
QMB 6756	Managerial Quantitative Analysis II	2

All M.S.ISOM candidates must also complete 6 credits of track coursework for the information technology, supply chain management, or business intelligence and analytics track:

Code	Title	Credits
Information Technology Track		
ISM 6216	Business Database Systems II	2
ISM 6236	Business Objects I	2
ISM 6259	Business Programming	2
Supply Chain Management Track		
MAN 6511	Contemporary Issues in Supply Chain Analytics	2
MAN 6528	Principles of Logistics/Transportation Systems	2
MAN 6573	Purchasing and Materials Management	2
Business Intelligence and Analytics Track		
ISM 6216	Business Database Systems II	2
ISM 6405	Business Intelligence	2
ISM 6423	Data Analysis for Decision Support	2

These required courses total 32 credit hours. In addition, each M.S.ISOM student with an undergraduate major or minor in business must take a minimum of 4 additional hours of approved graduate business electives for a total of 36 credit hours required for the M.S.ISOM degree. For students without an undergraduate business degree or minor, instead of graduate business electives, they must complete four of the following core business courses:

Code	Title	Credits
ACG 5005	Financial Accounting	2
ACG 5075	Managerial Accounting	2
ECP 5702	Managerial Economics	2
FIN 5437	Finance I: Asset Valuation, Risk, and Return	2
FIN 5439	Finance II: Capital Structure and Risk Management Issues	2
MAN 5246	Organizational Behavior	2

MAR 5806	Problems and Methods in Marketing Management	2

Bachelor/Master of Science: The Department also offers a combination bachelor's/master's degree program. This program allows qualified students to earn both the bachelor's and master's degrees, using 12 to 16 credit hours of graduate-level courses for both degrees.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/ms-isom/combined/>.

Management Department

Chair: M. Wang

Graduate Coordinator: J. Bono

The Management Department offers graduate work leading to a Ph.D. degree with a major in Business Administration and a concentration in Management; a Master of Business Administration degree with a concentration in Management; a Master of Science degree with a major in Management; and a Master of International Business (M.I.B.). Complete descriptions of the minimum requirements for these degrees are provided in the Graduate Degrees Section (p. 778) of this catalog.

The Department participates in combination bachelor's/master's degree programs for the Master of International Business (M.I.B.) and Master of Science (M.S.) with a major in management. The Master of International Business is open to students pursuing a bachelor's degree in a business discipline or minor in business administration. The M.S. with a major in management program is only open to non-business majors. Contact the graduate coordinator for information.

For more information, please see the program pages below and our website: <http://warrington.ufl.edu/departments/mgt> (<http://warrington.ufl.edu/departments/mgt/>).

Business Administration (Management)

Program Information

The Ph.D. program in business administration in the Department of Management prepares students for careers as faculty members of universities that emphasize research and teaching. The program is designed so that the student will:

1. develop strong competence in the base discipline crucial to the study of organizations and organization processes and
2. follow a field of specialization in organizational behavior or strategy.

Admission requirements for the Ph.D. include:

1. a minimum grade point average of 3.0,
2. a minimum GMAT score of 600, and
3. for nonnative speakers of English, a minimum score of 550 on the TOEFL. Although these are the minimum requirements, most students accepted into the Ph.D. in management have a GPA above 3.5 and a GMAT score above 650.

The research interests of the faculty are quite broad and details of current research interests can be found on the management departments' faculty

page. Students will also have exposure to scholars and faculty members from other universities, and from other departments in the University, who are invited to give workshops in the Department.

Breadth Requirement: It is preferred, but not required that students pursuing the Ph.D. be well versed in the structure and functioning of business organizations and the environment within which they operate. This expectation may be met through undergraduate or master's level work in business administration, but a background in business administration is not required for the Ph.D.

Research Skills Requirement: The general nature of the research requirement has been specified by the Graduate Committee of the Warrington College of Business. Students must take at least six methods and statistical courses, some which are offered in the department and college, and some which are taken through other colleges. The specific program is determined by the Ph.D. Coordinator in conjunction with the student's advisor and will be tailored to fit the student's prior preparation and the specialization that the student chooses.

Major Course Requirements: The program of study for each student will include required management seminars covering topics in both Organizational Behavior and Strategy.

Program Milestones: To maintain acceptable progress in the Ph.D. program, each student is required to present a first year research project in the second year and a second year research project in the third year. Procedures for these qualifying papers, dissertation, and final examination are given in the Requirements for the PhD. section of this catalog.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/phd-mgt> (<http://warrington.ufl.edu/graduate/academics/phd-mgt/>).

International Business

Program Information

The Master of International Business (M.I.B.) is a non-thesis interdisciplinary graduate business program designed to enhance a student's knowledge and understanding of global business trends and problems.

All M.I.B. candidates must complete the 30-credit curriculum, which consists of 14 core credits and 16 elective credits, with a grade point average (major and overall) of 3.0 or higher. The curriculum includes a mandatory global immersion experience and a non-thesis capstone project.

Combination Degree: The Master of International Business offers a combination bachelor's/master's degree option for students pursuing a bachelor's degree in a business discipline or minor in business administration.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/mib> (<http://warrington.ufl.edu/graduate/academics/mib/>).

Degrees Offered

Degrees Offered with a Major in International Business

- Master of International Business
 - without a concentration
 - with a concentration in Human Resources

Student Learning Outcomes

International business (MIB)

SLO 1 Knowledge

Examine the nature of competition and macro-environmental changes, and the effect of these elements to evaluate claims in a specialized industry.

SLO 2 Skills

Identify strategies used for the multinational corporation to examine and make recommendations for future growth and direction.

SLO 3 Skills

Identify cultural and business issues that impact organizations in a foreign environment.

SLO 4 Professional Behavior

Write business documents clearly, concisely, and analytically..

SLO 5 Professional Behavior

Speak in groups and in public clearly, concisely, and analytically, with appropriate use of visual aids.

Management

Program Information

Master of Science degree with a major in Management, non-thesis

option: This M.S. program is designed to afford general business competency to students who possess little or no educational business background. The M.S. with a major in management program is only open to non-business majors. Students must complete the 32-credit curriculum, which consists of 22 core credits and 10 elective credits, with a grade point average (major and overall) of 3.0 or higher.

Combination Degree Program: The M.S. with a major in management offers a combination bachelor's/master's degree option.

For more information, please see our website: <http://warrington.ufl.edu/graduate/academics/msm> (<http://warrington.ufl.edu/graduate/academics/msm/>).

Degrees Offered

Degrees Offered with a Major in Management

Student Learning Outcomes

Management (MS)

SLO 1 Knowledge

Produce a significant business knowledge gain compared to knowledge at program entry.

SLO 2 Skills

Identify the essential elements of core business principles to examine and evaluate problems and to construct and implement solutions in the business environment.

SLO 3 Skills

Identify appropriate analytical models and critical reasoning processes to evaluate evidence, select among alternatives, and generate creative options to advance effective decision making.

SLO 4 Professional Behavior

Write business documents clearly, concisely, and analytically.

SLO 5 Professional Behavior

Speak in groups and in public clearly, concisely, and analytically, with appropriate use of visual aids.

Marketing Department

Chair: R.J. Lutz

Graduate Coordinator: A. Sela

The Marketing Department at the University of Florida is a recognized leader in the discipline of marketing. For over a decade, our faculty has ranked as one of the most productive and influential in the field. Our faculty is known for conducting provocative, cutting-edge research that contributes both to the scientific understanding and practice of marketing. Our Ph.D. program has produced many leading researchers in the discipline. And the David F. Miller Center for Retailing Education and Research is known as one of the foremost centers for developing the science of retailing.

The Marketing Department offers a graduate program leading to the degree of Ph.D. in Business Administration (Marketing). Requirements for the Ph.D. degree are described in the Graduate Degrees (p. 778) section of this catalog.

For more information, please see our website: <http://warrington.ufl.edu/departments/mkt> (<http://warrington.ufl.edu/departments/mkt/>).

Majors

- Business Administration (Marketing - Master's) (p. 484)
- Business Administration (Marketing - Ph.D.) (p. 485)

Assistant Professor

- Hosseininasab, Amin
- Tomaino, Geoffrey Kenneth
- Yin, Mingzhang
- Zou, Tianxin

Eminent Scholar

- Shugan, Steven Mark

Distinguished Professor

- Alba, Joseph W.
- Janiszewski, Christopher Allen

Clinical Professor

- Podsakoff, Philip M.

Affiliated Faculty

- Carrillo, Michael A.
Clinical Assistant Professor
- Hoover, James H.
Clinical Professor

Business Administration (Marketing - Master's)

There are two distinct master's programs in marketing, offered at the Warrington College of Business. Please read this information carefully to determine which one is suitable for you.

The first program is the specialized Master of Science (M.S.) in Business Administration with a concentration in Marketing. The Master of Science Marketing program is intended for students whose objective is to work in the field of marketing in a corporate, non-profit, or entrepreneurial setting. For additional information and to apply for this program, visit the program website: <https://warrington.ufl.edu/master-of-science-in-marketing/>

The second program is the Master of Art (M.A.) in Business Administration with a concentration in Marketing. This program is intended for students whose ultimate goal is to earn a Ph.D. in Marketing at another institution. This program does not train students for a marketing career in the industry. Students admitted to this program take classes at the Ph.D. level and can specialize in either consumer behavior or quantitative research (empirical or analytical). The Marketing Department only accepts M.A. students into this research-oriented program in special cases, based on applicant quality and faculty availability and fit. Applicants must show evidence of a strong interest in academic research in marketing. If you are interested in this program, please contact the Marketing Department PhD Coordinator in the first instance. Do not submit an online application to this program without first contacting the graduate coordinator. Contact information can be found here: <https://warrington.ufl.edu/phd-in-business-administration-marketing/>

Combination Degrees: The College offers combination bachelor's/master's degree options for students pursuing a Bachelor of Science
